Dear Bidder,

Since our first Long Beach Signature® Auction in May 1985, Heritage's Official Auctions have set record-after-record, as well as becoming one of our most enjoyable traditions. Once again, our catalog contains a wonderful array of numismatic rarities, this time from more than 200 consignors. We appreciate their trust in Heritage, and we take seriously our role in assisting them in this critical activity. After all, central to the hobby of numismatics is the passing of numismatic treasures – and knowledge – from one generation to the next. I must also thank our bidders, and note that we are on the cusp of yet another milestone: 450,000 registered bidder-members at HA.com.

I invite you to read about our May Long Beach anchor consignors, who have given you these exciting numismatic rarities to pursue.

The Frank M. Stirling Collection

The late Frank M. Stirling was born in 1905 in Wakefield, Louisiana, and grew up on Wakefield Plantation. His life story reads like a true Renaissance man. The avid outdoorsman grew up keeping Wakefield stocked with firewood, and as an adult he would 'live off the land' for weeks at a time in the Louisiana woods. He started bird watching as a youth and continued into his old age; he regularly concerned the neighbors when they spotted him lying still on his back in the front yard. The athlete played tennis competitively throughout his life, and taught his grandchildren to enjoy the sport. The savant played chess with state champions, playing games in their minds and calling out their moves while driving to New Orleans for meets, and again taught his grandchildren love for the game. The historian started young; as a teen, he paid local youth five cents each for all the arrowheads they could find. In his late teens he buried his cache under a notable tree. Shortly before his death, he took his grandsons out to recover

them, but the landscape had changed so much that his archaeological hoard remains yet to be discovered and interpreted by a new generation (he would reflect that he wished he had saved all those early Buffalo nickels). A professional photographer, he worked for four decades for Esso, but put off his retirement due to concerns about his son-in-law's health. He was an impressive yet modest man, of deep intellect and quiet patience, such that two generations later he is still revered.

After he discovered numismatics, he formed three different collections: patterns, silver dollars, and currency. He preferred enlarging his collection over holding cash or indulging in flashy expenditures. His wonderful collection of patterns, assembled during the middle of the twentieth century, passed to his daughter on his death in 1984. The collection is of modest size, but what collector favorites are included – it is a virtual type set. Such favorites as a Judd-63 1836 Gobrecht dollar, 1870 Standard Silver half dollars, 1871 Longacre's Indian Princess dollar, 1875 Sailor Head twenty cents, 1876 Liberty Seated At The Seashore dollar, 1877 Coronet Liberty dollar, 1878 Morgan dollar, 1879 Washlady dollar, and an 1882 Shield Earring half dollar. The patterns exhibit extraordinary quality; all are high grade, some the finest known. All are low pops, some even unique. Pedigrees like Farouk, Kosoff, Mehl, and Schulman can be found.

A few regular issue gold coins are also included, and they are fine enough to constitute an impressive collection on their own: 1883 quarter eagle PR66 Ultra Cameo NGC; 1882 three dollar PR65 Star Ultra Cameo NGC; 1882 five dollar PR65 Ultra Cameo NGC; 1882 ten dollar PR64 Cameo NGC; and a Wire Rim 1907 High Relief twenty, MS65 NGC. Clearly Mr. Stirling had an exceptional eye, and this is an opportunity to obtain treasures that have been off the market for more years than most numismatists have been alive.

The Joseph C. Thomas Collection, Part Two

Part One of the Joseph C. Thomas Collection anchored our Central States auctions. The consignor is an astute businessman and financier, who, after decades of dedicated collecting, decided to auction rarities from his collection for the first time. Heritage's bidders again have the opportunity to pursue additional coins from this extraordinary \$25 million-plus collection – all sold unreserved.

The Mark Miller Registry Set of Barber Dimes

Dr. Mark P. Miller has consigned a wonderful Registry Set to Long Beach. In PCGS' Barber Dimes Basic Set, Circulation Strikes (1892-1916) category, this is the #3 Current Finest, and the #4 All-Time Finest. It contains many extraordinary coins, with twenty examples having none certified finer, and twenty-five issues in which only one example has been certified finer. Many have pedigrees from famous collections. Dr. Miller was inspired by his friends Dr. Steven Duckor and Stewart Blay to pursue this series, and he worked with Heritage and several other dealers and collectors. Knowing the "right people" with the "right coins" enabled Dr. Miller to complete his set – with varieties – in such extraordinary grades in under five years; this is one of the advantages of the popular Barber series and starting at just the right moment. Unlike many consignors, Dr. Miller did not start collecting in his youth, but he has made up for lost time. He also currently collects Movie Posters and other collectibles.

With so many exciting coins from which to choose, I recommend immediate research in Heritage's free Auction Archives at HA.com. With the detailed full-color images, lot descriptions, and prices realized listed for 1.6 million items from prior numismatic auctions, you cannot find a more useful resource. We want you to use this data to maximize your opportunity to add another treasure to your important collection. Heritage has made it possible to be as informed about the market as active dealers and collectors.

Please stop by the Heritage tables on the Long Beach bourse to say hello, or visit us in the lot viewing room. We have also made it easy to participate successfully through the Interactive Internet™ bidding systems at HA.com before the floor sessions begin, and through HERITAGE Live! at HA.com/Live during the floor sessions. If you are unfamiliar with coin auctions, we invite you to watch the process online; maybe you will catch a million dollar coin being sold. However you choose to bid, good luck!

Sincerely,

Greg Rohan
President

COLONIALS

Rare 1652 Willow Tree Shilling Noe 3-E, R.7, Fine Details

- 1 **1652 Willow Tree Shilling—Scratched—NCS. Fine Details.** 66.8 grains. Crosby 3-E, Noe 3-E, W-200, R.7. After the NE coinage was struck in 1652, the Willow Tree shillings began to be produced in the same year. The earlier varieties of Willow Tree shillings show how unfamiliar the coiner was with the rocker press. Most of the known examples from earlier dies display multiple impressions of the devices from multiple passes through the press in an attempt to more fully strike up the details in the dies. This is examined in detail in Louis Jordan's book *John Hull, The Mint and Economics of Massachusetts Coinage*, page 296:

“... the dramatic nature of these errors, such as the erratic alignment of bead segments and the presence of fully double letters and numbers, suggests the rockers were not sufficiently secure in the press. Possibly, the tolerance of the die shank was not accurate so that there was not a tight fit when it was inserted into the opening in the shaft of the press. It is also possible the pins fastening the die shank to the press did not fully stabilize the die.”

By the time the Noe (and Crosby) 3 dies were used, the operator of the press was more familiar with his craft, and these pieces lack the multiple impressions seen on earlier pieces. The only doubling of details on this coin is seen by a slight trace of a second inner border on the reverse.

Only eight or so pieces are known of this variety, and at one time Stearns owned three examples! The remarkable part of this coin is that it shows full legends on both sides. The centers are predictably lacking details, except for the slightest trace of the tree branch and roots on the right side. The surfaces are deep gray with blue around the margins. Several shallow scratches appear in the centers of both sides, accounting for the “Scratched” designation from NCS. It should be noted that for its Stack's Hain Family appearance, this coin was cataloged as Very Fine. Listed on page 36 of the 2009 Guide Book.

Ex: Stearns Collection (Mayflower Coin Auctions, 12/1966), lot 9; Hain Family Collection (Stack's, 1/2002), lot 11, where it brought \$19,550; Jones Beach Collection (Heritage, 1/2007), lot 704, which realized \$40,250. (#16)

Pleasing Noe-20 1652 Oak Tree Sixpence, XF40

- 2 **1652 Oak Tree Sixpence XF40 NGC.** Crosby 1a-D, Noe-20, W-400, R.6. 31.8 grains. This richly detailed piece shows little actual wear, but a roundish depression appears between the 2 and D and a small flattened area on the other side at the A of MASATHVSETS. The wavy surfaces display mixed tones of silver on this specimen made before the die recutting that resulted in Noe-21 and 22 (the later states are also rare). This is one of the varieties sometimes struck on cut-down shillings, and traces of an undertype are present between 4 and 5 o'clock on the obverse. Listed on page 37 of the 2009 *Guide Book*. (#19)

- 3 **1652 Oak Tree Shilling PCGS Genuine.** IN at bottom. Noe-13.3, W-520, R.7. 73.45 gn. One of the ephemeral Noe subvarieties cataloged by Richard Picker and Walter Breen. The tree is reengraved by the maker from Noe-13, notably on the shrub right of the tree, but does not yet resemble the spiny tree. Parallel diagonal die breaks appear near the TS in MASATHVSETS. The obverse is well centered with full legends, while the reverse is slightly misaligned toward 12 o'clock. The strike is quite sharp in places, but the tree is softly defined, and the darkly toned piece is granular from cleaning. Listed on page 37 of the 2009 *Guide Book*. (#20)

- 4 **1652 Oak Tree Shilling—Improperly Cleaned—NCS. VF Details.** Crosby 1b-D, Noe-7, W-480, R.5. 70.5 gn. IN at Bottom. The slate-gray surfaces are lightly hairlined and the tree is softly brought up, but the legends are bold where permitted by mint clips. A horizontal depression affects the upper curve of the 6. A distinctive variety with several heavy die cracks on the right reverse. Listed on page 37 of the 2009 *Guide Book*. (#20)

XF Noe-4 1652 Oak Tree Shilling

- 5 **1652 Oak Tree Shilling XF40 NGC.** Crosby 3-D, Noe-4, W-460, R.4. IN at Bottom. 70.4 gn. Evenly defined save for the upper and lower thirds of the tree. Richly toned dove-gray and gunmetal-blue. A small edge split at 5 o'clock is of mint origin, as is a slender flan defect through the 6 in the date. Mildly wavy, also as produced. Listed on page 37 of the 2009 *Guide Book*. (#20)

**Exquisite AU53 Noe-36
1652 Pine Tree Threepence**

- 6 **1652 Pine Tree Threepence AU53 PCGS.** Crosby 2a-B, Noe-36, W-640, R.4. 13.9 gn. A splendidly detailed example. The reverse has complete legends, and the tree and denomination are bold. A mint clip takes a portion of the SE in MASATHVSETS off the flan. The deep green-gold surfaces shimmer with luster. Slightly wavy, as made. Listed on page 37 of the 2009 *Guide Book*. Population: 4 in 53, 15 finer (4/09). (#21)

**Choice VF Noe-16 Small Planchet
1652 Pine Tree Shilling**

- 7 **1652 Pine Tree Shilling, Small Planchet VF35 PCGS.** Crosby 21-L, Noe-16, W-835, R.2. 69.4 grains. Struck from a later state of the dies with the two lowest branches on the left fused. A cud has also formed on the rosette below, and another is beginning to form below the N. A bit off center with pale silver-gray accents over the devices, otherwise medium gray in the fields. A problem-free coin for the grade with no obvious impairments. Listed on page 37 of the 2009 *Guide Book*. (#24)

**Thick Planchet (1694) London Elephant Token
MS63 Brown**

- 8 **(1694) London Elephant Token, Thick Planchet MS63 Brown PCGS.** No Diagonals. Breen-186, Hodder 2-B, W-12040. An interesting and enigmatic series, these halfpence are believed to have been struck somewhere between 1672 and 1694. This is the more frequently encountered variant, and the surfaces show attractive brown coloration with a streaky, occasional overlay of darker brown. This is a well struck piece, but the lower obverse shows evidence of having been struck from a worn die, and there is a prominent carbon spot on the lower reverse. Listed on page 44 of the 2009 *Guide Book*. Population: 14 in 63 Brown, 5 finer (4/09). (#55)

- 9 1722 Rosa Americana Penny, UTILE AU58 PCGS. Breen-115, "rare," Martin 2-C, W-1264, rosette after date only. Pale tan, rose, and walnut-brown embrace this unmarked and sharply defined piece. The king's neck has a few tiny planchet striations, as made. Listed on page 40 of the 2009 *Guide Book*. Population: 5 in 58, 12 finer (4/09).
Ex: *Palm Beach Signature (Heritage, 11/2004), lot 5009. (#113)*

Scarce 1723 Rosa Americana Twopence, MS63

- 10 1723 Rosa Americana Twopence MS63 PCGS. Breen-92, Martin 3-D, W-1334, R.2. Stop after REX, no stop after 1723. This high grade olive-brown twopence is fully struck, and there are only a few minor marks or spots. A worthy acquisition in such quality. Listed on page 41 of the 2009 *Guide Book*. Population: 6 in 63, 1 finer (4/09). (#128)
- 11 1722 Hibernia Halfpenny, Type One, Harp Left MS64 Brown PCGS. Nine harpstrings. Martin 4.3-Bc.1, R.4. W-12730. A satiny and unabraded medium brown near-Gem of this distinctive reverse design subtype. A good strike despite minor bluntness on the knees of Hibernia. Conditionally rare in such exemplary quality. Population: 4 in 64 Brown, 1 finer (4/09). (#167)
- 12 1723 Hibernia Halfpenny MS65 Red and Brown PCGS. Breen-155, No pellet before H, Large 3. Martin 4.47-Gb.7, W-13470, R.4. This is a beautifully preserved piece with significant but not overwhelming red color. This sharply struck piece has the smooth surfaces that might be suggested by the assigned grade. Students of the series might note a series of die breaks evident through US of GEORGIUS. Listed on page 43 of the 2009 *Guide Book*. Population: 4 in 65 Red and Brown, 2 finer (4/09). (#181)
- 13 1773 Virginia Halfpenny, Period MS65 Red and Brown NGC. Newman 25-M, W-1580, R.2. Period after S, 7 harpstrings. Bright original copper-red color is especially pervasive on the reverse. The cheek, neck, and obverse field have acquired medium brown toning. A well struck and beautifully preserved Gem, worthy of a high quality Early American type collection. Struck from clashed dies. Listed on page 43 of the 2009 *Guide Book*. (#241)

**Uncirculated P Below Bust
1760 Voce Populi Halfpenny**

- 14 1760 Hibernia-Voce Populi Halfpenny, P Below Bust MS61 Brown PCGS. Ex: Ford. Z-14-L, N-11, W-13960, R.3. 121.9 gn, 27.6 mm, per Ford:V. A smooth and generally glossy ebony-brown high grade representative of this popular Voce Populi subtype. Mildly granular, as made. Listed on page 47 of the 2009 *Guide Book*. Population: 1 in 61 Brown, 1 finer (4/09).
Ex: *George H. Earle Collection, (Henry Chapman, 6/1912), lot 1984; John J. Ford, Jr. Collection, Part V (Stack's, 10/2004), lot 22. (#268)*

**Impressive P Before Face AU55
1760 Voce Populi Halfpenny**

- 15 1760 Hibernia-Voce Populi Halfpenny, P Before Face AU55 PCGS. Z. 15-N, N-12, W-13950, R.2. An impressive walnut-brown Voce Populi that shows only slight friction on the cheek of the portrait and on the chest of Hibernia. No marks are located, and the centering is proper. This design subtype is separately listed on page 47 of the 2009 *Guide Book*. Population: 4 in 55, 2 finer (4/09). (#271)
- 16 1786 Vermont Copper, VERMONTENSIMUM VF25 PCGS. RR-6, Bressett 4-D, W-2020, R.2. This medium brown Landscape copper was struck from axially misaligned dies, such that two-thirds of the obverse is well defined, while the obverse border is softly brought up between 7 and 9 o'clock. The reverse also shows inconsistent sharpness due to the misalignment. The obverse is off-center a few degrees toward 6 o'clock. Softly struck portions show minor planchet flaws. Excellent for the grade from a technical standpoint. Listed on page 68 of the 2009 *Guide Book*. (#545)

**Choice AU VERMONTENSIMUM
1786 Vermont Copper, RR-8**

- 17 1786 Vermont Copper, VERMONTENSIMUM AU55 PCGS. RR-8, Bressett 6-E, W-2030, R.4. The Landscape type was only coined for portions of two years, 1785 and 1786, but is known with three different (and increasingly verbose) Latin translations of VERMONT. The 1785 varieties use VERMONTS or VERMONTIS, and the 1786 die marriages display the legend as VERMONTENSIMUM. The type was abandoned altogether later in 1786 for the more familiar Bust obverse design. A golden-brown late dies Choice AU example with full obverse legends despite slight misalignment of the obverse toward 3 o'clock. Uncommonly bereft of abrasions. Listed on page 68 of the 2009 *Guide Book*. Population: 4 in 55, 6 finer (4/09). (#545)

**Famous Baby Head 1786 Vermont Copper
VF30, RR-9, Bressett 7-F**

- 18 1786 Vermont Copper, Baby Head VF30 NGC.** RR-9, Bressett 7-F, W-2040, R.3. A dark brown example that has a couple of planchet flaws, one the baby head's shoulder and the other at 1 o'clock on the reverse. This distinctive and popular type is listed on page 68 of the 2009 *Guide Book*. Most survivors grade Fine or less. NGC has certified only two examples, both as VF (4/09). (#548)

**Choice AU 1785 Nova Constellatio Copper
Scarce Crosby 1-B, Blunt Rays**

- 19 1785 Nova Constellatio Copper, Blunt Rays AU55 PCGS.** Crosby 1-B, W-1880, R.4. Large US reverse. This scarce die marriage reuses an obverse die from 1783. Struck after Crosby 3-B, given the die break on the wreath above the date. A chocolate-brown example that has light wear and only a single thin mark near the 1 in the date. Listed on page 52 of the 2009 *Guide Book*. Population: 4 in 55, 2 finer (4/09). (#810)

- 20 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS.** Newman 7-T, W-6735, R.4. Dark mahogany-brown with a nice two-toned appearance created by lighter high points. The surfaces are only moderately granular. The planchet is nicer than usual, with none of the laminations or voids often seen on Fugios. A thin die crack is seen near 1 o'clock on the obverse, extending from the rim toward the tip of the sundial. Listed on page 83 of the 2009 *Guide Book*.
Ex: *New York Signature* (Heritage, 7/2002), lot 5776; *FUN Signature* (Heritage, 1/2006), lot 498. (#883)

- 21 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS.** Newman 12-M, W-6800, R.3. A bold medium brown example with no relevant marks, other than a few darkly toned planchet flaws. Obviously struck from misaligned dies, with strong definition on the left portions of each side and weak details on the right borders. This piece is struck from deeply clashed dies, with several sundial numerals and letters from MIND YOUR BUSINESS legible on the reverse. Listed on page 83 of the 2009 *Guide Book*.
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 583. (#883)

**Copper 1778-1779 Rhode Island Ship Token
No Wreath, MS62 Brown**

- 22 1778-1779 Rhode Island Ship Token, No Wreath, Copper MS62 Brown PCGS.** Breen-1139, W-1730, R.3. Mostly medium brown, but there are glimpses of lighter tan toning within the ship's rigging. A few faded marks near ADMIRAL, otherwise impressively unabraded. Listed on page 48 of the 2009 *Guide Book*. Population: 4 in 62 Brown, 6 finer (4/09). (#579)

**Luminous MS62 Brown 1787 Immunis Columbia Piece
Crosby Plate VIII-8, W-5680**

- 23 1787 Immunis Columbia Piece, Eagle Reverse MS62 Brown NGC.** Crosby Pl. VIII, 8, Breen-1137, W-5680. Produced as a pattern coinage proposal for the Confederation (and believed a prototype for federal coinage), the Immune or Immunis Columbia coppers of 1787 were more carefully produced than the 1786-dated pieces. Breen theorizes that the number of survivors points to a considerable emission, perhaps in the thousands, and possibly in the tens of thousands. Like most 1787 pieces, this piece has the date partially off the flan, but the bold strike, smooth planchet, and bold luster place it in the top end of surviving examples. Listed on page 53 of the 2009 *Guide Book*. (#841)

**Lovely (1792-94) Kentucky Token
LANCASTER Edge, MS64 Red**

- 24 (1792-94) Kentucky Token, LANCASTER Edge MS64 Red PCGS.** D&H-Lancashire-Lancaster-59, Breen-1156, W-8810, R.5. A beautiful dusky orange-gold near-Gem that has a few dashes of brown within the starry pyramid. No abrasions are present, although a thin, faint diagonal streak (as made) crosses JUST. Satiny and high grade for this widely collected 18th century Conder token, made in England but pursued on both sides of the Atlantic. Listed on page 71 of the 2009 *Guide Book*, and in the 1990 Dalton and Hamer reprint also, interestingly, on page 71. Population: 34 in 64 Red, 7 finer (4/09).(#625)

- 25 1794 Talbot, Allum & Lee Cent/1793 Stork Halfpenny Mule MS63 Brown NGC.** Dalton & Hamer 52a, Rulau-NY-884, W-8670, R.5. PAYABLE IN LONDON edge. A beautiful example with prooflike chocolate-brown surfaces. A good strike despite minor blending on the stork's breast feathers. A possible fingerprint on the right obverse field, otherwise unassailable. Struck by the maker in the late 18th century as a concoction to sell to Conder token collectors.(#973)

**MS63 Brown Mule of
1794 Talbot, Allum & Lee Cent
1793 Birmingham Halfpenny Reverse**

- 26 1794 Talbot, Allum & Lee Cent/1793 Birmingham Halfpenny Mule MS63 Brown NGC.** Dalton & Hamer Warwick 54, Rulau-NY-883, W-8665, High R.4. A handsome medium brown representative. Boldly struck, although the boy's hair lacks absolute detail. The right obverse field has minute planchet flakes, as made. One of several elusive mulings known for the Talbot, Allum & Lee cent tokens, struck by Peter Kempson's mint to capitalize on the crest of copper "Conder" collecting in England during the late 1700s.(#982)

- 27 Undated Washington Success Medal, Large Size, Plain Edge AU50 PCGS.** Baker-265A, W-10905, R.7. With die break at Washington's nose. This luminous piece is golden-brown and mahogany with light rub across the high points. Listed on page 80 of the 2009 *Guide Book*.(#779)

HALF CENTS

AU Details 1793 Half Cent, C-2

- 28 1793—Corroded—NCS. AU Details. C-2, B-2, R.4.** This example has excellent design definition, but the surfaces are darkly toned and exhibit granularity, particularly on the obverse. Nonetheless difficult to acquire with such little evidence of circulation wear. The sole year of the Liberty Cap Bust Left type. EAC 10.(#1000)

Impressive Near-Mint C-1a 1794 Half Cent

- 29 1794 AU58 NGC. C-1a, B-1a, R.3.** Presumably the more available Large Letters Edge variety, although the encapsulation prevents confirmation. This partly lustrous piece has alternating tan-gold and medium brown toning. This example has a small spot at 8 o'clock and a few faint scattered marks near the rims. EAC 25. Ex: *San Francisco ANA Signature (Heritage, 7/2005)*, lot 5065. (#1003)

Important 1796 C-1 No Pole Half Cent, Fine Details

- 30 **1796 No Pole—Scratched, Burnished—NCS. Fine Details.** C-1, B-1, R.6. Still Rarity-6 after all these years, there are approximately 20 known examples of the 1796 No Pole rarity in existence. The grade distribution is interesting, as the 20 or so survivors include four pieces that are more or less Mint State, followed by five or six middle grade Fine to VF examples, and eight to 10 lower grade pieces. The following abbreviated census is certainly incomplete but it provides an idea of known coins: 1. MS65 Red and Brown Eliasberg, lot 407; 2. MS64 Brown Whitney, lot 1705; 3. MS62 Brown McGuigan Collection; 4. MS60 or finer Missouri Cabinet; 5. XF Details Corroded Heritage (5/2007), lot 56; 6. VF Details Robison, lot 313; 7. Fine 15 Norweb, lot 22; 8. Fine 15 Heritage (2/2000), lot 5281; 9. Fine Details Lester Merkin (3/1969), lot 596; 10. VG, porous 1997 ANA, lot 8087; 11. VG Davis Graves, lot 87; 12. VG. Dr. Charles Ruby, Part I, lot 202; 13. VG 1976 ANA, lot 142; 14. James A. Stack (Stack's, 11/1989), lot 31; 15. AG Bowers and Merena (9/1992), lot 1022; 16. Damaged Dr. Charles Ruby, Part I, lot 203.

In addition to those 16 pieces, there are eight other auction records that are unmatched to the above coins, and **the present piece is an entirely new specimen that has never previously been auctioned**, to the best of our knowledge. In fact, it has an accompanying brown envelope that indicates a grade of Fine, and a purchase price of \$250. The price dates the transaction to sometime in the 1930s.

The present specimen has been off the market for several decades, and it is clearly a new example to the present generation of collectors. What an exciting opportunity. We highly recommend that serious bidders give higher consideration to the coin than to the adjectives on the holder. The surfaces are deeply toned, about the color of a black olive. Most of the scratches are found at the center of the reverse, with the obverse having an exceptionally clean appearance. There is a single old scratch across the hair curls, but it is so well blended with the surrounding surfaces that most collectors will give it little attention. The surfaces are slightly glossy, a result of minor surface manipulation that NCS describes as burnishing. This piece probably ranks about 10th finest of those we know of. EAC 8.

From The Collection of a Dallas Gentleman. (#1030)

Scarce 1796 C-2 With Pole Half Cent, VF Details

- 31 1796 With Pole—Rim Damage—NCS. VF Details. C-2, B-2, R.4. With an accompanying envelope indicating that this coin once traded as a VF for \$350. Smooth dark brown surfaces are slightly lighter on the devices. A few trivial marks are noted on each side, with minor rim bruises that are mostly inconsequential. This piece is quite pleasing overall, and far finer than the usual example that appears in the numismatic arena. The new *Copper Quotes* guide gives a value of \$40,000 for Fine 12 with average surfaces. A number of higher-grade With Pole pieces exist, perhaps a dozen or so examples in AU or better. A similar number of VF and XF coins follow the higher-grade coins in the census. EAC 10. *From The Collection of a Dallas Gentleman.* (#1027)

Post-Terminal 1797 C-1 Half Cent, MS60
Later State Than Listed in Breen or Manley

- 32 1797 1 Above 1, Plain Edge MS60 NGC. C-1, B-1, R.1. In its terminal die state, the 1797 1 above 1 half cent ranks as one of the toughest coins in the entire U.S. coinage series to grade. This example has an accompanying envelope that incorrectly grades the coin VF with a price of \$15.00. An additional notation on the envelope states "This piece has all the cracks listed by Gilbert." It also has all the cracks listed by Breen and apparently some that Breen was unaware of. The same can be said for Ron Manley's *Die State Book*. **This example is later than any die state described by either Breen or Manley.**

The obverse has two heavy bulges at the top of the cap and right, with gentle bulges in the left and right obverse fields. The bulges cause severe reverse weakness at ED ST and ICA, with the surfaces in those areas showing myriad tiny planchet marks. Faint traces of undertype are evident between UNITED and the border.

Numerous obverse die cracks are evident: 1. From the tip of the pole to the border. 2. From the rim through the right side of the B to the hair, continuing to the lowest hair curls. 3. A branch of crack 2 horizontally to the temple and field in front of Liberty's forehead. 4. A heavy crack from the nose tip to the border at 4 o'clock. 5. A branch of crack 4 down to the left to the throat and across the lower part of the bust. 6. A heavy crack from crack 3 down across the cheek and field to join crack 5. 7. A crack through Y to the forehead. 8. A crack from the border at 2 o'clock toward Liberty's eye. 9. A short horizontal crack joins cracks 4 and 5. 10. A crack between the lowest two locks into the field as described by Manley is actually a continuation of crack 2. 11. Unlisted by either Breen or Manley is a prominent branch of crack 2 to the left and the Liberty cap. This last crack is visible in Manley's State 5.0 plate but undescribed.

Both sides have exceptional medium chocolate surfaces with faint olive overtones. Frosty luster is evident in the form of a light cartwheel appearance. The surfaces have numerous tiny planchet marks in the weakly struck areas, a result of its extremely late die state. EAC 55. *From The Collection of a Dallas Gentleman.* (#1042)

- 33 **1802/0 Reverse of 1802 Good 6 NGC.** C-2, B-2, R.3. Originally purchased as Fine for \$10. This piece has smooth dark brown surfaces, slightly lighter on the devices, with traces of verdigris but no other imperfections. It is an excellent piece with fully outlined and visible central reverse details. EAC 6.
From The Collection of a Dallas Gentleman. (#1057)

- 34 **1805 Small 5, No Stems AU58 PCGS.** C-1, B-1, R.1. Manley Die State 2.0. A lovely chocolate-brown Borderline Uncirculated early copper type coin that has smooth surfaces and substantial luster. Softness is limited to the leaves right of the bow. EAC 50. (#1081)

Fine C-3 1805 Half Cent, Small 5, Stems

- 35 **1805 Small 5, Stems Fine 12 PCGS.** C-3, B-3, R.4. Manley Die State 2.0. A heavy die bulge appears in the right obverse field. This is the usually seen die variety of the Small 5, Stems, although it is hardly common. Only about 100 examples are known in all grades, usually well worn and corroded or otherwise damaged. Despite some old faint scratches and selected strike softness on HALF CENT, this piece has a pleasing medium brown appearance. In a green label holder. EAC 8. (#1087)

- 36 **1805 Large 5, Stems AU58 PCGS. CAC.** C-4, B-4, R.2. Manley Die State 2.0. Light golden-brown with slightly deeper steel-gray on the fields near the shoulder curls and denomination. Sharply impressed and satiny with clean surfaces. EAC 45. Population: 3 in 58, 4 finer (4/09). (#1090)

- 37 **1809/6 AU58 NGC.** C-5, B-5, R.1. A delightful piece with glossy chocolate surfaces, slightly darker on the reverse. The obverse has a small deep steel toning splash. The few minor blemishes on each side are fully grade consistent. EAC 50.
From The Collection of a Dallas Gentleman. (#1126)

Scarce 1811 Half Cent, C-1, VF35

- 38 **1811 VF35 PCGS. CAC.** C-1, B-1, Low R.4. The dusky-brown surfaces are free of significant marks. The design motifs are well centered on the planchet and crisply reproduced overall, even if most of the obverse stars are flat. This is an acceptable Choice VF representative of this scarce, low mintage half cent delivery. EAC 25. Population: 9 in 35, 30 finer (4/09). (#1135)

- 39 **1826 MS64 Brown NGC.** C-1, B-1, R.1. This amazing piece is boldly detailed with incredible medium brown surfaces and considerable original orange mint color. Both sides have satiny luster and exceptional eye appeal. EAC 60.
From The Collection of a Dallas Gentleman. (#1144)

**Lovely 1828 13 Stars C-3 Half Cent
MS63 Red and Brown**

- 40 **1828 13 Stars MS63 Red and Brown NGC.** C-3, B-2, R.1. A pristine Mint State piece with considerable original orange mint color, about 40% remaining, and somewhat subdued on the reverse. There are few spots on either side, and the overall eye appeal is exceptional. This gorgeous piece is suitable for the specialist or type collector. EAC 63.
From The Collection of a Dallas Gentleman. (#1148)

- 41 **1833 MS64 Brown PCGS.** C-1, B-1, R.1. Lone die pair for the year. Each side has rich rosewood color with a touch of violet. Central definition is excellent and the surfaces are smooth. EAC 58. (#1162)

- 42 **1835 MS64 Red and Brown NGC.** C-1, B-1, R.1. Fully lustrous cartwheel surfaces combine an attractive blend of original orange mint luster. Minor clash marks are visible on each side, but this early die state piece has no evidence of the reverse die crack that eventually appears. EAC 63.
From The Collection of a Dallas Gentleman. (#1169)

- 43 **1853 MS65 Brown NGC.** C-1, B-1, R.1. Crisply detailed with subtle blue and violet overtones that enliven the chocolate-brown surfaces. Carefully preserved with winning eye appeal. EAC 60. (#1227)

- 44 **1854 MS64 Red PCGS.** C-1, B-1, R.1. Generally rich copper-orange on the obverse with mild to moderate spotting. The reverse has paler color at the rims. Housed in a prior-generation holder. EAC 64. PCGS has graded only four finer Red examples (4/09). (#1232)

- 45 **1855 MS63 Red NGC.** C-1, B-1, R.1. While a large number of Red Mint State 1855 half cents survive, nearly all are plagued with numerous unsightly carbon spots. The present piece has a noticeable reverse spot between the F and A, but no other major spots on either side. The surfaces are fully brilliant with frosty cartwheel luster. EAC 64.
From The Collection of a Dallas Gentleman. (#1235)

- 46 **1857 MS63 Red and Brown NGC.** C-1, B-1, R.2. A splendid Mint State piece, with an envelope that stated a grade of "EF" and a price of \$2.50. Both sides of this fully lustrous example have considerable bright orange luster blended with pleasing blue-brown toning. The final-year half cents are rarely encountered with as much original color as on this piece. EAC 64.
From The Collection of a Dallas Gentleman. (#1240)

PROOF BRAIDED HAIR HALF CENTS

Splendid 1843 B-2 Half Cent First Restrike, PR64 Brown

- 47 **1843 First Restrike PR64 Brown NGC.** SR-5, B-2, R.6. 75.6 grains. The doubled T in CENT identifies this as a First Restrike half cent. This splendid proof has an accompanying envelope that identifies it as G.2, at a price of \$75. Bold design details are evident on both sides, with reflective, lightly mirrored fields and gorgeous turquoise-green toning. This proof meets the criteria for Walter Breen's Series I Restrikes: "They tone light iridescent brown, blue, or blue-green." The current population of the 1843 First Restrike proofs is between 20 and 30 coins. Breen discussed 20 pieces in his 1983 *Half Cent Encyclopedia*.

The half cents and large cents consigned to the present sale include 20 pieces with accompanying brown envelopes that identify the date, attribution, grade, and price. As best we are able to determine, the prices suggest that these coins originally traded hands in the 1930s. EAC PR60.

From The Collection of a Dallas Gentleman. (#1269)

1852 B-2 First Restrike Half Cent, PR64 Brown

- 48 **1852 First Restrike, Small Berries PR64 Brown NGC.** B-2, R.5. First Restrike. The doubled T in CENT identifies this First Restrike. An early Series I strike, 80.2 grains. This is the so-called "common" 1852 half cent variety, clearly the most plentiful of all the proof-only dates and varieties, but only 60 to 70 examples exist. Originally purchased for \$65, according to the accompanying envelope. The design elements are sharp and the surfaces are mildly reflective, with deep orange and pale blue intermingled on both sides. EAC PR63. *From The Collection of a Dallas Gentleman. (#1317)*

Choice Proof Brown 1857 Half Cent, B-2

- 49 **1857 PR64 Brown NGC.** O-111b, R.5. C-1, B-2, R.4. Doubling on the ENT in CENT confirms this series-ending proof variety. The obverse is brick-red throughout, while the reverse alternates between powder-blue and lime-green. A fully struck near-Gem that has flashy fields and excellent preservation. EAC 60.(#1332)

LARGE CENTS

Famous 1793 Chain AMERICA Large Cent, Sheldon-3

- 50 **1793 Chain AMERICA PCGS Genuine.** S-3, B-4, Low R.3. A sharp example that has complete legends and substantial hair detail. The obverse is evenly porous, and the reverse is evenly granular. The obverse has been tooled, and portions (especially near 5 o'clock) are faintly pincratched from verdigris removal. However, Chain cents with the details of the present coin are always in demand. EAC 4.(#1341)

S-8 1793 Wreath Cent, VF25 Vine and Bars Edge

- 51 **1793 Wreath Cent, Vine and Bars VF25 NGC.** S-8, B-13, R.3. Readily attributed by the diagonal die break across the central reverse. All major design details are present on this dark brown Wreath cent. The reverse is unabraded, while the obverse has a couple of old, slender marks on the neck and a thin planchet defect on the cheek. EAC 12.(#1347)

**Desirable 1793 Lettered Edge
Large Cent, S-11c, AU50**

- 52 **1793 Wreath, Lettered Edge AU50 NGC.** S-11c, B-16c, Low R.3. The attribution is according to the NGC holder, although the edge is not visible in this older generation slab. The three subvarieties of Sheldon-11 have a Vine and Bars Edge (S-11a), a Lettered Edge with two leaves (S-11b), and a Lettered Edge with a single leaf (S-11c). Both sides have intermingled tan and dark steel toning with a few minor marks. A couple of stray contacts on the lower hair strands and in the right obverse field should aid in tracking the provenance of this desirable example. EAC 40.(#1350)

**Scarce 1793 Liberty Cap Cent
S-13, Fine Details**

- 53 **1793 Liberty Cap—Corroded—NCS. Fine Details.** S-13, B-20, Low R.4. A nicely detailed deep brown example with moderately granular surfaces and areas of obverse pitting. The portrait has been wiped to create a smoother appearance. First-year Liberty Cap cents are conditionally rare and coveted by large cent specialists. EAC 7.(#1359)

- 54 **1794 Head of 1794 PCGS Genuine.** S-31, B-13, R.1. Caramel-brown color overall with light to moderate wear. Scattered abrasions and significant environmental damage have had surprisingly little impact on the eye appeal. EAC 10.(#901374)

**Borderline Uncirculated Lettered Edge
1795 Cent, Sheldon-74**

- 55 **1795 Lettered Edge AU58 PCGS.** S-74, B-2, Low R.4. A boldly struck near-Mint Liberty Cap cent with golden-brown fields and a medium brown portrait. Uncommonly free from abrasions or verdigris. The reverse has a few slender flan flaws, as produced, and the obverse also has a single narrow flaw down from 2 o'clock. Certified in a green label holder. EAC 45.(#1377)

1795 Plain Edge Cent, S-76b, XF40

- 56 **1795 Plain Edge XF40 PCGS. CAC.** S-76b, B-4b, R.1. The top of the 5 in the date touches the bust on this variety, and the edge is plain. A couple of striking irregularities are noted along the rim, including one in the denticles on the lower obverse between 5 and 6 o'clock, and another on the reverse rim near 2 o'clock. The surfaces are evenly worn and essentially unabraded for the grade, with olive-brown toning across each side. The devices are well produced and nicely centered on the planchet. EAC 30.(#1380)

Impressive 1795 S-78 Cent, MS63 Brown

- 57 **1795 Plain Edge MS63 Brown PCGS. CAC. S-78, B-8, R.1.** Housed in a early PCGS holder with white foam insert. The S-76B and S-78 are the two most plentiful 1795 large cent varieties, and the only two plain edge pieces that are obtainable without difficulty in Mint State grades. This pleasing olive and light tan piece has a few dull toning splashes on each side that should serve for identification. The surfaces have the usual tiny planchet marks, along with other postmint abrasions that are insignificant. Typical of the variety, the peripheral details are weak and the central design elements are sharper. EAC 55. Population: 14 in 63, 8 finer (4/09).(#1380)
-

Near-Census 1796 S-109 Cent, VF30

- 58 **1796 Draped Bust, Reverse of 1794 VF30 NGC. S-109, B-15, High R.3.** The original envelope identifies this as G. 6 [Gilbert-6], graded XF and priced at \$50. Smooth surfaces exhibit nicely blended medium brown and steel toning with faint roughness on the reverse, typical of the S-109 die marriage. A few tiny blemishes are visible on the obverse, but the overall quality is far finer than most 1796 Draped Bust cents. This piece is tied for 10th finest out of a total surviving population of about 300 coins, although its previous pedigree remains unknown. EAC 25.
From The Collection of a Dallas Gentleman. (#1404)
-

Pleasing 1797 S-140 Cent, AU55

- 59 **1797 Reverse of 1797, Stems AU55 NGC. S-140, B-22, R.1.** Although it is a common die marriage, the S-140 has a surprisingly low census, with only one or two Mint State pieces and three AU coins. Originally purchased as a VF for \$30. The obverse has numerous tiny abrasions on the deep steel surfaces, while the reverse is much cleaner. This desirable early cent will serve the specialist or type collector. EAC 35.
From The Collection of a Dallas Gentleman. (#1422)
- 60 **1798 Second Hair Style XF40 PCGS. CAC. S-174, B-35, R.2.** Heavy clash marks on the lower reverse aid the attribution, as do die lumps beneath the hair ribbon. This chocolate-brown Draped Bust type coin exhibits a wealth of detail, and the occasional minor mark little affects the eye appeal. EAC 30. (#1434)
-

Challenging AU 1798 Cent, S-185 Small 8, Second Hair Style

- 61 **1798 Second Hair Style AU50 NGC. S-185, B-46, R.2.** Small 8, Reverse of 1797. Chocolate-brown in design recesses, while the portrait and open fields are medium brown. A tiny edge nick is noted at 7 o'clock and a small planchet void in the hair, but the piece is quite pleasing overall. 1798 cents are common in worn-out or corroded condition but are difficult to secure with noticeable remaining luster. EAC 35. (#1434)
-

**Bold Near-Mint 1798 Cent
Second Hair Style, S-167**

- 62 **1798 Second Hair Style AU58 PCGS. S-167, B-33, R.1.** A slender die break through the E in UNITED helps attribute this splendidly detailed Draped Bust cent. Luster shimmers across the smooth surfaces, which are approximately evenly divided between golden-brown and dark brown. OF and the bust tip are softly brought up, but the remainder of the design is crisply struck. EAC 45. Population: 8 in 58, 0 finer (4/09).(#1434)

- 63 **1799—Corroded—ICG. AG3 Details. S-189, B-3, R.2.** The 1799 is the rarest date in the large cent series, and examples with clear dates are always in demand. The rim extends into the base of the date, and only a few letters in LIBERTY are partly present. The right reverse is pitted, and the coin has been harshly cleaned to remove verdigris, causing unnatural cherry-red color. EAC 2.(#1443)

Impressive 1799 S-189 Cent, VF25

- 64 **1799 VF25 NGC. S-189, B-3, R.2.** The number of 1799 large cents available at any one time in the marketplace is limited, while the number of collectors seeking those coins continues to expand. As a result, demand always seems to exceed supply, with each new collector driving prices to even higher levels. Every so often, a specimen appears that has remained off the market for many years or even decades. That is the case with this example, acquired many years ago as a VF for \$200, according to the accompanying envelope. Based on price records in the *Guide Book* and its predecessor, the *Standard Catalog*, this piece was probably purchased sometime in the 1930s, or possibly the early 1940s.

Showing the sharpness of a strong VF coin, the obverse has smooth surfaces with a few tiny abrasions, but overall an attractive piece. The reverse has slightly less sharpness, with faint traces of corrosion and roughness. An outstanding example, this VF25 NGC piece is virtually the equal of the other similar piece in the present sale. EAC 12.

From The Collection of a Dallas Gentleman. (#1443)

**The Edward Maris 1799 Normal Date Cent
VF, Tied for Sixth Finest Known**

- 65 1799 VF25 Uncertified.** S-189, B-3, R.2. The 1799 large cents, including two overdate varieties and one normal date variety, are the most important coins in the entire large cent series, with 1793 and 1804 following close behind. According to Del Bland, this specimen carries a grade of VF25, and it is tied for the sixth position in his Condition Census, with at least eight other pieces that also grade VF25.

The majority of the 904,585 large cents struck in 1799 were actually dated 1798, while the exact mintage of pieces bearing the 1799 date is unknown. However, that original production was undoubtedly extremely small, as few survive today, and most survivors are in low grades, being placed in collections when more common dates, such as 1798, were discarded. Today it is estimated that only 900 to 1,000 cents bearing the 1799 date still exist. The current population implies an original mintage of 20,000 to 30,000 coins. Throughout the second half of the 19th century, several stories attempted to explain the rarity. One of those stories suggested that the coins went from the Mint to Africa, being traded for female natives.

Both sides of this remarkable cent have mottled steel, tan, and maroon color with some weakness at the center of the reverse. Traces of deep green corrosion are barely visible. This important cent does have a few minor abrasions, but none of any significance. The surfaces have acquired a hard, glossy appearance over a long time interval. Highly unusual among the 1799 cents, the date and LIBERTY are both complete and full. The obverse is extremely sharp, and graded separately has the details of XF. The reverse is a little blunt, with the sharpness of VF20. Overall, although the coin is graded VF25 by Del Bland and listed as such in Walter Breen's *Large Cent Encyclopedia*, we prefer a conservative grade of VF20. Breen suggested that the 1799 Normal Date cents might have actually been struck in 1800, on the basis of a comparison of planchet quality with the cents dated 1800. EAC 20.

Ex: Dr. Edward Maris (H.P. Smith, 6/1886), lot 276; later, Federal Brand Enterprises (1/1963), lot 51A; later, Stuart A. Levine (4/3/1992); John B. MacDonald (1/1997); Robert C. Clark (Bowers and Merena, 8/2000), lot 285. (#1443)

Outstanding 1800 S-212 Cent, AU53

- 66 1800 AU53 NGC.** S-212, B-20, R.3. Among the top dozen or so examples of the variety, this piece was originally graded VF and acquired as "D.146" for \$10. Several of the early cents in the Dallas Gentleman's Collection are in old envelopes with attribution by Doughty number, perhaps a first for this cataloger. The S-212 variety is sometimes called the "Chips" variety, named for the die chips at the base of the 00. The appearance is similar to, and sometimes confused with, S-197, which is known as the "Q" variety. This piece has lightly abraded surfaces with deep steel and olive toning. EAC 35.

From The Collection of a Dallas Gentleman. (#1449)

Choice AU 1800 Cent, 'Q' Variety, S-197

- 67 1800 AU55 NGC.** S-197, B-12, R.1. The "Q" variety, named for the die crack near the first 0 in the date. A tornado-shaped die break between the IB in LIBERTY is equally distinctive. This medium brown cent has ample shimmery luster on the devices and legends and is smooth save for a few darker and slightly granular areas on the right reverse. EAC 40. (#1449)

Elusive 1804 Cent, S-266b, VF Details

- 68 1804—Corroded—NCS.** VF Details. S-266b, B-1, R.2. The envelope that accompanies this piece is marked VF with a price of \$125 and carries the additional notation: "D.198 - R8. Rarest state. Obverse die broken." The obverse has numerous fine tooling lines that are blended with the surrounding surface. The reverse is lightly corroded. The surfaces have desirable medium brown toning with darker steel and maroon on the reverse. EAC 12.

From The Collection of a Dallas Gentleman. (#1504)

Borderline Uncirculated 1805 Cent
Ex: Husak, S-267

- 69 **1805 AU58 PCGS.** Ex: Husak Collection. S-267, B-1, R.1. Generally golden-brown, with steel-gray toning on the portrait and across portions of the reverse field. A minimally abraded example that has a solitary tiny spot near 8 o'clock on the obverse. Formerly in one of the finest large cent collections sold in recent decades. EAC 45. Ex: *Walter Husak Collection (Heritage, 2/2008)*, lot 2272, which realized \$5,750. (#1510)

- 70 **1808—Environmental Damage—NCS. XF Details.** S-278, B-2, R.2. The surfaces of this pleasing cent have light tan color with splashes of deep maroon toning on the reverse, explaining the NCS environmental damage description. Otherwise, it is an excellent example for the grade. In an intermediate die state, this piece has obverse and reverse flowlines joining stars and letters to the border. EAC 25. From *The Collection of a Dallas Gentleman.* (#1543)

Undisturbed MS62 Brown
1812 Large Date Cent, S-290

- 71 **1812 Small Date MS62 Brown PCGS.** CAC. S-290, B-2, R.1. Incorrectly designated as a Large Date variety by PCGS. Golden-brown competes for territory with medium brown, although a slender area of charcoal-gray is noted at 6:30. A remarkably smooth representative of this conditionally challenging type. Struck from long-in-use dies with flowlined fields and minimal dentil detail. EAC 55. (#1561)

Wonderful 1812 Small Date Cent
S-290, MS62 Brown

- 72 **1812 Small Date MS62 Brown NGC.** S-290, B-2, R.1. The die crumbling above STATES is diagnostic. Blue and violet overtones enliven deep brown surfaces. Unabraded and unusually well-defined for a Classic Head cent, though a whisper of granularity precludes a finer designation. EAC 60. Census: 9 in 62 Brown, 14 finer (4/09). (#1561)

- 73 **1813—Corroded—NCS. AU Details.** S-293, B-1, R.2. Trivial surface corrosion is visible with a glass on this outwardly attractive 1813 cent. The strike is excellent and the overall appearance is much finer than many we have seen. Faint traces of subdued orange appear in some protected areas on the reverse. EAC 30. From *The Collection of a Dallas Gentleman.* (#1570)

- 74 **1814 Plain 4—Improperly Cleaned—NCS. XF Details.** S-295, B-2, R.1. We see nothing on this piece that suggests it is improperly cleaned, with the exception of a tiny light orange area in the upper hair curls. There are no apparent hairlines or other unsightly blemishes. Both sides have pale green-brown toning with faded tan luster. EAC 35. From *The Collection of a Dallas Gentleman.* (#1576)

- 75 **1819 Small Date MS63 Brown NGC.** N-8, R.1. Hints of original red mint color remain in the guarded areas close to the devices on each side, while the surfaces carry fully lustrous olive toning. A few small carbon flecks can be seen on the reverse of this attractive cent. About a dozen Mint State examples of this variety are known, followed by several AU pieces. EAC 55. From *The Collection of a Dallas Gentleman.* (#1606)

Significant Near-Mint N-2 1821 Cent

- 76 **1821 AU58 PCGS.** N-2, R.1. Only two die varieties are known for this scarce date, which failed to participate in the Randall Hoard. Thus, Uncirculated examples are rare, and even near-Mint pieces are hard to acquire. This is a satiny golden-brown representative with delicate rose-red and aquamarine undertones. No marks are detected, ample luster shimmers, and the eye appeal is exceptional for the grade. EAC 55. (#1621)

Lustrous 1828 N-10 Small Date Cent, MS62 Brown

- 77 **1828 Small Wide Date MS62 Brown NGC.** N-10, R.1. Although the variety is called R.1, the 1828 N-10 cent is an important *Guide Book* variety that is known only through a single die combination. Mostly olive and blue toning accompanies the lustrous and frosty surfaces, with traces of orange mint color on each side. This is an exceptional example that will garner considerable bidding activity. EAC 55.
From The Collection of a Dallas Gentleman. (#1657)

- 78 **1829 Large Letters AU58 NGC.** N-2, R.2. A rather plentiful die combination, although market experience suggests that all 1829 large cents are elusive in higher grades. This example, for instance, is probably among the two dozen finest 1829 N-2 cents. According to current Census records, there are only about 50 examples of all varieties that grade strict Mint State or finer. The present piece has pleasing medium brown surfaces with splashes of darker toning on each side. EAC 45.
From The Collection of a Dallas Gentleman. (#1663)

- 79 **1838 MS66 Brown PCGS.** N-1, R.1. Most notable as a diagnostic is the recut I of UNITED. This warmly lustrous rosewood and chocolate-brown example is well-defined on the central devices, though the obverse stars show softness. EAC 63. (#1741)

Terminal State 1844 N-5 Cent, MS61 Brown

- 80 **1844 MS61 Brown NGC.** N-5, R.1. Grellman State d. The bold obverse rim break from 6 to 7 o'clock identifies the terminal state of the N-5 marriage, described as a rare die state in Grellman's reference. The obverse has a boldly repunched first 4 in the date. Both sides of this sharp impression have lovely milk-chocolate surfaces with splashes of orange on the reverse. EAC 50.
From The Collection of a Dallas Gentleman. (#1856)

**Possibly Finest 1845 N-2 Cent
MS64 Red and Brown**

- 81 **1845 MS64 Red and Brown NGC.** N-2, R.1. Intermediate between Grellman State a and State b. This amazing near-Gem has gorgeous orange mint luster over more than 50% of the obverse and reverse surfaces, the latter somewhat mellow. A wonderful aspect of old-time collections, such as the one that held this piece, is the opportunity they provide to examine fully original coins that have never been conserved. The brilliant orange luster on the obverse of this piece is exactly what "original red" should look like. Our EAC grade places this beauty in a tie for finest known. EAC 63.
From The Collection of a Dallas Gentleman. (#1863)

- 82 **1846 Small Date MS63 Brown NGC.** N-4, R.1. Grellman State b. An extraordinary repunched date, the original position slightly left of the final placement. The surfaces are fully lustrous with excellent aesthetic appeal. Both sides are mostly dark brown, although considerable mellow orange mint luster is still visible. EAC 63.
From The Collection of a Dallas Gentleman. (#1865)

- 83 **1847 MS65 Red and Brown NGC.** N-20, R.3. This impressively unabraded Gem is about evenly divided between brick-red and light brown. The major devices are well struck, while the stars show customary selected incompleteness. EAC 63. N-20 Census: 2 in 65 Red and Brown, none finer, and none as full Red (4/09). (#1878)

- 84 **1848 MS64 Brown NGC.** N-35, R.2. Grellman State b. A strong die line extends left from the hair over the coronet point, and another die line bisects the berry to the right of T in CENT. All other identification points are absent in this intermediate die state. Perhaps deserving of a Red and Brown designation. The obverse has about 15% to 20% red with lovely medium brown toning, while the reverse approaches 50% original red. A wonderful example. EAC 63.
From The Collection of a Dallas Gentleman. (#1883)

- 85 **1849 MS64 Brown NGC.** N-20, R.1. Grellman State a. An early die state with crisp die lines at the lower left and right reverse. A common variety and this Mint State piece seems to rank about 10th in the Census. Splashes of mellow mint red accompany the lustrous blue-brown surfaces. EAC 60.
From The Collection of a Dallas Gentleman. (#1886)

- 86 **1849 MS64 Brown PCGS.** N-1, R.4. Grellman Die State a, without crumbling. A very scarce and desirable die pair. For a coin described as Brown, it has considerable gold and orange mixed with the chocolate-brown color, particularly on the reverse. EAC 63. (#1886)

Census Level 1852 N-15 Cent, MS66 Red and Brown

- 87 **1852 MS66 Red and Brown NGC.** N-15, R.3. Grellman Die State c. All reverse attribution lines and points are gone. This scarce variety is seldom found better than MS62 or MS63, per EAC standards, and the present piece is at that level. Both sides have generous portions of mint red, with pale blue and lilac toning. EAC 63.(#1899)

Fresh MS65 Red 1852 Cent, N-8

- 88 **1852 MS65 Red PCGS.** N-8, R.2. A popular hoard issue. This piece is unusual in that a ghost of the die crack from the coronet is visible, but the same cannot be said for the crack near star 13. This appealing Gem offers rich copper-orange color with scattered flyspecks on the reverse. PCGS has graded just one finer Red example (4/09). EAC 65.(#1900)
- 89 **1853 MS64 Red PCGS.** N-25, R.1. Well-defined in the centers but with softness at the obverse stars. Rich reddish-orange color with minor carbon. The N-25 is a well-known hoard variety for the year. Housed in a prior-generation holder. EAC 64.(#1903)
- 90 **1855 Upright 5s MS66 Brown PCGS.** CAC. N-4, R.1. Grellman Die State a, noted as a hoard state. Deep brown surfaces offer lovely blue overtones. Strongly defined and housed in a green label holder. EAC 60+.(#1907)
- 91 **1855 Upright 5s MS65 Red NGC.** N-4, R.1. Grellman Die State a. The strike is exacting on the portrait, although selected stars have central softness. Generally orange-gold, with slight mellowing on the neck, the jaw, and the reverse margin at 7 o'clock. Nearly unabraded, and carbon is relegated to the left obverse field. Certified in a former generation holder. EAC 63.(#1909)

PROOF LARGE CENTS

Impressive 1848 Large Cent
N-19, PR66 Red and Brown

- 92 **1848 PR66 Red and Brown NGC.** Ex: P. Kaufman. N-19, Low R.6. A very rare proof-only variety. Walter Breen, in his *Encyclopedia of United States and Colonial Proof Coins*, presents a roster of 16 pieces, but then says: "... I have excellent reason to believe that this enumeration is far from complete."
- This Premium Gem has impressive, well-preserved surfaces on both sides. The obverse displays intermingled mint orange color with hints of blue, while the reverse offers rich reddish-orange coloration with tinges of light blue. The strike is sharp, and there is slight but noticeable cameo contrast. There is a fine irregular line across the 1 in the date just above the base. The reverse has a fine die line on the rim over TED. Census: 2 in 66 Red and Brown, 0 finer (4/09). The highest Red and Brown coins at PCGS are a pair of PR65s. EAC PR63.(#1974)

Scarce 1855 N-10 Cent, PR64 Brown

- 93 **1855 PR64 Brown PCGS. N-10, R.5** as a proof. This pleasing medium brown example has weak stars at the left obverse, but full details of all other design elements. The surfaces are reflective although not deeply mirrored. A few small lint marks on the reverse confirm its proof status. EAC 60. Population: 5 in 64 Brown, 4 finer (4/09). Ex: *Heritage* (12/1984), lot 445. (#1994)

PR64 Brown 1857 Large Cent, N-3, Small Date

- 94 **1857 Small Date PR64 Brown NGC. N-3, Low R.5.** The deeply mirrored fields reveal aquamarine, rose-red, and lime-green when this razor-sharp specimen is rotated beneath a light. Devoid of contact, although the lower obverse has a few small brown freckles. Proofs were made from two different sets of Small Date dies, while the Large Date (N-1) is known solely from business strikes. EAC 60+. (#2000)

Second PR64 Brown 1857 Large Cent, N-3, Small Date

- 95 **1857 Small Date PR64 Brown PCGS. N-3, Low R.5.** A hair-thin die scratch (as made) on the bust truncation resembles an inverted checkmark and is diagnostic for this proof-only Newcomb marriage. A fully struck near-Gem with exquisite preservation. The reverse is mahogany-brown, while the obverse displays powder-blue, orange, and sea-green shades. EAC 60+. Population: 14 in 64 Brown, 12 finer (4/09). (#2000)

PR65 Red and Brown 1857 Large Cent
Small Date, N-5

- 96 **1857 Small Date PR65 Red and Brown NGC. N-5, High R.5.** A precisely struck Gem with a mark-free appearance and a flashy reverse field. The cheek, neck, and obverse field are brown, but much of the initial peach color resides about the stars and legends. The end of the line for the large cent, aside from anomalous 1868 patterns. EAC 60. (#2001)

FLYING EAGLE CENTS

Prooflike Snow-3 MS62 1856 Flying Eagle Cent

- 97 **1856 MS62 PCGS. Eagle Eye Photo Seal, Card Included.** From Snow-3 dies, associated with business strikes and considerably scarcer than the Snow-9 restrike proofs. Examples from the Snow-3 dies constituted most of the pieces actually struck in 1856. That small emission was distributed to Washington-area congressmen and officials to demonstrate the proposed small cent. Millions of Flying Eagle cents were eventually coined in 1857 and 1858, but the 1856 production, even with the restrike proofs included, was comparatively minuscule. Since its introduction, examples of the 1856 Flying Eagle cent have been coveted by numismatists, who in several instances accumulated hoards of 100 pieces or more.

The present example is unusually prooflike for a Snow-3. The strike is razor-sharp, and the fields are reflective. The reverse has a few light hairlines, but there are no visible marks or any indication of strike doubling. Toned orange-gold and lime-green. (#2013)

Interesting 1857 Flying Eagle Cent, MS63 Obverse Die Clash With a Seated Half Dollar

- 98 **1857—Obverse Die Clashed With Half Dollar—MS63 PCGS.** FS-402, formerly FS-003. Snow-9. It was previously believed that young Theodore Eckfeldt was responsible for this and several other mysterious die clashings on 1857 cents. However, the fifth edition of *Cherry-pickers* states that “recent research by Chris Pilliod has shown through die cud research that the Flying Eagle dies were installed in the press with the obverse die in the anvil (lower) position, while Liberty Seated half dollars had their obverse die in the hammer (upper) position.” The obverse is sharply struck, while the wreath on the reverse shows the often-encountered softness. The surfaces have mellowed to a rich brown, with lighter accents around the margins. (#2016)

Lovely Gem 1857 Flying Eagle Cent

- 99 **1857 MS65 NGC.** Both sides of this lovely Gem display golden-tan surfaces splashed with wisps of lavender and crimson. Tilting the coin just slightly under a light source reveals noticeable field-device contrast. The design features are sharply defined except for minor softness in some of the wreath elements. Nicely preserved throughout. Census: 14 in 65, 2 finer (4/09). (#2016)

Highly Lustrous MS66 1858 Large Letters Cent

- 100 **1858 Large Letters MS66 NGC.** Low Leaves, Closed E in ONE. While near-Gem survivors of this final-year Flying Eagle cent are always available, Gems are another matter entirely. Coins that grade finer than MS65 are rarer still, with only 22 examples certified MS66 by NGC, and two higher (4/09). Delicate honey-gold shadings adorn the otherwise orange-tan surfaces. Every feature is sharply detailed, and the luster is full with a shimmering, warmly frosted sheen. A few flecks of carbon are noted on each side with close examination. From The Joseph C. Thomas Collection, Part Two. (#2019)

Select Mint State 1858/7 Flying Eagle Cent

- 101 1858/7 MS63 PCGS. CAC. FS-301, formerly FS-006. Snow-1. This is a richly toned, golden-brown example of this popular overdate variety. The underlying 7 is not obvious, but it can be seen with the aid of magnification. Boldly struck and highly lustrous, with no distracting marks on either side. Population: 20 in 63, 29 finer (4/09).(#2022)

PROOF FLYING EAGLE CENTS

Famous 1856 Flying Eagle Cent Snow-9, PR62

- 102 1856 PR62 PCGS. Eagle Eye Photo Seal, Card Included. Snow-9, the usually seen proof dies, identified by the nearly imperceptible vertical die crack beneath the beak and a tiny die scratch (as made) on the left ribbon end. The opening of the O in OF is nearly square-shaped, as always on 1856 Flying Eagle cents, but unlike the vast majority of circulation strikes for the series. This needle-sharp and essentially mark-free specimen has even golden-tan toning aside from minor spots on the T in CENT and on the reverse rim at 3 o'clock. Careful rotation beneath a loupe locates a few faint hairlines on the obverse exergue, and these are all that deny a much finer grade.(#2037)

Near-Gem Proof 1856 Flying Eagle Cent

- 103 1856 PR64 PCGS. Snow-9. A razor-sharp Choice specimen of this landmark numismatic issue. The moderately mirrored fields display almond-gold and ocean-blue patina. The field beneath the C in CENT is toned dusky tan-brown. Subtle laminations affect the E in ONE, the NT in CENT, the wreath ribbon, and the obverse border at 1 o'clock, but carbon and contact are virtually absent. The 1856 Flying Eagle is the introductory small cent, and is also the single rarest date of its denomination. It has been the subject of strong collector demand since its introduction more than 150 years ago. *From The Joseph C. Thomas Collection, Part Two.*(#2037)

INDIAN CENTS

Scarce Pointed Bust 1860 Cent, MS65

- 104 1860 Pointed Bust MS65 PCGS. Bright honey-gold surfaces are imbued with splashes of light tan and orange. A strong strike imparts complete definition to the design features, and the impeccably preserved surfaces are devoid of significant abrasions or spots. Population: 27 in 65, 6 finer (4/09).(#2056)

Copper-Nickel 1861 Cent, MS66

- 105 **1861 MS66 PCGS.** Impressively lustrous surfaces are pale honey-gold with glimpses of mahogany near the rims. Overall definition is solid, and the four diamonds on the ribbon are clear. This Civil War issue is elusive in MS66 and a rarity any finer. PCGS has graded only 10 examples finer (4/09).(#2061)

- 106 **1864 Copper-Nickel MS65 PCGS. CAC.** A crisply struck and essentially untouched Gem example from the final year of the copper-nickel Indian cents. Only the very tips of several headdress feathers are incomplete. Lovely golden-tan coloration and virtually pristine surfaces.(#2070)

Tantalizing 1864 Copper-Nickel Cent, MS66

- 107 **1864 Copper-Nickel MS66 PCGS.** The lovely gold-tan surfaces have a bright, satiny appearance, and seem to be virtually pristine on both sides. Faint die cracks are noted through the date, along the upper left obverse beneath TES, and diagonally across the horizontal shield lines from the rim to the tip of the highest leaf on the right side of the wreath. This was the final year of the copper-nickel Indian cents, as the federal government sought to replace copper merchants' tokens with its new bronze Indian cent composition. Population: 9 in 66, 1 finer (4/09).(#2070)

Shining Premium Gem 1864 Copper-Nickel Cent

- 108 **1864 Copper-Nickel MS66 NGC.** Pale copper-orange and salmon colors dominate the eye appeal of this lustrous Premium Gem. The strike is pleasing for a copper-nickel cent and the preservation is excellent. Great eye appeal for this popular issue, the last struck in its alloy before the composition of the cent changed to bronze. (#2070)

- 109 **1865 Fancy 5 MS66 Red and Brown PCGS. CAC.** This Fancy 5 example shows pronounced clash marks on the reverse. Splendid original red covers both sides, with areas of medium brown around the rim. Fully struck with impeccable surfaces. Population: 4 in 66 Red and Brown, 0 finer (4/09).(#2083)

- 110 **1867 MS65 Red and Brown NGC.** Eye-catching red-orange patina surrounds the mahogany colored centers. The surfaces are remarkably pristine, with a peppering of nearly imperceptible flyspecks on the reverse. Prominent clash marks from the bust of Liberty are noted on the reverse.(#2089)

Exceptional 1868 Indian Head Cent, MS66 Red

- 111 **1868 MS66 Red PCGS.** With a large mintage of more than 10 million pieces, the 1868 Indian Head cent was not considered scarce at the time of issue. Few business strikes were saved at the time, as advanced collectors usually just purchased proof specimens from the Mint to represent the date. The issue was subjected to extensive melting in the years before 1874, greatly reducing the availability of Mint State specimens. Most examples seen today are in lower circulated grades. At the Premium Gem level, coins are rare today, especially with full red color. Only six coins have been certified in MS66 Red by NGC and PCGS combined, with none finer (4/09).

The present coin is a pleasing example, with a sharp, but not quite full strike. The obverse is just a bit brighter than the reverse, which is a deep cherry-red. Overall visual appeal is excellent. From The Joseph C. Thomas Collection, Part Two.(#2093)

Blazing 1869 Indian Cent, MS66 Red

- 112 1869 MS66 Red PCGS.** Richard Snow observes the 1869 Indian Head cent is “a very tough date to find in all grades.” An oversight in the Mint Act of April 22, 1864 led to the large-scale melting of small cents and two cent pieces in the late 1860s. Because the act provided no redemption clause for those denominations and the legal tender limit for the cent was only 10 cents, banks could refuse to accept large deposits of cents and two cents from merchants. The merchants’ only recourse was to turn the coins in at the Mint to be melted and recoinced. Snow reports more than 55 million bronze cents were melted during the next 10 years. The availability of the 1869 cent, with a small mintage of 6.4 million pieces, was drastically reduced by this activity.

The present coin is a spectacular specimen, fully struck, with bright, even orange-red color. Close examination with a loupe reveals a couple of tiny specks, the only notable one on the lower part of E in ONE. Overall eye appeal is excellent. Population: 7 in 66 Red, 0 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#2096)

**1870 Indian Cent, MS66 Red
Conditionally Challenging**

- 113 1870 MS66 Red PCGS.** Shallow N. The Mint introduced a new reverse hub for the Indian cent in 1870 that is characterized by a bold N in the word ONE. Many of the old, Shallow N dies were rehubbred—a fact that explains why there are so many doubled die varieties for this issue. Snow reports that Shallow N 1870 cents are “much scarcer” than their similarly dated Bold N counterparts.

The present Premium Gem is also important because it is a Condition Census survivor of this low mintage (5.2 million pieces), conditionally rare date. Only four MS66 examples have appeared at public auction (according to our records), all between 2002 and 2006. This piece is sharply struck throughout, and the surfaces are aglow with orange-red hues. Even brighter suggestions of pale orange color are noted at the upper right obverse border and at the lower reverse rim. We cannot, however, find more than one or two tiny carbon flecks, none of which are distracting. This is a lovely Indian cent, irrespective of the date. PCGS reports only four examples in MS66 Red and none finer, whereas NGC has yet to certify a single coin above the MS65 Red level (4/09).

Ex: Joseph P. Gorrell Collection (Heritage, 9/2002), lot 150.

From The Joseph C. Thomas Collection, Part Two. (#2099)

- 114 1873 Open 3 MS64 Red PCGS.** From reddish-orange to pale salmon and wheat-gold, this shining Choice coin explores the edges of the Red designation without crossing over the line. Well defined and pleasing. Population: 49 in 64 Red, 25 finer (4/09). (#2108)
- 115 1877 VF35 NGC.** Delicate violet and blue overtones enliven the otherwise chocolate-brown surfaces of this Choice VF example. A strongly appealing key-date coin that shows only a few minor abrasions. (#2127)

- 116 1877 XF40 PCGS. Shallow N in ONE. Generally olive-brown despite a blush of lilac-red on the obverse center. This key date cent lacks remotely relevant marks, and shows only moderate high point wear. (#2127)

Desirable 1877 Cent, MS60 Brown

- 117 1877 MS60 Brown NGC. Blue and violet overtones grace otherwise chocolate-brown surfaces. The strike is crisp, and the eye appeal is far superior to what the grade might suggest; no overt abrasions are present at the focal points. The most immediately noticeable mark is at the first A of AMERICA. Overall, an intriguing candidate for the higher-end Indian cent collector. (#2127)

Uncirculated Details 1877 Cent

- 118 1877—Altered Color—NCS. Unc Details. The pink-tinged wheat-gold color on this piece may not be real, yet it retains considerable eye appeal. A small carbon spot to the right of the D in UNITED is of relatively minor concern. No trace of wear affects the devices, which are well-defined and without distracting abrasions. (#2127)
- 119 1877 PCGS Genuine. Excellent detail with all letters of LIBERTY sharp. Glossy ebony-blue surfaces show disturbances at the rims and close to the devices, mostly moderate corrosion with possible traces of residue.

Delightful MS66 Red 1883 Cent

- 120 1883 MS66 Red PCGS. Impressively detailed throughout, including at the four diamonds at the hair ribbon. The luster is strong and impressive, with bold orange surfaces showing only occasional hints of rose and lavender. Dynamic eye appeal for this 1880s issue. Population: 23 in 66 Red, 7 finer (4/09). (#2147)

Exquisite Red Superb Gem 1883 Cent

- 121 1883 MS67 Red NGC. Dazzling cartwheel luster illuminates this exceptionally well preserved Superb Gem. There are no marks of any sort, and carbon is limited to a whisper near the Indian's jaw. An unimprovable example, certified in a prior generation holder. Census: 3 in 67 Red, 0 finer (4/09). (#2147)
- 122 1886 Type Two MS64 Red and Brown PCGS. The last feather tip of Liberty's headdress points between C and A of AMERICA, indicating that this piece is an example of the Type Two Indian cent design, referred to as "Variety 2" on the PCGS insert. This example is lustrous and boldly struck overall, if a tad weak on several of the obverse high points. Nicely preserved with minimal marks and just one or two unimportant specks. (#92155)

Rich Red Gem 1886 Type Two Cent

- 123 1886 Type Two MS65 Red NGC. CAC. Immensely lustrous with astounding eye appeal. This sharply struck Red Gem, coined after the slight redesign of the obverse, offers fiery copper-orange color with occasional glints of gold. Immensely elusive any finer; NGC and PCGS have graded just two such Red coins between them (4/09). (#92156)

Coveted 1888/7 Cent, Snow-1, FS-301

- 124 1888/7 PCGS Genuine. FS-301, formerly FS-010. Snow-1. The diagnostic cud is present on the rim near the E in UNITED. The key date of the Indian cent series, and desirable in any grade, let alone with little if any wear. Satin luster shimmers across the unmarked surfaces, which were apparently recolored at one time. Since retoned a deceptive deep brown on the obverse, while the reverse is a less convincing shade of mahogany-brown. Still an important piece that will command significant specialist attention during its fleeting auction appearance. (#2169)

Red Gem 1894/1894 Cent, Snow-1, FS-301

- 125 1894 Doubled Date MS65 Red NGC.** FS-301, formerly FS-011, Snow-1. The most dramatic repunched date variety within the Indian cent series. The Doubled Date has long been recognized as a major condition rarity in Uncirculated grades. In Gem condition and with full red surfaces, it is among the most elusive of all Indian cents. The surfaces of this piece have a rich, deep cherry-red color. Sharply struck throughout. The only flaw that deserves mention is a small speck on the cheek. Census: 5 in 65 Red, 1 finer (4/09).
Ex: Long Beach Signature (Heritage, 5/2007), lot 175. (#92189)

- 126 1895 MS66 Red NGC.** Beautiful orange-gold luster embraces both sides of this Premium Gem Red Indian cent. Sharply struck with remarkable preservation and eye appeal to match. NGC has graded only eight numerically finer Red representatives (4/09). (#2192)

- 127 1895 MS66 Red NGC.** Vibrant fire-orange luster shows occasional hints of red. Satiny and charming with dramatic eye appeal. NGC has graded just eight numerically finer Red representatives (4/09). (#2192)

Extraordinary MS67 Red 1895 Indian Cent

- 128 1895 MS67 Red NGC.** *Ex: Maine Roll.* We have handled several pieces from this roll over the past several years and all have been of uniformly high quality. This is an amazing type coin. The surfaces have blazing fiery-red color, and they are essentially carbon-free. The mint red on this coin must be seen to be believed. Census: 8 in 67 Red, 0 finer (4/09). (#2192)

- 129 1896 MS66 Red NGC.** Dynamic luster sweeps this crisply struck and unmarked Premium Gem. Minor carbon at 6 o'clock on the reverse and along the right obverse border fails to deny the eye appeal. Common in circulated condition, but seldom encountered in such a lofty grade. In a prior generation holder. Census: 7 in 66 Red, 2 finer (4/09). (#2195)

Superb Gem 1903 Cent, Red

- 130 1903 MS67 Red PCGS.** Sharply struck throughout, with nearly full definition on all of the design details. This Superb Gem provides potent luster and is essentially bereft of contact. Only a couple of pinpoint flecks and a minor lintmark near the ear deny technical perfection. Housed in a green label holder. Population: 5 in 67 Red, 0 finer (4/09). (#2216)

Better-Date 1908-S Cent, MS65 Red

- 131 1908-S MS65 Red PCGS.** Copper-gold surfaces display splashes of crimson on the obverse, and well detailed design elements have benefited from a solid strike. A couple of marks and light flecks on each side are not particularly bothersome. From the first year of branch mint production for the Indian cent, and a better date in the series overall. (#2234)

Lustrous MS65 Red and Brown 1909-S Indian Cent

- 132 1909-S MS65 Red and Brown PCGS. CAC.** A second key to the series, along with the 1877, although not as rare as that earlier date. This is a particularly attractive example. Each side shows the "woodgrain" effect that is commonly seen on 1909 cents of both design types. As a result, the brown color of the woodgrain subdues the otherwise rich red color seen over each side. A wonderfully clean and problem-free coin. The only negative aspect we can point out is softness on the tips of the feathers in the headdress. (#2239)

Stunning 1909-S Indian Cent, MS66 Red

- 133 1909-S MS66 Red PCGS.** Ex: Richard. The 1909-S Indian cent has a paltry mintage of only 309,000 pieces, which rivals the 1877 in desirability and overall rarity. It is also a condition rarity, with only 12 other MS66 Red coins certified as such by PCGS, and just one finer piece (4/09). This is a lovely, bright orange-red example that has even color over each side, no obvious carbon spots, and no abrasions. Slight weakness is evident at the feather tips and on the lower part of the wreath, but the quality is otherwise stunning.
Ex: Richard Collection (Heritage, 1/2004), lot 4363.
From The Joseph C. Thomas Collection, Part Two. (#2240)
-

PROOF INDIAN CENTS

Wonderful 1859 Indian Cent, PR66 Cameo

- 134 1859 PR66 Cameo PCGS.** The 1859 Indian cent is a blue-chip coin for anyone wanting to purchase a type piece of enduring popularity. The issue was only struck in 1859 with the Laurel Wreath Reverse, and seldom are examples seen with the depth of mirrored reflectivity the present piece possesses. The mirrors in the fields are unfathomably deep, and the color is as close as possible to the original "white" appearance these coins had when new. Close examination reveals each side displays a subtle pastel iridescence, but the frosted devices are most immediately apparent, set against the bottomless mirrors in the fields. Population: 6 in 66 Cameo, 0 finer (4/09).
Ex: Heritage (3/2004), lot 5115, which brought \$14,950; Heritage (1/2005), lot 30108, which realized \$17,250.
From The Joseph C. Thomas Collection, Part Two. (#82247)
-
- 135 1862 PR65 PCGS.** Crisply detailed with a faint blue overtone to the mirrors and light copper-orange color on the central devices. Outstanding contrast for a coin not designated as Cameo, though this piece is housed in a green label holder. (#2259)

Charming PR66 1862 Copper-Nickel Cent

- 136 **1862 PR66 PCGS.** Even though only 550 proofs were struck for this issue, it is usually more available than the two previous copper-nickel dates, and it also has a reputation for superior striking quality. The surfaces on this piece are exceptionally clean. Each side shows lovely honey-golden coloration with a slight accent of lilac intermixed. A lovely proof representative of the type. Population: 30 in 66, 1 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#2259)

Deeply Mirrored PR66 Red 1873 Closed 3 Indian Cent

- 137 **1873 Closed 3 PR66 Red NGC.** The design elements are fully struck and the coin overall is impressively preserved, with glassy fields that exhibit deep mirrors and are hairline-free. A paper-thin roller mark (as struck) extends from the upper right serif of O in ONE, through both Ns and the lower left serif of T in CENT to the wreath. A curly lint mark is also noted on the upper obverse, just above the fourth feather tip, while a minor nick just below Liberty's chin is the only noticeable contact evidence on either side of this outstanding Premium Gem proof. Census: 2 in 66 Red, 0 finer (4/09). (#2308)

Gorgeous PR65 Red 1875 Cent

- 138 **1875 PR65 Red PCGS.** With just 700 pieces struck, the 1875 proof cent issue poses a significant challenge, particularly with fully Red surfaces. The lemon and orange shadings of this Gem create lively eye appeal, and the mirrors are potent. Sharply struck with a single flyspeck noted just left of 12 o'clock on the obverse rim. Population: 13 in 65 Red, 2 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#2314)

Elegant PR64 Brown 1877 Cent

- 139 **1877 PR64 Brown PCGS.** The proof mintage for the 1877 cent, estimated at 900 specimens, enjoys popularity far beyond that of neighboring proof issues, thanks to its association with the key-date business strike. This boldly impressed example shows only a few faint hairlines on the violet-tinged mahogany surfaces. Population: 14 in 64 Brown, 10 finer (4/09). (#2318)

Full Red 1877 Indian Cent, PR66

- 140 **1877 PR66 Red PCGS.** The smooth sheen on both sides of this important 1877 cent allows full appreciation of the rich cherry-red luster with a noticeably deeper appearance on the reverse. Both sides display razor-sharp striking definition throughout, and the surfaces are expectedly free of distracting carbon for the PR66 level of preservation. A small amount of die rotation is noted, somewhat unusual on this proof issue. The 1877 is not appreciably rarer than any of the other proof Indian cents from this decade. As specialists know, however, this issue is under extreme collector pressure due to the key date status of the business strike 1877 cent. Expect strong bidder competition for this Premium Gem. Population: 11 in 66 Red, 2 finer (4/09). (#2320)

- 141 **1881 PR65 Red NGC.** Lovely lemon-gold, cherry-red, and olive-green colors adorn this intricately struck Gem. Satiny and mark-free, with a solitary gray spot on the wreath near the O in ONE. Census: 29 in 65 Red, 15 finer (4/09).(#2332)

Vibrant PR66 Red 1898 Cent

- 142 **1898 PR66 Red PCGS. CAC.** Fiery orange-gold color dominates the eye appeal of this striking Premium Gem. The definition is bold and the eye appeal is high. This later proof Indian cent issue is found only rarely so fine with fully Red surfaces, making the present specimen a prize. Population: 8 in 66 Red, 8 finer (4/09).(#2383)

Remarkable PR66 Red 1900 Cent

- 143 **1900 PR66 Red PCGS.** Vibrant copper-orange surfaces show occasional hints of gold near the rims. This beautifully detailed turn-of-the-century proof Indian cent is also exquisitely preserved. Its excellent eye appeal would let it fit in virtually any similarly graded collection. Population: 14 in 66 Red, 6 finer (4/09).(#2389)

- 144 **1901 PR66 Red and Brown PCGS. Snow-PR1.** The 90 in the date is clearly repunched near the right side of the bases of the digits. The obverse is intensely ruby-red, while the reverse has deep crimson and lilac tints. Well struck and impressive.
Ex: Long Beach Signature (Heritage, 9/2002), lot 5440. (#2391)

- 145 **1901 PR66 Red PCGS.** Rich copper-orange color with glimpses of paler gold visible at the margins. Sharply struck with gleaming fields. The holder shows a fine scratch that passes over the obverse but in no way affects the coin. Population: 20 in 66 Red, 7 finer (4/09).
From The Joseph C. Thomas Collection, Part Two. (#2392)

- 146 **1902 PR66 Red NGC.** Richly covered in a blanket of deep red-orange color. The strike is bold and the fields are reflective on both sides of this beautiful Premium Gem. Free of spots and hairlines. Census: 20 in 66 Red, 3 finer (4/09).(#2395)

- 147 **1902 PR66 Red PCGS.** Boldly impressed with rich fire-orange and gold color. A lovely Premium Gem proof that is sharply struck and beautifully preserved. Population: 24 in 66 Red, 9 finer (4/09).(#2395)

- 148 **1907 PR66 ★ Red NGC.** Splendid fire-red, lemon-gold, and olive-green adorn this suitably struck Premium Gem. A fleck or two and a slender line of carbon on the jaw are of little account. An attractive high grade example of this lower mintage proof date. (#2410)

LINCOLN CENTS

- 149 **1909 VDB MS67 Red PCGS.** Rich fire-orange color and potent, slightly satiny luster are among the most attractive attributes of this first-year Lincoln cent Superb Gem. Pleasing detail and careful preservation combine to account for the high grade. PCGS has graded only one finer Red coin (4/09).(#2425)

- 150 **1909-S VDB VF35 PCGS.** This chocolate-brown key date cent is well defined despite the expected wear on the jaw and cheek of our 16th president. A few minor marks exemplify the grade. The VDB initials are easily read, although in low relief. (#2426)

- 151 **1909-S VDB—Corroded—ANACS. AU53 Details.** The semibright copper-gold surfaces of this key date display crimson and sky-blue accents and reveal microgranularity. The design features are nicely defined. All in all, an attractive piece despite the light corrosion. (#2426)

- 152 **1909-S VDB AU55 NGC.** Boldly struck and evenly worn, with a typically streaky woodgrain appearance on both sides. Entirely free of distracting marks. A lovely Choice AU example of this Lincoln cent key date. (#2426)

1909-S VDB Cent MS64 Red and Brown

- 153 **1909-S VDB MS64 Red and Brown PCGS.** Almost any novice American coin collector was quickly made aware of the 1909-S VDB Lincoln cent, one of the most famous key issues of the 20th century. These pieces were tough for young collectors, as they are particularly rare in the lower circulated grades of About Good to Fine. This Choice Uncirculated example is well struck and shows the typical woodgrain appearance that is so common to these first-year Lincoln cents. Both sides of the piece are blemish-free. (#2427)

Choice Red and Brown 1909-S VDB Cent

- 154 **1909-S VDB MS64 Red and Brown PCGS.** Mostly orange-red, although the obverse shares apple-green hues and the reverse exergue is steel-blue. Well struck, even on the all-important VDB initials. There are essentially no marks, and carbon is minimal. Encapsulated in an old green label holder. (#2427)

Lustrous 1909-S VDB Cent, MS65 Red and Brown

- 155 1909-S VDB MS65 Red and Brown PCGS.** A wonderful Gem with considerable original golden-orange luster, mellowing to light brown on each side, but retaining more than half its mint red. This impressive piece has exceptional surfaces with few blemishes of any consequence. Always popular in every grade, we expect a high level of bidder interest. (#2427)

Excellent 1909-S VDB Cent, MS65 Red and Brown

- 156 1909-S VDB MS65 Red and Brown PCGS.** Lustrous surfaces display attractive golden-tan patina imbued with traces of mint-green and red. A decisive strike imparts virtually complete definition to the design features; the date, mintmark, and VDB initials are all crisp, and both sides are devoid of detracting contacts or spots. This is an excellent example for a high-grade Lincoln date/mintmark collection. (#2427)

**Lovely 1909-S VDB Lincoln Cent
MS65 Red and Brown**

- 157 1909-S VDB MS65 Red and Brown PCGS.** Definitely more red than brown, this highly lustrous Gem also displays some coral-gold and steel-green coloration on both sides. The design elements are generally well struck, as is nearly always true for this first-year key issue, although a touch of softness is noted on the finer details of Lincoln's beard. There are no disturbing marks on either side of this lovely example. (#2427)

Gem Red and Brown 1909-S VDB Cent

- 158 1909-S VDB MS65 Red and Brown PCGS.** This lustrous Gem is an excellent example of a coin with the so-called "woodgrain" finish that is much discussed by numismatists. The term refers to a visual effect characterized by a slightly grainy texture to the fields, and variations in the toning pattern of the coin that give it a variegated appearance. This piece is typically well struck and shows minimal marks. The shimmering luster illuminates surfaces that have a deep golden-red cast. (#2427)

Sharp 1909-S VDB Gem Red and Brown Cent

- 159 1909-S VDB MS65 Red and Brown PCGS.** Lustrous copper-gold surfaces display crimson and mint-green accents at the peripheries of this lovely Gem. A powerful strike leaves crisp definition on the design features, including the date, mintmark, and initials. Devoid of mentionable contacts or spots. An excellent coin for a high-grade Lincoln collection. (#2427)

Terrific MS64 Red 1909-S VDB Cent

- 160 1909-S VDB MS64 Red PCGS.** Fewer than half a million 1909-S VDB cents were struck, and only a fraction of those have survived so well as this distinguished near-Gem. The obverse of this well-defined example has rich copper-gold color, while deeper orange shadings dominate the reverse. An appealing representative of this famous Lincoln cent key. (#2428)

Popular MS64 Red 1909-S VDB Cent

- 161 1909-S VDB MS64 Red PCGS.** Far from a pocket-change pull, this near-Gem Red 1909-S VDB cent has been carefully preserved for a century, and both its sharp devices and its pumpkin-gold color are intact. It offers excellent eye appeal with a faint fingerprint at the lower reverse the only possible cause for concern. (#2428)

Terrific MS66 Red 1909-S VDB Cent

- 162 1909-S VDB MS66 Red NGC.** The smooth, golden-orange surfaces of this lovely Premium Gem are free of all but the most minute contact evidence. Lincoln's coat and bow tie are well struck, and there is complete separation of the shirt and coat all the way to the back of Lincoln's neck, one of the marks of a well-struck example of this key date. The reverse similarly offers no visible softness on any of the devices, and all three periods show in the designer's initials. A tiny scrape appears under a loupe above the O in ONE, mentioned for accuracy but undistracting. Census: 40 in 66 Red, 1 finer, and 1 MS66 ★ (4/09).(#2428)
- 163 1909-S MS65 Red NGC.** Well struck and lustrous with occasional minute flecks. Uncertified as such, but probably the S over Horizontal S variety, although a later die state makes confirmation difficult. Housed in a prior generation holder. (#2434)

Amazing MS66 Red 1909-S Cent

- 164 1909-S MS66 Red PCGS.** The surfaces range from copper-gold to pumpkin-orange on this 1909-S cent, but they never stray into Red and Brown territory. This gorgeous first-year Premium Gem is pleasingly detailed and delightfully well-preserved. PCGS has graded only four finer Red representatives (4/09).(#2434)

**Wonderful 1909-S S Over Horizontal S
Lincoln Cent, MS66 Red**

- 165 1909-S S Over Horizontal S MS66 Red PCGS.** FS-1502, formerly FS-012.3. This low mintage first-year S-mint Premium Gem has dazzling luster and a formidable strike. Delightful olive and rose tints grace the mark-free woodgrain surfaces. This variety was set aside in roll quantity, but high-grade pieces are nonetheless scarce. Population: 38 in 66 Red, 0 finer (4/09).(#92434)

Vibrant Red Gem 1913-D Cent

- 166 1913-D MS65 Red NGC. CAC.** Fresh copper-orange surfaces show glimpses of lemon-gold. This is a well-defined Gem with terrific eye appeal. Though over 15.8 million examples were struck, the vast majority circulated, and among those that did not, fully Red examples are few. Minor carbon is noted near the NI of UNITED. Census: 29 in 65 Red, 3 finer (4/09).(#2464)
- 167 1913-S MS64 Red PCGS.** Dusky fire-orange and pumpkin-gold color with a faint fingerprint at the upper reverse. Well struck overall but with significant weakness at the top left part of the O in ONE. (#2467)

Outstanding MS66 Red 1913-S Cent
Ex: Jack Lee

168 **1913-S MS66 Red PCGS.** Ex: Jack Lee. A well known semikey date from the 1910s, the 1913-S was produced in less than generous numbers (6.1 million pieces) for a 20th century U.S. cent. In addition to indifferent luster, many Mint State survivors are limited in grade by inadequate striking quality, with worn dies playing a role. Lest one despair of ever finding a high grade representative of this conditionally challenging issue, we call attention to the present example. Dave Bowers notes: "The advantage of being a smart buyer and cherrypicking is implied by David W. Lange's comment that many coins certified as Red 'just barely make the cut.' Words to heed, I would say! Mint State coins with original color have distinctive hues."

The strike on the present piece has a hint of softness on the upper left corner of the O in ONE and on portions of the AM in AMERICA, but the definition is sharp overall, and well above average for the issue. The straw-gold obverse is remarkably undisturbed by contact, and the reverse is predominantly peach in hue with glimpses of stone-gray color on the upper portion of that side. A singular carbon fleck above the N in CENT, and a solitary tick to the right of the T in CENT, can be used to pedigree this desirable Premium Gem. When we offered this identical specimen in January 2006, lot 3082, it set an auction record for any 1913-S cent in a Heritage auction when it brought more than \$63,000. The price may be a record for the date by any numismatic auction house. Population: 2 in 66 Red, 0 finer (4/09).

Ex: *The Joshua and Ally Walsh Collection of United States Cents; Heritage (1/2006), lot 3082. (#2467)*

Sharp 1914-D Cent, MS62 Red and Brown

- 169 **1914-D MS62 Red and Brown PCGS.** The lustrous surfaces of this key-date representative exhibit golden-tan color and razor-sharp design features. A few minor obverse contact marks are visible as are numerous minuscule speckles of carbon, a usual occurrence on 1914-Ds. A difficult coin to obtain in Mint State grades.(#2472)

Bright 1914-D Cent, MS64 Red and Brown

- 170 **1914-D MS64 Red and Brown PCGS.** The 1914-D is rare in all grades, but becomes especially difficult in Gem and better levels. Whispers of light tan patina barely preclude this near-Gem from full Red. A well directed strike sharpens the design elements. Some light carbon flecks are fewer and less severe than typically seen on surviving specimens.(#2472)
- 171 **1914-S MS64 Red PCGS.** Copper-gold luster envelops both sides of this near-Gem S-mint. Sharply struck except for weakness on the left side of the left wheat stalk. Some dark toning spots are visible on each side.(#2476)
- 172 **1915-S MS64 Red and Brown PCGS.** This early Lincoln cent is amazingly well preserved, and free of even the smallest mark or blemish. Satiny with light-brown color and a handful of flyspecks on each side.(#2484)
- 173 **1915-S MS65 Red and Brown NGC.** The 1915-S is a challenging issue in Mint State, and this Red and Brown Gem is easily ahead of the curve. Each side offers a mixture of violet and fresh copper-orange. NGC has graded only two finer Red and Brown examples (4/09).(#2484)

Elusive MS65 Red 1915-S Cent

- 174 **1915-S MS65 Red PCGS.** This sharply struck early branch mint Gem has comprehensive luster and lovely pumpkin-orange color. A few tiny pepper specks are evident on each side, most requiring a glass to see. A bold and fresh example, housed in a green label holder. Population: 28 in 65 Red, 5 finer (4/09).(#2485)
- 175 **1917 Doubled Die Obverse XF40 PCGS.** FS-101, formerly FS-013. Thickness atop the 9 and 7 in the date helps confirm this important *Guide Book* variety. Olive-brown overall with maroon on the portrait high points.(#92496)
- 176 **1918-S MS65 Red and Brown NGC.** Gold-orange color overall with hints of lemon, pink, and mahogany. An intriguing Gem, well-defined with immense visual appeal. NGC has graded only two finer Red and Brown representatives (4/09).(#2511)
- 177 **1918-S MS65 Red and Brown NGC.** Electric blue and violet-brown shadings dominate the eye appeal of this S-mint Gem. Well struck for the issue and carefully preserved. NGC has graded two finer Red and Brown pieces (4/09).(#2511)

Scarce Red Gem 1919-S Cent

- 178 **1919-S MS65 Red PCGS.** Ex: Jack Lee. The 1919-S cent saw a dramatic spike in production compared to West Coast cent issues of previous years, though paradoxically, that did not translate into large numbers of Gem survivors. Coins with fully Red surfaces are particularly elusive, and at the MS65 level, such pieces are condition rarities. This attractive example offers smooth fields and generally well-defined devices. Varying degrees of copper-orange and peach patina grace each side, with deeper shadings concentrated at the right reverse margin. Highly attractive and important. Population: 21 in 65 Red, 1 finer (4/09).(#2521)

Full Red 1919-S Cent, MS65

- 179 1919-S MS65 Red PCGS.** The 1919-S, approaching a mintage of 140 million pieces, is available in most grades. David Bowers (2008), however, writes: "Sharply struck pieces with original color are in the minority." The original copper-orange surfaces of this full Red specimen are laced with traces of mint-green. Well struck except for softness on the right portion of the right wheat stalk, and free of significant marks or spots. Population: 21 in 65 Red, 1 finer (4/09).(#2521)

Satiny Red Gem 1920-D Cent

- 180 1920-D MS65 Red PCGS.** Satiny luster occupies the smooth, unblemished surfaces of this elegant Gem. Original orange-tan color is interrupted slightly by toning streaks on the reverse, and there are a few flyspecks on each side of the piece. In an old green label holder. PCGS has graded only five finer Red pieces (4/09).
Ex: Long Beach Signature (Heritage, 2/2003), lot 5395. (#2527)
- 181 1922 No D Strong Reverse VF35 NGC.** FS-401, formerly FS-013.2. Die Pair 2. The reverse shows excellent detail for the grade, with relatively modest wear and a few minor marks. The obverse details are typically mushy and distinct. An attractive Choice VF example of this important key in the Lincoln cent series.(#3285)

**Select Mint State 1922 No D Cent
Strong Reverse, Ex: Jack Lee**

- 182 1922 No D Strong Reverse MS63 Brown PCGS. CAC.** *Ex: Jack Lee.* FS-401, formerly FS-013.2. Die Pair 2. From 1793 through 2007, the Philadelphia Mint coined cents (either large or small) in every year except 1815 and 1922. However, certain pieces coined at the Denver Mint in 1922 lacked a mintmark. This example is one such coin. While varieties exist with partially visible mintmarks, none of the Die Pair 2 coins display any trace of a mintmark, and full Mint State representatives are extremely rare.
This example is impressive, with unbroken satin luster on both sides. Although designated by PCGS as "Brown," considerable faded orange mint luster is still visible, especially on the reverse. In fact, enough orange luster remains on the reverse that a case could be made for a Red and Brown designation. A few tiny surface marks have taken this coin out of the Choice Mint State category, yet the quality is exceptional for the variety. Population: 9 in 63 Brown, 5 finer (4/09).(#3285)
- 183 1924-D MS65 Red and Brown NGC.** Fully struck and lustrous with an essentially Red obverse. The reverse has toned a medium-brown shade. A pair of interesting lintmarks (as struck) rest close together on Lincoln's temple and forehead. NGC has graded two finer Red and Brown examples (4/09).(#2553)
- 184 1924-D MS64 Red PCGS.** Fresh gold-orange color overall with slight variation on the reverse. Well-defined for this Denver issue with excellent eye appeal. PCGS has graded 39 finer Red pieces (4/09).(#2554)

Fiery Red Gem 1924-D Cent

- 185 **1924-D MS65 Red PCGS.** Ex: Jack Lee. Unlike the many condition-rarity issues that preceded it, the 1924-D is elusive regardless of quality. David Lange notes: "A semi-key date in all grades, 1924-D is scarce and always in demand. There are no grades in which this date is common ... Fully red, choice and gem pieces are very rare." This MS65 Red piece is uncommonly beautiful, with rich orange and copper-peach shades that mingle on each side. Powerfully lustrous and crisply detailed. A few faint flecks and fingerprint fragments on the obverse barely merit mention. Population: 38 in 65 Red, 1 finer (4/09).(#2554)

- 186 **1925-D MS64 Red PCGS.** This satiny red-orange near-Gem is well struck on the reverse, and only shows minor weakness on the obverse. Fully Red pieces are scarce, but MS64 Red is the most available level for such coins. Well-preserved and free of noticeable surface distractions.(#2563)

Beautiful Red Gem 1926-D Cent

- 187 **1926-D MS65 Red PCGS.** Peach-red and sun-gold alternate across this lustrous and precisely struck Gem. Infrequent minute carbon is all that limits the grade. Another conditionally rare Denver Mint issue from the 1920s, usually encountered spotty, toned, or worn. Certified in a green label holder. Population: 43 in 65 Red, 2 finer (4/09).(#2572)

Well Struck 1926-S Cent, MS64 Red

- 188 **1926-S MS64 Red NGC.** A better-than-average strike for this elusive issue, which displays vibrant luster and appealing deep cherry-red color laced with traces of mint-green, especially on the reverse. One carbon spot is noted at the center of the C of CENT. Virtually unimprovable quality for a 1926-S, as full Red Gems are all but unobtainable. Census: 3 in 64 Red, 1 finer (4/09).(#2575)

Dramatic MS65 Red 1926-S Cent

- 189 **1926-S MS65 Red ICG.** The 1926-S is a well-known semikey Lincoln cent issue from the 1920s, but in the MS65 Red grade, it emerges as perhaps the single rarest date and mintmark combination of the entire series. This is a well struck example that has lovely, original red surfaces. The obverse is lighter overall, with a few trivial carbon flecks noted under a loupe. The reverse is a tad deeper in color, with cherry-red patina in the centers deepening to fuchsia at the rims.(#2575)

Exceptional MS67 Red 1927 Cent

- 190 **1927 MS67 Red NGC.** While more than 144 million pieces were struck and this is generally a well-produced issue, it is surprising that a total of only 44 coins have been certified in MS67 Red by both major services (4/09). This is a lovely example that has rich, even red luster over both sides that is only broken by a couple of dabs of pale lilac on the reverse.(#2578)

Fresh Red Superb Gem 1927 Cent

- 191 **1927 MS67 Red PCGS.** Between the crisp strike and the vibrantly lustrous surfaces, this Superb Gem 1927 cent combines condition and beauty. The obverse has rich copper-orange color, while the reverse offers a lighter peach shade with glimpses of gold threading through. Population: 26 in 67 Red, 0 finer (4/09).(#2578)

Popular 1929 Cent, MS67 Red

- 192 1929 MS67 Red PCGS. Fully Red 1929 cents can be located without too much trouble through the Premium Gem level. MS67 Red pieces are much more challenging, and anything finer is nearly unobtainable. Orange-gold luster envelops this beautiful Superb Gem, and a well executed strike imparts sharp detail to the design elements. Devoid of noticeable contact marks or spots. Population: 44 in 67 Red, 0 finer (4/09). (#2596)

Impressive MS67 Red 1935-S Cent

- 193 1935-S MS67 Red PCGS. Among cents of the 1930s, the 1935-S requires the most discernment to find in quality condition, since its peculiar luster and eroded strikes often prove unappealing. Several numismatic references point to this issue as the last Lincoln cent to be acquired in Gem condition.

This Superb Gem cent is ablaze with fire-red coloration. The surfaces display a naturally glossy texture that highlights the sharp, nearly contact-free features. A few splashes of ice-blue toning appear on each side, something often seen on this issue. Unimprovable quality. Population: 7 in 67 Red, 0 finer (4/09). (#2647)

Spectacular 1939 Cent, MS68 Red

- 194 1939 MS68 Red PCGS. Rich peach color is accompanied by an occasional swath of lighter sky or olive hue. Dazzling luster ensures superior eye appeal. This crisply struck and immaculate cent represents the finest obtainable quality.

Currently, PCGS has only graded one MS68 Red example for every 105,500,000 pieces originally minted. Consider also that PCGS has only certified 66 Lincoln cents as MS68 Red for the entire series from 1909 to 1958, with a single 1919 cent certified as MS69 Red. Population: 3 in 68 Red, 0 finer (4/09).

Ex: *The Joshua and Ally Walsh Collection of United States Cents* (Heritage, 1/2006), lot 281. (#2677)

- 195 1943 MS68 PCGS. A virtually flawless Superb Gem with bright and utterly distraction-free surfaces. It is tied for numerically finest known to NGC or PCGS (4/09). (#2711)

- 196 1948-D MS67 Red PCGS. Decisively detailed with vibrantly lustrous peach and orange surfaces. This charming Superb Gem is tied for finest Red representative known to PCGS (3/09). (#2764)

- 197 1952-D MS67 Red PCGS. Boldly impressed with fiery copper-orange color. A faint variation line is visible in the field to the right of Lincoln's head. Tied for the finest Red example certified by PCGS (3/09). (#2800)

Lovely MS62 Brown 1955 Doubled Die Obverse Cent

- 198 1955 Doubled Die Obverse MS62 Brown PCGS. FS-101, formerly FS-021.8. Arguably the most famous American doubled die variety, offered here unworn with rosewood and violet-brown surfaces. Overall detail is pleasing, and the doubling is prominent. Only a few scattered, wispy abrasions in the fields contribute to the grade. The portrait is pleasingly preserved. (#2825)

- 199 1972 Doubled Die Obverse MS67 Red ICG. FS-101, formerly FS-033.3. The popular *Guide Book* doubled die, readily visible to the unaided eye. Light copper-gold surfaces are untouched save for a tiny flyspeck along the right edge of Lincoln's coat. (#2950)

PROOF LINCOLN CENTS

Popular 1909 VDB Cent, PR64 Red and Brown

- 200 1909 VDB PR64 Red and Brown PCGS. While the 1909 VDB business strike Lincolns are not rare—many Uncirculated coins were saved by the droves of collectors in 1909 enamored of the new cent design, and produced in quantities considerable enough to allow that to happen—the proofs of the same issue are quite rare and elusive. That is doubly true when 1909 VDB proofs have problem-free surfaces with good color.

Lange notes in his *The Complete Guide to Lincoln Cents* that “most collectors seeking a proof of the new cent had to satisfy themselves with [a 1909 ‘Plain’ cent] lacking the initials V.D.B.” The recorded mintage figure is only 420 proofs for the 1909 VDB, much lower than the 1909 “Plain” at 2,198 proofs. With the Mint release this year of the new Lincoln bicentennial commemorative cent reverses, prices for all 1909 cents have skyrocketed, with the present issue leading the pack. This example offers even, slightly mellowed red color overall. The strike is intricately detailed, with the high-squared-off rims and matte appearance characteristic of the issue. The piece appears problem-free and certainly looks much nicer aesthetically than the conservative PR64 Red and Brown grade might imply. Population: 20 in 64 Red and Brown, 31 finer (4/09). (#3301)

201 1909 PR64 Red NGC. An exquisite example of this first-year matte proof Lincoln cent issue, struck after the removal of the designer's initials from the reverse. Though slight disturbances and spots appear in the olive-tinged copper-gold fields, the texture and eye appeal are first-rate. (#3305)

202 1910 PR65 Red and Brown PCGS. Fully struck with gorgeous, fine grain surfaces characteristic of matte proofs. The obverse shows lovely red-brown and gold color, with just a couple of tiny carbon flecks, while the reverse is carbon-free and is covered by deep purple-rose toning. Both sides are contact-free. Population: 49 in 65 Red and Brown, 18 finer (4/09). (#3307)

203 1913 PR65 Red and Brown PCGS. The early matte proof Lincoln cents have an elegance that cannot be matched by the business strikes. This piece displays full design definition and decent surface preservation, with no contact marks or hairlines and just a couple of tiny carbon flecks on the obverse. The reverse also displays variegated bright-green and fire-red iridescence at acute angles. Population: 63 in 65 Red and Brown, 14 finer (4/09). (#3316)

Charming 1914 Cent, PR66 Red and Brown

204 1914 PR66 Red and Brown PCGS. Razor-sharp striking definition with unusual and beautiful color. Ruby, orange and violet shadings dominate the eye appeal of the finely textured surfaces. The 1914 matte proof Lincoln cent has a mintage of 1,365 pieces, less than half the figure of the previous year and a sign of collector fatigue with the matte proof concept. (#3319)

Appealing 1936 Type Two Cent, PR65 Red

205 1936 Type Two—Brilliant Finish PR65 Red PCGS. CAC. Orange-gold and beige-gold colors compete for territory on both sides of this brilliant Red Gem, and a decisive strike leaves strong delineation on the design elements. A handful of tiny light flecks do not take away from the overall pleasing eye appeal. The Type Two proofs have a fully mirrored format. (#3335)

1937 Lincoln Cent, PR67 Red Ultra Cameo

206 1937 PR67 Red Ultra Cameo NGC. There have been only three proof Lincoln cents minted prior to 1942 and designated Ultra Cameo by NGC. Among those three coins, this example is the single highest graded. The fields are exceptionally deeply mirrored and contrast with the frosted legends and devices. The connoisseur will surely appreciate the quality of this exceptional Superb Gem. Ex: Souder Collection (Heritage, 11/2005), lot 2026. (#93338)

207 1939 PR67 Red NGC. CAC. Fresh copper-orange surfaces are beautifully mirrored and unturned. Decisively struck and gorgeous, a specimen tied for numerically finest Red example known to NGC or PCGS (4/09). (#3344)

208 1950 PR67 Red Ultra Cameo NGC. Orange-gold surfaces display strong field-motif contrast and are devoid of mentionable marks or spots. The design elements are exquisitely struck. Census: 13 in 67 Red Ultra Cameo, 0 finer (4/09). (#93359)

Gorgeous 1952 Lincoln Cent, PR68 Red Cameo

209 1952 PR68 Red Cameo NGC. Although it lacks the impressive appearance of an Ultra Cameo, this first-class Lincoln cent is an exquisite piece with fully brilliant orange mint color. The mirrored fields are extremely deep around lustrous copper devices. This piece ranks among the finest 1952 proof Lincoln cents and is truly a coin for the connoisseur. (#83365)

Magnificent 1955 PR68 Red Ultra Cameo Cent

210 1955 PR68 Red Ultra Cameo NGC. Firmly struck with crystal-clear design elements and majestically deep reflectivity in the fields. The devices are richly frosted, and both sides show stark cameo contrast. One of the finest known examples of this proof issue, which is unsurpassed at NGC and only bettered by a single PR69 Deep Cameo coin at PCGS. Census: 5 in 68 Red Ultra Cameo, 0 finer (3/09). (#93374)

Great 1956 Lincoln Cent, PR69 Red Ultra Cameo

- 211 1956 PR69 Red Ultra Cameo NGC.** Rick Tomaska once noted that proof Lincoln cents from this decade do not generally show great cameo contrast on the reverse, but this magical specimen shows profound field-to-device contrast on both sides. Fully struck, immaculately preserved, and essentially brilliant. None are graded any finer at either service. Census: 2 in 69 Red Ultra Cameo, 0 finer (3/09).(#93377)

Unsurpassed 1957 Lincoln, PR68 Ultra Cameo

- 212 1957 PR68 Ultra Cameo NGC.** A bold and brilliant piece with rich contrast. The copper-orange surfaces have just a few tiny specks of milky patina below the M and E in AMERICA. A couple of curly lintmarks are noted on the obverse: one just below R in TRUST and the other directly above the 7 in the date, at approximately 3 o'clock. Census: 3 in 68 Red Ultra Cameo, 0 finer (3/09).(#93380)
- 213 1959 PR68 Red Deep Cameo PCGS.** Copper-gold coloration runs over the immaculately preserved surfaces of this stunning Deep Cameo. Boldly struck throughout. Population: 27 in 68 Red Deep Cameo, 3 finer (4/09).(#93386)

**Nearly Perfect 1960 Small Date Lincoln Cent
PR69 Ultra Cameo**

- 214 1960 Small Date PR69 Ultra Cameo NGC.** The 1960 Small Date Lincoln cent is much scarcer than its Large Date counterpart, both in business strike and proof format. The present piece is remarkable for its radiant frosted devices and exemplary, carbon-free surfaces. The cherry-red color is deep and uniform across each side. A gorgeous piece in near-perfect condition.(#93392)

**THE MICHAEL H. WILLIAMS
COLLECTION OF TWO CENT PIECES**

- 215 1864 Large Motto MS65 Red PCGS.** Yellow-gold dominates, although orange-red occupies much of the obverse periphery. Well struck with good luster and an absence of abrasions. A few minuscule flecks near STATES. Certified in a green label holder.
From The Michael H. Williams Collection. (#3578)
- 216 1865 MS65 Red PCGS.** Plain 5. KF-P16-RPD. The date is lightly repunched, most apparent above the flag of the 1. Olive and yellow-gold with a blush of cherry-red on the shield. Crisply struck and lustrous with minor carbon and no visible marks. Certified in a green label holder.
From The Michael H. Williams Collection. (#3584)

Scarce Red Gem 1866 Two Cent

- 217 1866 MS65 Red PCGS.** A fully struck Red Gem with undisturbed lustrous sun-gold and pumpkin-orange surfaces. A hint of cherry-red is seen on the lower right portion of the wreath. A few pinpoint flecks on the reverse periphery deny perfection. Encased in a green label holder. Population: 35 in 65 Red, 7 finer (4/09).
From The Michael H. Williams Collection. (#3590)

Elusive MS65 Red 1867 Two Cent

- 218 1867 MS65 Red PCGS.** Orange-red consumes the obverse, as well as the reverse margin. The central reverse is steel-blue. Mintages of two cent pieces declined annually throughout the 10 years of the denomination. Housed in an old green label holder. Population: 20 in 65 Red, 0 finer (4/09).
From The Michael H. Williams Collection. (#3593)

Challenging Red Gem 1868 Two Cent Piece

- 219 **1868 MS65 Red PCGS.** Consistent canary-gold luster shimmers across this nicely impressed and unmarked Gem. A loupe locates minor pinpoint flecks near 12 o'clock on the reverse. Certified in a green label holder, as are all the coins in this date run of Red Gem two cent pieces. Population: 11 in 65 Red, 3 finer (4/09).
From The Michael H. Williams Collection. (#3599)

PROOF TWO CENT PIECES

- 220 **1869 PR65 Red PCGS.** This flashy apricot-gold Gem possesses an intricate strike and little indication of carbon. The upper obverse border has slightly deeper ruby-red tints. Encased in a green label holder. A meager 600 proofs were struck. Population: 40 in 65 Red, 10 finer (4/09).
From The Michael H. Williams Collection. (#3641)

Elusive Red Gem Proof 1870 Two Cent

- 221 **1870 PR65 Red PCGS.** A canary-gold beauty whose reflective fields lack contact marks. The strike is exacting, and any carbon is limited to the lower left obverse periphery. Much of the mintage of 1,000 proofs was eventually melted as unsold by the Mint. Certified in a green label holder. Population: 37 in 65 Red, 9 finer (4/09).
From The Michael H. Williams Collection. (#3644)

PR65 Red 1871 Two Cent Piece

- 222 **1871 PR65 Red PCGS.** This lovely yellow-gold Gem is boldly impressed and nearly devoid of carbon. The fields lack any indication of hairlines. WE TRUST is die-doubled, as always for proofs of this low mintage date. Housed in a green label holder. Population: 37 in 65 Red, 12 finer (4/09).
From The Michael H. Williams Collection. (#3647)

- 223 **1872 PR65 Red PCGS.** Since the 1872 business strike is rare, proofs are often selected instead for date sets. The yellow-gold surfaces are essentially perfect save for minuscule flecks near 5 o'clock on the obverse. In a green label holder. Population: 36 in 65 Red, 13 finer (4/09).
From The Michael H. Williams Collection. (#3650)

Proof-Only 1873 Two Cent Piece Closed 3, PR65 Red

- 224 **1873 Closed 3 PR65 Red PCGS.** The proof-only 1873 two cent piece comes in two varieties. Closed 3 specimens are considered to be original strikings. Open 3 pieces were apparently coined by "midnight minters" a few years later, to meet collector demand for examples. This Closed 3 Gem has a needle-sharp strike and lovely sun-gold and rose color. Certified in a green label holder. Population: 18 in 65 Red, 13 finer (4/09).
From The Michael H. Williams Collection. (#3653)

ADDITIONAL TWO CENT PIECES

- 225 **1864 Large Motto MS65 Red NGC.** Highly lustrous with lovely copper-red coloration across the two sides. The design elements are sharply defined, with possible repunching noted on all four digits of the date. Well preserved and distraction-free. Always popular as the first year of the two cent denomination. Census: 2 in 65 Red, 1 finer (4/09). (#3578)

Formidable 1864 Two Cent, Large Motto, MS66 Red

- 226 **1864 Large Motto MS66 Red PCGS. CAC.** A highly lustrous peach-gold Premium Gem. This piece is impressively devoid of abrasions, and the type is practically unobtainable any finer. The obverse is essentially as made, and we note just a couple of tiny flecks on the reverse periphery. Population: 46 in 66 Red, 1 finer (4/09).
Ex: FUN Signature (Heritage, 1/2005), lot 5537. (#3578)
- 227 **1865 MS65 Red PCGS.** Fancy 5. Though this piece shows considerable variation in color, from copper-gold to fire-orange and dusky peach, it remains thoroughly Red. Well-preserved and pleasingly struck, a great Gem. Certified in an old green label holder. (#3584)
- 228 **1866 MS66 Red and Brown NGC.** Luminous mahogany and copper-orange shadings split along a strong vertical line on both obverse and reverse. Well-defined and minimally marked. (#3589)
- 229 **1867 MS64 Red PCGS. CAC.** A well struck and thoroughly appealing near-Gem two cent. It boasts rich copper-orange color with minor spotting inside the shield. Population: 34 in 64 Red, 20 finer (4/09). (#3593)

Attractive 1869 Two Cent, MS65 Red

- 230 1869 MS65 Red NGC.** The 1869 is a better date in the two cent series. Fully Red coins are especially hard to come by. Uniform copper-orange color covers this attractive Gem, and an exacting strike brings out strong detail on the design elements. A few minuscule light toning spots are not bothersome. Census: 19 in 65 Red, 2 finer (4/09).(#3605)

Seldom Seen Red Gem 1871 Two Cent

- 231 1871 MS65 Red PCGS.** Crisply struck and lustrous with slightly mellowed orange-red and olive-gold surfaces. Business strike Gems from the 1870s are difficult to find, since mintages of the denomination steadily dwindled. Encased in a green label holder. Population: 13 in 65 Red, 0 finer (4/09).(#3611)

PROOF TWO CENT PIECES

- 232 1867 PR66 Red and Brown NGC. CAC.** This alluring two-toned specimen exhibits lime-green color in the fields and reddish-copper patina on the high points of the design. Sharply struck, well preserved, and free of distractions. Census: 18 in 66 Red and Brown, 1 finer (4/09).(#3634)
- 233 1869 PR65 Brown NGC.** Though medium-brown shadings prevail on this Gem, a degree of dusky pumpkin-orange is noted near the rims. Beautifully detailed and pleasingly preserved, one of just 600 pieces struck.(#3639)

Red Gem Proof 1869 Two Cent

- 234 1869 PR65 Red PCGS.** This orange-red Gem features an exacting strike and an unabraded appearance. Outstanding eye appeal for this challenging proof issue, limited to only 600 pieces, not many of which remain full red. A small spot is placed in obscurity above the first S in STATES. Housed in a green label holder. Population: 40 in 65 Red, 10 finer (4/09).(#3641)

Gorgeous PR66 Red and Brown 1870 Two Cent

- 235 1870 PR66 Red and Brown PCGS.** This proof's mahogany and copper-orange shadings blend on the obverse, but the reverse has the lighter color outside the wreath and the deeper toning within. Crisply impressed with only the most trivial flaws visible, even under close inspection. Population: 10 in 66 Red and Brown, 0 finer (4/09).(#3643)

Sharp 1872 Two Cent, PR66 Red and Brown

- 236 1872 PR66 Red and Brown PCGS.** A solid strike emboldens the design motifs of this Premium Gem, and copper-gold, impeccably preserved surfaces are splashed with crimson and apple-green. Rotating the coin slightly beneath a light source brings out pleasing field-device contrast. Population: 17 in 66 Red and Brown, 1 finer (4/09).(#3649)

Pleasing 1873 Closed 3 Two Cent, PR63 Brown

- 237 1873 Closed 3 PR63 Brown PCGS. CAC.** Around 600 proofs are believed to have been struck of the Closed 3 variant. This is an especially pleasing example that has much red intermixed with the overall brown patina. There are no obvious marks on the piece, and the coloration would mask them in any case. The strike is sharp but not quite complete on the leaves. Population: 24 in 63 Brown, 47 finer (4/09).(#3651)

**Popular 1873 Closed 3 Two Cent
PR64 Red and Brown**

- 238 1873 Closed 3 PR64 Red and Brown PCGS. CAC.** A great Red and Brown example of the proof-only “Original” issue for this final two cent date. The lower and right obverse and upper and right reverse have pale copper-orange color, while the rest of the coin shows dappled mahogany and umber shadings. Distinctive eye appeal. (#3652)

**Wonderful PR67 Red and Brown
1873 Closed 3 Two Cent**

- 239 1873 Closed 3 PR67 Red and Brown NGC.** Strikingly toned with overwhelming originality and eye appeal. This sharply defined Superb Gem offers an intriguing blend of copper-gold, deep mahogany, and mint-green toning. The preservation is excellent on this Closed 3 “Original” two cent piece, coined in the final year for the denomination. (#3652)

Lovely PR65 Brown 1873 Open 3 Two Cent

- 240 1873 Open 3 PR65 Brown NGC. CAC.** One of an estimated 500 examples of the “restrike” or Open 3 two cent proof issue of 1873. The present Gem, though labeled as Brown, nonetheless shows considerable copper-gold dappled with the mahogany and olive shadings that prevail on each side. Strongly struck and well-preserved, though a small planchet flaw is visible near the right arrow feathers. (#3654)

THREE CENT SILVER

Lustrous MS65 1855 Type Two Three Cent Silver

- 241 1855 MS65 NGC.** Second year of the short-lived Type Two design and a worthy coin to acquire for type purposes. This is an impressive example that is mostly brilliant except for a faint bit of peripheral golden color around each side. Each side is sharply struck, and the only ripple in the fabric of the coin is pronounced die clash marks in the fields on each side. Census: 10 in 65, 6 finer (4/09). (#3671)

Colorful Gem 1858 Three Cent Silver

- 242 1858 MS65 NGC.** A pleasing combination of champagne, russet-gold, and sky-blue coloration decorates the well preserved surfaces. Lustrous and boldly struck with only faint clash marks. A scarce Gem survivor from this pre-Civil War date. The average grade for this issue from NGC and PCGS is only 59.7. Census: 42 in 65, 29 finer (4/09). (#3674)

- 243 1859 MS65 PCGS. CAC.** An impressive Gem with swirling luster beneath rich and dappled toning. Green-gold, blue, and silver-gray shadings dominate each side. Population: 25 in 65, 14 finer (4/09). (#3677)

Luminous 1860 Three Cent Silver, MS66 ★

- 244 1860 MS66 ★ NGC.** A luminous example that displays vivid obverse toning which allows it to qualify for the coveted Star designation from NGC, the sole business strike 1860 three cent silver to receive the Star at any grade level. Well struck, from dies that only show faint reverse clash marks, and blemish-free on both sides. From The Estate of Wanna Webster McGhee. (#3678)

- 245 1862 MS65 PCGS.** Luster shines through the medley of medium intensity multicolored toning. The design elements are generally well struck except for the typical localized softness. Both sides are devoid of significant marks. (#3680)

Elusive 1868 Three Cent Silver, MS64

- 246 **1868 MS64 NGC. CAC.** A scarce issue in Mint State with only 3,500 business strikes originally produced, many of which were melted in July 1873. This is a fully struck piece with lovely original toning across each side, primarily in shades of lilac and turquoise-green. The prooflike fields show a few faint marks on the obverse, limiting the grade. Census: 8 in 64, 6 finer (4/09).(#3688)

PROOF THREE CENT SILVER

Exquisite PR66 1863 Three Cent Silver

- 247 **1863 PR66 PCGS. CAC.** An elegant Premium Gem representative of this treasured Civil War-era proof three cent silver issue, one of just 460 pieces struck. Strong and well-preserved mirrors shine through rich blue-green and gold-gray patina. A razor-sharp strike crowns the eye appeal. Population: 8 in 66, 0 finer (4/09).(#3712)
- 248 **1863 PR64 Cameo NGC.** Blue-green peripheral tints yield to light silver-gray at the centers. Strongly contrasted, though the frost on the relatively flat devices is not so obvious as it would be on another denomination with more relief. Census: 5 in 64 Cameo, 7 finer (4/09).(#83712)
- 249 **1865 PR65 NGC.** Gold and violet shadings mingle on this exquisitely toned Gem proof. Crisply detailed with intense mirrors beneath the toning. Census: 26 in 65, 25 finer (4/09).(#3715)
- 250 **1866 PR66 NGC. CAC.** This is a lavishly toned Premium Gem proof with shades of deep electric-green and coral toning gracing highly reflective surfaces. Sharply struck and well-preserved with contact-free surfaces. Census: 19 in 66, 1 finer (4/09).(#3716)

Magnificent 1868 PR65 Cameo Three Cent Silver

- 251 **1867 PR65 Cameo PCGS. CAC.** A medley of lavender, cobalt-blue, and gold-beige patination assumes deeper shades on the reverse of this magnificent Gem, and a powerful strike lends razor-sharp definition to the design elements. A nicely preserved specimen of this Type Three trime. Population: 9 in 65 Cameo, 6 finer (4/09).(#83717)
- 252 **1868 PR65 PCGS. CAC.** Blue-green, violet, gold, and rose shadings mingle on each side of this sharply struck and carefully preserved Gem. Powerful mirrors flash through the patina. Population: 40 in 65, 9 finer (4/09).(#3718)
- 253 **1872 PR64 PCGS.** The nearly untuned obverse cedes to splashes of reddish-brown on the reverse. This exquisitely struck piece reveals some reverse pinscratches under magnification. Housed in a green label holder. Population: 90 in 64, 43 finer (4/09).(#3723)
- 254 **1873 PR64 PCGS. CAC.** This Choice proof hails from the last year of production for the three cent silver denomination. Green-gold and emerald toning drapes strongly mirrored, faintly hairlined surfaces. (#3724)

Pleasing PR65 Cameo 1873 Three Cent Silver

- 255 **1873 PR65 Cameo PCGS.** Though richly toned, this final-year proof three cent silver retains strong contrast. The sharply struck devices are frosted and primarily silver-white, with only occasional hints of the rose-tan and blue-green toning that drapes the gleaming fields. Population: 7 in 65 Cameo, 3 finer (4/09).(#83724)

THREE CENT NICKELS

Dazzling MS66 ★ 1882 Three Cent Nickel

- 256 1882 MS66 ★ NGC.** Only 22,200 business strikes were produced of this scarce issue, and proofs are more frequently encountered in high grades. This is a superlative example with mildly prooflike fields and only a hint of gold toning. Well struck aside from the dentils. The only business strike 1882 to receive a Star designation from NGC (4/09).
Ex: *Baltimore Signature* (Heritage, 7/2003), lot 5913, which realized \$2,760. (#3750)

MS67 1888 Three Cent Nickel Elusive as a Business Strike

- 257 1888 MS67 PCGS.** As the three cent nickel series wound to a close, mintages dwindled to low levels. This issue, for example, is from a mintage of just 41,083 coins, a production that includes 4,582 proofs. Seldom does a Superb Gem business strike appear on the market. When numerically high quality examples do become available, they are usually proofs. Sharply struck with iridescent green-gold and lilac toning. Population: 32 in 67, 1 finer (4/09).
Ex: *New York Signature* (Heritage, 7/2004), lot 5384, which realized \$2,817.50. (#3757)

PROOF THREE CENT NICKELS

Attractive 1865 Three Cent Nickel PR64 Deep Cameo

- 258 1865 PR64 Deep Cameo PCGS. CAC.** The deeply cameoed surfaces of this near-Gem proof display a veneer of soft champagne-gold patina. A decisive strike leaves sharp definition on the design elements, including virtually complete detail in the lines of the III. A scattering of tiny light flecks does not detract. Population: 3 in 64 Deep Cameo, 12 finer (4/09). (#93761)

- 259 1869 PR65 PCGS. CAC.** Excellent detail with light nickel-gray color overall and hints of rose and lilac. Well-mirrored and elegantly appealing. PCGS has graded 13 finer proofs (4/09). (#3765)
- 260 1879 PR67 Cameo NGC.** Impeccable striking definition and nearly perfect surface preservation are hallmarks of this great Superb Gem proof. The upper and lower loops of the 9 in the date are filled. Vivid cameo contrast is evident on each side, between the deeply watery fields and frosted devices. Census: 24 in 67 Cameo, 6 finer (4/09). (#83775)
- 261 1884 PR67 NGC.** Crisply struck with untuned surfaces and bright proof luster. Faint lint marks are noted on Liberty's cheekbone and just beneath her eye. A conditionally scarce specimen, with only one non-Cameo piece graded even finer by NGC (4/09). (#3780)
- 262 1884 PR67 Cameo PCGS.** A degree of rose-gold color lightly accents each side. Exquisitely struck with a pronounced cameo appearance. The surfaces are immaculately preserved. Population: 21 in 67 Cameo, 2 finer (4/09). (#83780)
- 263 1886 PR67 PCGS.** Generally crisply struck throughout, although the lower serifs of 1 in the date are oddly weak, perhaps due to some form of die polish. The surfaces are immaculate, and the piece is essentially untuned. A great Superb Gem three cent nickel. Only 4,290 proofs were struck. Population: 43 in 67, 3 finer (4/09). (#3782)

SHIELD NICKELS

Exceptional 1866 Rays Five Cent, MS66

- 264 1866 Rays MS66 NGC.** The 1866 is in high demand as the first year of issue and for inclusion in type sets for the With Rays design. This Premium Gem displays lustrous surfaces covered with a veneer of light golden-tan patina. A better-than-average strike sharpens the design elements, including the horizontal shield lines and star centrils, areas that are often weak. Well preserved, with no mentionable contacts or spots. Some fine peripheral cracks are visible, as often seen. Census: 24 in 66, 0 finer (4/09). (#3790)
- 265 1867 No Rays MS66 NGC.** Lustrous and lightly toned with an especially pleasing obverse. The borders display the various cracks commonly seen on early Shield nickels, and the reverse border is swollen near 1 o'clock, as made. An interesting die line rests atop the vertical shield stripes. Census: 30 in 66, 0 finer (4/09). (#3794)
- 266 1868 MS66 NGC.** Generally bold, if slightly flat on several of the reverse stars and on one or two of the vertical shield lines near the central obverse. The coin's luster quality is amazingly bright and vibrant. Essentially untuned with noticeable die cracks on each side, but with no post-striking distractions to limit the grade. Census: 31 in 66, 2 finer (4/09). (#3795)
- 267 1870 MS65 NGC.** A remarkable Gem with bold design features and brilliant light-gray surfaces. Both sides exhibit frosty luster. The obverse has several die cracks and some short die file marks at the border right of the date. Census: 33 in 65, 6 finer (4/09). (#3797)

Lovely MS66 1872 Nickel

- 268 1872 MS66 PCGS. CAC.** On this well-defined Premium Gem, all reverse stars have visible central lines, though this element is a trifle weak on the rightmost stars. Impressive luster shines through thin veils of lilac and pale nickel-gray color. Assorted peripheral die cracks as usual. Tied for the finest certified by PCGS (4/09). (#3799)

Radiant 1874 Nickel, MS66

- 269 1874 MS66 NGC. CAC.** Radiant luster blossoms out from both sides of this Premium Gem five cent. Essentially untoned surfaces exhibit sharply struck design features, with no areas revealing hints of weakness. A well preserved specimen, free of mentionable marks or spots. Available in most Mint State grades, but rare in MS66. Census: 4 in 66, 0 finer (4/09). (#3803)
- 270 1882 MS66 PCGS.** Pleasingly detailed, including on the reverse stars. A great Premium Gem example of this later Shield nickel issue with vibrant luster. Population: 70 in 66, 4 finer (4/09). (#3812)
- 271 1883 MS66 NGC.** Light almond-gold toning enriches this lustrous and essentially unabraded Premium Gem. Crisply struck save for slight blending of detail near TRUST. A saved date, but scarce in such a lofty grade. (#3813)

PROOF SHIELD NICKELS

- 272 1867 No Rays PR65 NGC.** From the usual Reverse IIa hub, although some No Rays 1867 proofs were struck using the reverse die of Judd-507, which has a different star alignment. Flashy and untuned with a mark-free appearance and a faint spot near IN. Only 600 proofs struck. Census: 43 in 65, 9 finer (4/09). (#3821)

Challenging 1870 Shield Nickel, PR66

- 273 1870 PR66 NGC.** The 1870 Shield nickel proof mintage is given as 1,000-plus in the 2009 *Guide Book*, while David Bowers reports an estimate of 850 to 1,000. In any event, the 1870 is challenging in the lofty grade of PR66, where fewer than 20 pieces have been graded by NGC and PCGS and none finer. A solid strike imparts virtually complete detail to the devices, including the star centers, elements that are sometimes ill-defined. Soft beige-gold patina occupies both sides, each of which is devoid of mentionable marks. Census: 15 in 66, 0 finer (4/09). (#3824)
- 274 1875 PR66 NGC.** Beautifully detailed for this proof Shield nickel issue with gleaming mirrors. Dramatically, if subtly toned with broad zones of pastel-yellow and sky-blue. Census: 22 in 66, 1 finer (4/09). (#3829)
- 275 1878 PR66 PCGS. CAC.** Bright nickel-white surfaces show occasional suggestions of gold. The luster is bright, but has a greater cartwheel than is normally found on proofs. PCGS has graded 14 finer pieces (4/09). (#3832)
- 276 1881 PR67 PCGS. CAC.** Light golden overtones grace otherwise nickel-gray surfaces. An exquisitely detailed and carefully preserved Superb Gem that offers delightful eye appeal. Population: 23 in 67, 0 finer (4/09). (#3836)
- 277 1881 PR66 Cameo PCGS.** Minor repunching is evident on the second 8 in the date. Sharply struck throughout, with carefully preserved surfaces. Nice field-to-device contrast is evident on both sides. Population: 47 in 66 Cameo, 10 finer (4/09). (#83836)
- 278 1882 PR67 Cameo NGC.** Decisively detailed and essentially untuned. The lack of patina lets the contrast between the lightly frosted devices and the gleaming mirrors stand out. Census: 23 in 67 Cameo, 0 finer (4/09). (#83837)
- 279 1883 PR66 PCGS.** A visually alluring Premium Gem, with lovely chestnut-gold toning and clean, well preserved surfaces. The design elements are reproduced with razor-sharp precision. (#3838)

LIBERTY NICKELS

- 280 1884 MS66 NGC.** FS-301, formerly FS-013.8. The 1 is widely repunched south, with faint recutting noted on the 8s. The variety is undesignated on the NGC insert. Light chestnut-gold patina graces this lustrous and sharply struck Premium Gem. Only the left ear of corn lacks ultimate definition. Immaculate save for an obscure mark on the base of the nose. Census: 14 in 66, 1 finer (4/09).(#3845)

- 281 1885 AU53 NGC.** Luminous olive-gold and nickel-gray shadings mingle on this well struck, briefly circulated Liberty nickel key. Minimally marked and fundamentally pleasing.(#3846)

Attractive 1886 Key Date Nickel, MS65

- 282 1886 MS65 NGC.** The 1886 is one of the key dates to the Liberty Head nickel series. The essentially untuned surfaces of this Gem yield pleasing frosty luster and are devoid of mentionable contact marks or spots. Most of the design elements are sharply struck, except for softness in the upper right star centers and in the wreath directly left of the bow knot. Census: 25 in 65, 3 finer (4/09).(#3847)

- 283 1890 MS65 PCGS.** A strongly struck and gorgeous Gem. The obverse is subtly lustrous beneath peach patina, while the generally nickel-white reverse offers greater radiance. Population: 46 in 65, 11 finer (4/09).(#3851)

- 284 1890 MS65 PCGS. CAC.** A splendid piece with scintillating luster in the fields and a lovely, bright, essentially untuned appearance, save for a touch of apricot color at several different locations along the reverse rim. The design motifs are boldly rendered overall, even if the left ear of corn and some of the obverse stars are incomplete. Population: 44 in 65, 11 finer (4/09).(#3851)

- 285 1890 MS66 NGC.** Dusky golden-gray and sky-blue patination runs over both sides of this Premium Gem nickel. The design elements are well impressed, except for weakness in the leaves left of the bowknot. Well preserved lustrous surfaces reveal no significant marks or spots. Census: 11 in 66, 1 finer (4/09).(#3851)

Near-Perfect 1899 Liberty Nickel, MS67

- 286 1899 MS67 NGC.** A delicate blanket of honey color evenly covers both sides of this otherwise brilliant Superb Gem. Booming luster and exemplary preservation confirm the lofty grade. Well struck except for the left ear of corn on the lower wreath, which is usually softly defined on business strikes of this underrated type. Census: 4 in 67, 0 finer (4/09).(#3860)

- 287 1900 MS66 PCGS.** Well-defined for this turn-of-the-century issue with only trifling softness visible on the right obverse stars. Faintly toned green-gold with excellent surface quality. Population: 39 in 66, 5 finer (4/09).(#3861)

- 288 1901 MS66 PCGS.** Each side offers impressive luster beneath intermittent green-gray and peach patina. Strongly defined on the central devices but with slight softness on the stars. Population: 41 in 66, 1 finer (4/09).(#3862)

- 289 1907 MS66 NGC.** Subtle rose gold toning envelops the obverse of this attractive Premium Gem, with a touch of dove-gray added into the mix on the reverse. Immensely lustrous for a Liberty nickel with memorable eye appeal. Census: 12 in 66, 0 finer (4/09).(#3868)

Pleasing 1912-S Liberty Nickel, MS64

- 290 1912-S MS64 PCGS.** The key-date representative displays pleasing luster and a blend of orange, yellow-gold and violet patina. The design elements are typically struck, in that the hair above the forehead is somewhat soft, as is the corn ear left of the ribbon bow. Marks of indeterminate origin are visible on the corn ear and in the above field.(#3875)

Important Gem 1912-S Nickel

- 291 **1912-S MS65 NGC.** A great Gem representative of this popular low-mintage issue, the only Liberty nickel struck at San Francisco. Rich gold-orange toning embraces much of each side, and occasional olive accents are also present away from the well struck devices. NGC has certified a mere five numerically finer examples (4/09).(#3875)

PROOF LIBERTY NICKELS

PR67 1883 No Cents Liberty Nickel

- 292 **1883 No Cents PR67 NGC.** Blushes of orange-gold and powder-blue embrace this meticulously struck and unabraded Superb Gem. A colorful specimen of this briefly issued design. The No Cents type was only coined in 1883, and proofs are far scarcer than their business strike counterparts. Census: 19 in 67, 0 finer (4/09).(#3878)
- 293 **1885 PR65 NGC.** Pale gold and nickel-gray colors mingle on this gleaming Gem proof, boldly impressed with modest contrast. The 1885 enjoys considerable popularity thanks to its corresponding low-mintage business strike.(#3883)
- 294 **1888 PR65 Cameo NGC.** Ex: Eliasberg. A delightful piece with a light golden hue. Wonderful cameo contrast gives this piece excellent eye appeal. The first 9 stars are nearly flat, but the central design is exquisitely detailed. A small mark on the V is the only visible flaw.(#3886)
- 295 **1893 PR66 Cameo NGC.** Dramatic gold and orange patina dominates the eye appeal on each side, though pale green-gray color also appears at the margins. Great eye appeal with moderate contrast. Census: 29 in 66 Cameo, 9 finer (4/09).(#3891)
- 296 **1897 PR67 Cameo NGC.** A majestic specimen that was not only produced with exceptional care, but has been meticulously preserved as well. The nearly untuned surfaces display only a few mint-made imperfections on Liberty's portrait and show pronounced contrast between fields and devices. Census: 7 in 67 Cameo, 4 finer (4/09). Ex: FUN Signature (Heritage, 1/2007), lot 2184.(#3895)
- 297 **1899 PR65 Cameo PCGS. CAC.** The sharp strike and moderate contrast leave little doubt as to this coin's proof status, though the mirrored fields also show significant cartwheels. Great eye appeal. Population: 4 in 65 Cameo, 10 finer (4/09).(#3897)

- 298 **1900 PR67 NGC. CAC.** Rich green-gold patina dominates the centers, while lighter nickel-gray is present at the margins. A gorgeous, sharply struck Superb Gem. Census: 26 in 67, 1 finer (4/09).(#3898)
- 299 **1900 PR67 Cameo NGC.** Crisply detailed with distinct field-to-device contrast. This minimally toned Superb Gem is carefully preserved and eminently appealing. Census: 6 in 67 Cameo, 0 finer (4/09).(#3898)

Superb Cameo Proof 1906 Liberty Nickel

- 300 **1906 PR67 Cameo PCGS. CAC.** A splendid type coin that has deeply reflective, mirrored fields. This mirroring sets up a strong contrast against the mint frost over the devices. The obverse is brilliant while the reverse has a slight golden cast. The surfaces are problem-free and appear perfect to the unaided eye. Population: 13 in 67 Cameo, 1 finer (4/09).(#83904)

Elusive 1908 PR67 Cameo Five Cent

- 301 **1908 PR67 Cameo PCGS. CAC.** Despite the mintage of 1,620 coins, the 1908 is among the rarest in the Liberty Head proof series. Cameo are especially elusive, particularly in this lofty level. The ice-blue center on the obverse is framed by yellow-gold, while the reverse displays variegated yellow-gold, mint-green, and rose coloration. Exquisitely struck and devoid of mentionable marks or spots. Population: 4 in 67 Cameo, 0 finer (4/09).(#83906)
- 302 **1910 PR67 PCGS.** This later Liberty nickel proof is crisply struck with gorgeous iridescent toning. Green-gold, nickel-blue, and rose-violet shadings dominate the eye appeal. Population: 30 in 67, 2 finer (4/09).(#3908)

Stunning 1910 Five Cent, PR68 Cameo

- 303 **1910 PR68 Cameo NGC.** Heavily frosted motifs stand out against the reflective fields of this Superb Gem proof. An exacting strike leaves sharp definition on the design features, including the corn ear left of the ribbon bow, an area often weak. Whispers of pastel violet, orange-gold, and sky-blue visit both sides, each of which is immaculately preserved. A stunning specimen. Census: 6 in 68 Cameo, 0 finer (4/09). (#83908)

BUFFALO NICKELS

Remarkable, Untoned 1913 Type Two Nickel, MS67

- 304 **1913 Type Two MS67 NGC.** Clean, problem-free surfaces are a given on any coin that is graded MS67. What sets this piece apart is the remarkable, thick mint frost that rolls around each side as it is rotated beneath a light. Perhaps someone will see a faint glimmer of color, but we see this piece as brilliant. Fully struck on the reverse with slight softness on the Indian's hair on the obverse. A remarkable first-year type coin. Census: 12 in 67, 0 finer (4/09). (#3921)

Magnificent MS67 1913 Type Two Nickel

- 305 **1913 Type Two MS67 NGC.** This lovely Superb Gem Type Two Buffalo has much to commend it, starting with unusually nice planchet quality, not in and of itself startling for the issue. Couple that, however, with splendid golden, rose, and pale blue tints, glorious luster, and a sharp strike, and it achieves its status among the couple of dozen finest certified at both services combined (4/09). (#3921)

- 306 **1913-D Type Two MS66 PCGS.** Bright, satiny luster illuminates the silver surfaces, which have gold accents that enhance their overall appeal. The surface preservation of the piece is excellent, and some wispy chatter marks near the center of each side are almost certainly as struck. Population: 49 in 66, 10 finer (4/09). (#3922)

- 307 **1913-S Type Two MS64 PCGS.** The low mintage 1913-S Type Two is the key to a circulated date and mint set. The issue provides best value in Mint State. The present near-Gem has medium cream-gray, rose, and lime toning. Lustrous and sharply struck with prominent clash marks beneath the chin. (#3923)

- 308 **1913-S Type Two MS64 PCGS.** The most challenging of the first-year Buffalo nickel issues, offered here as a richly toned near-Gem. Nickel-blue and gold-orange shadings dominate the eye appeal. (#3923)

Delightful 1913-S Type Two Nickel, MS65

- 309 **1913-S Type Two MS65 PCGS.** An attractive Gem example of this first-year issue, the most challenging of the 1913-dated Buffalo nickels. Both the richly textured obverse and the smoother reverse are unusually well-defined for an S-mint. Faint blue and green-gold tints visit otherwise pale nickel-gray surfaces. PCGS has graded 30 finer examples (4/09). (#3923)

Notable Superb Gem 1914 Nickel

- 310 **1914 MS67 PCGS.** Despite a mintage of over 20 million pieces, the 1914 nickel was not saved like its first-year counterparts, and Gem and better pieces are scarce, with Superb Gems condition rarities. This survivor offers strong, slightly frosty luster with pale nickel-blue and rose-gold toning over each side. Population: 16 in 67, 0 finer (4/09). (#3924)

Superb Gem 1916 Buffalo Nickel

- 311 **1916 MS67 PCGS. CAC.** The 1916 is a nice, early type coin and one that can be located in a wide variety of grades. At the MS67 level it is naturally an elusive issue. Only 20 coins have been so graded at both major services (10 at each), and there is only one coin certified finer (4/09). This is an especially well struck example. The surfaces are mostly brilliant, and there is just the slightest overlay of pale golden color on each side. (#3930)

- 312 1916-S MS65 ★ NGC.** A fantastic survivor for the issue. The strike is substantially above-average, particularly on the braid, and vibrant gold-orange, blue-green, and magenta patina graces quicksilver surfaces. NGC has graded just 14 numerically superior examples (4/09).(#3933)

Appealing MS65 1917-D Nickel

- 313 1917-D MS65 PCGS.** Light pink, blue, and champagne shadings wash over each side of this gorgeous Gem. Uncommonly vibrant luster shines beneath. Despite a mintage of close to 10 million pieces, this Denver issue is scarce at the MS65 level and a rarity any finer. PCGS has graded only 13 such pieces (4/09).(#3935)

Attractive MS65 1917-S Nickel

- 314 1917-S MS65 PCGS.** The strike is unusually sharp for this San Francisco issue, and the detail on the portrait borders on absolute, as does the definition on the bison's head and shoulder. Colorful toning ranges from light orange-gold to dusky peach. PCGS has certified 22 finer examples (4/09).(#3936)

Bright, Lightly Toned MS66 1917-S Nickel

- 315 1917-S MS66 PCGS.** Pale peach and nickel-blue elements grace the lustrous, slightly frosty surfaces of this desirable Premium Gem. Wonderfully detailed for an S-mint Buffalo nickel, particularly on the portrait's hair and the bison's head and shoulder. Tied for finest certified by PCGS (4/09).(#3936)
- 316 1918-D MS64 NGC.** Well struck and highly appealing thanks to the shimmering honey-gold luster and essentially pristine surfaces. A splendid near-Gem that offers plenty for the Buffalo nickel enthusiast. (#3938)

Scarce 1918/7-D Buffalo Nickel, Fine 15

- 317 1918/7-D Fine 15 PCGS.** FS-101, formerly FS-016.5. This piece retains plenty of detail for the grade, and the overdate feature is relatively easy to see under low magnification. Pale gray and tan coloration appears in a somewhat variegated pattern on each side. The surfaces are smooth and free of any troubling blemishes. (#3939)

Key XF 1918/7-D Nickel

- 318 1918/7-D XF40 NGC.** FS-101, formerly FS-016.5. The upper right corner of the 7 is obvious, as is the thickness of the crossbar and downstroke. A nicely defined example with a clear date and original pearl-gray and charcoal surfaces. Along with the 1916 Doubled Die, the key to a *Guide Book* collection of Buffalo nickels. (#3939)

- 319 1921 MS66 PCGS.** Sharply struck and highly lustrous with delightful toning on the reverse. The obverse has frosty luster with light gray color accented by hints of gold at the borders. The reverse has a wonderful display of color, including gold, lilac, and green. Few finer examples of this issue have been certified; PCGS has graded just 18 such pieces (4/09).
From The Joseph C. Thomas Collection, Part Two. (#3947)

Subtly Toned 1921-S Buffalo Nickel, MS64

- 320 1921-S MS64 PCGS.** The 1921-S is one of the great strike rarities as well as absolute rarities in the Buffalo nickel series. This piece lacks the planchet flaws, die cracks, and grease stains often seen on this issue, the only Mint-made flaw being occasional heavy metal flow in the reverse field. The obverse striking details are complete, but the reverse is less so, with some softness noted on the bison's head as well as the tail. The surfaces are bright and highly lustrous, and each side is toned in attractive, multicolored "oil slick" shades.
From The Joseph C. Thomas Collection, Part Two. (#3948)

Important Gem 1921-S Buffalo Nickel

- 321 **1921-S MS65 PCGS. CAC.** Impressively lustrous with pleasingly above-average detail for this often-weak San Francisco issue. Marks are minimal, particularly on the reverse. The fields have an orange peel texture, as made from long-lived dies. Housed in a green label holder. Population: 53 in 65, 8 finer (4/09). (#3948)

Well Struck MS65 1925-D Buffalo Nickel

- 322 **1925-D MS65 PCGS.** Unlike so many of its peers, the present 1925-D has a pleasing strike. The mintmark is well formed, and the devices are evenly detailed. Faint almond-gold toning visits the lustrous surfaces, which appear unabraded save for a solitary concealed hairline within the Indian's hair. Population: 68 in 65, 3 finer (4/09). (#3955)

Satiny, Boldly Struck Gem 1925-S Nickel

- 323 **1925-S MS65 PCGS.** David Lange in 2006 had this to say about the typical 1925-S Buffalo nickel: "In combination with their generally mushy appearance, the aesthetic value of this issue is low, regardless of its certified grade. Collectors, whatever their budget, buy this date simply to complete their sets." That is perhaps the most pessimistic evaluation he gave to any issue. The collector who views this simply stellar Gem, however, has every reason to disagree. Everything the typical example is, this wonderful coin is not.
- Both sides have intermingled shades of pastel rose at the center, framed by rings of light blue and pale gold. The attractive toning further enlivens the satiny, fully lustrous surfaces. Each side exhibits light clash marks. The obverse displays prominent flow lines near the border, suggesting a late die state, although the reverse die appears quite fresh. The obverse strike is far above average, with a bold LIBERTY fully separated from the border. The reverse strike is full, practically unheard-of on a 1925-S Buffalo nickel. The bison's head details are fully defined, the tail is completely outlined and split over the hindquarter, and the mintmark is undeniably complete. PCGS has certified only a single piece finer (4/09). (#3956)

Nicely Struck 1926-D Five Cent, MS65

- 324 1926-D MS65 PCGS. Golden-gray patina with an occasional hint of violet bathes the highly lustrous surfaces of this wonderful Gem. While not fully struck, as virtually none are (David Bowers, 2007), the design elements exhibit above-average definition; only the hair at the forehead is soft. Both faces are free of mentionable marks or spots. Population: 88 in 65, 24 finer (4/09).(#3958)

Desirable MS65 1928-S Nickel

- 325 1928-S MS65 PCGS. The 1928-S is one of several issues of its decade notorious for a soft strike, but as this Gem proves, there are exceptions. The bison's head and horn are particularly well-defined. Light nickel-gray surfaces have quicksilver luster and occasional elements of olive-gold toning near the rims. PCGS has graded five finer pieces (4/09).(#3965)

Sharp 1928-S Buffalo Nickel, MS66
Tied for Finest Certified

- 326 1928-S MS66 NGC. The 1928-S Buffalo nickel is an issue that fortunately is often found with sharp details and an overall good appearance. Although it is sometimes grouped with later mintmarked issues in the series that are less elusive, such as the 1929-S, 1930-S, and 1931-S emissions, that is an error that series aficionados do not commit. In point of fact, the 1928-S in top grades is much more difficult than those later pieces, in that respect having much more in common with the 1927-S.

This example, like most, is sharply if not fully struck, with bright mint luster enlivening the light rose and lilac toning on both sides. In MS66 this piece is one of the six finest certified at NGC (4/09). There are likewise none finer at PCGS.(#3965)

Appealing MS67 1934 Nickel

- 327 1934 MS67 PCGS. This Philadelphia issue enjoys ready availability through most grades, though at the MS67 level, it is a condition rarity like many of its fellows. The Superb Gem offered here has needle-sharp detail on the bison's head and impressive luster with a hint of frostiness. Faint peach-gold color visits parts of each side. Population: 18 in 67, 0 finer (4/09).(#3972)

- 328 1934-D MS66 PCGS. CAC.** Well struck overall with strong and pleasing luster. Delicate nickel-white surfaces show splashes of gold, peach, and blue patina. Population: 42 in 66, 0 finer (4/09). (#3973)
- 329 1936-D 3 1/2 Legs VF25 PCGS. CAC. FS-901, formerly FS-019.** This abraded-foreleg variety is more elusive than its 1937-D Three-Legged cousin, but it remains generally underrated. This midrange example has luminous nickel-gray surfaces with few abrasions. For the variety, Population: 5 in 25, 21 finer (4/09). (#3978)
- 330 1937-D Three-Legged AU53 NGC. FS-901, formerly FS-020.2.** Both sides of this popular variety exhibit light to medium gray patina with soft golden undertones. The design elements are well defined and the clean surfaces reveal just a couple of stray unimportant marks. (#3982)
- 331 1937-D Three-Legged AU55 PCGS. FS-901, formerly FS-020.2.** Perhaps the most famous die state variety in 20th century American numismatics, offered here as a scarcely worn example with strong luster and eye appeal. Delicate blue and gold tints visit the quicksilver surfaces of this softly struck piece. (#3982)
- 332 1937-D Three-Legged AU58 PCGS. FS-901, formerly FS-020.2.** This key date nickel shimmers with luster, and has only slight wear on the bison's hip. Medium dove-gray toning encompasses the unblemished surfaces. (#3982)
- 333 1937-D Three-Legged MS61 NGC. FS-901 (formerly FS-020.2).** An appealing Mint State example of this immensely popular variety. Boldly struck with pale green-gray toning and few marks. A faint pinscratch is noted across the top of the bison's back. (#3982)

Widely Collected MS62 1937-D Three-Legged Nickel

- 334 1937-D Three-Legged MS62 NGC. FS-901, formerly FS-020.2.** A dove-gray key date nickel that has hints of straw-gold near the rims. Luster shimmers across the unblemished surfaces. All diagnostics are present, such as the granular back leg and the trail of tiny die dots beneath the flank. (#3982)

Charming 1937-D Three-Legged Nickel, MS62

- 335 1937-D Three-Legged MS62 NGC. FS-901, formerly FS-020.2.** Gold and peach overtones visit luminous surfaces that are nickel-gray beneath the patina. The central devices show a degree of striking softness, the norm for the issue, but the overall surface quality is better than the MS62 designation might suggest. Overall, a great example of this ever-popular Buffalo nickel variety. (#3982)

PROOF BUFFALO NICKELS

Popular 1913 Type One Nickel, PR65

- 336 1913 Type One PR65 PCGS.** Pastel rose, violet, and greenish-gold patina bathes the luminous surfaces of this sharply struck Gem proof. A scattering of minuscule light flecks over the reverse does not take away from the overall pleasing eye appeal. Much of the demand for this variety comes from type set collectors. (#3988)

1913 Mound Reverse Buffalo Nickel PR66

- 337 1913 Type One PR66 PCGS.** A moderate swath of orange toning visits the portrait, while the reverse displays only hints of marigold patina. A satiny proof representative of the short-lived rough-hewn Type One design. This needle-sharp specimen is one of only 1,520 proofs produced. Encased in a green label holder. (#3988)

Gorgeous 1913 Type Two Nickel, PR67

- 338 1913 Type Two PR67 PCGS.** A Superb Gem matte proof of the redesigned Buffalo nickel with flat ground on the reverse. The obverse retains its texture and vibrancy, the satiny surfaces and vigorous detail of the devices reinforcing each other. Light nickel-gray overall with hints of peach near the rims. Population: 43 in 67, 4 finer (4/09). (#3990)
- 339 1914 PR64 PCGS.** Fraser's classic Buffalo nickel design is fully brought up in all of its glory. Both sides have a light, complete coating of milky greenish-tan patina, which is not unattractive. No contact marks nor hairlines are present on either obverse or reverse. (#3991)
- 340 1915 PR65 NGC.** Exquisitely detailed just a touch of peripheral tan surrounding otherwise pale nickel-gray surfaces. Lovely matte texture enhances the carefully preserved surfaces. (#3992)

- 341 1915 PR65 PCGS.** This exactly struck Gem proof exhibits pale greenish-gray toning over each side. Both sides are clear of hairlines or contact marks, but a spidery die crack extends across the bison's shoulder, and two or three flyspecks are noted elsewhere on the reverse. (#3992)
- 342 1915 PR66 PCGS.** Carefully preserved with bold design definition. The textured surfaces are primarily blue-green on the obverse with additional violet and reddish-orange elements on the reverse. (#3992)

Impressive Gem Proof 1916 Nickel

- 343 1916 PR65 PCGS. CAC.** The 1916 is the lowest-mintage official proof Buffalo nickel issue, with just 600 specimens struck. This Gem, housed in a small-format holder, combines unmistakably sharp detail with an attractive matte texture and lush orange, violet, and nickel-blue patina. Amazing eye appeal in all respects. (#3993)

Pleasing 1916 Gem Proof Nickel

- 344 1916 PR65 PCGS.** Golden-gray surfaces display hints of violet, gold, and mint-green, and take on slightly deeper hues on the reverse. A well executed strike delivers strong delineation to the design motifs, and the pleasing matte surfaces are devoid of mentionable marks or spots. (#3993)

Stunning 1916 Nickel, PR66

- 345 1916 PR66 PCGS.** Demand for matte proof U.S. coins never reached the levels that brilliant or cameo pieces enjoyed, and in 1916, the last year for matte proof Buffalo nickel strikings, only 600 specimens were produced. This gorgeous Premium Gem is decisively detailed with richly textured surfaces beneath intermittent gold and peach toning. (#3993)
- 346 1936 Type One—Satin Finish PR65 PCGS.** Decisively struck with gleaming edges, though the luster is far from the brilliance found on the year's Type Two pieces. Faint golden tints are visible at the margins. (#3994)

- 347 1936 Type Two—Brilliant Finish PR63 NGC.** Gleaming nickel-white overall with a hint of a golden overtone to the fields. Profoundly mirrored and appealing despite light, scattered hairlines that account for the grade. (#3995)
- 348 1936 Type Two—Brilliant Finish PR65 NGC.** Boldly impressed with a chromelike gleam on each side. Glimpses of golden toning add color to otherwise nickel-white surfaces. Marvelous eye appeal. (#3995)
- 349 1936 Type Two—Brilliant Finish PR66 PCGS.** The fields gleam beneath delicate layers of champagne patina, and the devices are crisply struck. A pleasingly preserved Premium Gem with great eye appeal. (#3995)

Wonderful 1936 Brilliant Finish Buffalo, PR67

- 350 1936 Type Two—Brilliant Finish PR67 NGC.** Luminous surfaces are bathed in a veneer of champagne-gold patina imbued with hints of rose and yellow-green. The design elements are boldly impressed and each side is impeccably preserved. The Brilliant proof is collected as a separate variety from the Satin proof. (#3995)

Gleaming 1936 Type Two Nickel, PR67

- 351 1936 Type Two—Brilliant Finish PR67 NGC.** A gorgeous Superb Gem specimen from the first brilliant proof Buffalo nickel issue. The strike is bold, and the fields are reflective with an unmistakable, almost chromelike gleam. Masterfully preserved with memorable eye appeal. NGC has graded just 14 numerically superior pieces (4/09). (#3995)

Gorgeous 1936 Type Two Nickel, PR67

- 352 1936 Type Two—Brilliant Finish PR67 NGC.** A hint of golden toning settles over each side of this gleaming Superb Gem. The strike is exquisite, and the eye appeal is a match for its impressive preservation. The Brilliant Finish would be carried over to the next year, which would be the last proof Buffalo nickel issue. NGC has graded 14 numerically finer examples (4/09). (#3995)

Amazing 1936 Type Two—Brilliant Finish Nickel, PR67

- 353 1936 Type Two—Brilliant Finish PR67 NGC.** Both sides of this Superb Gem proof yield a brilliant chrome-like finish. Variegated champagne-gold, violet, and pink coloration adheres to each face, and an exacting strike delivers bold delineation to the design features. Impeccably preserved throughout. (#3995)
- 354 1937 PR66 NGC.** The watery fields are deeply reflective and reveal iridescent toning at acute angles. The design elements are expectedly crisp throughout. An impressively preserved specimen from the second and final year of proof Buffalo nickel coinage. (#3996)
- 355 1937 PR66 PCGS.** Brilliant in finish, as are all proof Buffalo nickels of this date. This coin possesses glassy fields that form a splendid backdrop to the sharp devices. Scattered milk-and-honey toning enhances the eye appeal. (#3996)
- 356 1937 PR67 PCGS.** Fully struck with rich watery reflectivity in the fields, and sparkling, brilliant, pristine surfaces. Seemingly unimprovable quality for this proof Buffalo nickel issue. *From The Joseph C. Thomas Collection, Part Two.* (#3996)

Stone-White PR67 ★ 1937 Nickel

- 357 1937 PR67 ★ NGC.** A fully brilliant Superb Gem that provides prominently mirrored fields and a sharp strike. Only the hair immediately above the braid lacks absolute detail. No proofs were struck in 1938, although the Denver Mint coined business strikes that year. Census: 18 in 67 ★, 3 finer with a Star designation (4/09). (#3996)

Lightly Toned PR67 1937 Buffalo Nickel

- 358 1937 PR67 PCGS.** A lovely, nearly perfect proof striking that shows pinkish-golden and lilac toning evenly spread over each side. The proof mirrors are moderately reflective but greatly enhance the light and attractive toning that adds so much to this coin's overall appearance. (#3996)
- 359 1937 PR67 NGC.** Brilliant throughout with deeply reflective mirrors on each side and surfaces that are essentially perfect in terms of their overall preservation. A flashy and dazzling final-year Superb Gem. *Ex: Long Beach Signature (Heritage, 1/2004), lot 5535.* (#3996)
- 360 1937 PR67 PCGS.** Gleaming fields are primarily bright nickel-white with just a hint of liquid champagne toning over parts of each side. Decisively struck and beautifully preserved. PCGS has graded 11 finer specimens (4/09). (#3996)

JEFFERSON NICKELS

Gorgeous 1938 Jefferson Nickel, MS67 Full Steps

- 361 1938 MS67 Full Steps PCGS.** *Ex: Compradore Collection.* A simply gorgeous representative of this popular first-year issue, impressively toned with soft nickel-blue toning over most of the obverse and a gold-tinged reverse. Boldly struck and carefully preserved, with a single inconsequential graze on the portrait precluding an even finer designation. Population: 6 in 67 Full Steps, 0 finer (4/09). (#84000)

1942-D Over Horizontal D Nickel
'Rarest Jefferson Variety'
MS64 Full Steps, Condition Census

362 1942-D Over Horizontal D MS64 Full Steps PCGS. FS-501, formerly FS-027, VP-001. While in midyear 1942 San Francisco and Philadelphia switched from the traditional nickel alloy to the unusual wartime "silver nickel" composition of copper, silver, and manganese, the Denver Mint produced only 1942-D pieces with the traditional mix of metals, changing over in 1943 instead. According to the 2002 second edition of Bernard Nagengast's *The Jefferson Nickel Analyst* (a wonderfully useful reference):

"This variety is possibly the rarest major Jefferson Variety in uncirculated. A small number of the coins were discovered in the late 1970's and disbursed. Few have come to light since. Since the 1942D nickel is rarely seen by the roll, the variety may remain very rare unless an unusual number show up in an unsearched roll."

The first D is punched horizontally, with the curved side facing down. The present example shows no break in the steps of Monticello and displays light lilac toning. Lovely satin luster abounds on both sides. A couple of small, inoffensive marks account for the MS64 grade, but this *Guide Book* variety coin should nonetheless see fierce bidding competition among the hordes of Jefferson nickel specialists. This appears to be only the second time we have offered an MS64 Full Steps example of this coin. The first, in our FUN 2006 Signature auction (1/2006, lot 3113), brought \$32,200. Population: 3 in 64 Full Steps, 1 finer (4/09). (#84015)

- 363 1943-P Doubled Die MS65 Five Full Steps NGC.** FS-106, formerly FS-029. Thomas Jefferson's eye is widely die doubled. The date and other obverse legends are also obviously doubled. Among the nicest war nickel varieties. Attractive toned in lemon, rose, and powder-blue. Lustrous and exceptionally smooth with a bold strike and pleasing eye appeal.(#84174)

Scarce 1953 Jefferson Nickel, MS65 Full Steps

- 364 1953 MS65 Full Steps PCGS.** Ex: Compradore Collection. Dappled pastel toning is seen over both sides of this lustrous Gem, taking on sky-blue and olive-green hues on the obverse, and olive-green on the reverse. A strong strike imparts sharp definition to all of the design elements, culminating in Full Steps on Monticello. A few minute marks do not disturb. Population: 7 in 65 Full Steps, 0 finer (4/09).(#84049)

SMS JEFFERSON NICKEL

- 365 1965 SMS MS66 Deep Cameo PCGS.** A strongly contrasted beauty with the appearance of a proof, though the date makes it clear that this is an SMS coin. Strongly mirrored and carefully preserved with minimal patina. Population: 20 in 66 Deep Cameo, 8 finer (4/09).(#94197)

PROOF JEFFERSON NICKELS

Amazing 1938 Jefferson Nickel, PR68 ★

- 366 1938 PR68 ★ NGC.** An amazing representative of the first proof Jefferson nickel issue, pleasingly mirrored beneath gold, pink, blue, and milk-white toning. Exquisitely struck with impeccable eye appeal. The only PR68 specimen for the issue awarded the Star Designation by NGC, with no finer examples in the combined certified population (4/09).(#4175)

Gorgeous PR68 1940 Nickel, Reverse of 1940

- 367 1940 Reverse of 1940 PR68 NGC.** The straight, razor-sharp steps of Monticello are a clear giveaway for the more readily available proof Jefferson nickel variety of the year. Each side is beautifully preserved and vibrantly mirrored beneath light, occasionally hazy gold and magenta patina. This specimen would make a magnificent addition to virtually any Jefferson nickel collection.(#4177)

Rarely Seen 1940 Reverse of 1938 Nickel, PR67

- 368 1940 Reverse of 1938 PR67 PCGS.** The so-called "wavy steps" reverse was the original design left over from 1938. It was pulled from the vault in 1940 to strike an unknown, but small number of proofs. This is a brilliant example that has nicely reflective fields and, of course, problem-free surfaces.(#94177)

- 369 1957 PR68 Cameo PCGS.** A great example of this Jefferson nickel proof issue. Fully struck and seemingly pristine, with jet-black deep mirror fields and frosted silver-gray devices. Population: 16 in 68 Cameo, 0 finer (4/09).(#84189)

- 370 1971 No S PR68 Cameo PCGS.** The No S error coins are popular with collectors: They were created by the lack of an S mintmark on dies used to strike coins at the San Francisco Mint, and have occurred on Lincoln cents, Jefferson nickels, and Roosevelt dimes. This piece exhibits razor-sharp striking details throughout. The lavishly reflective, ink-black fields provide a suitable cameo backdrop to the frosted golden-silver devices.(#84204)

Lightly Toned 1971 No S Nickel, PR69 Cameo

- 371 1971 No S PR69 Cameo PCGS.** The mintage of this issue was allegedly 1,655 pieces. The lack of a mintmark occurred when an assistant engraver in the Philadelphia Mint forgot to punch in an "S" mintmark. This deeply reflective example shows starkly contrasting devices. Each side has light rose-golden toning with strong underlying brilliance. Scarce as a Cameo.(#84204)

**Starkly Contrasted 1971 No S
Jefferson Nickel, PR69 Cameo**

- 372 1971 No S PR69 Cameo PCGS.** Among the finest known examples of this modern rarity. The surfaces are essentially perfect, and the black-and-white contrast between the features and the fields is pronounced. Proof dimes were particularly susceptible to the No S mint error, with several dates known, but No S proof nickels were only struck in 1971. Population: 8 in 69 Cameo, 0 finer (4/09). (#84204)

EARLY HALF DIMES

Rare XF V-2, LM-2 1794 Half Dime

- 373 1794 XF40 PCGS.** V-2, LM-2, R.5. A charming cream-gray example that has noticeable luster and only moderate wear on the forehead, cheek, and bust truncation. The obverse has a couple of hair-thin marks, but these require a loupe to see and are of little consequence. A desirable representative of this challenging first-year die marriage. (#4250)

- 374 1795 Good 6 PCGS. CAC.** V-5, LM-8, R.3. The obverse die crack is faint but visible under the right light. Though well-worn, this slate-gray example is pleasing with few significant marks. (#4251)

Pleasing 1795 Half Dime, V-5, LM-8, AU58

- 375 1795 AU58 NGC.** V-5, LM-8, R.3. The die crack from the right side of Y to the bridge of the nose is familiar to the specialist and identifies this marriage. Pleasing golden-gray toning bathes both sides, and the design elements are well defined. Some light adjustment marks cross Liberty's portrait, and a tiny spot is located under the eagle's neck. A meritorious early half dime. (#4251)

Sharp XF 1796 Half Dime, V-1, LM-1

- 376 1796 XF40 ANACS.** V-1, LM-1, R.3. A richly detailed Small Eagle half dime that has noticeable luster and bright powder-blue surfaces. Minor abrasions on the right obverse field barely merit mention. This example lacks the prominent clash marks near the profile that often accompany the variety. Housed in an ANA cache holder. (#4254)

Bold Gem 1800 Half Dime, V-1, LM-1, MS65

- 377 1800 MS65 NGC. V-1, LM-1, R.3.** This variety has LIBERTY spelled correctly. The date is widely and evenly spaced, with the digit 1 centered over a single dentil. LIBERTY is also evenly spaced. The obverse stars on both sides of the portrait are well-spaced. Star 1 is close to the second curl, and star 7 is distant from the L in LIBERTY. Star 8 is slightly closer to the Y than star 7 is to the L, and star 13 is similarly close to the bust.

The reverse has a leaf joined to the outer left base of the final A and another leaf solidly joined to the right base of I. The outside arrowhead ends at the extreme left base of N, and the longest arrowhead ends below the center of that letter. Stars 1 through 4 in the top row are each separated from clouds, while stars 5 and 6 each lightly touch a cloud. The eagle's upper beak comes down to join star 12 between two points. This star just misses touching the lower beak, and joins the scroll over the outside left serif of U. The I in UNITED and the I in AMERICA are each centered beneath a single dentil.

The obverse of this specimen has only light clash marks. The reverse has a hairline die crack from M to the eagle's wing and shield, continuing faintly through the left reverse field to I of UNITED.

This is the most common die marriage among 1800 half dimes, with four known varieties described in the standard reference. The example offered here is a remarkable Gem that should easily please the specialist. The upper obverse and lower reverse are somewhat weak, but all other design elements are boldly defined. The impression is well-centered, with full obverse and reverse borders. Both sides have brilliant silver color at the centers, surrounded by pale gold and vibrant sea-green toning. For the date, Census: 5 in 65, 3 finer (4/09).(#4264)

**Splendid 1800 LIBEKTY Half Dime
V-2, LM-3, MS64**

- 378 1800 LIBEKTY MS64 PCGS. CAC. V-2, LM-3, R.4.** The "common" LIBEKTY variety with about 150 pieces known in all grades, but seldom encountered so fine. The other variety V-4, LM-4, remains an R.7 variety, with less than a dozen known. Both varieties have the distinctive broken B punch that looks like a K and gives the variety its name. The reverse of LM-3 has a berry below the right base of the final A, while LM-4 has a berry below the left base of that letter.

This Choice Mint State example is impressive for a sharper-than-average strike that only shows a trace of weakness just left of center on each side. The surfaces are fully lustrous beneath gold, lilac, and iridescent toning. It is an exceptional piece for the connoisseur. Population: 6 in 64, 2 finer (4/09).(#4265)

BUST HALF DIMES

Delightful MS66 1832 Half Dime, V-1, LM-3

- 379 1832 MS66 PCGS.** V-1, LM-3, R.1. Star 12 is repunched, and die cracks extend down from each wingtip. Light honey-gold toning visits this coruscating and refreshingly unabraded Premium Gem. The strike is unimprovable, and a finer type coin would be a challenge to secure. Population: 35 in 66, 8 finer (4/09). (#4279)

Lovely 1833 Gem Half Dime, V-5, LM-7

- 380 1833 MS65 PCGS.** V-5, LM-7, R.2. The 8 and 3 of the date are close at the top, and a large period after the denomination is centered over a space between two dentils. An original, deeply toned Gem with underlying satin luster. The design types on both sides are bold, except for the usual central softness characteristic of the Capped Bust design. Both sides have intermingled steel, lilac, russet, sea-green, and iridescent toning with splashes of lighter ivory. A lovely and highly appealing piece. (#4280)

Desirable Gem 1833 Half Dime, V-4, LM-3

- 381 1833 MS65 NGC.** V-4, LM-3, R.2. This intricately struck Gem is bathed in luster, and a pass beneath a loupe fails to locate even inconsequential contact. The borders display light golden toning, while the centers remain brilliant. An impressive example of this attractive early silver type. Census: 44 in 65, 41 finer (4/09). (#4280)

Exquisite 1833 Half Dime, V-1, LM-10, MS67

- 382 1833 MS67 NGC.** V-1, LM-10, R.1. This intricately struck Superb Gem exhibits vibrant luster and appears devoid of contact. The obverse features lovely golden-brown, pearl-gray, and fire-red toning, while the reverse has delicate lime-green and gold shades. A later die state with both loops filled within the second S in STATES. (#4280)

- 383 1836 Large 5C MS64 PCGS.** V-7, LM-7, R.4. Repunching on star 1 is a useful diagnostic. This minimally toned example is satiny with strong luster and crisp definition. For the various Large Denomination varieties, Population: 42 in 64, 26 finer (4/09). (#4287)

SEATED HALF DIMES

- 384 1837 No Stars, Small Date (Flat Top 1) MS61 NGC.** The flat top on the 1 in the date and the block 8 confirm the Small Date variety. Deep mauve, gold-beige, apple-green, and sky-blue toning subdues somewhat the luster on this No Stars half dime. This well struck piece has been nicely cared for. (#4312)

- 385 1838 Large Stars, No Drapery MS65 PCGS.** Obverse stars 8 and 11 are repunched. A lovely, lightly toned specimen with creamy golden-beige toning and satiny luster. Surface marks are minimal. Population: 50 in 65, 24 finer (4/09). (#4317)

- 386 1844 MS66 PCGS. CAC.** Impressively lustrous with an above-average strike for this earlier Seated half dime issue. Lovely blue-green and pink-rose toning embraces each side. Population: 22 in 66, 9 finer (4/09). (#4333)

- 387 1844 MS66 PCGS. CAC.** Elegantly toned and softly lustrous. The obverse shows subtle sky-blue toning, while more electric shadings drape the sage-accented reverse. Population: 20 in 66, 9 finer (4/09). (#4333)

Scarce Normal Date 1844 Half Dime

- 388 1844 MS67 NGC.** Normal Date. The 1844 half dime is scarce in all grades and rare in the lofty grade of MS67, where less than 10 examples have been certified by NGC and PCGS. Pastel cobalt-blue, lilac, and yellow-gold patination resides on lustrous surfaces, with slightly deeper hues on the reverse. Sharply struck, as typically seen, and devoid of mentionable marks.

The Normal Date variety is much scarcer than the Repunched Date, as discussed in Al Blythe, 1992, and in John McCloskey, *The Gobrecht Journal*, Issue #60, July 1994. (#4333)

- 389 1854 Arrows MS65 PCGS.** The popular With Arrows type was a limited design issued only from 1853 to 1855. Sharply struck and lightly toned, this Gem is free of appreciable marks and exhibits bright satin luster. There are a few faint striations (as struck), on each side of the coin, but often-seen die clash marks are absent here. In a green label holder. Population: 35 in 65, 9 finer (4/09).
Ex: Central States Signature (Heritage, 5/2005), lot 6320, which realized \$1,610. (#4358)

- 390 1858 MS65 PCGS.** This lustrous Gem has dark blue, russet, lavender, and gray toning throughout. Well struck overall, though this piece was coined from lapped dies that lack certain details, such as part of Liberty's pole. Both sides are nicely preserved. Population: 81 in 65, 54 finer (4/09). (#4367)

Splendid MS68 1858 Half Dime

- 391 1858 MS68 NGC.** Dappled tobacco-brown and forest-green toning enriches this lustrous and precisely struck Superb Gem, a pristine antebellum half dime that has somehow remained undisturbed for more than 150 years. A prize for either the type collector or the Seated specialist.

This coin represents the final Philadelphia issue of this Stars Obverse subtype. In 1859 assistant engraver Anthony Paquet changed the obverse design, most noticeably on the stars, which have hollow centers. The portrait of Liberty was also modified. Those changes were set aside in 1860, when the Legend Obverse subtype was introduced. Census: 4 in 68, 0 finer (4/09). (#4367)

Impressive, Conditionally Scarce 1859 Half Dime, MS67

- 392 1859 MS67 NGC.** The 1859 is a relatively common date in the Seated Liberty half dime series, though the better levels of Mint State are scarce. Soft luster shows through the medium-intensity bluish-gray and orange-gold toning, and an impressive strike sharpens the design features. Impeccably preserved throughout. Census: 17 in 67, 4 finer (4/09). (#4371)

Exquisite 1860 Half Dime, MS67

- 393 1860 MS67 PCGS. CAC.** The change to the Legend obverse was the last substantial design alteration to the half dime denomination until its abolition in 1873. This early example offers exquisite detail and powerful luster beneath elegant russet, lavender, and silver-blue shadings. Impeccably preserved throughout. Population: 32 in 67, 2 finer (4/09). (#4377)

Exceptionally Well-Preserved 1860 Half Dime, MS68 ★

- 394 1860 MS68 ★ NGC.** A stunning ice-blue Superb Gem with variegated patches of cobalt and russet coloration throughout. Areas of darker patination cling to the rims on both sides and the luster is phenomenal, as one would expect for such a lofty coin. All attributes combined, the current offering seems unimprovable. As of (4/09) NGC has certified only two 1860 half dimes at the MS68 level with the coveted ★ designation and none finer—understandably so. The population for the same technical grade at PCGS is two pieces. A coin for the connoisseur of Seated half dimes and for those who simply appreciate uncommonly attractive type coins.
From The Joseph C. Thomas Collection, Part Two. (#4377)

395 1861/0 MS65 NGC. V-5, FS-301, formerly FS-003.6. Peripheral orange and sea-green grace this virtually fully struck Gem. Satiny and unblemished with pleasing eye appeal. Portions persist of the left border of the underdigit 0. Per *Cherrypickers*, "This is one of the top five varieties for the series, with more demand than supply." Ex: *Belle Glade Collection* (Heritage, 8/2006), lot 825, which realized \$2,300. (#4380)

396 1863 MS65 NGC. A brilliant and semiprooflike Gem with unmarked surfaces. The 18 in the date is lightly repunched south. A Civil War date with a meager mintage of 18,000 pieces, since fractional currency was plentiful. Census: 20 in 65, 39 finer (4/09). (#4382)

Elusive 1869 Half Dime, MS67

397 1869 MS67 NGC. The 1869 is a better date in the Seated Liberty half dime series and is rare in Superb Gem, the condition of the present offering. Light cobalt-blue and lavender toning adorns both sides, each of which displays semiprooflike fields that highlight the devices. The design elements exhibit the typically strong strike. Nicely preserved throughout. Census: 1 in 67, 1 finer (4/09). (#4394)

398 1871 MS66 PCGS. Strongly lustrous with just a hint of color to otherwise silver-white surfaces. Boldly impressed and carefully preserved for this later half dime issue. Population: 17 in 66, 1 finer (4/09). (#4398)

PROOF SEATED HALF DIMES

399 1866 PR63 Cameo PCGS. Impressively mirrored with pleasing contrast that shines through a thin veil of gold-gray patina. Minor, scattered hairlines beneath the toning account for the grade. Population: 7 in 63 Cameo, 6 finer (4/09). (#84449)

Attractive 1870 Half Dime, PR66 Cameo

400 1870 PR66 Cameo NGC. CAC. NGC and PCGS have graded several hundred 1870 proof half dimes from a mintage of 1,000 coins, a figure that undoubtedly includes many duplications. Only about 30 specimens have been assigned the Cameo designation, the current Premium Gem among them. A melange of cobalt-blue, orange-gold, and lavender patination adorns both sides, displaying deeper hues on the obverse. Exquisitely struck and impeccably preserved. Census: 5 in 66 Cameo, 3 finer (4/09). (#84453)

Remarkable JR-1 1796 Dime, MS66
Condition Census Coin

401 1796 MS66 NGC. JR-1, R.3. 1796 was a watershed year for the fledgling U.S. Mint, as it expanded its portfolio of coined denominations to include silver dimes and quarters with the Draped Bust obverse and the Small Eagle reverse, as well as Capped Bust to Right (or Turban Head) gold quarter eagles. The year is also memorable for the creation of some of the rarest U.S. type coins, including the aforementioned quarter eagles with the No Stars obverse, a one-year type, and the coveted Draped Bust, Small Eagle half dollars of 1796 and 1797, a two-year type featuring the denomination "1/2" on the reverse. The 1796 Draped Bust, Small Eagle quarters are also a one-year type, but due to a somewhat larger mintage they are expensive, but slightly more available.

The surfaces show rich blue toning over each side with deep rose color in the center of the obverse. The striking details are uncommonly strong on each side, with only the slightest softness evident on the eagle's breast feathers. Slight evidence of adjustment marks can be seen on the rim on the right side of the obverse and on Liberty's cheek, but they are mentioned for pedigree purposes rather than as a cautionary note for the prospective bidder. In fact, the only other ripples in the surface of this magnificent piece are the die clash marks that are expected from this late die state.

While common as a variety, in such a high grade this coin is quite elusive as well as extraordinarily well preserved. The variety is distinguished easily by the bold cud die break (or is it a clash mark?) through the rim and two points of star 1. On the reverse, a leaf touches the third E only, and there are two leaf points beneath the A in STATES. Bold clash marks are visible from the reverse bow above Liberty's head. This piece certainly appears to be near the top—or possibly at the top—of the Condition Census for the variety. While NGC and PCGS together show four pieces graded finer, those population data are for all varieties of 1796 dimes, not solely the JR-1. The finest JR-1 attributed as such at either NGC or PCGS is a single NGC coin in MS64 (4/09).(#4461)

Astonishing 1798/97 Dime, MS66
16 Stars Reverse, JR-1

402 **1798/97 16 Stars on Reverse MS66 NGC. JR-1, R.3.** The small 8 in the date is punched over a substantially larger 7 underdigit, with a corner protruding from the top right of the 8. On the reverse, a small die crack runs from star 10 to the eagle's head. Both sides are from later die states. The obverse die shows clashing that was subsequently lapped, and various details on the obverse are weak or nonexistent, most notably at Liberty's outer curls and her shoulder. This coin does not show the clashing through the date and on the reverse that distinguishes near-terminal specimens, though it does display remnants of an earlier clash in the right obverse field.

This is the second of just three NGC-graded MS66 examples for the variety that Heritage has offered (the first being the specimen we offered in August 2006 at Denver), with no Premium Gems certified by PCGS and no coins finer known at either service (3/09). Each side offers strong, slightly frosty luster with primarily pale silver-gray surfaces that show glimpses of champagne-gold close to the margins. The coin is a trifle softly struck at the central reverse, but it is generally well-defined elsewhere. It is also astonishingly well-preserved for an 18th century product, with only the tiniest of marks scattered in the fields and virtually no flaws visible on the devices. The early dime enthusiast would do well to give careful consideration to this captivating coin.

From The Joseph C. Thomas Collection, Part Two. (#4468)

Lustrous 1802 Dime, JR-4

- 403 **1802 PCGS Genuine.** JR-4, R.4. The PCGS code equates to "Cleaned," and the right obverse field does appear somewhat cloudy. The reverse is lightly hairlined but is nonetheless highly attractive. This coin has substantial luster and is nicely retoned in moderate orange-gold and lilac-gray tints. Liberty's jaw has slight wear. (#4472)

Meritorious Choice XF 1802 Dime, JR-4

- 404 **1802 XF45 NGC.** JR-4, R.4. Emerald-green and golden-brown borders encompass ivory-gray devices. The centers are typically impressed, but luster shimmers within the sharply defined wings and lower hair tresses. Smooth overall despite a thin mark on the shoulder and an inconspicuous abrasion on the lower left obverse field. (#4472)

BUST DIMES

Impressive 1821 Large Date Dime, JR-5 MS66, Likely Finest Known

- 405 **1821 Large Date MS66 NGC.** JR-5, R.3. The JR-5 die marriage is not particularly rare, but it is seldom found in Mint State grades. This impressive Premium Gem presents an outstanding opportunity for Bust dime specialists, as it is almost certainly the finest known of the variety. It is also near the top of the Condition Census among all varieties of the date, as NGC has certified only a single MS67 finer (unspecified as to variety), including both Large Date and Small Date variants. The finest 1821 Large Dates/JR-5s at PCGS are in MS65 and AU58, respectively.

The obverse has frosty luster gleaming beneath intense gold, rose, and sea-green toning across the entire surface. The reverse has an untuned area at the center, surrounded by deepening rings of similar colors. For the date, Census: 3 in 66, 0 finer (4/09).

Ex: Heritage (7/2006), lot 602, which brought \$16,100.

From The Joseph C. Thomas Collection, Part Two. (#4496)

**Stunning 1821 Small Date Dime
JR-9, MS66**

- 406 1821 Small Date MS66 NGC. JR-9, R-2.** A plentiful variety in the context of 1821 dimes, the JR-9 die marriage is frequently seen in Mint State grades. However, Premium Gems are few and far between. The central obverse and reverse have deep steel toning, with concentric rings of gold and lilac that confirm its originality. The present offering is only the second auction appearance of any 1821 dime in MS66, dating back to the beginning of our Permanent Auction Archives in January 1993, and it is the first Premium Gem 1821 Small Date dime that we have ever offered. In addition to its wonderful aesthetic appeal, this piece boasts a sharp strike with stunning design details. Census: 2 in 66, 0 finer (3/09). *From The Joseph C. Thomas Collection, Part Two.*(#94496)

**Satiny Gem 1823/2 Dime
Large Es Reverse, JR-3**

- 407 1823/2 Large Es MS65 NGC. JR-3, R.2.** The diagnostic seventh star points to Liberty's headband. This satiny piece is fully patinated in orange-gold, gunmetal-blue, and olive shades. Gem Capped Bust dimes are highly elusive, and the present coin boasts not only a sharp strike, but also excellent surfaces and appealing color. The overdate feature is clear with a loupe, as the base of the 2 extends to the right of the 3, and the neck of the 2 is visible within the lower loop of the 3. A supremely important survivor. *Ex: Long Beach Signature (Heritage, 2/2006), lot 722, which realized \$8,740.*(#4499)

**Extremely Rare Curl Base 2 1829 Dime
Good Details, JR-10**

- 408 1829 Curl Base 2—Damaged—NCS. Good Details. JR-10, R.6.** Three somewhat circular obverse impressions have bent this piece and flattened opposite areas. Richly toned, with sea-green fields and lilac-gray devices. Most of LIBERTY is readable, and the base of the curl 2 is clear, although the date is affected by the impressions. Most examples of this famous rarity are low-grade, and the finest we have auctioned this decade is a damaged VF20 in March 2007.(#4512)

Pleasing Choice 1831 Dime, JR-5

- 409 1831 MS64 NGC. JR-5, R.1.** A hint of chestnut-tan toning visits this shimmering and pinpoint-sharp Choice Capped Bust dime. Remarkably free from abrasions. Struck from prominently clashed dies. An exceptional example of this popular date. Census: 43 in 64, 38 finer (4/09).(#4520)
- 410 1832 MS63 PCGS. CAC. JR-1, R.2.** A luminous Select example of this later Bust dime date, well struck with sage, gold-orange, violet, and silver-gray colors mingling on each side. Great eye appeal. Population: 28 in 63, 52 finer (4/09).(#4521)

Rare AU58 JR-2 1833 Dime

- 411 **1833 AU58 PCGS. JR-2, R.5.** A bold, bisecting die crack crosses the obverse between 11 and 5 o'clock. Presumably, this crack caused an early retirement of the obverse die, accounting for the rarity of the JR-2 marriage. Apple-green, maroon, and stone-gray encompass this fully defined and partly lustrous near-Mint representative. (#4522)

SEATED DIMES

- 412 **1837 No Stars, Small Date MS61 PCGS. CAC.** Dusky silver-gray surfaces show dappled blue, tan-gold, and violet elements. Strongly struck with great eye appeal for the grade. Population: 1 in 61, 37 finer (4/09). (#4562)
- 413 **1844 VF25 ANACS.** Light to moderate multicolored toning bathes both sides of this VF25 specimen, each of which is devoid of significant marks. The 1844 is not as difficult as the 1846 but is still scarce in all grades. (#4585)
- 414 **1844 VF25 ANACS.** Medium intensity golden-gray fields highlight the lighter silver-gray design elements on this eagerly sought after "Little Orphan Annie" representative. Both sides are nicely delineated and remarkably clean. (#4585)
- 415 **1844 VF30 ANACS.** Bright golden-orange surfaces exhibit well defined motifs and just a few minute marks. This issue is always in high demand. (#4585)
- 416 **1844 VF30 ANACS.** Violet patination on the obverse cedes to golden-gray hues on the reverse. A few light to moderate contacts are visible on the obverse. (#4585)
- 417 **1844—Cleaned—ANACS. XF Details, Net VF30.** Both sides of this lightly cleaned example are nicely retoning in myriad pastel colors. Well detailed, and revealing just a few minor marks. Interested bidders should not be intimidated by the ANACS disclaimer as the cleaning is not all that bad. (#4585)
- 418 **1844 VF35 ANACS.** Pastel shades of multicolored toning grace both sides of this popular date. Relatively clean surfaces exhibit nicely defined devices. (#4585)
- 419 **1844 XF45 PCGS.** A charming Choice XF representative of the famous "Little Orphan Annie" dime, which became famous by a promoter's obsessive pointing-out of its lack of fame. Dappled blue-green and peach shadings visit still-lustrous surfaces. Population: 9 in 45, 17 finer (4/09). (#4585)
- 420 **1844 XF45 ANACS.** Light silver-gray surfaces display whispers of rainbow patination. Well defined and minimally abraded. Rare in XF level of preservation. (#4585)

Famous 1844 'Orphan Annie' Dime, AU53

- 421 **1844 AU53 PCGS.** The famous "Little Orphan Annie" dime, elusive due to its low mintage of 72,500 pieces. Most survivors are well worn, but the present example has ample luster and only moderate friction. Toned light honey-gold and steel-blue. Encased in a green label holder. Population: 3 in 53, 10 finer (4/09). (#4585)
- 422 **1853 Arrows MS65 PCGS.** A Gem example of this popular silver dime type. The present coin has smoke-gray and light blue patina with bold luster and an equally sharp strike, even on the reverse leaves. Great eye appeal. (#4603)
- 423 **1853 Arrows MS65 NGC.** Dappled orange, rose, and violet shadings enliven each side of this well struck Gem. Excellent quality and eye appeal for this popular type issue. (#4603)
- 424 **1859-S AU50 PCGS.** Silver-gray surfaces with hints of ice-blue display traces of luster in the protected areas of the well-defined design features. A couple of minute surface and rim marks do not detract. Population: 1 in 50, 8 finer (4/09). (#4621)

Low-Mintage Key 1860-O Dime, Choice XF

- 425 **1860-O XF45 ICG.** An attractively original survivor from the year before the outbreak of the Civil War. Deep charcoal-gray toning mingles with shades of forest-green and purple near the borders. Moderate wear is seen over the high points, and there are no sizeable abrasions evident on either side. A scarce key date in any grade, with a mintage of only 40,000 pieces. (#4632)

Desirable Choice VF 1873-CC Arrows Dime

- 426** 1873-CC Arrows VF35 PCGS. CAC. Fortin-101, High R.5 for the grade. A later die state with a thin die break—only observed on a few other specimens—through the right side of the corn cob and curving right where it terminates at the rim. The diagnostic die break through the mintmark is present.

The gunmetal-gray example offered here displays the highest degree of originality and is completely free of distractions, which is uncommon for the issue. The rims are well defined, and the level of detail is reminiscent of a coin grading finer. Interestingly, this piece shows bold strike doubling throughout the wreath. Of the 90 1873-CC With Arrows dimes certified as of (4/09) by NGC and PCGS combined, only 14 coins have been graded better than VF, making this near-XF example a special opportunity for the Seated dime connoisseur. (#4666)

- 427** 1874 Arrows MS64 PCGS. A sharply struck example that has light sky-blue and pearl-gray color. The reverse is essentially immaculate, while the obverse field shows the light abrasions that preclude Gem status. Still, a great type coin. (#4668)

Silver-White Gem 1874 Arrows Dime

- 428** 1874 Arrows MS65 NGC. Both sides of this attractive Gem display essentially silver-white surfaces with frosty luster. The design elements are generally well brought up, except for the usual weakness on Liberty's head and on the bow knot. A few grade-consistent marks do not disturb. A great piece for a high grade type set. (#4668)

Beautiful MS66 1874 Arrows Dime

- 429** 1874 Arrows MS66 PCGS. Light orange toning visits the primarily silver-white surfaces. This Premium Gem is lustrous and well struck, and both sides are splendidly unabraded. The second and final year of the Arrows, Legend Obverse subtype. Housed in a green label holder. Population: 19 in 66, 7 finer (4/09). (#4668)

Impressively Preserved 1875-CC Dime, MS66 Mintmark Above Bow

- 430** 1875-CC Mintmark Above Bow MS66 NGC. The slightly more available of the mintmark-placement varieties for the year, though at the Premium Gem level both qualify as conditionally rare. This highly lustrous piece shows deep butter-yellow and green-gold toning across each side. Carefully preserved and immensely desirable. Census: 9 in 66, 4 finer (4/09). (#4673)

**Rare MS66 1875-CC Mintmark Below Bow Dime
One of the Three Finest Certified**

- 431 1875-CC Mintmark Below Bow MS66 NGC.** The Below Wreath variety is more difficult to obtain than its In Wreath counterpart. The issue is rare in Mint State. NGC and PCGS together have certified a mere three Premium Gems and none finer. Silver-white surfaces yield frosty luster and sharply struck design elements. Both sides are impeccably preserved. Census: 2 in 66, 0 finer (4/09) (#4674)

- 432 1876-CC MS65 NGC.** A beautifully toned Gem, with intense mint frost over the colorful, expertly preserved surfaces. Well struck, impressively preserved, and free of any significant marks. Census: 43 in 65, 27 finer (4/09).(#4680)

Highly Lustrous MS66 1877-CC Dime

- 433 1877-CC MS66 NGC.** Type Two Reverse with E in ONE further from the wreath. Struck from an ample mintage of 7.7 million pieces, thus qualifying the 1877-CC as a Carson City type coin. This is a fabulous example that is brilliant throughout. Both sides display heavy metal flow, most likely from being struck from an extensively used die pairing. Peripheral die cracks around the obverse confirm this as well. The devices are sharply defined in all areas and there are no noticeable abrasions on either side. Census: 36 in 66, 12 finer (4/09).(#4683)

- 434 1884 MS66 PCGS.** A well-defined Premium Gem with strong, satiny luster. The obverse has rich reddish-orange and sage toning, while the reverse has lighter, more sparse patina. Population: 32 in 66, 21 finer (4/09).(#4692)

- 435 1886 MS66 PCGS.** Essentially untoned with bright and shining luster. The centers are well-defined, though Liberty's head shows slight softness. Population: 26 in 66, 7 finer (4/09).(#4696)

- 436 1890 MS66 PCGS.** Pale russet patina exists around both peripheries of this Premium Gem example with brilliant luster. It also displays a sharp strike and strong die clash detail on both sides. Population: 33 in 66, 3 finer (4/09).(#4704)

PROOF SEATED DIMES

Sharp 1837 Large Date, No Stars Dime, PR64

- 437 1837 Large Date, No Stars PR64 PCGS.** Greer-102. The first examples of Christian Gobrecht's Seated Liberty design to be coined *en masse* were the dimes and half dimes of 1837. The design represented a significant technological breakthrough, since the uncluttered obverse featured only the portrait of Liberty and the date—and thus the hubbed die could be completed by applying a single blow of the date logotype.

According to Breen's *Complete Encyclopedia* (1988), the Mint struck 30 brilliant proof dimes on June 30, 1837 for presentation to Treasury officials and other VIPs in celebration of the new advances. The proofs were struck with the Large Date logotype and are distinguishable by the spur above the first T in STATES.

In keeping with their distribution to noncollectors, many of the surviving proof examples are nicked-up or, worse yet, today even unrecognizable as proofs. Although more than 40 examples are certified between NGC and PCGS, as many as half are duplicates. This piece is sharply struck and deeply toned in slate-gray that extends to charcoal in some peripheral areas. The fields, although unreflective, are relatively smooth and particularly attractive for the grade. The 7 in the date is repunched, indicative of the Greer-102 variety. Population: 6 in 64, 3 finer (4/09).
From *The Joseph C. Thomas Collection, Part Two*.(#4718)

- 438 1859 PR64 PCGS. CAC. Dappled gold, peach, and blue shadings enliven each side of this Stars on Obverse proof dime. Crisply detailed with just a few faint hairlines visible beneath the patina. Population: 60 in 64, 39 finer (4/09).(#4748)

Beautiful 1859 Dime, PR66 ★

- 439 1859 PR66 ★ NGC. From a proof mintage of only 800 pieces. Fully struck with all details sharply delineated. Moderately frosted devices sit amidst reflective fields. Beautifully toned in shades of lilac and aqua with a touch of brown. A breathtaking example of this popular issue. Census: 1 in 66 ★, 1 finer (4/09).(#4748)
- 440 1860 PR64 PCGS. Antique-gold and silver-white colors converge on this pre-Civil War proof dime. Excellent eye appeal with only a few hairlines scattered in the fields. Population: 41 in 64, 38 finer (4/09).(#4753)

**Stunning 1864 Dime, PR66 Deep Cameo
Finest Certified Specimen**

- 441 1864 PR66 Deep Cameo PCGS. The 1864 dime comes with a comparatively low mintage of 470 proofs. While PCGS and NGC have graded a couple of hundred surviving specimens, Deep Cameos are extremely rare. Indeed, the two services have seen a mere two such coins, of which this Premium Gem is the finest. Stunning field-motif contrast is evident from all angles. Essentially untuned surfaces exhibit sharply struck design features and are impeccably preserved.(#94757)

Colorful PR66 1871 Dime

- 442 1871 PR66 NGC. Cherry-red and sea-green illuminate the obverse, while the reverse features turquoise-blue and lime patina. An exactly struck Premium Gem with nicely reflective fields and outstanding eye appeal. A meager 960 proofs were struck. Census: 12 in 66, 3 finer (4/09).(#4764)

Lovely PR66 Cameo 1873 No Arrows Dime

- 443 1873 No Arrows PR66 Cameo PCGS. CAC. Appealingly contrasted with gleaming fields. While the obverse shows primarily cloud-white patina overall with a hint of gold framing the centers, the reverse has more dramatic orange peripheral toning with a claret crescent at lower left. Population: 2 in 66 Cameo, 0 finer (4/09).(#84766)

Essential Arrows Type 1873 Dime, PR67 Cameo

- 444 1873 Arrows PR67 Cameo NGC. The mintage of 800 proofs and the subsequent smaller number of survivors are never enough to satisfy collector demand for this two-year type. Only one other PR67 has been certified by NGC, with a single Star coin finer (4/09). This is an immaculately preserved example. The fields are moderately reflective, and each side has scarlet patina that outlines the devices.(#84769)

Flashy PR67 1879 Dime

- 445 1879 PR67 NGC. CAC. Beautifully patinated in aquamarine, peach, and cherry-red. This flashy Superb Gem is boldly struck aside from the customary minor blending on the upper left portion of the cereal wreath. A trivial graze above the N in ONE precludes perfection. A low mintage date due to ceaseless silver dollar coinage. Census: 11 in 67, 3 finer (4/09).(#4776)
- 446 1881 PR66 NGC. Sharply struck with gleaming mirrors beneath soft and delightful patina. The obverse has gold-orange peripheral shadings around a minimally toned centers, while the reverse exhibits subtle blue-green colors. Census: 28 in 66, 14 finer (4/09).(#4778)
- 447 1882 PR66 Cameo NGC. Moderately contrasted beneath dynamic patina. Both sides show elegant blue and green shadings, and the obverse also displays splashes of gold. Census: 17 in 66 Cameo, 16 finer (4/09).(#84779)

**Captivating 1884 Dime, PR67 Ultra Cameo
One of the Two Finest Certified**

- 448 1884 PR67 Ultra Cameo NGC.** NGC and PCGS have certified a fair number of 1884 dime proofs, many of which possess a Cameo finish. The two services have seen a mere three Ultra/Deep Cameos, however, the current Superb Gem being one of the two finest. Untoned surfaces display outstanding field-device contrast and are immaculately preserved. A well executed strike leaves sharp detail on the frosted design features, and both sides yield captivating eye appeal. (#94781)

BARBER DIMES

Marvelous Superb Gem 1892 Barber Dime

- 449 1892 MS67 PCGS.** Ex: Duckor. Like their larger-denomination relatives, the Barber dimes are named for Charles Barber, who created the design. They were originally known as Liberty Head dimes, and became known as Barber dimes only well into the 20th century. This is a marvelous specimen, tied for the finest of the date certified by PCGS. The quality is extraordinary, with full design definition and extremely sharp clash marks visible in the obverse fields. Once upon a time, clash marks were considered detrimental to the quality and value of a coin, but today the exact opposite is true. Nearly any defect that a coin experiences during the minting process enhances its desirability and value. Lovely golden-olive and blue-green toning congregates at the border on both sides of this beauty. Pale rose and gray-brown color adds to the aesthetic appeal of this Superb Gem example. Population: 9 in 67, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4796)

Richly Toned MS67 1892 Barber Dime

- 450 1892 MS67 PCGS.** It is well known that as first-year issues the 1892 dime, quarter, and half were widely saved and are generally available in Uncirculated grades. However, not all such pieces are attractive. This piece has bright mint luster that enhances the rich, multicolored toning that covers each side. The center of the obverse is light teal with rose coloration at the margins. The reverse has a small, off-center spot of indigo surrounded by deep blue-green toning over the rest of that side. Sharply defined throughout. Population: 9 in 67, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4796)

Scarce Premium Gem 1892-O Barber Dime

- 451 1892-O MS66 PCGS.** Ex: Duckor. Despite a substantial mintage, most survivors of this New Orleans Mint issue are in lower grades through MS64 at best. Gem or finer examples are seldom encountered. This lovely Premium Gem is from a late state of the dies, especially the obverse, with peripheral die rust and a die crack through Liberty's bust truncation. This is variety number 102 in the David Lawrence reference, with the mintmark repunched. The lower curve of the original mintmark is visible inside the secondary mintmark. In fact, it almost has the appearance of an O punched over a smaller O, perhaps from a punch later used for the 1905 Micro O variety. This is a sharply struck example with full details on both sides. Pristine surfaces have pale gray toning with peripheral iridescence, incorporating attractive orange-gold, pale green and russet shades. Population: 5 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4797)

Outstanding Gem 1892-S Dime

- 452 1892-S MS65 PCGS.** Though first-year examples of any given series traditionally have a high savings rate, the combination of an unpopular design and a low-mintage West Coast issue means that the 1892-S is a condition rarity in MS65 and above. This Gem example is attractively lustrous beneath rich blue-green and rose-gold toning. Population: 13 in 65, 2 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4798)

- 453 1893/2 MS63 PCGS.** This overdate is identified by a horizontal line inside the bottom loop of the 3, representing the base of a former 2. It is a recent addition to the *Guide Book* and is growing in popularity. This Select example is pleasingly lustrous with gold-orange elements over otherwise silver-gray surfaces. Population: 3 in 63, 12 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4799)

Lovely 1893 Barber Dime, MS66

- 454 1893 MS66 PCGS.** A veil of faint gold color bathes the lustrous surfaces of this well struck Barber dime. A few dark toning specks are noted on the central reverse. A couple of shallow planchet flakes are also seen on the reverse, but are no hindrance to the Premium Gem assessment. Population: 24 in 66, 2 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4800)

Rare 1893-O Premium Gem Barber Dime

- 455 1893-O MS66 PCGS.** A flashy, untoned example with semireflective fields that offer excellent contrast to the frosty devices. While the 1893-O is one of the least difficult New Orleans issues to locate in lower grades from the first decade of Barber dime production, few pieces survive in this lofty state of preservation. Population: 6 in 66, 3 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4801)

Charming MS65 1893-S Dime

- 456 1893-S MS65 PCGS.** Ex: Duckor. Remarkable eye appeal for this earlier S-mint issue. The luster is pleasing, and the detail is strong. While the obverse shows deep and dappled emerald, olive, and green-gold patina, the reverse toning is lighter with a mix of blue-green and champagne shadings. Population: 20 in 65, 6 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4802)

Colorful MS66 1894 Barber Dime

- 457 1894 MS66 PCGS.** Deep blue-gray and reddish-gold hues overlie the nearly perfect surfaces. The 1894 is a scarcer issue among Philadelphia Barber dimes and the quality of this wholly original example is the equal of any we have recently seen. Population: 6 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4803)

Important 1894-O Barber Dime, MS66 Tied for Finest Graded at PCGS

- 458 1894-O MS66 PCGS.** Ex: Duckor. Both sides are exquisitely detailed, with frosty luster and faint iridescent toning. The obverse and reverse are essentially brilliant, with only the faintest traces of gold at the rims. Close examination reveals a few wispy hairlines on Liberty's cheek, but the balance of the coin is essentially perfect and problem-free, as it should be for the grade. No varieties have been reported for this low-mintage issue, although we note that this example has the mintmark tilted noticeably to the left. This lovely example is an important condition rarity at the Premium Gem level. Population: 6 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4804)

Scarce Gem 1895 Barber Dime

- 459 **1895 MS65 PCGS.** Boldly struck with great cartwheel luster and attractive gold-tan and golden-brown toning, along with hints of sky-blue along the reverse border. Well preserved and free of significant marks, with just a couple of unimportant nicks perceived on Liberty's cheekbone. This low-mintage issue is very scarce at the Gem level of preservation. Population: 12 in 65, 12 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4806)

Rare Premium Gem 1895 Barber Dime

- 460 **1895 MS66 PCGS.** A visually enticing combination of copper-orange, steel-green, and yellow-gold coloration occupies each side of this impressively preserved example. Sharply struck and free of any significant blemishes, with semiprooflike fields that serve to highlight the lovely, variegated toning. This issue boasts the lowest mintage of any Barber dime from the Philadelphia Mint, at 690,000 pieces, and Premium Gems like this one are rare. Population: 10 in 66, 2 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4806)

- 461 **1895-O VF20 PCGS.** Light silver-gray on the devices with deeper slate shadings in the fields. An appealing midrange representative of this low-mintage Barber dime issue, arguably the key date for the series when one excludes the 1894-S. (#4807)

Low Mintage XF45 1895-O Dime

- 462 **1895-O XF45 NGC.** This popular and low-mintage issue experiences high demand across a broad range of grades. The present Choice XF coin, though lightly circulated, has few marks and retains considerable peripheral luster. Green-gold and silver-gray toning graces each side. Census: 10 in 45, 43 finer (4/09). (#4807)

Attractive Key-Date 1895-O Dime, AU50

- 463 **1895-O AU50 PCGS.** The key to the Barber dime series (except, of course, for the famed 1894-S rarity), the 1895-O is always in demand by date/mintmark collectors. Sea-green, violet, and yellow-green patina bathes this attractive AU specimen. Nicely defined and revealing just the expected minor circulation marks. (#4807)

Striking MS64 1895-O Dime

- 464 **1895-O MS64 PCGS. CAC.** Aside from the legendary 1894-S rarity, the most elusive Barber dime is the 1895-O. Just 440,000 pieces were struck, and it commands high prices from Good to Mint State, towering over the rest of its regularly struck competition. The present near-Gem offers delightful eye appeal. Blue-green, peach, and pale silver-gray shadings are dominant, with strong luster shining beneath. The obverse exhibits considerable frost on the portrait, while the well-defined reverse lacks the degree of frost but offers a level of reflectivity in the fields. Population: 6 in 64, 11 finer (4/09). (#4807)

Gem Key-Date 1895-O Barber Dime

- 465 1895-O MS65 PCGS.** The 1895-O Barber dime had a low mintage of 440,000 coins, and only a small number have survived in Uncirculated condition. This impressive Gem example combines seemingly unimprovable eye appeal with a high degree of technical merit. Most of the design elements are crisply defined by a sharp striking impression, although some of the lower left wreath leaves are weak. Rich copper-tan and lilac toning emerges near the peripheries. Well preserved and nearly blemish-free on both sides. A conditionally scarce offering of this key date in the Barber dime series. Population: 9 in 65, 2 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4807)

Desirable 1895-S Ten Cent, MS65

- 466 1895-S MS65 PCGS.** Toned with rainbow hues around the periphery of both sides, with intense and radiant coloration seldom found unless a coin has spent decades in a Wayne Raymond holder. The surfaces are clean, although we note a minor tick on Liberty's cheek and planchet rolling marks in the same area, typical of the San Francisco Mint of the period. A bold strike adds to the appeal of this highly desirable Gem specimen. NGC and PCGS have graded a total of eight examples this high, with four pieces seen even finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4808)

- 467 1896 MS66 PCGS.** Ex: Law. Dappled blue, rose, and apricot shadings dominate the eye appeal of this gorgeous survivor. Immensely lustrous beneath the toning and well-defined. Population: 8 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4809)

Challenging Near-Gem 1896-O Barber Dime

- 468 1896-O MS64 PCGS.** A particularly strong strike for this sought-after New Orleans issue, with bright, satiny, untuned centers and glimpses of golden color at the borders. Just a few stray blemishes on the obverse, one before Liberty's chin and another at the base of her neck keep this impressive Barber dime from Gem status. Every bit as challenging in better Mint State grades as its low mintage of 610,000 would suggest. Population: 17 in 64, 13 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4810)

Outstanding Premium Gem 1896-S Barber Dime

- 469 1896-S MS66 PCGS.** Ex: Duckor Collection. This issue and the 1896-O are virtually identical in mintage and overall rarity. The mintage totaled 575,056 coins, or about 35,000 less than the '96-O. Both have identical populations in this Premium Gem grade level. The strike is exquisite with full obverse and reverse details. The surfaces are mostly brilliant, if partially masked by pale gold color. Although a few of the faintest hairlines are visible, the surfaces are essentially pristine. Like the 1895-S dime, the mintmark is clearly shelf doubled. Although equality may have finally been reached, until recently, this 1896-S issue, with a lower mintage and similar population, would often sell for half or less the price of a similar 1896-O dime. Such a situation suggests to us the underrated nature of this issue. Population: 5 in 66, 0 finer (4/09).

From The Mark Miller Registry Set of Barber Dimes. (#4811)

Splendid Superb Gem 1897 Dime

- 470 1897 MS67 PCGS.** Splendidly struck with intense mint frost and exquisite, variegated toning in bright shades of turquoise, coral-rose, and gold. Based upon eye appeal, this is certainly one of the finest examples that we have ever seen; the technical merit of the piece is also impressive. An interesting die break resides atop the 7 in the date, but post-striking marks are absent on both obverse and reverse. Population: 4 in 67, 0 finer (4/09).

From The Mark Miller Registry Set of Barber Dimes. (#4812)

Elusive 1897-O Barber Dime, MS66

- 471 1897-O MS66 PCGS.** The 1897-O is another elusive early O-mint Barber dime. This is a well struck Premium Gem of this scarce date that shows beautiful iridescent blue, green, and golden-brown peripheral toning on both sides. The surfaces are quite attractive, with no distractions aside from faint lines on Liberty's cheek and neck. The centers are bright and frosty. The strike is sharp on the reverse wreath, except for the finest details on the lowest inside left leaf. NGC and PCGS have seen just 10 pieces at this grade level, with a mere five specimens graded finer (4/09).

From The Mark Miller Registry Set of Barber Dimes. (#4813)

Beautiful Gem 1897-S Dime

- 472 1897-S MS65 PCGS.** Delicate tan-brown toning visits the centers and accompanies the borders. The fields appear pristine, and even the portrait displays only minimal contact. A conditionally rare S-mint issue usually encountered in grades below Fine. Population: 10 in 65, 6 finer (4/09). (#4814)

Wonderful MS66 1897-S Barber Dime

- 473 1897-S MS66 PCGS.** Ex: Duckor. A fully brilliant Premium Gem example with no toning of any sort. The surfaces are remarkably pleasing and free of defects. Both sides have extensive die polish in the fields, imparting a strong prooflike appearance. In this instance, the die polishing lines are actually visible without magnification. The devices have frosty luster, with the entire obverse and reverse having a lovely cameo appearance. All design elements are either exceptionally sharp or fully defined. It is this quality that, in days gone by, was called "Proof" or at least "Semi-Proof," a term that legendary Fort Worth, Texas coin dealer B. Max Mehl was quite fond of. Population: 5 in 66, 1 finer (4/09).

From The Mark Miller Registry Set of Barber Dimes. (#4814)

- 474 1898 MS66 PCGS.** Ex: Law. Elegant peach, silver-blue, and green-gold shadings enliven each side of this Premium Gem. An immensely lustrous and carefully preserved beauty. Population: 24 in 66, 4 finer (4/09).

From The Mark Miller Registry Set of Barber Dimes. (#4815)

**Gem 1898-O Barber Dime
A Little-Saved New Orleans Issue**

- 475 1898-O MS65 PCGS.** The 1898-O had a mintage of 2.1 million pieces, but it is notably scarcer than the production figures suggest. David and John Feigenbaum stated in their 1999 book on Barber coinage that the 1898-O was not extensively saved because "the coins were produced and distributed in a poor part of the country (at the turn of the century)." This piece has rich, satiny mint luster beneath multiple layers of blue, gray, and rose-colored toning. The surfaces are exceptionally clean, and the striking details are strong except at the forefront of Liberty's hair curls. Population: 6 in 65, 6 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4816)

Exceptional 1898-S Barber Dime, MS66

- 476 1898-S MS66 PCGS.** Ex: Duckor. A splendid Premium Gem with exceptional eye appeal. All design elements on both sides are extremely sharp. Few examples of this date are found in the MS65 to MS67 grade range. The surfaces on both sides have frosty luster beneath pale champagne color, framed by vivid sky-blue, green, amber, and lighter pale blue toning—a wonderful rainbow presentation. While not in the same rarity class as the 1898-O, this issue is quite elusive in its own right. Unknown quantities of these coins, along with 1899-S and 1900-S, were apparently sent to the Philippines for use in their economy. More recently, quite a number of those coins were returned to the States for collectors, but usually in XF and AU grades. This would certainly explain the availability of coins in those grades, as well as the rarity in Gem condition or better. Population: 4 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4817)

- 477 1899 MS66 PCGS.** Lavender and olive colors endow this lustrous and boldly struck Premium Gem. A carefully preserved beauty that should appeal to the discerning series enthusiast. Population: 15 in 66, 3 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4818)

Impressive 1899-O Barber Dime, MS66

- 478 1899-O MS66 PCGS.** Ex: Duckor/Hugon. This specimen is boldly struck and frosty white, with fully lustrous surfaces. Both sides are brilliant, with no toning save for a hint of champagne on the reverse. The design features on each side are sharply defined, especially the lower reverse wreath details that are almost invariably weak. A virtually undetectable and insignificant arcing break in the luster is noted on Liberty's cheek and neck, and it is this characteristic that positively identifies this coin as the Hugon specimen. This date is quite scarce, especially in Premium Gem quality, and the present opportunity should be considered carefully. Population: 7 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4819)

Frosty 1899-S Dime, MS66

- 479 1899-S MS66 PCGS.** Ex: Duckor. All of the design features on both sides are boldly struck, with exceptional hair details on the obverse and strong wreath details on the reverse. Both dies show several light cracks, suggesting that each has seen considerable production use. Brilliant and nearly perfect surfaces have only a few tiny ticks, mostly on the obverse. The surfaces are frosty and brilliant white, with pale champagne toning, and deeper gold peripheral patina. Population: 8 in 66, 3 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4820)

- 480 1900 MS65 PCGS.** The design elements are sharply struck and as carefully preserved as the lustrous fields. Golden-brown, sea-green, cobalt-blue, and lilac patina graces each side. Population: 18 in 65, 11 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4821)

Remarkably High Grade 1900-O Dime, MS66

- 481 1900-O MS66 PCGS.** Like other O-mint dimes, this date is infrequently located in Uncirculated grades, and when it is such coins are poorly preserved. This is a splendid example whose bright fields enliven the rich, speckled rose and emerald-green toning seen on each side. As invariably seen on this issue, the design high points lack complete definition. Light roller marks are also noted over the face of Liberty, a feature that has interest from the production viewpoint of numismatics, but has little (or no) influence on the grade or desirability of the coin. Population: 5 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4822)

Magnificent MS66 1900-O Dime

- 482 1900-O MS66 NGC.** The 1900-O is seldom seen above Fine condition and is definitely rare in Mint State, let alone MS66. This is a colorfully toned example that is uncommonly well defined throughout. A mottled overlay of sea-green, turquoise, and plum-red patina blankets both sides. There are no visible marks. Census: 5 in 66, 1 finer (4/09).
Ex: Dallas Signature (Heritage, 12/2005), lot 482, which realized \$4,600. (#4822)
- 483 1900-S MS65 PCGS.** Dappled green-gold and silver-gray shadings embrace each side of this lustrous and attractive Gem. Well-defined and pleasingly preserved. Population: 16 in 65, 7 finer (4/09). (#4823)

Conditionally Challenging 1900-S Dime, MS66

- 484 1900-S MS66 PCGS.** While not a low-mintage issue, with 5.1 million pieces produced, the 1900-S is the last of the three dates shipped in quantity to the Philippines. High grade examples such as this one are challenging to locate, with only six pieces certified in MS66 and one finer at PCGS (4/09). The streaky, multicolored toning seen over each side cannot subdue the bright underlying mint frost, a characteristic of almost all San Francisco coins. Fully struck.
From The Mark Miller Registry Set of Barber Dimes. (#4823)
- 485 1901 MS66 PCGS.** Impressively lustrous and strikingly toned. The obverse of this Premium Gem has deep turquoise and emerald patina, while the reverse shows similar colors mixed with orange-gold at the margins and an untuned center. Population: 12 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4824)

Entrancing 1901-O Barber Dime, MS66

- 486 1901-O MS66 PCGS.** Ex: Duckor. Although perhaps not as elusive and underrated as the 1900-O, this issue has its own degree of rarity. The obverse is fully brilliant, with frosty silver surfaces and prooflike fields. The reverse has a smooth, satiny, lustrous appearance, with light champagne toning. This piece is much more sharply struck than most survivors, although some weakness is visible within the lower wreath details. The obverse fields have extensive die polishing lines, creating the prooflike appearance that surrounds the frosty Liberty. The mintmark is finely doubled; the nearby wreath details are also doubled, a result of machine doubling at the time this example was struck. Population: 8 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4825)

Amazing Superb Gem 1901-S Dime

- 487 1901-S MS67 PCGS.** The 1901-S is an intriguing lower-mintage Barber dime issue. In an article published in the September 13, 1999 edition of *Coin World*, Paul Gilkes suggests that a number of San Francisco issues, including the 1901, "might carry higher price tags, but specimens are usually available." Of course, at the MS67 level, all bets are off: PCGS has graded just four MS67 pieces and none finer (4/09). This gorgeous piece, carefully preserved and satiny, offers a lovely blend of pale silver-blue, dusky gold-orange, and rose toning. A memorable opportunity for the Barber dime collector. From *The Mark Miller Registry Set of Barber Dimes*. (#4826)

Surprisingly Scarce 1902 Barber Dime, MS66

- 488 1902 MS66 PCGS.** With a mintage of more than 21 million pieces, the 1902-P is surprisingly scarce in high grades. Only 15 coins have been certified by PCGS in this grade, with one finer at both services (4/09). This piece has satiny surfaces with an even layer of golden-brown patina. The strike is full on each side, and there are no obvious abrasions. From *The Mark Miller Registry Set of Barber Dimes*. (#4827)

Outstanding 1902-O Barber Dime, MS66

- 489 1902-O MS66 PCGS.** Ex: Duckor. Sharply struck, with satiny silver luster and pale gold toning about the peripheries. Hints of lilac are noted on the reverse. An aesthetically pleasing example, despite a few minor ticks and hairlines on Liberty's neck and face. It appears that a tiny die chip partially fills the lower part of the digit 2, one Breen described in his *Complete Encyclopedia*, although he did not provide a separate catalog number. This example is tied with one other for the finest certified by PCGS. The 1902-O is a surprisingly tough date to find in any Mint State grade, let alone Gem or finer. The collector of high-grade Barber dimes would do well to consider this opportunity carefully, for it combines high technical grade with outstanding aesthetic appeal. Population: 2 in 66, 0 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4828)

Remarkable 1902-S Barber Dime, MS66

- 490 1902-S MS66 PCGS.** Ex: Law. One of only 12 MS66 examples reported by NGC and PCGS, this Premium Gem is surpassed in terms of technical quality by two MS67 specimens, one at each service. We find this hard to believe, since this coin's expertly preserved surfaces and frosty features approach perfection. Moderately bright in the fields with attractive red-brown patina near the borders. Population: 10 in 66, 1 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4829)
- 491 1903 MS66 PCGS.** Ex: Duckor. Fully lustrous and frosty with vivid gold, lilac, and sea-green color on both sides. The surfaces have a few small ticks along with some action in the field above ONE and below DIME, but the overall eye appeal is powerful. From *The Mark Miller Registry Set of Barber Dimes*. (#4830)

Elusive Gem 1903-O Barber Dime

- 492 **1903-O MS65 PCGS.** The mottled tan, fuchsia, and green patina of this attractive Gem gives the coin an unmistakably original appearance. Well struck and impressively preserved; there are no distracting marks on either side. The New Orleans Mint produced 8.18 million dimes in 1903, few of which have survived at the current level of preservation. Population: 10 in 65, 3 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4831)

Rare 1903-S Barber Dime, MS66 Ex: Duckor

- 493 **1903-S MS66 PCGS.** Ex: Duckor. Along with the 1901-S, 1902-S, and 1904-S dimes, this is one of the important and rare San Francisco Mint business strikes in the Barber dime series. It is a sharply struck and exceptionally attractive Premium Gem example with bold design details and lovely toning. The central obverse has pale gray-brown color, surrounded by gold, russet, and blue toning. The reverse is similarly toned, except the central pale gray-brown on the obverse is replaced by vivid olive-gold. This issue has the sixth lowest mintage of the entire series, with a total production of just 613,300 coins. Demand is considerable in every grade, from Good to Mint State. A single tiny field nick above the right ribbon loop is the only identifier we can find for pedigree hunters. Population: 11 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4832)

Iridescently Toned MS66 1904 Barber Dime

- 494 **1904 MS66 PCGS.** While common in lower grades, the 1904 is seldom located in this superior state of preservation. Only seven other pieces have been so graded at PCGS and seven coins at NGC, with none finer at either service (4/09). Beautiful iridescent shades of lavender, orange-yellow, gold, lime-green, sky-blue, and violet roll over the highly lustrous surfaces of this impressive specimen. The design elements are sharply impressed throughout, with no areas displaying weakness. A few minor ticks on Liberty's cheek are undistracting.
From The Mark Miller Registry Set of Barber Dimes. (#4833)

Exceptional 1904-S Dime, MS66, Ex: Eliasberg Bought Directly From the Mint in 1904

- 495 **1904-S MS66 PCGS.** Ex: Eliasberg. The 1904-S has long been on the radar screen of collectors because of its low mintage of 800,000 pieces. When located in the better grades of Uncirculated (which is seldom), the typical piece is similar to this one: attractively toned with strong underlying mint luster. The toning on this piece is deeper around the devices and much lighter in the more exposed areas of the design. Sharply struck throughout. Population: 7 in 66, 1 finer (4/09).
Ex: Purchased directly from the San Francisco Mint by J.M. Clapp (11/1904); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr. (Bowers and Merena, 5/1996), lot 1279.
From The Mark Miller Registry Set of Barber Dimes. (#4834)

Dazzling 1905 Dime, MS66

- 496 **1905 MS66 PCGS.** Ex: Law. Generally well struck, although a touch of softness affects the first A in AMERICA. The 905 in the date appears to be repunched. Splendid luster careens across each side, giving the piece a dazzling, flashy appearance. The surfaces are essentially untuned and distraction-free. Population: 3 in 66, 2 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4835)
- 497 **1905-O MS66 PCGS. CAC.** Ex: Duckor. A scarcer O-mint Barber dime that is usually seen softly struck and is quite difficult above the lower Mint State grades. This sharply struck specimen has luster that is more frosty than satiny. The obverse is lightly toned a subtle gray-rose; the reverse is somewhat deeper, with olive and golden hues. A carefully preserved condition rarity. Population: 16 in 66, 6 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4836)
- 498 **1905-O MS66 PCGS.** Light gold and silver-white colors dominate this Premium Gem, while the reverse rims also show a few splashes of crimson. Well struck with rich eye appeal. Population: 16 in 66, 6 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4836)

Scarce 1905-O Micro O Barber Dime, MS63

- 499 **1905-O Micro O MS63 PCGS.** David Lawrence, in his book *The Complete Guide to Barber Dimes*, speculates that this variety results from an employee using the mintmark punch intended for use on quarter dollars. The Micro O has caught the fancy of Barber enthusiasts and currently enjoys unprecedented demand. This specimen has bright, lustrous surfaces with just a hint of light tan-gold patina. The design elements are sharply struck throughout, with no hints of softness. A few grade-defining marks are noted on Liberty's cheek and neck. Population: 2 in 63, 2 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#94836)

Lovely MS66 1905-S Ten Cent

- 500 **1905-S MS66 PCGS.** Ex: Duckor. After a run of scarce San Francisco Mint Barber dimes, the 1905-S drops substantially in elusiveness and value. This issue ranks 46th for total Mint State population. Despite its rank, only 11 examples certified above MS65 at PCGS suggest that this date is decidedly difficult to locate, and that this Premium Gem should garner an excellent price. A lovely example with silver-gray color and pale blue-green toning over the lower obverse and upper reverse. The surfaces have frosty luster and only a few tiny tick marks. Population: 8 in 66, 3 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#4837)

Colorful MS66 1905-S Dime

- 501 **1905-S MS66 PCGS. CAC.** Strongly detailed with wonderful luster beneath colorful and impressive patina. The blue and violet shadings that fade into one another on the obverse appear dappled with pale emerald and muted magenta on the reverse. Overall preservation is high, even by Premium Gem standards. Population: 8 in 66, 3 finer (4/09). (#4837)

Beautifully Toned 1906 Dime, MS67

- 502 **1906 MS67 PCGS.** The 1906 dime has a large mintage of almost 20 million pieces. Uncirculated coins are relatively easy to locate, but Superb Gem pieces such as this one are rarely encountered. Both PCGS and NGC have only certified nine coins in this grade, and none are finer (4/09). This is a wonderful coin for a type set. The mint luster is strong and surprisingly frosted for a Philadelphia product. Each side also has lovely emerald-green centers surrounded by rose at the margins. The surfaces are remarkably free from abrasions, and the only hint of softness is on Liberty's forecurls.
From *The Mark Miller Registry Set of Barber Dimes*. (#4838)

- 503 **1906-D MS66 PCGS.** Ex: Eliasberg. Mottled lavender-gray toning drapes the central obverse with bright crimson-orange shades about the denticles. The reverse is more evenly toned in similar shades with electric-blue and golden-green rim accents. Frosty and wonderful. Population: 14 in 66, 2 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#4839)

- 504 **1906-O MS66 PCGS.** Beautiful sea-green and mauve-gray toning adorns both sides of this sharply struck, seemingly pristine Premium Gem. Rare and desirable at this lofty grade level. Population: 14 in 66, 5 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#4840)

- 505 **1906-S MS66 PCGS.** Ex: Duckor. Breen-3552. Repunched 6. The digit 6 is clearly doubled, best viewed with the coin inverted. Breen suggested that this digit is actually tripled, visible only with high magnification. This is a sharply struck representative with frosty luster beneath outstanding orange, blue, and iridescent toning, a little subdued on the reverse. A few faint marks are trumped by the wonderful toning. Population: 16 in 66, 3 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#4841)

- 506 **1907 MS66 PCGS.** Frosted surfaces enhanced by delicate amber shadings offer understated eye appeal. Well struck and attractive. Population: 14 in 66, 1 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#4842)

Dynamic MS66 1907-D Dime

- 507 **1907-D MS66 PCGS.** Golden-russet and sea-green shadings form arcs around the nearly brilliant centers. Thick mint frost swirls beneath this toning scheme and accents the mark-free faces. Crisp definition rounds out the impressive eye appeal of this early D-mint Barber dime. Population: 5 in 66, 1 finer (4/09).
From *The Mark Miller Registry Set of Barber Dimes*. (#4843)

Marvelous MS66 1907-O Dime

- 508 1907-O MS66 PCGS.** A fully struck Premium Gem with attractive iridescent colors and thick, satinlike luster over each side. Swirls of antique-gold and deep crimson-red accent the green-gray patina that drapes most of each side. Crisply struck and attractive. Population: 12 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4844)

Conditionally Scarce 1907-S Dime, MS66

- 509 1907-S MS66 PCGS.** While the issue is generally found in nice condition, there are few 1907-S dimes in Gem or better grades. Strike is a fairly consistent problem with this issue, and this particular coin demonstrates that. It is not weak, as one might expect, but the devices on each side show a uniform softness of high point definition; one might theorize that the dies were set too far apart. Overall, however, this is a splendid coin. The surfaces are notably free from abrasions. The mint luster enhances the rich aquamarine and golden toning seen on each side. Population: 7 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4845)

- 510 1908 MS66 PCGS.** Ex: Duckor. Russet, brick-red, and orange peripheral shadings yield to softly lustrous silver-gray centers. Well-defined and carefully preserved. PCGS has graded just one finer example (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4846)

Fabulous MS67 1908-D Dime

- 511 1908-D MS67 PCGS.** Ex: Hugon, Duckor. Here is an exceptional coin that retains glowing luster, a full and complete strike, and gorgeous pastel green and gold toning on both sides. The surfaces are pristine, with a couple of tiny ticks on Liberty's neck all that separate this coin from virtual perfection. A memorable Superb Gem. Population: 7 in 67, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4847)

- 512 1908-O MS66 PCGS.** Golden-brown and lavender shadings embrace this intricately struck and satiny Premium Gem. Wonderfully well-preserved with remarkable visual appeal. Population: 7 in 66, 4 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4848)

Excellent MS66 1908-S Dime

- 513 1908-S MS66 PCGS.** Ex: Duckor. A splendid, sharply struck Premium Gem example with excellent aesthetic appeal. All of the hair and leaf details on the obverse are nicely articulated, while each of the individual leaf veins on the reverse are similarly sharp and well impressed. This is a coin that the Barber connoisseur will truly appreciate. Lustrous, frosty surfaces shine through gray-brown, sea-green, gold, and iridescent toning. Population: 10 in 66, 3 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4849)

- 514 1909 MS66 PCGS.** Orange splashes overlies smooth slate-gray surfaces. A lustrous and impeccably struck Premium Gem with strong eye appeal and a nearly immaculate reverse. Population: 8 in 66, 3 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4850)

Delightful MS66 1909-D Dime

- 515 1909-D MS66 PCGS.** This attractive Premium Gem has blue-green, emerald, and gold-orange peripheral shadings around minimally toned silver-gray centers. The strike is crisp, and the surface quality is exceptional for this Denver issue of fewer than 1 million pieces. Population: 11 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4851)

Elusive Premium Gem 1909-O Barber Dime

- 516 1909-O MS66 PCGS.** A scarce O-mint dime, from the final year that the New Orleans Mint was open as a coining facility. Only 10 other pieces have been so graded by PCGS, with two finer (4/09). This is an original, satiny example that is covered with olive-green and golden toning. A significant coin for the Barber dime specialist. From *The Mark Miller Registry Set of Barber Dimes*. (#4852)

Unsurpassed 1909-S Barber Dime, MS66

- 517 1909-S MS66 PCGS.** The lovely toning variations over each side are the chief attribute of this impressive specimen: gray-green and coral-red on the obverse, rose-gray with electric-blue peripheral accents on the reverse. This Premium Gem is conditionally unsurpassed at both of the major grading services. Population: 9 in 66, 0 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4853)

- 518 1910 MS66 PCGS. CAC.** Sharply struck with shining silver-white surfaces that show a measure of satin. Carefully preserved with undeniable eye appeal. Population: 22 in 66, 10 finer (4/09). (#4854)

Satiny Superb Gem 1910 Dime

- 519 1910 MS67 PCGS. Ex: Duckor.** This is one of the most plentiful issues in the series, ranking 67th out of 74 issues for total Mint State population. Superb Gem examples such as this one are seldom seen, however. The current population of nine examples graded by PCGS almost certainly includes some resubmissions, and may even include at least one submission of the coin later certified as MS68. We submit that the real population of MS67 examples is probably only four or five coins. This Superb Gem has satiny silver surfaces beneath lovely gold and pale green toning. The surfaces are virtually perfect in their quality. Even with 10x magnification, we find no identifying characteristics. The devices on both sides are boldly rendered. Population: 9 in 67, 1 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4854)

Appealing MS66 1910-D Dime

- 520 1910-D MS66 PCGS.** Light golden tints overall with a hint of orange. This impressive Premium Gem offers gorgeous luster and a substantially above-average strike for its Denver issue. A small mark on the neck precludes a finer designation. Housed in a green label holder. Population: 6 in 66, 2 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4855)

Richly Toned MS66 1910-S Barber Dime

- 521 1910-S MS66 PCGS. Ex: Duckor.** The 1910-S is one of the lower-mintage S-mint Barber dimes, with only 1.2 million pieces produced. This low mintage also accounts for the issue's scarcity. Both sides of this example are covered with rich, multicolored toning, and the underlying mint frost is thick and significantly enlivens the surfaces. The strike is sharp throughout. Population: 8 in 66, 2 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4856)

- 522 1911 MS66 PCGS. EX:Duckor.** Deep maroon, grayish gunmetal-blue, and orange patina covers the obverse of this Premium Gem, and brownish-orange and sea-green concentrates at the reverse margins, ceding to brilliant centers. Lustrous surfaces exhibit sharply struck design elements and are minimally abraded. Population: 70 in 66, 14 finer (4/09). (#4857)

Remarkable Superb Gem 1911 Barber Dime

- 523 1911 MS67 PCGS.** Bright and untoned with satiny luster over both sides. The strike is bold and sharp, although a few hair strands on Liberty's head are not quite full. A remarkably preserved example of this ever-popular type coin that appears as if it had just been struck. Population: 12 in 67, 2 finer (4/09). From *The Mark Miller Registry Set of Barber Dimes*. (#4857)

**Superb 1911-D Barber Dime
An Excellent Type Coin**

- 524 1911-D MS67 PCGS.** The 1911-D is one of the higher-mintage Barber dimes, with more than 11 million pieces struck. Attractive Mint State examples can be found, and it is only at the MS67 grade level that this issue becomes rare. PCGS and NGC combined have only certified 13 pieces at the MS67 level, and none are finer (4/09). This is an essentially untoned example that shows no noticeable abrasions, as one would expect from the grade. Rich, satiny luster glows over both sides of this splendid type coin.
From The Mark Miller Registry Set of Barber Dimes. (#4858)

Exemplary 1911-S Dime, MS67

- 525 1911-S MS67 PCGS.** While the 1911-S Barber dime cannot be considered an absolute rarity with a mintage of 3.5 million pieces, at the MS67 level it is seldom seen. In fact, only seven other PCGS coins have been so graded, with none finer; NGC has certified five pieces, with one finer (4/09). This exceptionally pleasing coin displays soft, frosted mint luster that rolls around each side unimpeded by any meaningful post-striking impairments. The color is completely white, with no signs of toning. An extraordinary Condition Census coin.
From The Mark Miller Registry Set of Barber Dimes. (#4859)

Attractive, Original 1912 Barber Dime, MS67

- 526 1912 MS67 PCGS.** A lovely coin for high quality type purposes. Both sides exhibit thickly frosted luster. An accumulation of antique-golden, olive, crimson, and gunmetal-blue iridescence lines the obverse periphery. The reverse is fully brilliant. The striking details are sharply defined, and the issue is impossible to locate any finer, despite a sizeable mintage of 19.3 million pieces. Population: 4 in 67, none finer at either service (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4860)

- 527 1912-D MS66 PCGS.** Strongly struck with hints of golden toning visiting otherwise silver-white surfaces. A marvelously appealing Premium Gem example of this Denver issue. Population: 18 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4861)
- 528 1912-S MS66 PCGS.** Vibrant lemon-gold and dove-gray colors endow this thoroughly lustrous, intricately struck, and exquisitely preserved Premium Gem. The only detectable flaw is a faint spot after the final A in AMERICA. Population: 8 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4862)
- 529 1913 MS66 PCGS.** Ex: Duckor. The central obverse and reverse are fully lustrous and virtually brilliant, subdued only by light champagne toning. Lovely steel-blue, mint-green, and iridescent toning is noted around the peripheries on both sides. This "common" issue of nearly 20 million pieces is anything but at the Premium Gem level. Population: 32 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4863)

Enchanting Premium Gem 1913-S Dime

- 530 1913-S MS66 PCGS.** This is a glittering, lightly toned, enchanting Premium Gem with a layer of lovely yellow-gold patina on both sides. A slight degree of mottled russet toning is also noted near the central reverse. Few coins from the original mintage of 510,000 pieces can boast the excellent preservation of this example. Population: 17 in 66, 4 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4864)
- 531 1914 MS66 PCGS.** Subtle peach shadings visit the margins of this highly lustrous P-mint Premium Gem. Strong definition with eye appeal to match. PCGS has graded five finer pieces (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4865)
- 532 1914-D MS66 PCGS.** Green-gold peripheral tints yield to rose-tinged silver-gray at the centers. This immensely lustrous Premium Gem offers great eye appeal, even by the standards of the grade. Population: 20 in 66, 2 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4866)

Impressive 1914-S Barber Dime, MS66

- 533 1914-S MS66 PCGS.** The coloration is hazy gold and mint-green, with a bit of mottled toning seen on both sides. The strike is generally bold, if somewhat weak on OF AM on the upper right obverse, and on the lower right wreath. The reverse is virtually mark-free, and the only blemishes on the obverse are a couple of tiny nicks on Liberty's face and neck that are visible only with the aid of magnification. Population: 11 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4867)
- 534 1915 MS66 PCGS.** Frosty and gorgeous with hints of peach and gold patina visible on each side. The strike is bold and the eye appeal is strong. Population: 9 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4868)
- 535 1915-SMS66 PCGS.** A few speckles of reddish-gold patina grace the highly lustrous surfaces of this Premium Gem. This is a sharply struck and nicely preserved coin. Population: 10 in 66, 1 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4869)
- 536 1916 MS65 PCGS.** Great eye appeal for this final-year issue. Warmly lustrous surfaces are silver-gray at the centers with degrees of red and orange toning at the margins. Carefully preserved, even by Gem standards. (#4870)
- 537 1916 MS66 PCGS.** Bright silver-white with hints of pink in the centers and golden-brown toning at the left obverse. Strongly struck with high eye appeal for this final-year Barber dime issue. Population: 40 in 66, 5 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4870)

Exceptional MS67 1916 Barber Dime

- 538 1916 MS67 PCGS.** Ex: Duckor. The final Barber dime issue, here represented by a Superb Gem example that is among the finest known. Both sides have fully brilliant luster with frosty surfaces and only the faintest light gold and iridescent toning. A tiny mark in the field near M of AMERICA, and slight action below the I of DIME, are the only pedigree markers that we need. It is sharply struck with full design details on both sides. Exceptionally attractive and highly desirable. Population: 5 in 67, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4870)
- 539 1916-SMS66 PCGS.** Light silver-gray patina over each side deepens considerably to crimson around the rims. Well struck with smooth, frosted surfaces. This last S-mint Barber dime issue is a condition rarity in Premium Gem. Population: 12 in 66, 0 finer (4/09).
From The Mark Miller Registry Set of Barber Dimes. (#4871)

PROOF BARBER DIMES

- 540 1892 PR66 PCGS. CAC.** Low to medium intensity multicolored toning embraces this Premium Gem, and reflective fields highlight crisply impressed design elements. Impeccably preserved throughout. Population: 29 in 66, 11 finer (4/09). (#4875)

Incredibly Toned 1892 Barber Dime, PR66 Cameo

- 541 1892 PR66 Cameo PCGS.** The surfaces are almost perfectly preserved, and it is obvious that this coin's owners have taken great care with it since the year of issue. The fields are deeply mirrored and the devices noticeably frosted—the contrast evident through the multiple layers of toning on each side. Wondrously toned in shades of emerald-green, rose, and blue. First year of issue for the Barber type and always of great interest to collectors. Population: 7 in 66 Cameo, 6 finer (4/09). (#84875)

Conditionally Elusive PR67 Cameo Barber Dime

- 542 1892 PR67 Cameo NGC.** Due to the new silver designs, the 1892 dime saw a mintage of 1,245 proofs, and many of which have survived to the present day. Even those with cameo contrast can be had with a little patience. Superb Gem Cameos, however, such as the present offering, are much more elusive. Frosty, well struck motifs stand out against the mirrored fields. Nearly untoned, save for some incipient light milky-gray color on the reverse. Census: 13 in 67 Cameo, 0 finer (4/09). (#84875)

Second-Year 1893 Barber Dime, PR66 Deep Cameo

- 543 1893 PR66 Deep Cameo PCGS.** Light to medium gold toning covers this fully struck and exceptionally mirrored Premium Gem. The portrait is heavily frosted, and the legends and wreath also display contrast. Type demand was satisfied by the 1892, and proof mintages dropped significantly in 1893. A scant 792 proofs were struck. Population: 1 in 66 Deep Cameo, 2 finer (4/09). (#94877)

- 544 **1894 PR65 PCGS. CAC.** Deep blue-green and gold toning drapes the fields, while the devices retain a measure of silver-gray. A lovely Gem proof from early in the Barber design. (#4878)

Gorgeous PR67 1896 Dime

- 545 **1896 PR67 NGC.** A carefully preserved Superb Gem, immensely reflective beneath rich patina. The obverse is primarily gold-orange with forest-green elements at the right obverse, while the reverse has a ring of blue-green around a deep peach center. High eye appeal. Census: 12 in 67, 1 finer (4/09). (#4880)

- 546 **1900 PR65 PCGS.** Blue and green-gold toning mingles on each side of this Gem proof. Crisply detailed and pleasingly preserved, an elegant survivor. Population: 22 in 65, 33 finer (4/09). (#4884)

Immaculate PR67 1913 Barber Dime

- 547 **1913 PR67 PCGS.** A low-mintage, late-date proof issue with only 622 pieces produced. This is one of the finest examples known with only 17 total PR67 coins certified between both services (five PCGS and 12 NGC), and only two are finer (both at NGC). The obverse of this nearly perfect coin has a large area on the left side that is brilliant, while the right side is deep green. The reverse is mostly scarlet with a few dabs of lilac. (#4897)

MERCURY DIMES

Sharply Struck Key 1916-D Dime

- 548 **1916-D—Whizzed—NCS Genuine.** The bands are fully split on this key date dime, but the reverse is microgranular from whizzing and exhibits enhanced satin sheen. The obverse has a more original appearance. Delicate rose and olive toning denies full brilliance. Well struck and attractive despite its impairment. (#4906)
- 549 **1916-D VG10 ANACS.** A pleasingly smooth and original example of this key date, with slight toning that confirms its originality. An attractive dime that would serve well as the anchor of a full circulated collection. (#4906)

Popular Fine 1916-D Dime

- 550 **1916-D Fine 12 PCGS. CAC.** Neither thoroughly worn nor relatively high-grade, this Fine example of the popular 1916-D dime lands in a sweet spot for a wide range of collectors. Its luminous surfaces are primarily pale gray on the obverse with a more dusky rose-silver reverse. Slight darkening around the devices on each side. (#4906)

Charming VF25 1916-D Mercury Dime

- 551 **1916-D VF25 PCGS.** An impressive silver-gray key date dime that appears to have traces of mint luster despite moderate wear on the cap and fasces. All legends are bold, and marks are inconsequential. Although the 1916-D is obtainable (for a price) in lofty Mint State grades, midgrade circulated examples are highly elusive. Most survivors are well worn. Encased in an old green label holder. (#4906)

Toned XF40 1916-D Mercury Dime

- 552 1916-D XF40 ANACS.** Ice-blue and chestnut patina embraces this sharply defined key date dime. The vertical lines in the fasces are almost fully separated. Most 1916-D Mercury dimes are well-worn, and this rare intermediate grade example is both affordable and preferable for many collectors. (#4906)

Coveted 1916-D Dime, AU55 Details

- 553 1916-D—Artificially Toned—ANACS. AU55 Details.** This key-date dime is well struck and has little evidence of actual circulation. However, the luster is diminished, and the coin is evenly toned a dusky charcoal-gray. A strong lens reveals a few distributed hair-thin marks. Far nicer than the usually seen 1916-D, which grades VG or less. (#4906)

Key-Date 1916-D Dime, MS62

- 554 1916-D MS62 NGC.** This key date representative exhibits sharply struck design features, including some separation in the middle bands. Whispers of sky-blue, lavender, and gray visit both sides. A minute mark is visible on Mercury's cheek and another on the neck. The 1916-D is scarce in all Mint State grades. (#4906)

Appealing 1916-D Dime, MS62 Full Bands

- 555 1916-D MS62 Full Bands PCGS.** The satiny surfaces of this key date dime are virtually abrasion-free, and the few tiny nicks on each side are only discernible under close examination with a magnifier. The excellent striking details include central reverse bands that are fully split, and none of the often-seen peripheral fadeaway seems evident on either obverse or reverse. Deep and obviously original sea-green and russet patina gathers near the borders, enhancing the overall appearance of the piece. The key date status of this issue has never been in doubt, by virtue of its minuscule mintage of 264,000 coins, and this Mint State Full Bands example seems unusually impressive and appealing for the MS62 grade level. (#4907)

Significant 1916-D Mercury Dime MS65 Full Bands

556 1916-D MS65 Full Bands PCGS. Between 1907 and 1916, the United States' resurgence in coinage art reached its zenith, inspired by Augustus Saint-Gaudens and the coinage of ancient Greece, encouraged and abetted by President Theodore Roosevelt, and continued by Saint-Gaudens' artistic heirs, among them Adolph A. Weinman, James Earle Fraser, and Bela Lyon Pratt. Four new designs debuted for gold denominations, along with makeovers for the cent, nickel, dime, quarter, and half dollar. Among circulating coins only the Morgan dollar—which in any case had not been minted since 1904—would remain unchanged until its reissue of 1921.

While many collectors espouse the Walking Liberty half dollar as the nation's most beautiful silver coin, Weinman's "Mercury" or Liberty Head design also has its proponents. In fact, it might be argued that its seemingly lesser recognition is due more to the size of the dime itself than to any perceived artistic faults. Imagine for a moment how majestic the lowly Mercury dime would look on a silver canvas the size of the half dollar.

This Gem Full Bands example matches in its production and subsequent preservation the monumental artistry of Weinman's elegant coinage design. Few are the fortunate collectors who will ever be able to acquire an example of this, the most coveted Mercury dime issue in one of the highest certified grades practically obtainable. This piece is fully struck in all areas, not just on the central bands. The luster is intense, with reddish-gold patina that is deeper on the obverse than on the reverse. An important opportunity to bid on one of the most important silver coins of the early 20th century. Population: 32 in 65 Full Bands, 24 finer (4/09). (#4907)

Delightful 1916-S Dime, MS67 Full Bands

- 557 1916-S MS67 Full Bands PCGS.** A medley of yellow-green, violet, sky-blue, apple-green, orange, and purple toning bathes the highly lustrous surfaces of this delightful Superb Gem. A well executed strike culminates in Full Bands, and a few minuscule reverse marks are within the parameters of the designated grade. Population: 17 in 67 Full Bands, 0 finer (4/09).(#4909)

- 558 1917 MS66 Full Bands PCGS. CAC.** A solidly struck and vibrant second-year coin with essentially untoned, slightly frosty surfaces. Excellent visual appeal. PCGS has graded 13 finer Full Bands pieces (4/09).(#4911)

Eye-Catching 1917-D Ten Cent, MS67

- 559 1917-D MS67 PCGS. CAC.** Although well struck on the design elements, as are most 1917-D dimes, the definition on the horizontal crossbands is just shy of complete. Thin crescents of emerald-green, rose, and orange iridescence dominate each side, a feature that makes this Superb Gem representative extremely eye-catching. Population: 1 in 67, 0 finer (4/09).(#4912)

Gem Full Bands 1917-D Dime

- 560 1917-D MS65 Full Bands PCGS.** Traces of sun-gold endow this thoroughly lustrous and well struck branch mint Gem. A solitary graze on the right obverse field prevents perfection. The curious set aside examples of the unfamiliar 1916, but generally ignored the 1917-D. As a result, it is a scarce issue in Mint State, and rare as a Gem. Population: 34 in 65, 6 finer (4/09).(#4913)

Conditional Rarity 1918-D Mercury Dime MS65 Full Bands

- 561 1918-D MS65 Full Bands PCGS.** The strike is bold across all features without exception, qualifying this specimen as a true condition rarity. Rich luster sweeps soft pewter-gray surfaces that are lightly dappled with occasional russet hues at the peripheries. No distractions are noticed under normal examination; only under a loupe does a small abrasion on Liberty's cheek appear. A short die break extends from the rim through the left side of the first S in STATES, suggesting a later die state.

1918-dated dimes struck at the Denver Mint are common overall, but they are extremely challenging in high grade—especially if well struck. PCGS has certified only 18 pieces at the Gem level with the Full Bands designation, and just two examples—both MS66 coins—have achieved a finer grade (4/09).(#4919)

- 562 1918-S MS64 Full Bands PCGS.** Lustrous surfaces display soft champagne-silver color imbued with light gray dapples on the obverse. Sharply struck design elements culminate in Full Bands in the middle and bold diagonal ones. A few minor grazes are hardly noticeable. Population: 61 in 64 Full Bands, 43 finer (4/09).(#4921)

Magnificent MS66 1921-D Dime

- 563 1921-D MS66 PCGS.** The 1921-D has an impressively low mintage of only 1.08 million pieces, ranking it behind only the 1916-D in terms of overall rarity among Mercury Dimes. Premium Gems, of course, are very scarce. The surfaces on this coin are highly lustrous and exceptionally smooth. Each side has just the slightest accent of gold and lilac patina. An exceptionally attractive example of this key issue. Certified in an old green label holder. Population: 10 in 66, 0 finer (4/09).

Ex: Santa Clara Signature (Heritage, 11/2002), lot 6900; Dallas Signature (Heritage, 11/2003), lot 6072, which realized \$3,795. (#4936)

Elusive MS65 Full Bands 1921-D Dime

- 564 1921-D MS65 Full Bands PCGS.** Remarkably well struck, with minimal fadeaway on the peripheral design elements and complete definition of the central reverse bands. This Gem is highly lustrous and mostly untoned, although several golden-brown toning flecks are noted in the left obverse field. This issue is scarce, but not rare at the current grade level. Population: 54 in 65 Full Bands, 15 finer (4/09). (#4937)

- 565 1924-S MS63 Full Bands PCGS.** Crisply struck with a mix of gold-orange and silver-gray shadings in the patina. Only a few wispy abrasions are visible on the satiny surfaces, though they combine to preclude a finer designation. (#4947)

Challenging Gem Full Bands 1925-S Dime

- 566 1925-S MS65 Full Bands PCGS.** The 1925-S is arguably the worst-produced of all issues in the Mercury dime series. However, the habitual softness of strike that plagues the issue in general is not reflected on the fully split central reverse bands of this pleasing example. Vibrant mint luster is only slightly affected by the original mottled toning that covers each side. A solid Gem with no mentionable abrasions. A thin, vertical depression of mint origin extends vertically through the center of Liberty's neck, without influencing the technical grade of the piece. Population: 58 in 65 Full Bands, 20 finer (4/09). (#4953)

- 567 1927-D MS65 PCGS.** Light silver-gray overall with glimpses of gold near the rims. An attractive Gem, generally well struck for this Denver issue but with incompleteness on the bands. Population: 31 in 65, 13 finer (4/09). (#4962)

- 568 1928-D MS64 Full Bands PCGS.** Sharply struck and well-preserved with soft luster, this satiny near-Gem offers great eye appeal. The nearly untuned light-gray surfaces reveal a few faint wisps of gold color on each side. (#4969)

Delightful 1928-D Dime, MS66 Full Bands

- 569 1928-D MS66 Full Bands PCGS.** Decisively detailed with bright and appealing luster. Each side is silver-white save for a hint of gold visible at the margins. Though this Denver issue is available in lesser Full Bands grades, anything above a Gem is a condition rarity. Population: 16 in 66 Full Bands, 3 finer (4/09). (#4969)

- 570 1929 MS67 Full Bands PCGS. CAC.** Light gold and rose accents visit gleaming silver-white surfaces. This sharply struck Superb Gem offers wonderful eye appeal. Tied for the finest Full Bands example known to PCGS (4/09). (#4973)

Sharp MS67 Full Bands 1929-D Dime

571 1929-D MS67 Full Bands PCGS. Crisply defined with warm and inviting luster. The green-gold toning that enlivens much of the obverse fields appears largely at the margins on the reverse. This D-mint issue is virtually impossible to find any finer with Full Bands; PCGS has certified only one such coin (4/09). (#4975)

572 1931 MS66 Full Bands PCGS. Bright silver-white in the centers with crisp detail. Glimpses of gold toning close to the rims enhance the eye appeal. PCGS has graded 11 finer Full Bands coins (4/09). (#4983)

Exquisite MS68 Full Bands 1934 Dime

573 1934 MS68 Full Bands NGC. Delicate peach-gold and apple-green toning embraces this thoroughly lustrous and magnificently preserved Superb Gem from the era of the Great Depression. The strike is essentially full. A small area of prooflike surface encompasses the monogram. Census: 8 in 68 Full Bands, 0 finer (4/09). (#4989)

Tempting MS67 Full Bands 1935-D Dime

574 1935-D MS67 Full Bands PCGS. Light golden tints visit otherwise pale silver-gray fields, shading to peach-pink close to the rims. The strike is above-average for this 1930s Denver issue, and the surfaces are carefully preserved. Tied for numerically finest Full Bands example graded by NGC or PCGS (4/09). (#4995)

575 1937-S MS67 Full Bands PCGS. Well struck and expertly preserved, this Superb Gem shows the all-important fully split bands on the central reverse. Lustrous and lightly toned, with pale gold color on each side. Small areas of shiny prooflikeness appear along the front and back of Liberty's head, and are caused by excess die polish. Population: 74 in 67 Full Bands, 1 finer (4/09). (#5009)

Patinated MS68 ★ 1940-S Dime

576 1940-S MS68 ★ NGC. CAC. Dramatic bands of forest-green, cherry-red, and lemon-gold alternate across the left obverse. The reverse displays similar colors, but the bands are limited to the left periphery. The fields exhibit myriad fine die polish lines, as made. Lustrous and essentially immaculate. Census: 3 in 68 ★, none finer with a Star designation (4/09). (#5026)

Memorable MS66 Full Bands 1942/1-D Dime

577 1942/1-D MS66 Full Bands PCGS. CAC. In a July 31, 1991 article for *Coin World* titled "Collector finds 1942-D variety by chance," William T. Gibbs recounts how the earliest reports of the 1942/1-D overdate dime were met with considerable disbelief. Delma K. Romines, whom Gibbs identifies as the original discoverer of the 1942/1-D overdate, could not secure authentication for his specimen before military duty usurped his time for collecting. In addition, what Gibbs describes as the first publication of the overdate, the 1963 second edition of Frank G. Spadone's *Major Variety & Oddity Guide*, might have raised more questions than it answered:

"Page 53 of Spadone's second edition features closeup photographs of the dates of the Philadelphia overdate and its previously unknown cousin from Denver. Crisp, clear photographic reproduction being somewhat less easily obtainable in 1963 than today, many photos in Spadone's second edition appear to be heavily retouched, including the two overdate dimes; thus, the photographic evidence was inconclusive for some."

By 1966, however, many authorities had warmed to the Denver overdate, and the hunt was on. By that time, however, most of the D-mint pieces had become worn, leaving Mint State coins the exception. This Premium Gem, sharply struck with full bands on the reverse, is one of just 12 coins so graded by PCGS with none finer at that service (4/09). Impressively lustrous surfaces are pale silver-blue with a satiny texture. Beautifully preserved with the overdate as clear as it comes. (#5041)

PROOF MERCURY DIMES

- 578 1936 PR64 PCGS.** The mirrors on this near-Gem are deep and gorgeous, and the reverse shows appreciable contrast. It is boldly impressed with faint gold overtones and dots of crimson along the rims. Minor hairlines preclude a finer designation. (#5071)
- 579 1936 PR65 PCGS.** A lovely Gem example from the first Mercury dime proof issue. Well struck with milky, light silver-gray toning across each side. The surfaces are impressively preserved and contact-free. (#5071)
- 580 1936 PR65 NGC.** Milky toning drapes much of each side, but the mirrors of this Gem shine through. Crisply detailed with great all-around eye appeal for this initial proof Mercury dime issue. (#5071)
- 581 1936 PR66 NGC.** Crisply struck and brilliant, with bright silver surfaces that display considerable reflectivity in the fields. Free of handling marks or spots. (#5071)
- 582 1936 PR66 NGC.** A beautifully toned example of this proof Mercury dime issue, the first in the series. Solidly struck, and free of any surface disturbances. (#5071)

Dazzling PR67 1936 Mercury Dime

- 583 1936 PR67 NGC.** This brilliant and needle-sharp Superb Gem has glassy fields and pristine surfaces. The appearance is the same as when it was coined more than 70 years ago. The 1936 is the first and lowest mintage proof issue of the type. Proofs were struck for only seven years, with production ended by World War II. (#5071)

Fully Brilliant 1936 Dime, PR67

- 584 1936 PR67 NGC.** This issue is the rarest of the 1936-1942 proofs at or above the Gem level. The fully brilliant surfaces of this Superb Gem display exquisitely struck design elements and are devoid of mentionable blemishes. This is a great representative for a high-grade collection. Census: 79 in 67, 2 finer (4/09). (#5071)

Beautiful PR68 1937 Mercury Dime

- 585 1937 PR68 NGC.** This silver-white Superb Gem is almost completely devoid of contrast, as was the norm for proofs of the era, but its extreme brilliance and immaculate surfaces place it into a small minority of survivors. Among the finest pieces certified at each service (4/09). (#5072)

Shimmering PR68 1938 Mercury Dime

- 586 1938 PR68 NGC.** Stunning brilliance emanates from impeccably preserved, untuned surfaces. The exceptionally deep mirrors in the field areas give the piece exemplary eye appeal. It also allows the viewer to see the lines of metal flow in the fields on each side. Fully struck and pristine, as expected for a coin graded PR68. Census: 33 in 68, 1 finer (4/09). (#5073)
- 587 1939 PR68 NGC.** The 1939 proof Mercury dime had a small mintage of just 9,321 pieces. This specimen is fully struck, with just the slightest degree of toning, and both sides are free of hairlines and contact marks. Neither NGC nor PCGS has graded a numerically finer specimen (4/09). (#5074)
- 588 1939 PR66 Cameo NGC.** Though the frost on the devices is not heavy, this Premium Gem offers distinct contrast nonetheless. Essentially untuned with gleaming and carefully preserved mirrors. Census: 13 in 66 Cameo, 10 finer (4/09). (#85074)
- 589 1940 PR68 NGC.** This beautiful proof is virtually as struck, with essentially perfect surfaces. Both sides show light, streaky gray-rose toning with a wisp of limited rainbow color along the upper borders. Rarely are early proofs available in such high grade, and when they are, they are quickly absorbed into 20th century proof type sets. Census: 39 in 68, 1 finer (4/09). (#5075)
- 590 1941 PR68 NGC.** A spectacular, nearly all-white coin with highly reflective surfaces. A slight trace of toning is located at the bottom of the reverse. The surfaces are essentially perfect and close inspection with a loupe yields no signs of contact. Amazing eye appeal. (#5076)
- 591 1942 PR68 NGC.** The last of the proof Mercury dimes, represented here by a gorgeous PR68 survivor. Gleaming and minimally toned with spectacular visual appeal. (#5077)

PROOF ROOSEVELT DIME

- 592 1956 PR68 Deep Cameo PCGS.** A razor-sharp specimen, with frosted devices and deeply-mirrored fields. Immaculate, as expected for this lofty grade. Population: 20 in 68 Deep Cameo, 1 finer (4/09). Ex: *Velma & Bowie Lynch Collection, Part Four (Heritage, 8/2004)*, lot 5886, which realized \$1,897.50. (#95231)

TWENTY CENT PIECES

- 593 1875-CC AU58 NGC.** An appealing near-Mint representative with light gray and pale gold toning over smooth, satiny surfaces. Lightly worn with a few faint marks. An attractive example of this scarcer low-mintage issue, the only collectible twenty cent date from the Carson City Mint. (#5297)
- 594 1875-S MS64 NGC. CAC.** A warmly lustrous and richly toned near-Gem example of this popular odd-denomination type issue. Gold-orange, sage, and silver-gray elements mingle on each side. (#5298)
- 595 1875-S MS64 PCGS.** Vibrantly lustrous beneath an original skin of mottled champagne-gray patina on both sides. The design features are generally boldly struck, and only Liberty's head, the obverse stars, and the eagle's right (facing) talons are typically incomplete. Nicely preserved and free of marks. (#5298)
- 596 1875-S MS64 NGC.** Golden-gray patina is slightly deeper in hue on the obverse, where it is joined by subtle violet. Sharply struck, except for the usual softness in the hair atop Liberty's head and the upper part of the left (facing) wing. The lustrous surfaces are quite well preserved. (#5298)
- 597 1875-S MS64 PCGS.** A great example of this popular odd-denomination issue with warm and inviting luster beneath rich patina. Subtle mauve and violet toning is most prominent, while glimpses of silver-gray and gold are present near the rims. (#5298)

Superb Gem 1875-S Twenty Cent Piece

- 598 1875-S MS67 NGC.** The Specie Redemption Act, passed on Jan. 14, 1875, mandated that as of Jan. 1, 1879, gold coins would be exchangeable at par with paper bills—for the first time since the end of 1861. This ensured that paper currency of one dollar or more would be backed by gold, and that the government would gradually reduce the number of “greenbacks” in circulation. Western silver miners, who had been increasing in wealth, power, and political influence in the 1870s, wanted more. The silver twenty cent piece was introduced in that same year, even though it was confusingly similar in size and design to the quarter (the Susan B. Anthony dollar was still far in the future).
This marvelous Superb Gem type coin, from the generous first-year S-mint production (it is not a coincidence that most examples were made in the West, at both San Francisco and Carson City), is one of only five coins so graded at NGC, with a single piece finer (4/09). Radiant cartwheel luster flows from both sides, and silver-white surfaces are expectedly pristine, even under a loupe. The strike is, however, fairly blunt on some of the high points on each side—Liberty's head and stars 6-11 on the obverse, and the mintmark, lower claw, and Y CENTS on the reverse. A patch of horizontal roller marks appears between the eagle's wings and head. The surfaces elsewhere are well struck, unabraded, and problem-free. (#5298)
- 599 1876 MS63 NGC.** The second and last Philadelphia business strike twenty cent issue, represented here by a Select piece well struck with soft luster beneath rich patina. Blue-green and burnt-orange elements mix with silver-gray on each side. (#5299)

EARLY QUARTERS

Elusive 1796 Quarter, B-2, VF Details

600 1796—Tooled, Improperly Cleaned—NCS. VF Details. B-2, R.3. This High 6 variety is more plentiful than the B-1 Low 6 variety, making it an ideal candidate for a collection of coinage designs. The first-year-of-issue 1796 quarters are highly desirable and elusive, with examples finding a ready market in all grades and states of preservation.

This example has light gray surfaces with darker ebony toning in the peripheral areas. The central obverse and reverse exhibit considerable evidence of tooling to remove previous flaws of an unidentified nature, although we see no evidence that this piece was ever holed and plugged. It was probably bent at one time, and the tooling is likely masking some old corrosion. (#5310)

Mint Director, Elias Boudinot

**Radiant 1805 B-3 Bust Quarter, MS64
Condition Census, Late Die State Coin**

601 1805 MS64 PCGS. B-3, R.1. Die State V. This common Browning variety is actually quite rare in such an advanced die state, and the present example is equal to the top of the Condition Census enumerated in Walter Breen's 1992 update of Browning's *The Early Quarter Dollars of the United States, 1796-1838*.

The late die state of this coin is characterized by several die markers. There are three obverse die cracks, one through star 4 passing below the hair ribbon to the hair curl; a second that runs through stars 1 and 2 and through the lower date digits; and a third that extends upward from the 5 in the date to the bust. The E in LIBERTY is quite weak, noticeably more so than the flanking letters. On the reverse, there are heavy clash marks from the bust above the clouds and STATES OF; a crack through the tops of STA; and another from the rim to the upright of the first T in STATES.

The current example has muted silver-gray surfaces with a golden overlay, complemented on the reverse by peripheral aqua and amber. Bright mint luster radiates beneath the light toning. A small dark alloy spot in the 0 of the date will serve as a pedigree identifier. There are no mentionable planchet flaws or other distractions on this incredibly rare and appealing coin. This example is sure to generate some spirited bidding. Population: 6 in 64, 1 finer (4/09).

Ex: *Heritage* (4/2006), lot 1462.

From *The Joseph C. Thomas Collection, Part Two*. (#5313)

BUST QUARTERS

Gem B-1 1815 Quarter, Ex: Ashland City

602 **1815 MS65 NGC.** Ex: Ashland City Collection. B-1, R.1. The 1815 is the premier issue in the Capped Bust quarter series. While popular for first-year type purposes, the 1815 is probably more desirable as a low-mintage, conditionally challenging date. A mere 89,235 pieces were produced from the single obverse and reverse die marriage known for the date. Circulated and lower-Mint State survivors are available fairly regularly, but Gems are undeniably rare. Only nine examples are known between NGC and PCGS combined, with eight pieces certified finer (4/09).

The present example is an early die state with no clash marks. Reverse repunching appears on the base of the second T and the A in STATES. This is an uncommonly well-struck representative of the design, with full denticulation at the borders and crisp definition over virtually all features. Both sides display frosty luster and are virtually untoned, save for some wispy light gray streaks. A handful of grade-consistent ticks are noted. A tiny planchet void in the obverse field, before Liberty's nose, is a worthwhile pedigree marker. Census: 4 in 65, 5 finer without the enigmatic "E" and "L" counterstamps the issue is known for (4/09). (#5321)

Extraordinary 1815 Quarter, B-1, MS67
The Finest Known Example

603 1815 MS67 NGC. B-1, R.1. Browning-Breen Die State II. Only one variety is known of this important date. The mintage comprised 69,232 pieces delivered Dec. 16, 1815 per warrant #732, and 20,003 coins delivered Jan. 10, 1816 per warrant #733, for a total of 89,235 pieces. According to Steve Tompkins in the 2008 *Early United States Quarters*, all coins in the first warrant were delivered to the Planters Bank in New Orleans. Tompkins goes on to say that: "The coins contained in warrant 733 were most likely delivered to the Bank of the United States in Philadelphia." The latter point is questionable, as the First Bank of the United States ceased operation in 1811 when Congress refused to renew its charter. The Second Bank of the United States was chartered by Congress only in early 1816. Were the warrant 733 quarters delivered to some other Philadelphia bank, perhaps the Bank of Pennsylvania or the Bank of Philadelphia?

This is the finest example known of this popular and widely collected date. As a Die State II coin, the fields show evidence of die clashing. However, aside from light clash marks, the impeccably preserved surfaces reveal virtually nothing to interrupt the flow of the thick, frosted mint luster that liberally covers each side. Both obverse and reverse are deeply patinated, with gray, gold, and emerald-green centers surrounded by deep scarlet-gray, forest-green, and gunmetal-blue toning around the margins. The striking definition is strong throughout, with even pressure applied to all the design elements. An extraordinary coin and a singular opportunity for the type or date collector. Census: 1 in 67, 0 finer (4/09).

From *The Joseph C. Thomas Collection, Part Two*. (#5321)

- 604 1818 AU53 NGC. B-8, R.3. Three crowded dentils below the first 1, a die scratch from the inner side of star 2 into the field, and I of PLURIBUS slightly left of center of the second T in STATES confirm the variety. This later die state shows clash marks (bars) at the ear, and a die crack from the rim through the rightmost leaf into the eagle's left (facing) foot. Medium intensity peripheral golden-gray patina cedes to light gray in the centers. Well defined except for flatness in the star centers. Quite clean for a coin that saw some circulation. (#5322)

Wonderful Gem 1818 Quarter, B-3

- 605 1818 MS65 NGC. B-3, R.3. The repeating date is equally and widely spaced, and the last 8 is uncentered (right of) the lowest hair curl. Both 1s in the date have broken feet at their left sides. This is technically the 1818/5 overdate die from the B-1 die marriage, but reground so that the traces of the 5 no longer show. On this piece there is visible die clashing on both sides. The coin is essentially brilliant, displaying just a bit of peripheral color. The surfaces are thickly coated in superb mint frost and show generous luster that is seldom seen on early type. The strike is full throughout, save for minor weakness on Liberty's highest hair curls. There are no mentionable abrasions. A wonderful type coin or representative of this available variety. For the date, Census: 26 in 65, 13 finer (4/09). (#5322)

Amazing MS66 1818 Bust Quarter, B-3

- 606 1818 MS66 NGC. Ex: Foxfire. B-3, R.3. Die State II. The obverse die is shared with the B-1 die pairing, and both are sometimes called 1818/5 overdates, although on the B-3 the 5 is no longer visible under the last 8. The date is quite wide and equally spaced, and relatively high above the border. The second 8 is to the right (uncentered) under the curl, and star 1 points between the first and second drapery folds. On the reverse, the scroll's left end is under the upright of the D, and its right end is centered under the right foot of A. All T's are defective at bottom right, and a crack extends from the edge through the lower arrowhead and the two arrow shafts above, up toward the eagle. The defective left feet in both 1s of the date confirm the die state.

The 1818 quarter, from a mintage of 361,174 pieces, is readily obtainable in circulated grades. Even Mint State coins are occasionally available through MS64 or MS65. Premium Gems, however, are difficult to locate, as evidenced by the 15 coins certified by NGC and PCGS, some of which are likely resubmissions. A mere two pieces are seen finer.

The silvery surfaces of this amazing MS66 example are awash in full luster and display whispers of cobalt-blue and light tan at the margins. The design features are sharply detailed throughout. The dentilation is full on both sides, and no mentionable contact marks are evident. Some light clash marks are visible on the reverse. This is an outstanding piece for a high grade type set. For all 1818s, Census: 12 in 66, 1 finer (4/09). This is the finest and only B-3 certified as such at either service.

From The Joseph C. Thomas Collection, Part Two. (#5322)

- 607 1820 Small O AU55 NGC. B-4, R.2. The date has a small 8, star 7 points to the lower part of the cap, the I in PLURIBUS is centered under the left stand of the second T in STATES, and the middle talon of the eagle's right (facing) claw is broken even with the arrow shaft. Bright silvery surfaces display deep electric-blue and lavender at the margins. A nicely struck and minimally abraded piece. (#5328)

- 608 1820 Large 0 XF45 NGC. B-1, R.4. A luminous Choice XF example with rose-gold and violet-blue elements over otherwise silver-gray surfaces. Well struck for the issue and attractive. (#5329)

Vividly Toned 1820 Large 0 Quarter, B-1 MS64, Condition Census Example

- 609 1820 Large 0 MS64 NGC. B-1, R.4. Tompkins Die Stage 2. This is one of the Large 0, Large Stars varieties known for the date. *Guide Book* variety collectors would endeavor to acquire one each of the Large 0 and Small 0 variants, while Bust quarter specialists would seek one of all five pairings known for the year. The flag of the 1 is long and curved, the 8 is higher than 1 or 2, and there is a small lump above the dentils between 2 and 0. On the reverse all T's are defective at the bottom right. In this die stage there is a small lumpy die chip in the lower part of the 2 in the denomination.

Regardless of die marriage, the 1820 is rarely encountered in Mint State. Tompkins notes that while this variety is only "moderately scarce," it becomes more of a challenge as the Mint State level is approached. We would call the variety "very scarce," however, and it is worth noting that this example appears tied for second place in the Condition Census according to Tompkins' enumeration.

The design elements are strongly detailed on this near-Gem example. Orange-red patina occupies the centers, while electric-blue dominates the borders. Rotation beneath a light reveals just a few minute marks well concealed within the toning. Pleasing overall appeal.

Ex: Rudolph Collection (Heritage, 4/2006), lot 526.

From The Joseph C. Thomas Collection, Part Two. (#5329)

- 610 1821 XF45 PCGS. B-4, R.3. The light silver-gray surfaces of this modestly worn Choice XF coin retain subtle radiance. Pleasingly detailed with few overt abrasions. (#5331)
- 611 1821 AU50 NGC. B-3, R.2. Tompkins Die State 2/1. There are die scratches between stars 2 and 3, star 7 points to the headband, and a defect appears on the underside of the scroll under the S in PLURIBUS. "Bars" from die clashing at Liberty's ear and die rust between the leaves and the 2 in the denomination confirm the die states. Silver-white surfaces display a splash of violet in the obverse center. Well defined except for some of the star centers. A scattering of light circulation marks is visible on each side. (#5331)

Lovely Choice Mint State B-3 1821 Quarter

- 612 1821 MS64 NGC. B-3, R.2. Tompkins Die State 2/1. Deep golden-brown and apple-green toning blankets this intricately struck and satiny representative. Prominent die lines near stars 2 and 3 are as made. Light marks beneath the eye will be missed by most. Struck from clashed and lightly rusted dies. For coins not specifically attributed by variety, Census: 17 in 64, 9 finer (4/09). (#5331)

Scarce Choice AU 1822 Bust Quarter, B-1

- 613 1822 AU55 NGC. B-1, R.2. Deep ocean-blue and olive toning embraces this lightly circulated Bust quarter. Luster shimmers from the legends, stars, plumage, and hair. The claws, curls, and cap display slight wear. The left obverse field has a few unimportant marks, while the remainder of the surfaces are unblemished. (#5332)

Attractive 1825/4/3 Bust Quarter, B-3, AU53

- 614 1825/4/3 AU53 NGC. B-3, R.2. The otherwise charcoal-gray surfaces exhibit olive accents near the peripheries. Both sides are subdued, with satiny surface textures. Nicely struck for the type, and rather lightly abraded for a circulated example. Remnants of the underdigits are easily visible under a loupe. (#5336)

**1828 B-1 Large Size Quarter
A Lovely Toned Gem**

- 615 1828 MS65 NGC.** B-1, R.1. The final issue in the Large Size Capped Bust quarter series. On this available die pairing stars 1, 7, 8, and 13 are all closer to the bust than on the B-4 (most noticeably star 1), and there is minute repunching on stars 10 and 11. On the reverse all T's are defective at the bottom right.

The present coin is toned in mottled shades of deep green and gold on the lower two-thirds of the obverse, with the upper portions a light steel-gray. The patina is matched on the reverse where the lower portion is lighter, and the color palette ranges through deep blue, green, and russet, with luster gleaming through the peripheral lettering. The strike is sharp on all but Liberty's uppermost curls, and all stars show full radial lines to the centers. Regardless of variety, the 1828 issue is a very scarce coin in Gem condition, with just a handful seen that qualify at this level and a sole example graded higher by the two major services. A coin for the type collector who demands excellent surfaces and attractive toning. Census: 3 in 65, 1 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#5342)

Impressive 1831 B-6 Quarter, MS63

- 616 1831 Large Letters MS63 PCGS.** B-6, R.3. Slender arrowheads. Blended forest-green and straw-gold toning embraces this lustrous Select Bust quarter. The strike is precise aside from a couple of the right-side star centrils. Both sides are surprisingly unabraded. Population: 4 in 63, 12 finer (4/09). (#5349)

**Remarkable Gem Prooflike 1833 Quarter
B-2, High in the Condition Census**

- 617 1833 MS65 Prooflike NGC. B-2, R.2.** The 1833 issue is an underrated and overlooked issue among the Small Size Capped Bust quarters that end the series before the Liberty Seated quarters appeared in 1838. Not only does the 1833 have by far the smallest recorded mintage—156,000 coins—of the eight years that comprise the series, but the Reverse F of the B-2 variety, as here, is from a “new and totally different master hub,” according to Steve Tompkins’ 2008 reference, with two-line shield stripes and differently shaped wings, claws, feathers, and leaves—almost a design subtype in itself.

The present example is a remarkable piece in all respects, from the blue-green, sapphire, violet, and rose toning that drapes each side to the considerable reflectivity that shines through the patina. The striking definition is excellent, and the preservation remarkable: Neither fields nor devices exhibit a single individually mentionable flaw. This is the finer of just two Prooflike examples certified by NGC. A gorgeous Gem that will undoubtedly see fierce bidding competition. Census: 1 in 65 Prooflike, 0 finer (4/09).
From The Joseph C. Thomas Collection, Part Two. (#5352)

Pristine 1838 B-1 Bust Quarter, MS66

- 618 1838 MS66 NGC. B-1, R.1.** The year 1838 saw the transition from the Capped Bust, Small Size quarter to Christian Gobrecht’s Seated Liberty design, which premiered on half dimes and dimes in 1837. Lilac and apricot fill the centers, while the margins are adorned with blue-green patina. This intricately struck Premium Gem has remarkably clean surfaces, and the satin luster is easily seen through the attractive toning. An outstanding final-year type coin. Although 366,000 pieces are reported to have been produced, only one die pair is known, which suggests that either the dies were unusually hardy, or, more likely, some of the reported delivery may have been dated 1837. Census: 3 in 66, 0 finer (4/09).

Ex: Heritage (2/2005), lot 6528.

From The Joseph C. Thomas Collection, Part Two. (#5357)

Remarkable MS67 1853 Arrows and Rays Quarter

619 1853 Arrows and Rays MS67 NGC. For several years leading up to 1853, few U.S. silver coins remained in circulation, because they were worth more melted than in their coined form. The root cause for this was the immense discoveries of gold in California that lowered the market price of gold in terms of silver. As Walter Breen describes in the *Complete Encyclopedia of U.S. and Colonial Coins*, this “eventually (led) to a point where bullion dealers found they could make ‘endless chain’ profits by melting down silver coins bought for face value and reselling the silver. All of the mints’ output of silver vanished into hoarders’ hands, and most of it went to bullion dealers; less and less silver reached the Mint for coinage, reflected in the diminishing mintages of 1850-52.”

The Act of February 21, 1853, reduced the weight of silver coins to a figure that would eliminate bullion dealers’ profits and thus discourage further melting. The Act authorized the coinage of quarters at 96 grains, compared with the former 103 1/8 grains. Mint Director George Eckert realized that the new coins had to have an identifying mark to distinguish them from earlier ones. For the quarter (and half dollar as well), he placed arrows at each side of the date, with rays behind the eagle. (The dimes and half dimes included only the arrows.) This design format (for the quarters and half dollars) lasted only one year, with a reminder of the reduced weight carried on through 1855 in the form of arrowheads only. More than 15 million quarters were struck of the Arrows and Rays design. They were a smashing success. One Philadelphia paper reported that the Mint had “fully overcome the complaint among the small dealers of a want of change.” The new coins served their purpose excellently. For the first time since the establishment of the Mint in 1793, the nation had an adequate supply of fractional coins of uniform quality.

This particular piece is one of the finest examples extant of this one-year type; NGC and PCGS have certified a mere five specimens, and unsurprisingly, none are finer. For an issue all too often found with heavily toned surfaces, this is a brilliant example with silky-smooth, satinlike mint luster. The strike is impressive throughout, and each side is nearly abrasion-free; small marks on Liberty’s cheek and on the left (facing) shoulder serve as pedigree markers. Die polish lines are evident on both sides, especially on the obverse. Census: 3 in 67, 0 finer (4/09). From The Joseph C. Thomas Collection, Part Two. (#5426)

Select 1853/4 Quarter
Arrows and Rays, FS-1301

- 620 1853/4 Arrows and Rays MS63 PCGS. FS-1301, formerly FS-003. Well defined and virtually untoned, with highly lustrous surfaces. The vertical shaft of the 4 clearly shows under the 3 of the date. An unmarked and attractive example of this numismatic curiosity, and among the finest known. Population: 7 in 63, 4 finer (4/09).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 4016, which realized \$5,060. (#5427)
-

Rarely Seen MS64 1855-S Arrows Quarter

- 621 1855-S Arrows MS64 PCGS. CAC. The 1855-S quarter circulated widely among the California mining communities, so that most survivors are well worn or damaged. Mint State pieces are few and far between. Indeed, Larry Briggs assigns them a high R.6 rarity rating in his 1991 *Liberty Seated Quarters* reference. PCGS and NGC have graded only 15 Uncirculated examples.
- While most Mint State 1855-S quarters are weakly struck, this near-Gem specimen exhibits crisp definition, save for minor softness on the hair atop Liberty's head. Whispers of light gray and olive-tan reside on both sides, which display vibrant luster. A few light contact marks and grazes deny Gem status. Population: 3 in 64, 1 finer (4/09).
- From The Joseph C. Thomas Collection, Part Two. (#5437)*
-

Condition Scarcity 1856 Gem Quarter

- 622 **1856 MS65 NGC.** The 1856, sporting a mintage of 7.624 million pieces, is one of the most common dates in the Seated Liberty quarter series. Examples in the better Mint State grades, however, such as this Gem offering, are much more difficult to acquire. Lustrous ice-blue surfaces are occasionally splashed with reddish-gold, yellow-gold, and sky-blue. Some typical strike weakness is noted over both sides. Nicely preserved. Census: 12 in 65, 4 finer (4/09).(#5438)

- 623 **1867 VF35 PCGS. CAC.** A lovely Choice VF example of this elusive post-Civil War issue, one of only 20,000 pieces struck. Rich violet-gray toning overall with lighter color at the worn high points. Population: 3 in 35, 28 finer (4/09).(#5470)

Rarely Seen 1868-S Quarter, MS63

- 624 **1868-S MS63 PCGS.** Even though 96,000 pieces were struck of the 1868-S quarter, it is seldom seen in any grade and is especially elusive in AU and Uncirculated condition. At the MS63 level, only three pieces have been certified—this one by PCGS and two at NGC. In higher grades, a mere 10 coins have been seen by both of the major services (4/09). This piece shows the creamy luster usually found on Mint State 1868-S quarters that we have seen. The striking details are sharp overall except at the top of the obverse, and each side displays light rose coloration. Remarkably free from abrasions for an MS63.(#5473)

- 625 **1873-CC Arrows PCGS Genuine.** The letters of LIBERTY are visible but blurry. The overall appearance of this Carson City quarter is suggestive of burial and later unearthing, with olive and slate-gray color and milky-white splashes at the right reverse. (#5492)

- 626 **1874-S Arrows MS64 PCGS.** Well-defined in the centers with fresh luster that enlivens pale silver-gray surfaces. A gorgeous example of this branch mint Arrows quarter issue.
From The Joseph C. Thomas Collection, Part Two.(#5495)

Lustrous 1875-S Gem Quarter

- 627 **1875-S MS65 NGC.** Type One Reverse. The 1875-S is generally poorly struck. It is also elusive in all grades, despite the 680,000-piece mintage. Frosty luster envelops this Gem that displays just a touch of barely discernible localized light tan color. The reverse is actually quite well struck, while the obverse reveals areas of incompleteness. Roller marks are visible on the obverse. Both sides are devoid of significant contact marks. Census: 9 in 65, 1 finer (4/09).(#5500)

Attractive 1876-CC Quarter, MS66

- 628 **1876-CC MS66 PCGS.** Cobalt-blue and violet patination is slightly deeper on the reverse of this Premium Gem. Semiprooflike fields display a good degree of contrast with the devices, especially on the obverse. This is a generally well struck and nicely cared-for coin. Population: 4 in 66, 1 finer (4/09).(#5502)

Lovely 1877 Seated Quarter, MS66

- 629 **1877 MS66 NGC.** Type Two Reverse. A glacially white representative of the With Motto design type, this Premium Gem has frosty silver surfaces and bold design elements. Examples at this grade level are not particularly hard to locate, given some time to search. Seeking just the right example from the present population will require effort. Here is a piece that should please the connoisseur. Census: 44 in 66, 35 finer (4/09).(#5504)

Amazing Superb Gem 1877 Quarter

- 630 1877 MS67 NGC.** A lovely Superb Gem Seated quarter that would be ideal for a type set. The eye appeal is flawless, from the hint of golden toning gracing the frosty surfaces to the sharp strikes on Liberty and the stars. Carefully preserved with tantalizing eye appeal. NGC has graded just seven numerically finer pieces (4/09). (#5504)
- 631 1877-CC MS63 PCGS.** The luster in the light silver-gray fields is strong and slightly flashy, and the well struck devices show a touch of frostiness. A few isolated abrasions define the grade of this Carson City quarter. (#5505)

Highly Appealing 1880 Quarter, MS67

- 632 1880 MS67 PCGS. CAC.** The 1880 is scarce in the better Mint State grades. Cobalt-blue, beige-gold, and lavender patination adorns both sides of this lovely Superb Gem. Partially prooflike fields highlight the frosty well struck motifs when the coin is tilted slightly beneath a light source. An impeccably preserved highly appealing coin. Population: 8 in 67, 0 finer (4/09). (#5512)
- 633 1888 MS65 PCGS.** Strongly struck with considerable flashiness to the luster. Glimpses of gold and silver-gray toning enliven the fields. Great eye appeal for this low-mintage issue. Population: 31 in 65, 47 finer (4/09). (#5520)
- 634 1888-S MS64 PCGS.** Rich rose, violet, and magenta patina embraces each side of this lustrous near-Gem. Strongly detailed with no singularly mentionable flaws. Population: 22 in 64, 8 finer (4/09). (#5521)

Richly Toned MS68 1890 Quarter

- 635 1890 MS68 NGC.** Cherry-red, powder-blue, and sea-green toning covers this thoroughly lustrous and pristine Superb Gem. The strike is complete save for Liberty's hair and a few star centrils, but the quality is unimprovable for this scarce date. Once high mintages of Morgan dollars began in 1878, the production of other silver denominations was substantially reduced for years thereafter. Dime mintages were the first to return to normal levels, in 1882. Except for an anomalous 1888-S quarter issue, production of Seated quarters and halves remained low until 1891. The 1890 quarter, with a mintage of 80,000 pieces, has approximately the same rarity in Mint State as the 1889, which had an even lower mintage of 12,000 pieces. Presumably, the same Philadelphia-area dealer (perhaps John W. Haseltine) retained a similar quantity of both issues for stock. Census: 5 in 68, 0 finer (4/09).
From The Joseph C. Thomas Collection, Part Two. (#5523)

Shimmering MS67 1891 Seated Quarter

- 636 1891 MS67 PCGS. CAC.** This final year of issue is available in all grades through Gem, at which point it becomes more difficult to acquire. In MS67, the grade of the present coin, only 17 pieces have been certified by PCGS and NGC, with a solitary example grading higher. The highly lustrous surfaces are bright and untuned and exhibit sharply defined devices. A couple of minor marks in the left obverse field help pedigree the piece. Population: 3 in 67, 0 finer (4/09).
From The Joseph C. Thomas Collection, Part Two. (#5524)

PROOF SEATED QUARTERS

- 637 1866 Motto PR63 PCGS. CAC.** Though this gold-tinged violet-gray specimen is not designated as Cameo, both sides show distinct contrast. Sharply struck and attractive for the grade, though light hairlines are noted beneath the toning. Population: 39 in 63, 36 finer (4/09).(#5565)

Amazing 1869 PR65 Cameo Quarter

- 638 1869 PR65 Cameo NGC.** The untuned surfaces of this amazing PR65 quarter exhibit strong field-device contrast, and a decisive strike imparts virtually complete delineation to the frosty design features. Nicely preserved throughout. From a mintage of 600 proofs. Census: 5 in 65 Cameo, 4 finer (4/09).(#85568)
- 639 1877 PR64 PCGS. CAC.** Type Two Reverse. Gleaming mirrors and a sharp strike fortify the eye appeal of this mildly contrasted near-Gem. Only a few tiny disturbances in the essentially untuned fields preclude a finer designation. Population: 33 in 64, 20 finer (4/09).(#5578)
- 640 1879 PR64 Cameo PCGS.** Type Two Reverse. Minimally toned with strong mirrors and pleasing contrast, particularly on the reverse. A few faint hairlines in the fields contribute to the grade. Population: 12 in 64 Cameo, 11 finer (4/09).(#85580)

Dazzling PR67 ★ 1883 Quarter

- 641 1883 PR67 ★ NGC. CAC.** Ocean-blue, fire-red, and sun-gold adorn the obverse margin, while the reverse border is primarily aquamarine. The seated Liberty is mostly untuned and frosty, although light rose patina on the eagle precludes a Cameo designation. A fully struck example of this popular low mintage date. Census: 2 in 67 ★, 1 finer (as PR67 ★ Cameo) with a Star designation (4/09).(#5584)
- 642 1885 PR65 Cameo NGC.** Ice-white devices provide immeasurable contrast with the glassy fields. The strike is precise aside from the right-side stars. Another low mintage date; just 930 proofs and 13,600 business strikes were issued. Census: 21 in 65 Cameo, 22 finer (4/09).(#85586)

Exquisite PR67 Cameo 1886 Quarter

- 643 1886 PR67 Cameo NGC. CAC.** This flashy Superb Gem has outstanding obverse white-on-black contrast, and only delicate golden patina on the reverse denies an Ultra Cameo designation. Intricately struck and exceptionally preserved. Only 886 proofs were struck, and the business strike production was also low. Census: 17 in 67 Cameo, 1 finer (4/09).(#85587)
- 644 1887 PR63 PCGS.** Crisply detailed and minimally toned with light, scattered hairlines. Both sides show modest contrast, though not to the level required for a Cameo designation. One of just 710 specimens coined.(#5588)

BARBER QUARTERS

Highly Attractive 1892 MS67 Quarter Type One Tripled Die Reverse, FS-801

- 645 1892 MS67 PCGS. CAC.** Type One Reverse. Tripled Die Reverse. FS-801. Tripling shows on the outer lettering, and doubling appears on a few stars, the ribbon ends, and the arrows. A late die state with die chips nearly filling the upper loops of the first and second S in STATES. The lovely original toning over both sides of this Superb Gem Barber quarter includes shades of sea-green, rose-gray, and amber. The striking details are uniformly crisp and bold, and the surfaces are virtually void of marks.(#5601)

Eliasberg's Choice Mint State 1892-S Quarter

- 646 1892-S MS64 PCGS. CAC.** Ex: Eliasberg. Type One Reverse. An exquisitely struck near-Gem that has flashy luster and faint yellow-brown color. The reverse is gorgeously preserved, while the obverse is also clean. The upper reverse is lightly strike doubled. Housed in a green label holder, and with an irrefutably desirable pedigree. Population: 17 in 64, 12 finer (4/09).
Ex: Purchased by J.M. Clapp directly from the Philadelphia Mint; John H. Clapp; Clapp Estate, 1942; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1547, where it realized \$3,520. (#5603)

- 647 1901-S Fair 2 PCGS.** Despite extensive wear that includes merger of rim and field, this gold-gray survivor has a clear date and an easily discernible mintmark. Attractive for the grade and eminently collectible. (#5630)

Intriguing Good 6 1901-S Quarter

- 648 1901-S Good 6 PCGS.** Though significantly worn, this key-date Barber quarter retains an important level of detail: On the headband, the L and Y of LIBERTY are clear and a fragment of the T is visible, making this piece more desirable than the "average" Good survivor. Medium-gray surfaces show occasional gold and rose tints. (#5630)

Noteworthy VF25 1901-S Quarter

- 649 1901-S VF25 PCGS.** An appealing midgrade piece that shows glimpses of gold and forest-green against otherwise light silver-gray surfaces. The modestly marked surfaces are slightly glossy, and the eye appeal is high. The 1901-S is a highly elusive issue in all grades, but better circulated pieces are extremely challenging; most survivors are either heavily worn or Mint State, and only a handful of Fine to Extremely Fine pieces exist. There will never be enough to satisfy the demand of hundreds, if not thousands of Barber quarter enthusiasts. Population: 6 in 25, 53 finer (4/09). (#5630)

- 650 1903-S MS65 PCGS.** This crisply struck Gem is draped in dusky tan-gold and cream-gray toning. Satin luster traverses surfaces unabraded save for subtle contact on Liberty's jaw and the lower portion of the shield. The lower mintage 1903-S, one of just over 1 million pieces struck, is scarce and sought-after in grades of Fine or better. Certified in a green label holder. Population: 13 in 65, 10 finer (4/09).
Ex: Long Beach Signature (Heritage, 6/2005), lot 6017. (#5636)

Blazing MS67 1906 Barber Quarter

- 651 1906 MS67 NGC.** This highly lustrous quarter is completely brilliant over each side. The strike is bold throughout, and both sides are essentially immaculate. Formidable quality for this Teddy Roosevelt-era quarter issue, a little-saved affair of less than 3.7 million pieces. Census: 3 in 67, 0 finer (4/09).(#5642)
- 652 1909 MS66 PCGS.** Vibrant orange-gold toning with accents of lavender covers both sides of this conditionally scarce example. This powerfully struck piece has just a trace of softness on the eagle's shield and right wingtip, as often seen. Remarkable satiny luster shimmers throughout and enhances the spectacular eye appeal. Population: 17 in 66, 2 finer (4/09).(#5653)
- 653 1909-D MS65 PCGS.** This is a magnificent Gem Barber quarter that has mottled, original plum-red and cobalt-blue patina on both sides. Sharply struck and highly lustrous, without a single apparent mark or blemish on either side. Population: 26 in 65, 18 finer (4/09).(#5654)

Fantastic MS66 1911-S Quarter

- 654 1911-S MS66 PCGS.** Though it is not one of the famous three S-mint Barber quarter rarities, the 1911-S is elusive in its own right and has a mintage of under 1 million pieces. This example is carefully preserved with pale silver-gray color overall and an above-average strike. Population: 40 in 66, 4 finer (4/09).
From The Joseph C. Thomas Collection, Part Two.(#5661)
- 655 1912 MS65 PCGS. CAC.** Brightly lustrous with occasional hints of pebbling in the fields. This well-defined Gem offers impressive eye appeal. Anything finer is a condition rarity, with 15 such pieces known to PCGS (4/09).(#5662)

Desirable 1913-S Quarter, MS66 Ex: JFS Collection

- 656 1913-S MS66 PCGS.** With an original production of a mere 40,000 pieces, it is no surprise that the 1913-S Barber quarter has the lowest mintage of all nongold regular-issue U.S. coins from the 20th century. The 1913-S is one of the three most difficult issues in the series, along with the 1896-S and 1901-S. David Lawrence states that two sets of dies were probably used for the entire production. At least one of the obverse dies developed breaks. The present example is from a particularly late state, with a noticeable crack that begins at the rim and runs up through the 3 of the date and to the tip of Liberty's bust. Another small vertical crack is seen below Liberty's ear. This coin is untoned except for scattered, small apricot toning spots over the right portion of the obverse. The luster has a bright satiny sheen, and the only mentionable distraction is a dark spot in the reverse field below the eagle's left (facing) wing. Although not as rare as the 1901-S in high grades, the 1913-S is still a challenging date to locate as a Gem or better, with only 30 coins graded by PCGS above the MS64 level (4/09). A shimmering, high-end example of this prized 20th century rarity.
Ex: FUN Signature Sale (Heritage, 1/2004), lot 2061, which realized \$27,600; JFS Collection (Heritage, 8/2004), lot 4099.
From The Joseph C. Thomas Collection, Part Two.(#5666)
- 657 1915-D MS66 NGC.** Ice-blue, emerald-green, russet, and a few dashes of scarlet surround the margins with lighter colored centers. Only a few minute marks are detected on the portrait. Fully struck and attractively preserved with uncommon eye appeal. Census: 12 in 66, 4 finer (4/09).(#5671)

PROOF BARBER QUARTERS

Exceptional White-on-Black 1892 Quarter PR67 Cameo

- 658** 1892 PR67 Cameo NGC. Type Two Reverse. The snow-white devices show stark contrast against the deeply mirrored fields. One has to wonder why this spectacular coin did not achieve Ultra Cameo designation by NGC. The untoned surfaces are splendidly preserved, and the obverse is nearly perfect. A tiny planchet flaw, of Mint origin, is located in the field below the second U in UNUM. Census: 18 in 67 Cameo, 4 finer (4/09). From *The Joseph C. Thomas Collection, Part Two*. (#85678)

Elegant 1892 Quarter, PR68 Ultra Cameo

- 659** 1892 PR68 Ultra Cameo NGC. Type Two Reverse, forming the majority of 1892 proofs. Sharply struck motifs appear to float over the deep, glassy fields of this marvelous first year Barber quarter. Both sides are untuned and devoid of mentionable flaws. This elegant piece will delight the Barber coinage enthusiast. Census: 7 in 68 Ultra Cameo, 0 finer (4/09). (#95678)
- 660** 1896 PR64 PCGS. Dappled blue and gold shadings invigorate each side of this near-Gem proof. Crisply detailed with only a few faint hairlines hidden under the toning. (#5682)

Stunning PR68 Cameo 1899 Quarter

- 661** 1899 PR68 Cameo NGC. Strongly contrasted with gorgeous silver-black mirrors and sharply struck devices coated in "white" frost. Each side offers amazing eye appeal and careful preservation. This turn-of-the-century issue is unavailable any finer with Cameo surfaces, according to the combined certified population (4/09). (#85685)

Brilliant PR67 Cameo 1909 Quarter

- 662** 1909 PR67 Cameo NGC. Frosty devices provide exemplary contrast with darkly mirrored fields. Fully brilliant and seemingly worthy of an Ultra Cameo designation, although conservatively assessed by NGC. A lower mintage proof date with only 650 pieces issued. Census: 10 in 67 Cameo, 1 finer (4/09). (#85695)

Outstanding 1910 Barber Quarter PR68 ★ Ultra Cameo

- 663** 1910 PR68 ★ Ultra Cameo NGC. Icy-white devices and glassy mirrored fields combine to provide unimprovable white-on-black cameo contrast. The strike is full on the shield corners, and only the right (facing) claw and fletchings show any indication of incompleteness. This brilliant Superb Gem has outstanding eye appeal, and ranks among the finest survivors from the scant emission of 551 proofs. Only the first few proofs struck from a freshly installed Barber die pair show the present degree of exceptional contrast. NGC has certified just three pieces as Ultra Cameo, and none surpass the PR68 level (4/09). (#95696)

- 664 1911 PR64 Cameo PCGS.** Though a light layer of cloud-white patina drapes each side, the essential contrast of this near-Gem is undimmed. Strong eye appeal with only a few hairlines in the fields. Population: 7 in 64 Cameo, 33 finer (4/09).(#85697)

Fabulous PR68 Cameo 1911 Quarter

- 665 1911 PR68 Cameo NGC.** Another low-mintage proof date with only 543 pieces struck. Of the 12 coins certified in this lofty grade by NGC, surely several are resubmissions. This is a fabulous piece that has stark white-on-black contrast and is perfectly balanced from side to side. The surfaces are fully brilliant, fully struck, and of course, problem-free.(#85697)

Brilliant Cameo PR67 1912 Barber Quarter

- 666 1912 PR67 Cameo NGC.** This is an immaculately preserved Superb Gem proof that is brilliant throughout. The fields are highly reflective and the devices display rich mint frost. Essentially unimprovable quality. Only 700 proofs were struck, and surprisingly few have survived in high grades such as this. Census: 7 in 67 Cameo, 2 finer (4/09).(#85698)
- 667 1913 PR64 NGC.** A sharply struck proof with deeply mirrored fields and mottled turquoise-blue, lilac-gray, deep-purple and gold toning across both sides. Free of hairlines or contact marks. (#5699)
- 668 1913 PR66 PCGS.** Dusky lilac, sun-gold, and apple-green enrich this intricately impressed Premium Gem. Housed in a green label holder. A scant 613 proofs were struck. Population: 29 in 66, 13 finer (4/09).(#5699)

Charming Superb Gem Proof 1914 Quarter

- 669 1914 PR67 NGC.** The 1914 proof quarter is famous for its low mintage of only 380 pieces. This carefully preserved example has deeply mirrored fields with lightly lustrous devices that yield a subtle cameo effect enhanced by the coin's brilliance. Census: 17 in 67, 7 finer (4/09).
From The Joseph C. Thomas Collection, Part Two.(#5700)

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, Fine 15

- 670 1916 Fine 15 PCGS.** The first year 1916 Standing Liberty quarter had a minuscule mintage of just 52,000 pieces. Naturally it has become the series' key date at all grade levels, and even lower-level circulated coins are desirable. This piece seems original and unimpaired, with attractive light toning on each side. Moderately worn, with slighter better details on the reverse, where a faint pincrash is noted from the eagle's upper left (facing) wing to PL in PLURIBUS.(#5704)

Desirable 1916 Standing Liberty Quarter, MS62

- 671 1916 MS62 NGC.** The 1916-dated Standing Liberty quarters and Walking Liberty half dollars, the former by Hermon MacNeil and the latter by Adolph A. Weinman, were the last coinage redesigns until 1921's Peace dollar, continuing the extensive coinage redesign project begun by President Theodore Roosevelt and Augustus Saint-Gaudens during the previous decade.

In the case of the 1916 Standing Liberty quarters, the small mintage of 52,000 coins was produced in late 1916, and slipped quietly into circulation in early 1917 along with the 1917 Type One issues. Although the shield of this richly toned quarter is somewhat weak, the remaining details on both sides are nicely brought up. Underneath the thick gold, lilac, and iridescent toning is a full quota of frosty luster. The surfaces have a few typical marks that are consistent with the grade. (#5704)

- 672 1917 Type One MS65 Full Head PCGS. CAC.** A boldly impressed Gem that would fit well in a similarly toned type set. Splashes of silver-blue, gold, and crimson-charcoal toning frame pale gray centers. (#5707)
- 673 1917 Type One MS66 Full Head NGC.** Aside from a touch of tan at the obverse margins, this piece offers subtly textured silver-white surfaces. With its bold detail and impressive preservation, it would be a great fit for a similarly graded type set. (#5707)

Sharp 1917-D Type One Quarter, MS66 Full Head

- 674 1917-D Type One MS66 Full Head PCGS.** A well executed strike transcends the Full Head to include bold delineation on all design elements, including the rivets, vertical shield lines, Liberty's toes, and the eagle's plumage. Lustrous surfaces display splashes of light golden-tan patina and are devoid of significant marks. Full Head specimens are fairly available through the Gem level. Premium Gems are more challenging, and anything finer is elusive. (#5709)

- 675 1917-S Type Two MS64 Full Head NGC.** Wisps of light tan appear on radiantly lustrous surfaces, and sharply struck devices transcend the Full Head to include excellent definition on the stripes of the inner shield and the eagle's feathers. Some inconsequential marks are noted on the upper part of the inner shield, on Liberty's torso, and above the reverse motto. Census: 60 in 64 Full Head, 32 finer (4/09). (#5719)

Intriguing MS64 Full Head 1918-S Quarter

- 676 1918-S MS64 Full Head NGC.** Attractively lustrous with hints of pale blue and pink toning gracing the fields. Though the strike is visibly soft on Liberty's body and the nearby shield, the head shows an abundance of delicate details. Minimally marked for the MS64 designation. Census: 58 in 64 Full Head, 17 finer (4/09). (#5725)

- 677 1919-D AU58 NGC.** The luster on each side is warm and satiny. Well struck overall, though Liberty's head is distinctly flat as usual. Light silver-gray color with golden overtones and two near-vertical charcoal streaks through UNITED STATES OF AMERICA on the reverse. Just a touch of rub is noted on the high points. (#5730)

Dynamic MS64 Full Head 1919-S Quarter

678 1919-S MS64 Full Head PCGS. Strongly struck for this S-mint issue that has become infamous for the opposite. Not only is the head well-defined, but so are all the rivets of the shield. Hints of lemon-gold patina grace strongly lustrous surfaces that show no singularly mentionable flaws. Population: 13 in 64 Full Head, 14 finer (4/09).(#5733)

679 1921 AU58 PCGS. Though Liberty's head shows softness, the rest of the coin, including the shield, is sharply struck. Minimally toned with inviting luster and just a trace of friction on the high points. (#5740)

680 1923 MS67 NGC. Fantastically lustrous with glimpses of sky-blue and gold patina. Well struck in general with only slight softness on Liberty's head. Census: 44 in 67, 0 finer (4/09).(#5742)

681 1923-S AU58 NGC. A low-mintage key issue in the Standing Liberty series, the 1923-S commands a premium at all levels of preservation. This near-Mint example is absolutely original, attractively toned lilac-gray with satiny luster that is virtually intact. (#5744)

Unusual Semiprooflike 1924-D Quarter MS66 Full Head

682 1924-D MS66 Full Head NGC. This is a most unusual and atypical 1924-D quarter. Our reference point for this issue is the many pieces consigned to our June 1995 Long Beach sale by the Museum of Connecticut History. Most of those pieces were from later die states and showed significant loss of detail at the top of the date just above the die crack that is invariably seen on 1924-D quarters. This particular piece shows the die crack, but there is no loss of detail at the top of the date. But what is most peculiar about this piece is that the fields appear to have been polished in the mint, creating a basined, semiprooflike appearance. None of the coins from the Connecticut History holdings had this feature, so we conclude this piece is not from that hoard. The surfaces are brilliant throughout, and the striking details are strong not only on Liberty's head, but also on the other design elements. Census: 9 in 66 Full Head, 2 finer (4/09).(#5749)

Scarce MS65 Full Head 1924-S Quarter

683 1924-S MS65 Full Head NGC. Honey-gold and powder-blue enrich this coruscating and unabraded Gem. The strike is complete save for softness on the cheek and a couple of shield rivets. As expected with all high grade examples from this series, the mint luster is outstanding. Pale golden color covers each side. Seldom encountered in such exceptional quality. Census: 29 in 65 Full Head, 4 finer (4/09).(#5751)

Gorgeous MS64 Full Head 1926-D Quarter

684 1926-D MS64 Full Head PCGS. Strong and attractive luster defines the eye appeal of this near-Gem, largely faint silver-gray with splashes of orange and peach scattered on each side. Pleasingly detailed on Liberty's head, though the lower left rivets of the shield and the leading edge of the eagle's wing show softness. Population: 30 in 64 Full Head, 29 finer (4/09).(#5757)

685 1927-S XF45 PCGS. An evenly worn example with a combination of apricot and silver-gray toning and just a few tiny marks on either side. A pleasing Choice XF example of this late semikey date in the Standing Liberty quarter series. (#5764)

Attractive AU53 1927-S Quarter

686 1927-S AU53 PCGS. Always in demand in grades from AG on up, the low-mintage 1927-S is one of the most challenging regular issue coins in the Standing Liberty series. This is an especially attractive piece that is mostly untuned. The devices have even wear over the high points, with the only notable area of softness on the head of Liberty (as usual). (#5764)

687 1928-S MS67 NGC. Small S. A lightly toned Superb Gem with potent luster and splendidly smooth surfaces. The strike is above average, although the lack of an earhole precludes a Full Head designation. Census: 17 in 67, 0 finer (4/09).(#5770)

688 1928-S MS66 Full Head PCGS. CAC. This pleasingly detailed Premium Gem shows only a touch of softness on the shield. Each side is immensely lustrous with hints of gold and peach toning visible near the rims. PCGS has graded 11 finer Full Head representatives (4/09).(#5771)

689 1928-S MS66 Full Head PCGS. Well struck with bright silver-white luster and noteworthy eye appeal. The detail on Liberty's head is pleasing, as is the overall preservation. PCGS has graded 11 finer Full Head coins (4/09).(#5771)

Outstanding 1929-D Quarter, MS65 Full Head

690 1929-D MS65 Full Head NGC. As a later issue in the series (actually, it is the final D-mint Standing Liberty quarter), the 1929-D is often classified as a common coin. However, it is uncommon, at least at the Gem Full Head level of preservation. Cline (2007) opines that the 1929-D is one of the most underrated dates in the entire 1916-1930 Standing Liberty series. The surfaces are brilliant-white with bright, frosty mint luster, and there no obvious or distracting abrasions on either side. The strike is strong throughout, and the eye appeal alone would do justice to an even higher grade. Census: 17 in 65 Full Head, 10 finer (4/09).(#5775)

691 1929-S MS66 Full Head NGC. Bright silver-white luster dominates the eye appeal of this crisply struck and carefully preserved Premium Gem. This S-mint quarter is instantly memorable. NGC has graded 22 finer Full Head pieces (4/09).(#5777)

692 1930 MS66 Full Head NGC. Rich reddish-orange peripheral tints frame lustrous silver-gray centers. A pleasingly detailed survivor from this final year of issue for the Standing Liberty design. NGC has graded 27 finer Full Head coins (4/09).(#5779)

Lovely Full Head 1930 Quarter, MS67

693 1930 MS67 Full Head PCGS. Potent luster dominates this exceptionally preserved Superb Gem. Pastel gold and sky-blue toning ensures the eye appeal. Well struck except for a pair of shield rivets near the waist. The final date of the prematurely ended series. Housed in a green label holder. Population: 28 in 67 Full Head, 0 finer (4/09).(#5779)

Impressive MS67 Full Head 1930 Quarter

694 1930 MS67 Full Head PCGS. A minimally toned Superb Gem with remarkable frosty luster and excellent definition on Liberty's head. Aside from hints of golden toning, this coin is shining silver-white. Great eye appeal for this final-year issue. Neither NGC nor PCGS has certified a numerically finer Full Head example (4/09).(#5779)

WASHINGTON QUARTERS

695 1932-D MS64 PCGS. This radiantly lustrous near-Gem key date displays whispers of golden-tan, powder-blue, and lavender around the peripheral areas, and an impressive strike translates to strong definition on the design features. A few minor handling marks define the grade.(#5791)

696 1932-D MS64 PCGS. This key date near-Gem displays creamy silver-white coloration and bold, smooth satin luster over both sides. The striking details actually seem better than those usually seen for this issue, as the finer detailing of Washington's wig hair is more clearly delineated than average, especially around the ear. Impressively unabraded, and certain to command bidder attention.(#5791)

697 1932-D MS64 PCGS. Strongly struck and impressively lustrous. The centers are pale silver-gray, while the fields show varying levels of blue-violet and reddish-gold patina, this more heavy on the obverse.(#5791)

Near-Gem Washington Quarter Key 1932-D

698 1932-D MS64 PCGS. Soft, frosted mint luster characterizes this piece, and each side has a light accent of golden and mottled russet color. A few pecks in the left obverse field are all that keep this coin from the Gem category.
Ex: Dallas Signature (Heritage, 11/2005), lot 1445, which realized \$4,950.(#5791)

Magnificent Gem 1932-D Quarter

- 699 1932-D MS65 PCGS.** The undisputed key to the Washington quarter series, this is a coin that must be seen to be fully appreciated. While not technically perfect, the surfaces are original and attractively toned. The borders display golden-russet patina, richest along the upper right obverse periphery. An exceptional 1932-D that should interest a wide variety of collectors of this modern series. Population: 63 in 65, 1 finer (4/09).(#5791)

- 700 1935-D MS67 NGC.** Immensely lustrous with fantastic eye appeal. The strike is bold, and freckles of blue-green and golden-orange enliven the obverse margins. Despite a mintage of nearly 5.8 million pieces, the 1935-D is highly elusive at this level of preservation. Census: 11 in 67, 0 finer (4/09).(#5798)

Highly Lustrous MS67 1937-D Quarter

- 701 1937-D MS67 PCGS.** Bright, even mint frost covers this gorgeous D-mint survivor, minimally toned save for traces of golden-brown at the left obverse margin. Highly lustrous and impressively preserved. This coin is tied for numerically finest certified at both PCGS and NGC (4/09).(#5804)

Remarkable MS68 ★ 1942-D Quarter Finest Certified at NGC and PCGS

- 702 1942-D MS68 ★ NGC.** Magnificent multicolored toning endows both sides of this highly lustrous, virtually immaculate coin. Arguably the single finest certified, since the only other MS68 NGC example lacks a Star designation, and PCGS has yet to encapsulate any above MS67 (4/09).
Ex: Central States Signature (Heritage, 4/2002), lot 5778, which realized \$8,337.50. (#5818)

SMS WASHINGTON QUARTER

- 703 1964 SMS MS66 PCGS.** Type A Reverse. The Special Mint Set coins of 1965 through 1967 are common, but not so for the 1964, which was unknown to the collector community in this format prior to the early 1980s. This satiny Premium Gem is unabraded and attractively toned in tan-gold and stone-gray. Population: 11 in 66, 13 finer (4/09).(#5974)

PROOF WASHINGTON QUARTERS

Shimmering, Brilliant PR67 1936 Quarter

- 704 1936 PR67 NGC.** This enchanting Superb Gem is essentially brilliant and undeniably appealing. Full design definition complements sublime technical excellence. A wonderful example from this popular initial proof Washington quarter issue, tied for numerically finest certified by both NGC or PCGS (4/09).(#5975)

- 705 1941 PR68 NGC.** The mintage of 15,287 pieces was relatively small. Soon, proof coinage would cease altogether, during the dark days of World War II. This specimen is fully struck and immaculately preserved, with touches of attractive, original patina near the borders. Census: 28 in 68, 0 finer (4/09).(#5980)

- 706 1950 PR68 ★ Cameo NGC.** An absolute stunner with incredible white mint brilliance on the devices and bold, mirrored fields. The design motifs seem to float across the surfaces of this superlative proof. Every detail on each side is as sharp as the dies themselves. Memorable and exciting. (#85982)

- 707 1976-S Silver PR70 Deep Cameo PCGS.** Technically flawless with absolute contrast. A perfect exemplar of the popular Bicentennial quarter proof, one of just 31 pieces assigned the ultimate grade by PCGS (4/09).(#96008)

STATEHOOD QUARTER

- 708 2004-D Wisconsin Extra Leaf Low MS67 NGC.** FS-5902. A minimally toned Superb Gem representative of this popular and enigmatic modern variety. Well-defined with the "extra leaf" prominent. (#814033)

EARLY HALF DOLLARS

- 709 1794 PCGS Genuine.** O-105, R.5. A well-worn but readily collectible example of this rare variety. Surfaces are medium-gray save for a large patch of fresh silver in the right obverse field, the result of damage. (#6051)

- 710 1794—Plugged, Improperly Cleaned—NCS.** VG Details. Ex: Meyer Collection. O-104, R.5. A significantly circulated representative of this rare variety that has retoned deep slate-blue and olive-gold from a past cleaning. From the perspective of the reverse, the hole is just to the left of the first A in AMERICA. (#6051)

- 711 1794—Plugged—NCS. VG Details.** Ex: Meyer Collection. O-107, R.6. A desirable representative of this very rare die pair. Medium-gray and slate-gray colors dominate. Though this piece was holed at 12 o'clock on the obverse, the subsequent plug was expertly done, and only small traces of the plug are visible on the reverse. (#6051)

Essential 1794 O-101a Half Dollar, XF40

- 712 1794 XF40 NGC.** O-101a, R.4. The earlier die state shows a die crack from the edge through the pair of leaves below the first S in STATES; in this later die state, the crack turns upward sharply, just missing the outer berry and crossing the single leaf and the last S in STATES.

Both the early and late states of the O-101 die pairing are classified as R.4, but such a rarity ranking somewhat misses the point of just how in-demand are the 1794 half dollars as a *first-year type*—and, for that matter, the 1794 silver dollars are, much more so. Of course the 1794 silver dollars are many times rarer, due to their much lower mintage of 1,758 pieces, compared to a recorded mintage of 23,464 half dollars. But of all 11 1794 half dollar varieties, the R.4 O-101 is the only one that is “merely” very scarce, as the remaining pairings are all rare—most of them very rare to unique.

The gunmetal-gray surfaces of this piece offer pale reddish accents over the high points, and while the coin has of course seen moderate wear, there are no marks of any singular import.

Sooner or later, advanced collectors tire of having their various collections missing the key dates, or type assemblages that lack the true blockbuster coins that distinguish a “great” collection from a merely “good” one. Many of them turn to the *first-year-of-type issues* essential for the formation of such a memorable set. Undoubtedly the best-known first-year type collection was formed by Jimmy Hayes. As the most available Overton die pairing of this first-year type, the present coin is one of those essentials. (#6051)

Deeply Toned 1794 Half Dollar, O-101, XF Details

- 713 1794—Improperly Cleaned—NCS. XF Details.** O-101, R.3. Star 1 pierces the center of the lowest hair curl, a point of star 2 is close to curl 2, and a point of star 15 touches the lower bust near the truncation. On the reverse there are 21 berries, 10 left, 11 right. Deep grayish-blue toning covers both sides. A nicely defined piece that is minimally marked. The NCS disclaimer should not dissuade the interested bidder, as the cleaning is not all that bad. (#6051)

- 714 1795 2 Leaves VG8 ANACS.** O-119, R.4. The I in UNITED is recut, and die lumps are present above the final star. A lavender-gray example of the widely sought Flowing Hair type. Unblemished aside from a faint thin mark near the A in STATES. (#6052)

Pursued 1795 Half Dollar, VF25 Two Leaves, O-110a

- 715 1795 2 Leaves VF25 NGC.** O-110a, R.4. A pair of bold die cracks on the upper right obverse field identify the later die stage. A smooth dove-gray example with impressive definition on Liberty's hair. The bottom of the date and the top of OF are incompletely brought up, but the remainder of the legends are sharp. A couple of faint mint-made adjustment marks near the date and some pinpoint marks on the profile are visible only beneath a glass. A desirable example from the second and final year of the Flowing Hair type. Ex: Dallas Signature (Heritage, 12/2005), lot 773. (#6052)

Exceptional 1795 O-131 Half, AU58

- 716** 1795 2 Leaves AU58 NGC. O-131, R.4. The O-131 is a very scarce and valuable early half dollar variety, especially in high grades. The finest known is MS63 (the James Stack specimen), followed by two other Mint State coins, three AU58s, and four AU55s that have been sold in the past 10 years. This exceptional piece has deep gray patina over each side, with occasional patches of darker color around the peripheries. There are no marks that would be useful to trace the pedigree of this coin; only the configuration of the toning would make that possible.(#6052)
- 717** 1795/1795 VG8 ANACS. O-112, R.4. The broadly repunched date paired with a Two Leaves reverse. Gold-gray and slate shadings dominate this well-worn example, a coin that is nonetheless minimally marked with impressive eye appeal.(#6055)

Attractive 1796 16 Stars Half Dollar, O-102, VG8
Ex: Jules Reiver Collection

718 1796 16 Stars VG8 NGC. Ex: Jules Reiver Collection. O-102, High R.5. The usually seen die crack that travels from the rim between the date and star 1 through the first four stars to the milling at 8 o'clock shows clearly on this specimen. A later die state is evidenced by an additional crack connecting stars 2 and 3 and by cracks from stars 1 and 2 to the edge.

Both sides display pleasing natural gray toning, with the devices just a shade lighter. Liberty's ear and the hair strands beneath are relatively well defined, as are the curls behind the shoulder. Indeed, the obverse likely qualifies as full Fine. On the reverse, the eagle's right (facing) wing and the adjacent palm leaves in the middle of the wreath are weak, as is the bottom of the 2 in the fraction and the upper parts of F and AM. The design elements are nicely centered on the planchet, and about one-half of the dentilation shows on the obverse and roughly one-quarter on the reverse. The surfaces are remarkably clean for a coin that has seen moderate to heavy circulation, and reveal no mentionable blemishes or adjustment marks. A minute J-shaped mark on Liberty's temple identifies the coin.

This piece will make a welcome addition to an early U.S. type set or to a date/variety collection of Bust halves. Lower- to middle-grade Draped Bust, Small Eagle half dollars usually lack the attractive, unimpaired surfaces seen on this lovely specimen.

Ex: Julian Leidman (9/1983); *The Jules Reiver Collection* (Heritage, 1/2006), lot 22513.

From *The Joseph C. Thomas Collection, Part Two*. (#6058)

Entrancing AU 1803 Large 3 Half, O-101

- 719 1803 Large 3 AU50 ICG.** O-101, R.3. Golden-russet and olive-green adorn this unblemished Draped Bust half. Luster shimmers from the hair, shield, plumage, and borders. Light wear on the jaw and shoulder confirms brief circulation, but the devices display pleasing definition. (#6066)

Elusive 1805 Half, O-112

- 720 1805 PCGS Genuine.** Ex: Meyer Collection. O-112, R.2. From the legendary complete Bust half die variety collection of Charlton E. Meyer. Lovely red-brown toning clings to the obverse margin. The reverse is untuned save for glimpses of peripheral tan-gold. Struck from boldly clashed dies. Unabraded aside from some inconspicuous straightening lines around the eagle's head and nearby stars. (#6069)
- 721 1805—Improperly Cleaned—NCS.** XF Details. O-113a, R.4. Light wear is concentrated on the high points. While this piece shows hairlines in the slightly glossy silver-gray centers, the peripheral zones have retoned slate-gray and gold. (#6069)

Census-Level 1805 O-107 Half, XF45

- 722 1805 XF45 PCGS.** O-107, R.5. An outstanding example of the variety, and the third finest to appear at auction in recent years, according to Stephen Herrman's record. An AU53 NGC crossed the auction block in July 2008, and we offered the Jules Reiver XF45 coin in January 2006. Following those were an XF40 and a VF20. Both sides are light silver-gray, with deep golden-brown peripheral toning on the obverse. (#6069)

Near-Mint 1805 Half Dollar, O-112

- 723 1805 AU58 NGC.** O-112, R.2. The date and star 1 are close to the bust on the obverse, while on the reverse, an arrowhead appears below the right upright of the N in UNITED. A briefly circulated coin that retains substantial luster beneath soft gold-gray and silver shadings. Minimally marked and pleasing. A double "collar" clash beneath the chin, as made. (#6069)

**Choice AU 1806 Bust Half
Pointed 6, No Stem, O-109**

- 724 1806 Pointed 6, No Stem AU55 PCGS.** CAC. O-109, R.1. Exquisite apple-green and tan-gold toning graces this partly lustrous and well impressed Draped Bust type coin. Any marks present are minor and difficult to locate. A middle die state with at least three sets of clash marks, but without the crack from star 12 to the neck that identifies O-109a. (#6073)
- 725 1806 Pointed 6, Stem VF35 NGC.** O-121, R.4. Deep steel-gray and walnut-brown toning blankets this middle-grade Bust half. A strong loupe locates scattered faint abrasions, along with a brief curved mark in the shield. (#6071)

**Scarce AU55 1806 Half Dollar
Pointed 6, With Stem, O-116**

- 726 1806 Pointed 6, Stem AU55 NGC.** O-116, R.3. Numerous slender die cracks decide the Overton marriage. Luster fills the obverse border and most of the reverse. Mostly pearl-gray, but the peripheries are light golden-brown. Surprisingly devoid of marks. A worthy Draped Bust example. (#6071)
- 727 1807 Draped Bust XF40 NGC.** O-102, R.2. The left serif of Y in LIBERTY points well above the top of T, and a leaf points to the extreme right base of I in AMERICA. Traces of luster rest in the protected areas, and a relatively sharp strike results in strong definition on the design elements. Bright silver-white surfaces exhibit occasional whispers of purple at the rims. A few minuscule marks are visible on the obverse. (#6079)

- 728** 1807 Draped Bust—Cleaned, Retoned—ANACS. AU50 Details. O-110a, R.3. Dusky steel-blue, gold, and lilac-red shades help conceal a relatively mild cleaning. Luster still shimmers from device crevices. The central obverse shows minor planchet granularity, but no consequential marks are reported. (#6079)

Near-Mint 1807 Draped Bust Half, O-105

- 729** 1807 Draped Bust AU58 NGC. O-105, R.1. Aquamarine, fire-red, and honey-gold envelop this near-Mint early silver type coin. The portrait displays wear, but bright luster dominates the margins. A loupe reveals the expected minor marks, most apparent above the arrowheads. John Reich's arrival as assistant engraver led to design changes across all series, ending the Draped Bust type. (#6079)

BUST HALF DOLLARS

Popular 1807 50 Over 20 Half, O-112, AU53

- 730** 1807 Large Stars, 50 Over 20 AU53 NGC. O-112, R.1. This example of this popular mispunched denomination shows sharp design details, yet provides excellent value relative to pieces in even higher grades. The surfaces are toned deep walnut-brown, but slight amounts of luster glimmer from the borders. Moderate marks above the eagle's neck are concealed beneath the patina. (#6086)

1807 O-112 Half, Large Stars, 50 Over 20, AU58

- 731** 1807 Large Stars, 50 Over 20 AU58 NGC. O-112, R.1. The more available of the two die pairs for this *Guide Book* variety. Both serifs are visible on the 1. A later die state with a crack joining the base of 80 and a rough lump under the crossbar of the 7. Luminous surfaces are color-free and exhibit nicely defined design features. Both sides are remarkably clean. A couple of hair-thin marks left of the beak are mentioned for complete accuracy. (#6086)

**Attractive 1807 Bust Half Dollar, XF40
O-111b, The 'Bearded Goddess'**

- 732** 1807 Bearded Goddess, Large Stars, 50/20 XF40 PCGS. O-111b, R.5. One of the best-known die varieties in the Bust half series, the Bearded Goddess features a dramatic die break between Liberty's chin and upper breast. A fainter die break, resembling the early stage of a developing rim cud, resides directly above obverse star 6. A nice, original XF example with no individually noticeable marks on either side. (#39358)

**Famous XF Details 'Bearded Goddess'
1807 Capped Bust Half
O-111b, Large Stars, 50/20 C**

- 733** 1807 Bearded Goddess, Large Stars, 50/20—Improperly Cleaned—NCS. XF Details. Ex: Meyer Collection. O-111b, R.5. The famous *Guide Book* variety with a bold curved die crack between Liberty's chin and chest. Some numismatists might consider the present piece to be O-111a, since the die crack in front of the eye is very delicate, and the die crack beneath the chin lacks the thickness seen on some examples of O-111b. This cream-gray piece is faintly hairlined and has an unobtrusive lamination above the cap. From the legendary complete Bust half die variety collection of Charlton "Swampy" Meyer. (#39358)

1807 Capped Bust, Large Stars Half, O-114, AU53

- 734** 1807 Capped Bust, Large Stars AU53 PCGS. Ex: Meyer Collection. O-114, R.3. Die lumps under the 7 in the date and to the right of star 11 help identify the die marriage, as does the joining of the two lower arrowheads. The silver-gray surfaces are splashed with light golden-tan, sky-blue, and rose patina and retain traces of luster in the recessed areas. Relatively sharp definition characterizes the design features, and each side is devoid of significant marks. (#6088)

- 735** 1811 Small 8 MS63 NGC. O-109, R.2. A heavy radial die crack at 10:30 allows immediate attribution. Despite its injury, the reverse die must have held out for some time, since the variety is relatively available. This lustrous representative features rich forest-green and pumpkin-gold toning. Smooth save for a few marks on the left reverse field. (#6097)

Key 1815/2 Half Dollar, O-101a, AU50

- 736** 1815/2 AU50 NGC. O-101a, R.3. Jade-green and stone-gray alternate across this lightly circulated key-date half. Luster glimmers from the margins and devices. A few minor obverse marks are of little import. At least four sets of clash marks are visible on the field beneath the scroll. (#6108)

**1815/2 Half Dollar, O-101
Condition Census, MS63**

- 737** 1815/2 MS63 NGC. O-101, R.2. With an estimated mintage of 47,150 pieces, the 1815/2 Capped Bust half dollar has long been known as the “Queen” of the series. Only one die variety is known for the date, and the issue is avidly pursued by Bust half specialists. The overdate was created when silver deposits resumed after the War of 1812. An unused obverse die from 1812 was taken out of storage, and a 5 was punched in over the final digit in the date to create the new die. As a date, the 1815/2 half dollar was quite popular with collectors, but early catalogers did not notice the overdate in their descriptions. For example, in the Sixth Semi-Annual Sale (Woodward, 3/1865), lot 1556, the description reads, “1815 Splendid specimen, rarely seen so fine, being scarcely touched by circulation, scarce.” The lot realized \$3.00 to “French,” the enigmatic gentleman who bought the 1861 Paquet Reverse double eagle in the same sale.

The present coin is a well preserved and attractive specimen, struck from misaligned dies. The strike is quite sharp on the left side and the central details are crisp, but there is noticeable softness on the right-side stars and the corresponding area on the reverse. The coin is from an early die state, with multiple clash marks evident in the fields and vertical bars detected below the ear. Even shades of reddish-golden color enhance the surfaces. While population data may be skewed by resubmissions, coins at the MS63 level are rare. The coin offered here is tied for fourth place in Stephen Herman's Condition Census for the date. Census: 6 in 63, 10 finer (4/09).
From The Joseph C. Thomas Collection, Part Two. (#6108)

Select 1817 Half Dollar, O-103a

- 738 **1817 MS63 PCGS.** O-103a, R.3. The defective base on the I in UNITED confirms the die marriage. A late die state with the peripheral stars and letters drawn to the edge. A highly lustrous piece with medium caramel-gold and ivory-gray toning. Remarkably unabraded, and housed in an old green label holder. Population: 17 in 63, 16 finer (4/09).
Ex: Silbermünzen Collection (Heritage, 5/2008), lot 524, which realized \$4,237.75. (#6109)

Bold Near-Gem O-104a 1818 Half

- 739 **1818 MS64 NGC.** O-104a, R.3. Several stages of obverse die cracks are known for this die marriage, with the O-104a die state slightly more plentiful than the prime or O-104b die states. The lower left portion of the obverse die is shattered on this die state, with cracks through the date and bust. One crack crosses the drapery and bust on its way to stars 3 and 4. Another crack extends upward to the border above star 7. The obverse border of this near-Gem specimen is wider at the upper right, while the reverse is properly centered. Among the finest examples of its die marriage, the present near-Gem has vibrant luster, a bold strike, and dappled autumn-gold and steel-blue toning.
Ex: Westmoreland, Virginia Collection, Part Two (Heritage, 1/2007), lot 4372. (#6113)
- 740 **1823 AU58 NGC.** O-104, R.3. A crisply struck Bust half with nearly full luster and only a hint of wear on the shoulder curl and the curl beneath the Y in LIBERTY. The slightly glossy surfaces are unblemished and feature light almond-gold and cream-gray toning. Struck from clashed dies. (#6131)

Near-Gem 1823 Half, O-111
Elusive Early Die State

- 741 **1823 MS64 PCGS.** O-111, R.4. The very scarce early die state for the variety without the die crack through the first four stars. This example is choice with warm and inviting luster. Dappled green-gold and silver-gray patina drapes much of each side, and blue and peach accents also appear. For non-Guide Book varieties, PCGS has graded just six finer examples (4/09). (#6131)

Lustrous Select 1824/1 Half, O-101

- 742 **1824/1 MS63 PCGS. CAC.** O-101, R.2. An intermediate die state with a fine die crack at the tops of UNITE, but no evidence of later die cracks at TES A or ERICA. Lustrous and engagingly toned in powder-blue and caramel-gold shades. Liberty's profile is strike-doubled. The field is abraded near the eagle's neck, and a retained lamination affects the first U in UNUM. Population: 7 in 63, 10 finer (4/09). (#6139)
- 743 **1824 MS62 NGC.** O-117, R.1. A lustrous and boldly struck silver type coin that has only a hint of golden patina. Abrasions are refreshingly absent, and it would be difficult to find another with similar quality for the grade. (#6137)
- 744 **1825 MS62 NGC. CAC.** O-111, R.3. Star 13 touches a rear curl, and the heavy recutting on the reverse in 50 confirms the attribution. Nicely struck with pleasing luster overall, though the light golden patina that covers the silver obverse gives way to an arc of darker reverse toning that encompasses most of the denomination and the arrowheads. (#6142)

Scarce 1825 Half, O-106, MS63

- 745 **1825 MS63 PCGS.** O-106, R.4. The flag of the 5 in the date is recut. The scarce early die state without the die crack throughout the lower reverse periphery. Navy-blue toning dominates the reverse and the obverse margin, while the portrait is chestnut-brown and stone-gray. Powerfully struck and lustrous with an uncommonly mark-free appearance. (#6142)

Outstanding MS65 ★ 1826 Half, O-112a

- 746 1826 MS65 ★ NGC. O-112a, R.2. Die chips within the N in UNITED confirm the late Overton subvariety. Golden-brown toning deepens toward the rims, where it is joined by ruby-red and sky-blue. Crisply struck and thoroughly lustrous. A clash mark beneath the eagle's beak resembles a shark fin. A delightful Gem that will enthrall the specialist. (#6143)

Superb Gem 1826 O-120 Bust Half Dollar
Tied for Finest of the Date and Variety

- 747 1826 MS67 NGC. O-120, Low R.4. Both dies are perfect on this early die state example. This stunning Superb Gem is tied for the finest example of O-120 currently known. At the same time, it is tied for the finest 1826 half dollar of any variety that NGC has certified.

This sensational piece is sharply struck, with intricate design details on both sides. The luster is bold and vivid, with reflective reverse fields. The exquisite surfaces are matched by the beautiful rainbow appearance, with both sides offering central ivory and gold coloration surrounded by peripheral blue, lilac, and iridescent toning. For the date, Census: 5 in 67, 0 finer (4/09).
Ex: Bowers and Merena (8/2003), lot 1486. (#6143)

1827 Square Base 2 O-120 Half Dollar, MS64

- 748 1827 Square Base 2 MS64 PCGS. O-120, R.5. Unlike most survivors from this die pairing, there is no die crack atop UNITED STATES. The prominent die lines beneath the bust tip often cause early die examples of O-120 to be confused with the extremely rare O-149. Well struck and unmarked with deep blended golden-brown and olive-green toning. The borders are lustrous. (#6144)

Gem 1828 Capped Bust Half Dollar, O-122
Small 8, Square Base 2, Large Letters

- 749 1828 Square Base 2, Small 8, Large Letters MS65 NGC. O-122, R.3. Die lines left of the date help identify the variety. Deep aquamarine, mauve, and rose-red encompass this satiny and carefully preserved Gem. A few stars are incompletely brought up, but the major devices are well struck. An outstanding example of this Square Base 2 marriage. (#6151)

- 750 1831 MS62 PCGS. O-116, R.3. Warmly lustrous with just a hint of peach color over otherwise silver-white surfaces. Well struck and attractive. The reverse is rotated approximately 30 degrees counterclockwise. (#6159)

- 751 1831 MS62 NGC. O-110, R.2. The 18 is noticeably higher than the 31 in the date, and the stars are typically drawn to the edge, which is diagnostic for this obverse die. On the reverse, the base of the A in STATES is noticeably lower than the second T. Dramatic gold, blue, and violet toning endows the obverse, which contrasts sharply against the mostly brilliant reverse. Several stars are soft, as usual, but the rest of the details are powerfully impressed. A lightly abraded, vividly lustrous, and highly attractive piece. (#6159)

- 752 1832 Small Letters AU55 PCGS. O-121, R.3. A transitional die state with little milling and the 3 in the date just beginning to fill. Gold-orange and umber peripheral shadings yield to pale silver-gray in the lustrous centers. (#6160)

- 753 1832 Small Letters MS63 PCGS. O-105, R.3. The smooth surfaces are enhanced by frosty silver luster and hints of champagne toning on each side. This example is exceptional for its quality, ranking among the nicest examples of the variety.
Ex: Park Cities Collection (Heritage, 11/2006), lot 819. (#6160)

Vibrant Near-Gem 1833 Half Dollar, O-108

- 754 **1833 MS64 NGC. O-108, R.1.** Bust half specialist Dr. Glenn Peterson identifies this die marriage by the second lowest horizontal line in the shield, which briefly extends into the right (facing) wing. The borders offer deep apple-green, while the fields and devices are lightly toned in rose-red and sun-gold. Lustrous, precisely struck, and nearly devoid of contact. The left obverse field has a possible faint fingerprint fragment. (#6163)

Appealing 1834 Small Date, Small Letters Half O-116, MS64

- 755 **1834 Small Date, Small Letters MS64 PCGS. CAC. O-116, R.1.** A popular and available variety that shows a curving die line, or "worm," to the left of the tip of the bust. An attractive near-Gem, immensely lustrous beneath blue-green, peach, and gold patina. Striking softness is evident on each side, most noticeably around the A of STATES and the URI of PLURIBUS. For the various Small Date, Small Letters varieties, Population: 47 in 64, 9 finer (4/09). (#6166)
- 756 **1836 Lettered Edge MS61 PCGS. O-111, R.3.** Orange and stone-gray predominate, although the cheek is gunmetal-blue. Minimally abraded, and luster fills the borders and devices. (#6169)
- 757 **1836 50 Over 00 MS61 ANACS. O-116, R.2.** Star 12 is boldly repunched, a diagnostic for this popular *Guide Book* variety. A satiny example with uncommonly smooth surfaces. Honey-gold toning deepens slightly near the rims, where it is accompanied by glimpses of ocean-blue. (#6170)

REEDDED EDGE HALF DOLLARS

Midgrade 1836 Reeded Edge Half, VF35

- 758 **1836 Reeded Edge VF35 PCGS.** First of an era, the 1836 Reeded Edge half dollars were the first coins minted by the new steam technology. The first steam presses at the Mint were placed into service in November 1836. This pleasing piece has bright silver-gray surfaces with hints of peripheral iridescence. A few minor marks on each side are consistent with the grade. (#6175)

Historic MS63 1836 Reeded Edge Half

- 759 **1836 Reeded Edge MS63 PCGS.** The 1836 Reeded Edge half dollar is an important and scarce transitional issue with slightly modified design elements on both sides, and with a reeded edge rather than the usual lettered edge. It is also the first U.S. coinage issue that was struck with steam power. A quick glance suggests a coin that is substantially finer than the grade suggests, and only close examination reveals the few minor marks that limit the grade. Both sides are brilliant silver-white with faint traces of wispy champagne toning. The surfaces display frosty luster, and the design elements are boldly detailed. Population: 7 in 63, 3 finer (4/09). From The Joseph C. Thomas Collection, Part Two. (#6175)

- 760 1837 MS61 NGC.** Light gold-tan and silver-gray shadings drape the luminous surfaces. A well struck Reeded Edge half that shows fewer significant abrasions than the grade might suggest. (#6176)
- 761 1837 MS62 PCGS. CAC.** Autumn-gold and lavender intermingle throughout this satiny and powerfully struck representative. There are no obtrusive marks. An underappreciated type coin; only the 1836 also has the 50 CENTS reverse. (#6176)

**Richly Toned Condition Rarity 1837
Reeded Edge Half Dollar, MS65**

- 762 1837 MS65 NGC.** The 1837 is one of only two issues of Christian Gobrecht's Reeded Edge, 50 CENTS Reverse half dollar. The scarcity of the low-mintage (1,200 pieces) 1836 steers most type collectors in the direction of the 1837. The latter issue is also a condition rarity in its own right, and few survivors possess the relatively abrasion-free surfaces of this richly toned representative. Warm copper-gray toning covers the centers, with cobalt-blue peripheral patination. Blushes of crimson color are intermingled throughout the obverse. The strike is sharp in all areas, although a few small abrasions cluster over and before Liberty's neck. Census: 40 in 65, 12 finer (4/09). (#6176)

SEATED HALF DOLLARS

**Patinated Select 1842 Seated Half
Small Date, Large Letters**

- 763 1842 Small Date, Large Letters MS63 NGC.** Apple-green and orange alternate across richly detailed and slightly subdued representative. The fields have a few inconspicuous abrasions, and the obverse rim has a nick at 5 o'clock. An interesting rim die break is noted at 11 o'clock on the reverse. Most 1842 halves are the Medium Date variety. The Small Date, Large Letters is scarce, and the Small Date, Small Letters is extremely rare. Census: 4 in 63, 8 finer (4/09). (#6240)

Select 1846 Tall Date Half Dollar

- 764 1846 Tall Date MS63 PCGS. WB-106.** This exactly struck Select half dollar is prooflike and possesses flashy fields. Rotation beneath a light reveals dramatic plum-red, forest-green, orange, and powder-blue shades. Rare in such minimally abraded and undisturbed condition. Population: 7 in 63, 2 finer (4/09). (#6252)
- 765 1848 MS63 PCGS.** Immensely lustrous and well struck overall with only localized softness on a few stars and the eagle's left (facing) claw. Color is generally silver-white with hints of gold-orange at the reverse margins. Population: 9 in 63, 10 finer (4/09). (#6260)

Desirable MS64 1851 Seated Half

- 766 1851 MS64 PCGS.** Most remarkable about this pre-Arrows Seated half is its detail: All devices, from Liberty's curls to the stars and the eagle's feathers, are sharp and beautiful. Light violet, peach, and silver-gray toning drapes pleasingly lustrous surfaces. Population: 3 in 64, 2 finer (4/09). (#6266)
- 767 1855 Arrows MS64 PCGS. CAC.** A favorable strike leaves strong design detail on this near-Gem half, with the exception of softness on the last three stars and the eagle's left (facing) leg and claw. Lustrous surfaces are nearly untuned, save for hints of light gold-tan that show up under magnification on the obverse. A few minute handling marks preclude the Gem classification. Population: 13 in 64, 6 finer (4/09). (#6281)

Elusive WB-103 1857-O Seated Half, MS64

- 768 1857-O MS64 PCGS.** WB-103. The entire date on this variety is slightly recut north. This example is well struck, with greenish-gray and antique-gold toning and nicely preserved surfaces. The satin luster is appealing, if not spectacular. Wiley and Bugert characterize this variety as R.8 in Mint State.(#6291)
- 769 1859-S MS63 PCGS.** Dappled gold-orange and mint-green color dominates the eye appeal of this Select example. The strike is sharp overall, and the eye appeal is great. Warmly lustrous and highly desirable. Population: 7 in 63, 13 finer (4/09).(#6298)
- 770 1860-O—Shipwreck Effect—NGC, Uncirculated, Ex: S.S. Republic; 1861-O—Shipwreck Effect—NGC, Uncirculated, Ex: S.S. Republic, Wiley-07, a Louisiana die marriage; and an 1861-O—Shipwreck Effect—NGC, Uncirculated, Ex: S.S. Republic, Wiley-15, a CSA die pairing.** All three coins are slate-gray and unworn but have granular surfaces. Housed in a wooden presentation box and accompanied by an unsigned certificate of authenticity.(Total: 3 coins)
- 771 1861 MS64 NGC.** A bold striking with elliptical patterns of steel-blue and copper-gold toning framing the obverse and a thin crescent of similar coloration on the left side of the reverse. The 1861 is one of the more obtainable No Motto half dollars in Mint State, but enjoys added demand as a Civil War date. Census: 62 in 64, 30 finer (4/09).(#6302)

Popular AU First-Year 1870-CC Half Dollar

- 772 1870-CC AU50 NGC.** As is the case with the many other issues struck in the first year of operation for the Carson City Mint, the 1870-CC halves rank among the most challenging and desirable within their series, though their high production compared to other denominations (54,617 pieces) means that they are relatively affordable in most grades. While collectors in the 1970s and earlier considered the 1870-CC a rarity in any grade, according to Rusty Goe's *The Mint on Carson Street*, after the rumors of a hoard of nearly 100 1870-CC halves proved true, numismatists revised their estimates.
- Though the issue became "scarce in all grades" instead of rare, most of the survivors from that hoard were low-grade pieces, and the populations of high-end (XF and better) coins remained nearly stable. The 1980s also saw a marked rise in collector interest for Carson City coinage, and though this interest extended through all grade levels, the best pieces gained the most from the extra attention. Even in the past decade, one can chart the dramatic spike in price for better circulated pieces in general and About Uncirculated coins in particular.
- The present coin is surprisingly well-defined for an early Carson City product, particularly on Liberty's hair and foot and the eagle's feathers. Modest, yet distinct wear affects Liberty's upper torso on the obverse and the eagle's beak and arrowheads on the reverse. The fields remain softly lustrous beneath elegant green-gold and sage patina. The surfaces are minimally marked and highly attractive—a winning candidate for the discerning Carson City silver specialist. Census: 3 in AU50, 2 finer (4/09).
From *The Joseph C. Thomas Collection, Part Two*.(#6328)
- 773 1872-CC XF45 PCGS.** Many 1872-CC half dollars were undoubtedly melted by the Treasury after the 1873 change to a metric weight. Most survivors are well worn, and only three examples have been certified as Mint State by either PCGS or NGC. Stone-gray and caramel-gold shades grace this unblemished and attractively detailed Choice XF representative. A desirable selection for the Carson City specialist.(#6334)

Delightful 1873 Arrows Half, MS64

774 1873 Arrows MS64 NGC. WB-106. Large Arrowheads. Strongly struck with faint frostiness to the impressive luster. This near-Gem is richly toned gold-orange with elements of violet, blue, and rose visible mostly at the margins. A great representative for the 19th century type collector. NGC has certified 10 numerically finer pieces (4/09).(#6343)

775 1875-CC MS63 PCGS. Unusually well defined for this type, which is usually seen with softness on Liberty's upper hair detail. This piece displays crisp upper hair detail and clear definition of all obverse stars, save for slight weakness on star 13. Both sides are satiny, with a light coating of creamy color. Nicely preserved overall, with a few shallow marks on the right side of the obverse. Population: 15 in 63, 23 finer (4/09).(#6350)

Sharp 1875-CC Seated Half, WB-102, MS64

776 1875-CC MS64 PCGS. WB-102, Medium CC. One of three different mintmark sizes for the 1875-CC. Light caramel-gold toning illuminates the borders of this primarily silver-gray near-Gem. Well struck and pleasantly devoid of abrasions. Housed in a green label holder. Population: 19 in 64, 4 finer (4/09).(#6350)

Near-Gem 1875-CC Half Dollar

777 1875-CC MS64 NGC. CAC. This Carson City type coin has satin luster and medium almond-gold and cream-gray toning. The strike is above average, and neither side has any obvious marks. Although the 1875-CC is readily collected in grades below VF, Uncirculated examples are both rare and desirable. Census: 23 in 64, 3 finer (4/09).(#6350)

778 1875-S MS64 PCGS. Decisively detailed with bright silver-white surfaces that show only occasional hints of patina. On the reverse, the mintmark is curiously small. (#6351)

779 1876 MS64 PCGS. Type One Reverse. Hints of silver-blue and gold toning grace the rims of this strongly lustrous, slightly satiny near-Gem. Amazing eye appeal and high quality for the grade. Housed in an old green label holder. Population: 50 in 64, 17 finer (4/09).(#6352)

780 1876 MS64 PCGS. Type One Reverse. This satiny near-Gem type coin features blended cream-gray and aquamarine patina. The strike is good despite the usual inexactness on the eagle's left (facing) ankle. Population: 50 in 64, 17 finer (4/09).(#6352)

Frosty Gem 1876-S Half Dollar

781 1876-S MS65 NGC. Type One Reverse, with an open bud above the H in HALF. This lovely Gem appears fully brilliant upon first glance, but has a hint of gold toning here and there. Lustrous and sharply struck with splendidly unblemished surfaces. A prize for the advanced Seated half collector. Census: 10 in 65, 4 finer (4/09).(#6354)

782 1879 MS64 ★ Prooflike NGC. Type Two Reverse. Flashy fields, icy devices, and a crisp strike create the illusion of a proof impression. Proofs, however, have a Type One Reverse, with an open bud above the H in HALF. Peach toning along the borders only increases the eye appeal. One thin mark is noted near the knees. (#6361)

Gorgeous MS66 1879 Half Dollar

783 1879 MS66 PCGS. Type Two Reverse. The 1879 issue marks the beginning of a long stretch of low-mintage Philadelphia-only dates for the half dollar, and only 4,800 business strikes were produced for that year. This Premium Gem has gleaming, moderately reflective fields that are essentially silver-white. Devices are sharply struck and frosty. Population: 46 in 66, 15 finer (4/09).(#6361)

784 1890 MS63 PCGS. Golden and cream-gray toning enriches this satiny and fully struck Seated half. Refreshingly unabraded, and desirable due to a low mintage of 12,000 pieces. (#6372)

**Astounding 1891 Half Dollar
MS66 ★ Deep Prooflike**

- 785 1891 MS66 ★ Deep Prooflike NGC.** A coin that combines astonishing beauty and quality. Gleaming silver-white fields show only occasional hints of milky patina, and the rich frost on the devices brings out the best of the central details. Of three Deep Prooflike pieces certified by NGC, this is the finest by two points (4/09).

PROOF SEATED HALF DOLLARS

Richly Toned 1857 Half, PR64

- 786 1857 PR64 PCGS.** Fewer than 25 proofs are known today of this rare issue. The *Breen Proof Encyclopedia* comments, "Except for the small cent, probably the most difficult denomination of the year." These pieces were, of course, made in the year before the Mint began publicly and widely marketing proof coinage for sale to the public at large. The present example boasts good luster that radiates from beneath moderately patinated amber, blue, and russet surfaces. Population: 11 in 64, 2 finer (4/09).(#6411)

Sharp Gem Proof 1860 Seated Half

- 787 1860 PR65 NGC. CAC.** Although Mint records state 1,000 proofs were struck, that figure is misleading, since a significant portion of the initial mintage went unsold and was eventually melted by the Treasury. The 1860 is scarcer than several Civil War dates with lower proof mintages. This is a well struck Gem that displays rich electric-blue, rose-red, stone-gray, and lime-green patina once rotated beneath a light. Census: 13 in 65, 26 finer (4/09).(#6414)

- 788 1862 PR63 NGC. CAC.** Sharply struck with considerable mirrors beneath the smoke-gray, obsidian, gold-orange, and blue patina. Faint contact marks are visible on this Select proof, which shows glimpses of possible past contrast.(#6416)

- 789 1862 PR64 NGC.** Though not accorded a Cameo designation, this near-Gem offers obvious contrast on each side, particularly the reverse. Strongly mirrored with glimpses of gold-gray peripheral toning. Census: 57 in 64, 33 finer (4/09).(#6416)

Lush PR64 1864 Seated Half

- 790 1864 PR64 PCGS.** A crisply detailed near-Gem that offers strong mirrors that shine through the rich patina enveloping each side. Dappled gold-orange and amber central shadings yield to blue-green and violet elements close to the rims. A few faint hairlines are hidden under the toning. Population: 57 in 64, 17 finer (4/09).(#6418)

- 791 1865 PR63 PCGS.** Faint gold and purple toning drapes each side of this profoundly mirrored Select proof. Scattered contact marks affect the fields, and a planchet flaw is noted to the right of the hand holding the pole.(#6419)

Stunning PR64 Cameo 1865 Half

- 792 1865 PR64 Cameo PCGS.** Beautiful cobalt-blue and lilac-gold patination graces both sides of this sharply struck near-Gem specimen, one of only 500 proofs struck during this last year of the Civil War. Considerable luster radiates from underneath the moderate toning, completing an attractive and desirable package. Population: 13 in 64 Cameo, 9 finer (4/09).(#86419)

Beautiful 1866 Motto Fifty Cent, PR67 Cameo

- 793 1866 Motto PR67 Cameo NGC.** NGC and PCGS have graded a goodly number of the 725-piece mintage of 1866 proof half dollars. Relatively few of these sport a Cameo finish, and the ones that do are concentrated in the PR62 to PR64 grade levels. Cobalt-blue, lavender, and yellow-gold patina reside on the borders of this Superb Gem Cameo, leaving the central areas brilliant. Sharply defined and impeccably preserved. Census: 2 in 67 Cameo, 1 finer (4/09).(#86424)

Wonderful PR65 Cameo 1867 Half

- 794 1867 PR65 Cameo NGC.** Virtually black-and-white and attractive, with strong frost on the devices and glittering mirror fields surrounding. The fields and surfaces are pleasing for the grade and show no disturbances aside from the faintest hairlines. Identifiable by a sideways S-shaped lint mark below the F of HALF. Exceptional quality for the grade. Census: 10 in 65 Cameo, 7 finer (4/09).(#86425)
-

Lovely PR64 Cameo 1868 Half

- 795 1868 PR64 Cameo PCGS.** Strong mirrors and pleasingly frosted devices combine for gorgeous contrast. Each side has a thin veil of cloud-white patina that turns to gold on the rims. Only a few wispy hairlines in the fields stand between this specimen and a Gem designation. Population: 9 in 64 Cameo, 2 finer (4/09).(#86426)
-

Charming PR64 Cameo 1869 Half

- 796 1869 PR64 Cameo PCGS.** Crisply detailed with powerful mirrors that shine through light to moderate toning. Light gray shadings drape most of each side, but the obverse periphery shows thin crescents of blue and the reverse rims exhibit rich orange-gold color. Strongly frosted devices stand out. Population: 6 in 64 Cameo, 4 finer (4/09).(#86427)
-

Vibrant Gem Proof 1879 Half

- 797 1879 PR65 PCGS.** Type One Reverse. This year marks the first in a series of low-mintage issues in the Seated half dollar series. The present proof survivor displays smoky rose-gray and cobalt-blue toning that yields to lighter frosty coloration over the central devices. The drapery below Liberty's elbow is partially effaced by die polish. Both sides are, however, equally mark-free, with pinpoint striking definition. A coin for the collector who values originality. Population: 21 in 65, 16 finer (4/09).(#6440)
-

Exceptional PR66 1881 Half Dollar

- 798 1881 PR66 NGC.** A popular, low total-mintage date with only 10,000 business strikes produced plus another 975 proofs. This is a lovely, multicolored example that is deeply mirrored. The obverse retains a significant amount of brilliance with golden and blue toning on the left side. The reverse, on the other hand, has bright blue, aquamarine, and crimson iridescence, made even more vibrant by the mirrored flash in the fields. Astonishing eye appeal. Census: 24 in 66, 5 finer (4/09).(#6442)
-

- 799 1882 PR64 PCGS.** Splashes of electric-blue, rust-orange, and purple coloration race over the luminous surfaces of this near-Gem proof. Sharply struck design elements display some variance with the reflective fields. A light graze is visible in the lower folds of the drapery. Population: 82 in 64, 51 finer (4/09).(#6443)
-

Impressive PR66 Cameo 1882 Seated Half

- 800 **1882 PR66 Cameo NGC.** Key to the late-date Seated halves, only 4,400 business strikes and 1,140 proofs were produced of this seldom-seen date. Sometimes there is confusion between first-strike business strikes and proofs, but not here. This piece shows exceptionally deep mirrors in the fields with no trace of cartwheel. The devices are also heavily frosted and provide stark contrast which provide a profound Cameo appearance that borders on an Ultra Cameo designation. The obverse is mostly brilliant with just a hint of peripheral color. The reverse has a slight overlay of reddish patina. Exceptional quality. Census: 16 in 66 Cameo, 6 finer (4/09).(#86443)

Stellar PR66 Ultra Cameo 1882 Half

- 801 **1882 PR66 Ultra Cameo NGC.** This is an impressively well-preserved proof Seated half. The surfaces are untuned with richly frosted devices floating atop deep, glassy fields. Neither side shows a flaw worthy of individual mention. The 1882's proof mintage of 1,100 halves equals one-fifth of the year's production for the denomination. Census: 3 in 66 Ultra Cameo, 3 finer (4/09).(#96443)

Gorgeous Gem Proof 1883 Half

- 802 **1883 PR65 NGC.** With its sharp strike and overall solid preservation, this Gem proof offers excellent technical appeal. Most rewarding, though, is its patina. The once-mirrored surfaces are luminous through amber-orange toning that yields to blue and violet shadings at parts of the rims. Census: 41 in 65, 29 finer (4/09).(#6444)
- 803 **1885 PR63 PCGS.** A strongly mirrored Select proof, sharply struck with lightly hairlined but immensely reflective fields. Peripheral blue-green shadings yield to silver-gray at the centers. The reverse has pleasing contrast.(#6446)

- 804 **1885 PR64 Cameo PCGS.** The honey-gold obverse center is framed by apple-green and sun-gold. The reverse has peach and powder-blue margins but is otherwise minimally toned. A low mintage date because of the ongoing heavy coinage of silver dollars. Population: 20 in 64 Cameo, 12 finer (4/09).(#86446)
- 805 **1887 PR63 PCGS.** A lovely Select proof with crystal-clear design definition and rich, variegated patina in shades of charcoal-gray, orange-tan, and electric-blue on both sides. An appealing specimen from an original mintage of just 710 pieces.(#6448)
- 806 **1891 PR64 NGC.** Maroon, yellow-gold, and electric-blue patination gravitates to the margins of this near-Gem proof leaving the centers brilliant. This is a sharply struck piece that reveals just a few minor handling marks that preclude Gem status.(#6452)

Dazzling Gem Proof 1891 Seated Half

- 807 **1891 PR65 NGC.** Gorgeous golden-brown, ruby-red, olive-green, and cobalt-blue invigorate this final-year Gem proof Seated half. The strike is sharp, and the surfaces are undisturbed. Lightly die-doubled on the fletchings and HALF DOL. Among the most colorful survivors from the proof mintage of 600 pieces. Census: 27 in 65, 23 finer (4/09).(#6452)

BARBER HALF DOLLARS

Scarce 1892 Tripled Reverse Barber Half, FS-801, MS65

- 808 **1892 MS65 NGC.** FS-801, formerly FS-007.8. A scarce *Cherry-pickers'* variety. The reverse is tripled, most obviously on HALF. The shimmering surfaces reveal pale gold and silver color. The design elements are fully struck and surface blemishes are minimal. A lovely Gem example of this first-year issue in the Barber half series.(#6461)
- 809 **1893-O MS64 PCGS.** Dappled orange and stone-gray shadings embrace the obverse, while the reverse shows only occasional champagne tints. A reasonable strike with typical softness noted on the fletchings. This O-mint issue is scarce in Choice and rare any finer. Population: 43 in 64, 7 finer (4/09).(#6466)

Series-Key 1896-O Barber Half, MS65

- 810 1896-O MS65 PCGS. CAC.** David and John Feigenbaum, in their *Complete Guide to Certified Barber Coinage*, maintain that the Mint State 1896-O is second in rarity only to the 1904-S half, an issue well known among Barber collectors for its elusive nature. A glance at the NGC certified population actually shows fewer Mint State examples of the 1896-O than the 1904-S, and the PCGS data show a similar trend. Of course, such figures fall in the category of "statistics," as the 1904-S numbers are more likely to be inflated by multiple resubmissions.

This is a wonderful Gem of this tricky issue, with silver centers accented by a peripheral ring of amber-gold on each side. Close perusal with a loupe reveals only a couple of grade-consistent reeding marks on Liberty's neck. The strike is above-average on the obverse, but weakness shows on the reverse right shield corner and the nearby wing. The eagle's claw and fletchings are somewhat weak, but better-detailed than expected. If one is contemplating beginning a Mint State set of Barber halves, this is the place to start. Population: 3 in 65, 3 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#6475)

Delightful Gem 1897-S Half

- 811 1897-S MS65 NGC.** The 1897-S half is roughly equal in rarity to the 1897-O in most grades, though nearly half again as many were struck, and Gems are condition rarities. Both the obverse and reverse are frosty-white and virtually untuned. The piece is well-preserved with minor as-struck flaws more prominent than post-striking abrasions: a tiny planchet void (as struck) near the point of the truncation of Liberty's neck is mentioned for pedigree purposes. Faint roller marks (also as produced) remain over the eagle's right (facing) shoulder from a slightly soft strike, but all other areas are uncommonly sharp for the type. Census: 7 in 65, 6 finer (4/09). (#6479)

Challenging 1898-O Half Dollar, MS64

- 812 1898-O MS64 PCGS.** The 1898-O Barber half is a rare and elusive issue in Mint State. This pleasing near-Gem example offers partially prooflike fields that establish modest contrast with the devices, slightly more so on the reverse. A better-than-average strike leaves sharp definition on the design features, save for minor softness on the upper right shield corner and arrow feathers and adjacent claw. Small marks on Liberty's neck and cheek preclude Gem status. Population: 21 in 64, 8 finer (4/09). (#6481)

- 813 1899-S MS62 PCGS.** Green-gold, orange, and silver-gray elements merge on this 19th century S-mint Barber half. Pleasingly lustrous with few overt abrasions. Population: 8 in 62, 44 finer (4/09). (#6485)

- 814 1901-S XF45 PCGS.** Though it is not of the same rarity as its quarter counterpart, the 1901-S half is highly elusive nonetheless. This lustrous Choice XF piece shows only modest wear on the gold-tinged silver-gray surfaces. Population: 11 in 45, 51 finer (4/09). (#6491)

- 815 1903-O MS64 PCGS.** Blended brick-red and pearl-gray patina across the devices yields to powder-blue toning around the rims. Coruscating mint luster glimmers beneath the rich toning. A few minute reeding marks on the obverse account for the grade, but the reverse is remarkably clean. Population: 46 in 64, 11 finer (4/09). (#6496)

Elusive Premium Gem 1904 Barber Half

- 816 1904 MS66 PCGS.** A strong strike and lovely original toning are hallmarks of this highly attractive Premium Gem. The satiny, well preserved surfaces are free of any noticeable marks and nearly pristine on both sides. This issue is scarce in Mint State, and rare any finer than MS64. Population: 4 in 66, 1 finer (4/09). *From The Mark Miller Registry Set of Barber Dimes. (#6498)*

Fantastic Gem 1906 Barber Half

- 817 1906 MS65 PCGS.** A well-defined piece, strongly lustrous and silver-white with impressive visual appeal. Aside from a few stray marks scattered in the fields, the surfaces are virtually untouched. Though this Philadelphia issue has a healthy mintage, Gem and better survivors are condition rarities. Population: 22 in 65, 5 finer (4/09).(#6504)

- 818 1907-O MS64 PCGS.** Pleasingly lustrous beneath rich patina, dappled blue and gold-orange on the obverse with silver-white replacing the blue on the reverse. Slight striking softness on the devices is typical for this O-mint issue. Population: 44 in 64, 20 finer (4/09).(#6510)

- 819 1908-O MS64 NGC. CAC.** Delicate orange and violet tints supplement the silver-gray toning of this near-Gem. Unusually well-defined for an O-mint Barber half, particularly on the talons. Census: 35 in 64, 54 finer (4/09).(#6514)

Impressive MS66 1912-D Barber Half

- 820 1912-D MS66 NGC.** This untoned Premium Gem has booming luster and remarkably smooth fields. The portrait is surprisingly clean. The fletchings and the upper juncture of the right wing to the shield are a bit soft, as usual for the type. The 1912-D is a plentiful date in most grades, but emerges as a rarity at the MS66 level. Census: 8 in 66, 0 finer (4/09).(#6525)

- 821 1913 AU58 NGC.** With just 188,000 pieces struck, the 1913 has one of the lowest mintages of the series. This briefly circulated example is significantly finer than most, and has no marks worthy of individual mention. The strike is crisp and the fields have plenty of luster. Census: 11 in 58, 48 finer (4/09).(#6527)

- 822 1913-S MS64 PCGS.** The 1913-S half dollar is not a famous rarity, unlike the 1913-S quarter, but it is a scarcer date in the series. Just over 600,000 pieces were struck, and while pieces are not too difficult to find in worn-out circulated grades, Mint State pieces are few. This lustrous and nearly brilliant near-Gem is pleasingly preserved, with only slight striking softness. Population: 25 in 64, 19 finer (4/09).(#6529)

Lovely MS66 1913-S Half

- 823 1913-S MS66 PCGS.** The 1913-S half dollar is strikingly rare in better Mint State grades, particularly above the Gem level; PCGS has graded only four MS66 coins and just one finer (4/09). This well-defined example is brightly lustrous with largely silver-white centers. Peripheral toning ranges from faint gold to deeper peach. (#6529)

PROOF BARBER HALF DOLLARS

White PR66 Cameo 1892 Half

- 824 1892 PR66 Cameo NGC.** This virtually brilliant Premium Gem has flashy mirrored fields and attractive, even frosting throughout the devices. The fletchings are fully struck, uncommon for the type, and the shield corners are also completely brought up. The reverse is lightly die doubled, most apparent on the series of HALF DOLLAR. Census: 20 in 66 Cameo, 25 finer (4/09).(#86539)

- 825 1894 PR64 PCGS.** Rich orange and rose shadings dominate the centers, while blues and violets enhance the margins. Strongly mirrored beneath the toning with only faint, scattered hairlines. (#6541)

- 826 1895 PR63 Cameo PCGS. CAC.** This beautifully mirrored piece features superb contrast between the frosted devices and the fields. Peripheral russet toning is more pronounced on the obverse. Excellent eye appeal. Population: 6 in 63 Cameo, 22 finer (4/09).(#86542)

Astounding PR68 ★ Cameo 1897 Half

- 827 1897 PR68 ★ Cameo NGC.** Deeply mirrored and exquisitely preserved with contrast that transcends a “mere” Cameo designation. The frost is thick across the silver-white devices. Only a few hints of milky toning in the obverse fields keep this coin from having a fully black-and-white appearance, but this is no obstacle to its amazing eye appeal. A rarity so fine. (#86544)

Gem Cameo Proof 1898 Half

- 828 1898 PR65 Cameo NGC.** Frosty motifs contrast greatly with the glassy fields. This well struck Gem has light apricot patina and excellent eye appeal. Thorough rotation beneath a light is required to locate the few hairlines on the right obverse field. A scant 735 proofs were struck. Census: 11 in 65 Cameo, 36 finer (4/09). (#86545)

Sharp Gem Proof 1900 Barber Half

- 829 1900 PR65 PCGS.** A sharply impressed Gem whose glassy fields and softly luminous devices appear undisturbed. Light chestnut-gold toning further confirms the originality. This piece could arguably fit within a proof type set for either the 19th or 20th century. A stingy 912 proofs were issued. Population: 39 in 65, 19 finer (4/09). (#6547)
- 830 1900 PR64 Cameo PCGS.** Lightly gold-toned overall with prominent contrast, particularly on the reverse. The mirrors are potent and the eye appeal is great. Population: 5 in 64 Cameo, 21 finer (4/09). (#86547)

Desirable PR66 Cameo 1900 Half

- 831 1900 PR66 Cameo NGC.** Great eye appeal for this turn-of-the-century issue, among the last proof Barber halves to be found with outstanding cameo contrast. This Premium Gem specimen does not disappoint, and the devices offer outstanding silver-white frost. Golden peripheral shadings show occasional splashes of deeper color. Census: 22 in 66 Cameo, 13 finer (4/09). (#86548)

Attractive 1902 Gem Proof Half Dollar

- 832 1902 PR65 PCGS.** The half dollar saw 777 proofs minted in 1902. Whispers of light tan patina run over both sides of this luminous Gem. A solid strike impresses the design elements, leaving only minor softness in the upper right corner of the shield. Neither face reveals significant contacts. Housed in a first-generation holder. Population: 24 in 65, 28 finer (4/09). (#6549)

Dazzling, Brilliant PR65 1904 Barber Half

- 833 1904 PR65 NGC.** The strike is full, as expected, and the surfaces show that they have been carefully preserved over the past 105 years. There is noteworthy deep reflectivity in the fields, and mild cameo contrast is evident on the reverse. Free of troublesome hairlines or contact marks, and a highly attractive Gem proof. Census: 36 in 65, 46 finer (4/09). (#6551)

Tempting Superb Gem Proof 1913 Half

- 834 1913 PR67 PCGS.** One of just 627 proofs minted for this later Barber half issue, exquisitely preserved beneath rich patina. Dappled gold, blue-green, and violet shadings dominate the eye appeal, though dots of silver-white are also present. Housed in a green label holder. Population: 13 in 67, 0 finer (4/09).(#6560)

Near-Perfect PR67 1915 Half Dollar Moderately Contrasted

- 835 1915 PR67 NGC.** An exceptionally well-preserved example of this final year of issue for the Barber half dollar. The surfaces are nearly perfect and there is no trace of color on either side. The shimmering mint brilliance shows deep reflectivity in the fields, and there is also a fair degree of mint frost on the devices, which gives the coin even more visual appeal. Census: 12 in 67, 5 finer (4/09). *From The Joseph C. Thomas Collection, Part Two.*(#6562)

WALKING LIBERTY HALF DOLLARS

Originally Toned, Lustrous MS64 1916-S Walker

- 836 1916-S MS64 PCGS.** The bright silver surfaces have soft, frosty luster and each side is covered with even gray patina that deepens to peripheral gold and iridescent along the borders. Although this date is not particularly rare in the context of all early Walkers, despite a mintage of just 508,000 coins, demand is high and examples are difficult to locate.(#6568)

Magnificent Condition Rarity 1917 Walker, MS67

- 837 1917 MS67 NGC.** In the context of early date Walking Liberty half dollars, the 1917 is a common issue. The mintage of nearly 12.3 million pieces is the highest total for any date in the series before 1936, and its availability in Mint State makes the coin a favorite candidate for a type collection. Surprisingly, the issue's availability drops off sharply above the Gem level. MS66 examples are scarce, and only six coins have been certified in the Superb Gem grade by NGC and PCGS combined, with none finer.

This spectacular MS67 specimen displays nearly perfect mattelike surfaces and thick, frosty mint luster. The silver-gray and lilac centers are highlighted by a streak of golden-rose along the right obverse. A well executed strike leaves sharp definition throughout. Magnificent overall eye appeal. Census: 4 in 67, 0 finer (4/09).(#6569)

- 838 1917-D Obverse MS63 PCGS.** Both sides of this untuned Select Walker are awash in pleasing frosty luster, and each exhibits sharply struck design features, including excellent detail on Liberty's branch hand. Minuscule surface and rim marks deny the attainment of a higher grade.(#6570)

1917-S Reverse Mintmark Half Dollar, MS64

- 839 1917-S Reverse MS64 NGC.** Original cobalt-blue and plum-red shades grace the moderately toned obverse. The reverse exhibits only delicate mauve and powder-blue tints. Both sides feature swirling luster and are void of any noticeable marks. Crisply struck and memorable. The mintmark moved to the reverse of the half dollar in 1917, although it remained on the obverse of the cent and quarter.(#6573)

**Appealing 1917-S Half Dollar
Reverse Mintmark, MS65**

- 840 1917-S Reverse MS65 NGC.** Slightly frosty on the high points with strong and inviting luster. The centers are primarily silver-gray with golden shadings present near the rims. Well struck overall save for typical softness at Liberty's hand and the leading edge of the eagle's leg. Census: 18 in 65, 3 finer (4/09). (#6573)
- 841 1918-D AU58 NGC.** Light golden overtones grace this vibrantly lustrous near-Mint example. Well struck for the issue with only minor rub visible on the high points. (#6575)
- 842 1919-D—Improperly Cleaned—NCS. AU Details.** Despite minor rub, this key-date D-mint Walker is well-defined, particularly on Liberty's thumb and the eagle's feathers. Silver-white surfaces have diffuse luster and scattered hairlines from a past cleaning. (#6578)

Elusive 1919-D MS62 Half Dollar

- 843 1919-D MS62 PCGS.** The 1919-D is difficult to obtain in Mint State. Both sides of this MS62 specimen display pleasing satiny luster and just a whisper or two of light golden-tan color. The design elements are typically struck in that Liberty's hand and head area and the eagle's trailing leg and breast-wing juncture are weak. Well preserved surfaces are devoid of significant marks. (#6578)
- 844 1919-S AU55 PCGS.** Pleasing luster remains in the gold-accented silver-gray fields. Light wear blends with a typically soft strike on the high points. Strong overall eye appeal. (#6579)
- 845 1920-S MS61 NGC.** Glimpses of peach and gold toning visit otherwise silver-white surfaces. A pleasingly lustrous example, minimally marked for the grade but with central striking softness. (#6582)

Popular AU Details 1921 Half

- 846 1921—Improperly Cleaned—NCS. AU Details.** With fewer than a quarter of a million pieces struck, the 1921 Walking Liberty half is a popular and prominent condition rarity, worthy of being held up alongside its D- and S-mint counterparts as a challenging issue in the series. Though this lightly worn silver-gray piece shows hairlines from a past cleaning, its sharp strike and lack of abrasions are redeeming qualities. (#6583)

Charming Select 1921-D Half

- 847 1921-D MS63 PCGS.** The famously low-mintage 1921-D half is prized in all grades, but competition for unworn survivors is particularly fierce. This Select coin is well-defined on the branch hand. Luminous fields show dappled green-gold and pale silver-gray coloration. Striking eye appeal for an issue conditionally scarce any finer. (#6584)

Luminous Choice VF 1921-S Half

- 848 1921-S VF35 ANACS.** Though the 1921-S half dollar is the highest-mintage issue for the denomination and year, in Choice VF and better grades it is also the rarest. This piece is primarily silver-gray with glimpses of sky-blue at the luminous margins. A small rim nick is noted to the right of Liberty's foot, but marks are few. (#6585)
- 849 1923-S AU55 NGC.** Well struck for the issue with pleasing definition on Liberty's branch hand. Though a touch of rub is present on the high points, the silver-white fields retain most of their luster. (#6586)

Attractive MS62 1923-S Walking Liberty Half

- 850 1923-S MS62 NGC.** Bruce Fox (1993) notes that a master die change this year produced deeper gown lines, which is one of the first features to stand out on this MS62 example. Indeed, most of the design detail is relatively sharp, save for the usual softness in the centers. Whispers of champagne-gold, powder-blue, and lavender are seen over each side of this lustrous example. A few minute marks are well concealed beneath the toning. Quite an attractive coin for the grade designation. (#6586)

Condition and Strike Rarity 1927-S Walker, MS65

- 851 1927-S MS65 PCGS. CAC.** Most 1927-S half dollars immediately went into circulation to support commercial business needs. Those that did not are condition as well as sometime strike rarities. While this example is not fully struck through the centers, its strike is clearly superior to the usually encountered Mint State specimen. Liberty's left hand and adjacent branches display at least partial definition. The surface preservation is immaculate, with strong luster and light copper-gray and russet toning on both sides. Some light die striations, as made, show above the sun on the obverse. There are no abrasions of any consequence visible. A superior coin for a fine Gem date set, and an extremely elusive issue. Population: 54 in 65, 6 finer (4/09). (#6587)
- 852 1929-S MS64 PCGS.** This shimmering near-Gem has medium silver-gray and olive toning. Well-preserved aside from a couple of ticks on Liberty's extended arm. Strong eye appeal for this conditionally elusive S-mint issue. (#6590)

Exceptional, Fully Struck 1933-S Walker, MS66

- 853 1933-S MS66 PCGS.** The 1933-S is the poster child for a fully struck Walker from the earlier years of the series. It is seldom seen with anything less than a full strike, and this piece displays that completeness of definition throughout. Additionally, the surfaces have bright, swirling mint luster with an overlay of attractive golden-rose toning. Population: 76 in 66, 7 finer (4/09). (#6591)
- 854 1934-S MS64 PCGS.** Dappled green-gold toning embraces lustrous surfaces that exhibit well struck motifs. A couple of small marks in the right obverse field limit the grade. (#6594)
- 855 1936-S MS66 PCGS.** A well struck and frosty example with glowing mint luster. The white centers give way to varying shades of amber toning that are deepest at the outer perimeters. Attractive and original. PCGS has graded just six finer pieces (4/09). (#6600)

Intensely Lustrous 1937-S Walker, MS67

- 856 1937-S MS67 NGC.** This piece has instant eye appeal, and close examination of both sides does not disappoint. The snow-white surfaces are radiantly lustrous and nearly perfect. A few wispy marks appear with the aid of a magnifier, but they are too small to mention and certainly do not distract. Census: 11 in 67, 0 finer (4/09). (#6603)
- 857 1938 MS67 NGC.** Well struck with intense mint frost over entirely brilliant silver-white surfaces. An enchanting Superb Gem, with astonishingly clean surfaces that only reveal the most trivial of nicks and field grazes. Census: 25 in 67, 1 finer (4/09). (#6604)
- 858 1938-D MS65 PCGS.** Dappled orange and silver-gray elements dominate the eye appeal of this appealing Gem. Well struck with warm and satiny luster overall and a spot of brightness just to the left of Liberty's branch hand. (#6605)
- 859 1938-D MS66 NGC.** Pleasingly lustrous with a solid strike for this issue of fewer than half a million pieces. Frosty silver-white overall with glimpses of champagne at the rims. NGC has graded 18 numerically finer examples (4/09). (#6605)
- 860 1938-D MS66 PCGS.** Shining silver-white with only slight striking softness in the centers. Overall surface quality is excellent, particularly at the gold-kissed rims. PCGS has graded 23 finer pieces (4/09). (#6605)

- 861 1941-S MS66 PCGS.** Long considered the key issue in the short set, the 1941-S is not only scarce in the absolute sense but it is a strike rarity as well. This lovely Premium Gem example has swirling mint luster and striking details that are significantly sharper than the norm. PCGS has graded just six finer pieces (4/09).(#6613)

Stellar MS68 1943 Walking Liberty Half

- 862 1943 MS68 NGC.** An extraordinarily detailed example of this short-set issue, with luster and eye appeal to match. Peach-gold patina graces the central obverse, while the rest of the coin is bright silver-white. Carefully preserved and outstanding in all respects. Tied for numerically finest graded by NGC or PCGS (4/09).(#6618)

Immaculate MS67 1943-S Half Dollar, FS-101

- 863 1943-S MS67 NGC. CAC. FS-101, formerly FS-010.5.** Trumpet Tail S, identified by the rounded serifs relative to its Large S alternative. IN GOD WE TRUST displays hub doubling typical for the date. Most 1943-S Walkers have a dubious strike, but the present Superb Gem has unusual detail for the wartime issue, especially on the skirt lines and leg feathers. Pristine and lustrous with lovely light yellow-gold toning. Census: 21 in 67, 0 finer (4/09).(#6620)
- 864 1944-S MS66 PCGS. CAC.** A short-set Premium Gem with shining silver-white surfaces that exhibit occasional frostiness. Slightly above-average detail for the issue, though definition on the high points is lacking in certain respects. PCGS has graded five finer pieces (4/09).(#6623)

Exceptional MS67 1944-S Walking Liberty

- 865 1944-S MS67 NGC. Large S.** The 1944-S is common in typical Mint State, but Superb Gems are extremely rare. The present lustrous piece commands such a lofty grade because it is virtually bereft of contact, and because the strike is decidedly above average for this usually mushy issue. In particular, the skirt lines are well defined. Lightly toned overall with autumn-gold and olive-green peripheral iridescence. Census: 4 in 67, 0 finer (4/09).(#6623)
- 866 1946 MS66 PCGS.** A set of 20 1946 Walking Liberty half dollars, all graded MS66. Most have light cream-gold peripheral toning around pale silver-gray centers that are pleasingly lustrous. High eye appeal throughout the lot.(Total: 20 coins)
- 867 1946 MS67 PCGS.** An immensely lustrous survivor with faint gold-gray overtones. Well struck overall with great eye appeal. PCGS has graded no finer examples (3/09).(#6627)
- 868 1946 MS67 PCGS.** A strongly lustrous Superb Gem, well struck with delicate golden tints over much of the fields. A few tiny marks are visible on the sun on the obverse. Tied for finest certified by PCGS (3/09).(#6627)
- 869 1946-D MS67 NGC. CAC.** Well struck overall with light golden overtones visiting subtly silver-gray surfaces. The fields show a touch of satin. Neither NGC nor PCGS has graded a numerically finer example (4/09).(#6628)
- 870 1947-D MS67 NGC.** A vibrant sheen of intense luster shines across each side of this magical Superb Gem. The coin's classic, beautiful design is crisply reproduced, and the glowing surfaces are distraction-free. Light olive and reddish patina appears at the borders. Census: 40 in 67, 0 finer (4/09).(#6631)

THE MICHAEL H. WILLIAMS COLLECTION OF PROOF WALKING LIBERTY HALF DOLLARS

Gem Proof 1936 Walking Liberty Half

- 871 1936 PR65 PCGS.** A needle-sharp specimen with ivory surfaces that occasionally deepen to russet-gray near the rims. The 1936 is key to the seven-year proof series. Proofs were omitted for the first 20 years of the type, partly because demand for proofs declined in the years prior to 1916. Proof coinage resumed in 1936, and mintages increased annually through 1942. Housed in a first generation holder, as are all the dates in this well-matched Gem proof collection. From The Michael H. Williams Collection.(#6636)

- 872 1937 PR65 PCGS.** Delicate gold toning visits this exquisitely struck Gem. The fields are prominently mirrored, and slight frost is noted on the devices. A better date for this popular proof series. Encased in a first generation holder.
From The Michael H. Williams Collection. (#6637)
- 873 1938 PR65 PCGS.** Wisps of caramel-gold grace the flashy fields of this unabraded and intricately struck proof Gem Walker. Only a trace of the designer's monogram is present, as made from a lapped reverse die. Housed in a first generation holder.
From The Michael H. Williams Collection. (#6638)
- 874 1939 PR65 PCGS.** Light honey-gold and pearl-gray toning confirms the originality. Virtually fully struck, although a strong loupe reveals a glimpse of the planchet texture near Liberty's waist. In a first generation holder.
From The Michael H. Williams Collection. (#6639)
- 875 1940 PR65 PCGS.** A flashy and lightly patinated Gem silver type coin. The strike is powerful, and the glassy fields appear flawless. The designer's monogram is faint but readable. Certified in a first generation holder.
From The Michael H. Williams Collection. (#6640)
- 876 1941 PR65 PCGS.** A minimally toned and satiny Gem whose strike is unassailable. Unlike a majority of proof 1941 Walking Liberty halves, the designer's initials are present. Encapsulated in a first generation holder.
From The Michael H. Williams Collection. (#6641)
- 877 1942 PR65 PCGS.** Light cream-gray overall, although the central obverse has a blush of yellow-gold. The branch hand shows only minor incompleteness of strike. The U.S. entry into World War II ended proof coinage, and the half dollar changed designs in 1948 before proof production resumed in 1950. Certified in a first generation holder.
From The Michael H. Williams Collection. (#6642)

ADDITIONAL PROOF WALKING LIBERTY HALF DOLLARS

Boldly Defined 1936 Fifty Cent, PR63

- 878 1936 PR63 PCGS.** A few wisps of nearly indiscernible gold color show under magnification, and highly luminous surfaces exhibit bold delineation on the design elements. A few minute handling marks barely prevent a higher grade. From a mintage of 3,901 pieces, it is the key to the Walking Liberty proof series. Encapsulated in a green label holder. (#6636)

Choice Proof 1936 Walking Liberty

- 879 1936 PR64 NGC.** Although the Walking Liberty design was introduced in 1916, it was an additional 20 years before the first proofs were issued. The 1936 is the key to the proof series. This Choice example has light peripheral golden-brown toning and a hint of frost on the devices. Certified in a former generation holder. (#6636)

Sumptuous PR66 1936 Half

- 880 1936 PR66 PCGS.** Impeccably struck and essentially pristine with bright, brilliant surfaces, flashy reflectivity in the fields, and mildly frosted devices. Only 3,901 halves were struck in this initial year of proof Walking Liberty half dollar production, making the 1936 the undisputed key to the 1936-42 series.
From The Joseph C. Thomas Collection, Part Two. (#6636)

Superb Gem Proof 1936 Walking Liberty Half

- 881 1936 PR67 NGC.** Only 3,901 proof halves were struck in 1936, the first year of official proof production for this denomination since 1915. As with the other denominations from this year, the proof half (when encountered) has often been cleaned or shows some signs of mishandling. This is a Superb Gem proof that shows evidence of having been struck from heavily polished dies, with the resultant deep mirrors in the fields. The coin basically presents as brilliant but it has a slight overlay of rose-lilac toning when closely examined. Census: 74 in 67, 0 finer (4/09). (#6636)
- 882 1937 PR67 NGC.** A gorgeous Superb Gem example of this second-year Walker proof, profoundly mirrored beneath splashes of olive toning. NGC has graded 19 numerically finer specimens (4/09). (#6637)
- 883 1939 PR67 PCGS. CAC.** Strongly struck overall with excellent reflectivity and eye appeal. Subtle green-gold tints visit the margins. Highly appealing and housed in a green label holder. PCGS has graded 24 finer pieces (4/09). (#6639)

Glorious PR68 ★ 1942 Walking Liberty

- 884 1942 PR68 ★ NGC. CAC.** A marvelously preserved specimen from the design's proof finale. Light silver-gray patina overall with arcs of gold, orange, and lime at the margins. Satiny and sharply defined. A prize for the connoisseur of patinated silver proofs. Census: 16 in 68 ★, 1 finer with a Star designation (4/09). (#6642)

FRANKLIN HALF DOLLARS

- 885 1951-D MS66 Full Bell Lines PCGS.** Impressively lustrous with a touch of frostiness on the well-defined devices. Amber-orange and golden-tan peripheral toning gives way to smooth silver-gray at the centers. Population: 63 in 66 Full Bell Lines, 0 finer (4/09). (#86659)
- 886 1957-D MS67 Full Bell Lines NGC.** Well-defined with warm luster beneath rich patina. Cherry-red and dusky gold-orange shadings mingle with the charcoal and sage shadings that dominate each side. Census: 6 in 67 Full Bell Lines, 0 finer (4/09). (#86673)
- 887 1963-D MS66 Full Bell Lines PCGS.** Zones of yellow toning dominate the eye appeal of the obverse, but the focus on the pale silver-gray reverse is on the strong lines of the Liberty bell. Neither NGC nor PCGS has graded a numerically finer Full Bell Lines example (4/09). (#86685)

PROOF FRANKLIN HALF DOLLARS

- 888 1950 PR66 Cameo NGC.** Appreciably contrasted with moderate mirrors. This Premium Gem is essentially untuned with fantastic eye appeal, a great specimen of its first-year issue. (#86691)

Wonderful PR65 Ultra Cameo 1950 Half

- 889 1950 PR65 Ultra Cameo NGC.** An intensely contrasted specimen of this initial proof Franklin half dollar issue. The strike is bold, and the devices are heavily frosted. Liquid mirrors are mostly silver-white with rings of blue and reddish-orange visible near the rims. NGC has graded only one finer Ultra Cameo example (4/09). (#96691)
- 890 1951 PR65 Ultra Cameo NGC.** Profoundly mirrored with virtually no patina to interfere with the noteworthy black-and-white contrast on each side. This Gem offers dynamic eye appeal. Census: 17 in 65 Ultra Cameo, 13 finer (4/09). (#96692)
- 891 1955 PR69 Cameo NGC.** A scarce and seldom-encountered date with cameo contrast. This is a magnificent coin that shows deep, watery fields on each side. The devices are richly frosted, almost to the Ultra Cameo level. A stunning specimen that approaches perfection. Census: 4 in 69 Cameo, 0 finer (4/09). (#86696)

Charming PR68 Deep Cameo 1955 Half

- 892 1955 PR68 Deep Cameo PCGS.** Profoundly contrasted and essentially untuned with moderate to heavy frost across the central devices. Exquisitely detailed and carefully preserved for this middle-date proof Franklin half dollar issue. Among Deep Cameo survivors, PCGS has graded just 16 PR68 pieces with none finer (4/09). (#96696)
- 893 1956 Type Two PR69 Ultra Cameo NGC.** Snow white devices display excellent contrast with the deeply mirrored fields. Near-pristine surfaces exhibit sharply struck design elements and are untuned. (#96697)

Gorgeous 1956 Type Two Franklin Half
PR69 Deep Cameo

- 894 1956 Type Two PR69 Deep Cameo PCGS. CAC. Gorgeous white-on-black contrast is seen on both sides. The devices are crisply struck and richly frosted. The fields are watery pools of deep reflectivity. The surfaces are exquisitely preserved and seemingly pristine on both sides. Population: 39 in 69 Deep Cameo, 0 finer (4/09).(#96697)
- 895 1956 Type Two PR69 Ultra Cameo NGC. Fantastically mirrored and virtually flawless. The rich frost across the boldly impressed devices lends this coin a stunning black-and-white appearance. (#96697)

Profound Ultra Cameo 1962 Half, PR69

- 896 1962 PR69 Ultra Cameo NGC. While the 1962 half is one of the more frequently encountered Cameo Franklins, it is rarely seen with Ultra Cameo contrast. This is underlined by the Rick Tomaska in his reference *Complete Guide to Franklin Half Dollars*: "Flawless or near-flawless 1962 proof Franklins, with extremely heavy snow-white frost on both obverse and reverse are very elusive coins." This is just such a piece. The surfaces are completely brilliant and there is profound contrast between the heavily frosted devices and illimitable depth of reflectivity in the fields. Census: 16 in 69 Ultra Cameo, 0 finer (4/09).(#96703)

KENNEDY HALF DOLLAR

Delightful 1964 Kennedy Half, MS67
None Graded Finer at PCGS

- 897 1964 MS67 PCGS. Conditionally quite elusive at the Superb Gem level, although a common issue in lower grades. PCGS has certified only 31 examples including the present piece in MS67, and there are none finer at that service. Both Registry Set and type set collectors actively pursue the 1964 and 1964-D issues in the highest grades, as they are the only 90% silver regular issues in the Kennedy series. This example offers a ring of delightful cinnamon and reddish-gold framing the portrait, while the reverse is brilliant silver-white. Both sides show minimal contact, in keeping with this highest grade assigned at PCGS for the issue. The strike is full in all areas. Population: 31 in 67, 0 finer (4/09).(#6706)

PROOF KENNEDY HALF DOLLAR

Intensely Contrasted 1964 Kennedy Half
PR69 Deep Cameo, Registry Set Essential

- 898 1964 PR69 Deep Cameo PCGS. Precious few of the 1964 proof Kennedy halves in existence ever attain the Deep Cameo designation from PCGS. Most examples were produced from well-used dies that showed little or no mint frost remaining on the devices, ruling out the Cameo or the much-rarer Deep Cameo rating. This piece, however, shows a generous layer of intense mint frost over all devices on both sides, with profound field reflectivity that produces the coveted "black-on-silver" contrast so desired—and pursued—in this series. The surfaces are essentially pristine, as demanded of the grade, although a loupe reveals a few tiny obverse flecks behind the portrait. The 90% silver first-year key to the Kennedy proof series, and a Registry Set essential. PCGS has certified only 70 in this grade, and there are none finer at that service (4/09).(#96800)

EARLY DOLLARS

Sharp 1794 B-1, BB-1 Dollar, XF Details

899 1794—Repaired—NCS. XF Details. B-1, BB-1, R.4. The acquisition of a 1794 silver dollar is the highlight of any advanced collection of U.S. coins. That said, few numismatists can hope to ever own this classic piece of Americana. Not only does its cost place it beyond the reach of most collectors, but there are precious few specimens that have survived to the present day. And of those that have managed to escape the ravages of time, many, if not most, are plagued with some sort of impairment.

The 1794 dollar's history dates to the early years of the Republic. Indeed, Jack Collins and Walter Breen, in their manuscript *1794: the History and Genealogy of the First United States Dollar*, revised January 31, 1993, refer to Alexander Hamilton as the "Grandfather" of America's first silver dollar, based on his seminal January 28, 1791 report to Congress.

Collins and Breen go on to refer to Mint Director David Rittenhouse as the "Father" of the 1794 dollar. The authors state: "He provided the bullion, determined the fineness, supervised the production, and distributed all specimens struck. They then cite Adam Eckfeldt, "... the Mint's factotum and mechanical genius," as "Chief Obstetrician and Foster Parent," because "without him, the strip would not have been satisfactorily rolled, nor the blanks accurately cut and prepared, nor the dies properly hardened, nor the press anywhere near fit to strike the coins."

Mint records show that Rittenhouse made two deposits of silver bullion on Aug. 29, 1794, one for \$1,706.82, and another for \$294.51. Martin A. Logies, in *The Flowing Hair Silver Dollars of 1794: An Historical and Population Census Study*, writes: "Once the silver planchets were prepared, (Chief Coiner Henry) Voight commenced striking the new silver dollars. Immediately, it was apparent that the Mint's equipment, which had functioned well in coining the soft copper cents and half cents, was inadequate to strike the new, larger diameter, hard silver coins with the intended quality. Only 2,000 specimens were originally produced (matching Rittenhouse's silver deposit), all from one set of dies, and then mintage was suspended, pending the arrival of better equipment. Of these, 242 specimens were immediately rejected as being totally unacceptable ... leaving only 1,758 specimens to be delivered on October 15, 1794. Since Mint Director Rittenhouse provided the silver for these dollars, all 1,758 were paid out to Rittenhouse, and it was then he who distributed them to others."

Light to medium gray patination covers the semibright surfaces of this XF Details example. Sharp definition characterizes the design features, except for the typical weakness along the left obverse and reverse borders. Light abrasions are distributed over both sides, and there is a small rim bruise under the 79 of the date, and two or three more at the left reverse rim. A small scratch from the lower middle part of the eagle's left (facing) leg extending to the bottom of the nearest leaf, and a small contact mark on the lower right part of the eagle's neck, help to pedigree the coin for future catalogers and researchers. In this regard, it is instructive to note that this piece does not match the plates or descriptions of the 117 1794 dollars referenced in Collins and Breen, or the 125 examples listed in Logies.

Some light adjustment marks are visible along the left obverse border. The "Repair" NCS alludes to is not readily apparent, though there is a cluster of small marks in the right obverse field that may have been placed there intentionally.

In summary, this is a highly collectible example of one of America's most famous coins, despite a number of surface and rim marks. As such, we expect bidding to be quite strong. (#6851)

**1795 Flowing Hair Silver Dollar
Three Leaves, B-5, BB-27**

- 900** 1795 Flowing Hair, Three Leaves PCGS Genuine. B-5, BB-27, R.1. Gunmetal-gray with russet toning that deepens toward the rims. The PCGS code translates as "Cleaning." There are faint hairlines across the eagle's body, and more noticeable hair-thin marks throughout much of the portrait. The eagle's left (facing) wing displays nearly complete detail, and the right wing exhibits most of its initial feathers. (#6852)

**Midgrade 1795 Flowing Hair Dollar
VF30, Three Leaves, B-5, BB-27**

- 901** 1795 Flowing Hair, Three Leaves VF30 ICG. B-5, BB-27, R.1. Bowers-Borckardt Die State III. This problem-free Flowing Hair dollar has light steel-blue, cream-gray, and honey-gold patina. Marks are inconsequential and difficult to find. The eagle's left (facing) wing is especially well defined.
Ex: New York Signature (Heritage, 7/2002), lot 8332; New York Signature (Heritage, 7/2004), lot 6840. (#6852)

**1795 Flowing Hair, Three Leaves
Silver Dollar, B-5, BB-27, VF35**

- 902** 1795 Flowing Hair, Three Leaves VF35 PCGS. B-5, BB-27, R.1. This is a plentiful die marriage, much favored by type collectors. A deeply toned specimen with charcoal-green surfaces that leave a bit of light-gray color on the exposed central high points. Forest-green and lilac iridescence occurs at the obverse periphery. Russet-gold accents appear on the higher points of the reverse. A superficial scratch resides just to the right of obverse stars 7 and 8. A patch of faint adjustment marks appears on the lower reverse field, but there are no other noteworthy marks on either side. (#6852)

**XF Flowing Hair 1795 Dollar
Three Leaves, B-5, BB-27**

- 903** 1795 Flowing Hair, Three Leaves XF40 NGC. B-5, BB-27, R.1. The thin raised line or "bar" behind the highest neck curl is a mint-made diagnostic for the familiar Bolender-5 variety. This attractive example has dove-gray devices that mildly contrast with deeper battleship-gray fields. A single diagonal adjustment mark, as made, is seen beneath Liberty's ear, but no post-strike detractors are present, given its moderately circulated status. The 1794 is a coveted and costly rarity, so collectors are compelled to select a 1795 Flowing Hair dollar to fulfill their early silver type sets.
Ex: Dallas Signature (Heritage, 12/2005), lot 900, which realized \$11,500. (#6852)

Well-Detailed 1795 B-5, BB-27 Dollar, AU53

- 904 1795 Flowing Hair, Three Leaves AU53 NGC.** B-5, BB-27, R.1. Specialists soon learn to identify this familiar Bowers-Borckardt variety by the bold die line or “bar” of extra metal behind the highest hair curl on Liberty. The authors estimate that the variety exists to the extent of 2,500-3,500 examples in all grades. Deep olive and lilac embrace this splendidly detailed final-year Flowing Hair dollar, which exhibits only light wear on the eagle’s breast and on Liberty’s cheek and shoulder. Close perusal with a loupe reveals some minor mint-made adjustment marks at 10 o’clock on the reverse, but there is no detrimental contact requiring singular mention.(#6852)

- 905 1795 Flowing Hair, Two Leaves—Repaired, Improperly Cleaned—NCS.** Good Details. B-1, BB-21, R.2. A heavily circulated yet instantly recognizable example of the Flowing Hair design. Silver-gray and slate-blue surfaces have toned over past cleanings and repair, but the smoothing-out in the fields and faint hairlines are both visible.(#6853)

- 906 1795 Flowing Hair, Two Leaves—Plugged—NCS.** VG Details. B-2, BB-20, R.3. Awkwardly plugged through the I in LIBERTY, which is reengraved, and the nearby field is smoothed. The plug is also unmistakable near the final A in AMERICA. Hairlined from cleaning, but all legends are clear and some tail feathers show.(#6853)

**Attractive 1795 Flowing Hair Dollar
Two Leaves, B-1, BB-21, Fine 12**

- 907 1795 Flowing Hair, Two Leaves Fine 12 PCGS.** CAC. B-1, BB-21, R.2. Deep aquamarine, lilac, and apricot hues envelop this Flowing Hair dollar. The design elements exhibit nice detail for the designated grade. Faint thin abrasions are noted above the date, behind the eye, and near star 7, and the reverse has a pair of inconsequential rim nicks at 12 o’clock and 3:30. They are mentioned for complete accuracy only, as none detract from the overall aesthetic appeal. The central obverse displays minor adjustment marks.(#6853)

**Fine 1795 Flowing Hair Dollar
B-2, BB-20, Two Leaves**

- 908 1795 Flowing Hair, Two Leaves Fine 12 ANACS.** B-2, BB-20, R.3. Primarily stone-gray with hints of straw-gold. The fields are moderately abraded, but at a level appropriate for the grade. Much tail and wing plumage remains on this scarce early silver type coin. B-2 is a somewhat better variety, since perhaps a majority of Two Leaves dollars are from B-1 dies.(#6853)

**VF 1795 Flowing Hair Dollar
Two Leaves, B-1, BB-21**

- 909 1795 Flowing Hair, Two Leaves VF20 ANACS.** B-1, BB-21, R.3. Deep brown and gunmetal-gray blanket this lightly abraded representative. All legends and dentils are bold, and some wing and hair definition remains. All silver type collectors need a 1795 Flowing Hair dollar, and demand has only increased in recent years.(#6853)

**Lovely 1795 Flowing Hair Dollar
B-1, BB-21, Choice XF**

- 910** 1795 Flowing Hair, Two Leaves XF45 ICG. B-1, BB-21, R.2. A surprising example of this popular Flowing Hair dollar die pair, well struck overall with minimal wear. Slate-blue toning dominates, though occasional green-gold elements also appear in the subtly radiant fields. An ideal piece for the type collector. (#6853)

**Choice VF Centered Draped Bust
1795 Silver Dollar, B-15, BB-52**

- 911** 1795 Draped Bust, Centered VF35 PCGS. B-15, BB-52, R.2. Bowers-Borckardt Die State IV. A lightly toned first-year Draped Bust dollar that has a surprising amount of luster within the hair, wings, and legends. Minor parallel adjustment marks (as coined) are noted on the obverse center and borders, where uneffaced by the strike. A few minute rim nicks are of little importance. Minutely granular near the base of the wreath and on the field above the bust tip. (#6858)

**Appealing XF45 Centered Draped Bust
1795 Dollar, B-15, BB-52**

- 912** 1795 Draped Bust, Centered XF45 NGC. B-15, BB-52, R.2. Bowers-Borckardt Die State V with a faint crack atop the ICA in AMERICA. A primarily slate-gray Choice XF example that has hints of chestnut toning on the reverse, while the central obverse features dove-gray patina. Relatively unabraded for the grade. Although no dies are shared between BB-51 and BB-52, most specialists believe BB-51, with its awkward Bust placement, was struck first. The mint worker presumably learned from the mistake before laying out BB-52. (#6858)

**Bold Large Letters Reverse, B-3, BB-71
1797 10x6 Stars Dollar**

- 913** 1797 10x6 Stars, Large Letters PCGS Genuine. B-3, BB-71, R.2. Bowers-Borckardt Die State III. A satiny and splendidly detailed Bust dollar with only minimal wear on the cheek, shoulder, and eagle's breast. An X is scratched on the central reverse, although dusky russet-gold toning makes the impairment difficult to find. The obverse has medium blended powder-blue and stone-gray toning. The only early dollar die variety with a 10x6 star arrangement. (#6865)

**Wonderful 1797 10x6 Stars Dollar
B-3, BB-71, AU58**

- 914 1797 10x6 Stars, Large Letters AU58 PCGS.** B-3, BB-71, R.2. Bowers-Borckardt Die State III, with both obverse and reverse lapped, as usually seen. The lone 1797 obverse die with the stars arranged 10 and 6 instead of 9 and 7, paired with a Large Letters reverse die. In his *Silver Dollars and Trade Dollars of the United States*, Bowers notes that a number of auctions prior to the early 1990s called examples of the BB-71 "Uncirculated," though today PCGS recognizes just four Mint State survivors (4/09). It does not seem unreasonable that this near-Mint piece, immensely lustrous with only light rub on the reverse high points, might have been called Uncirculated in the past. Peach, gold, and dusky silver-blue shadings embrace each side. (#6865)

**Choice VF 1797 Dollar, B-1, BB-73
Large Letters, 9x7 Stars**

- 915 1797 9x7 Stars, Large Letters VF35 PCGS. CAC.** B-1, BB-73, R.3. Bowers-Borckardt Die State II. Luster brightens the stars and legends and can also be seen within the wreath and near the profile. A subtle lamination on the shoulder curl is as made. One of only three die marriages for this scarce date, each of which receives a separate *Guide Book* listing. (#6863)
- 916 1798 Large Eagle, Pointed 9—Cleaned—ICG. VF35 Details.** B-15, BB-112, R.3. The obverse is identified by a short spike the protrudes from the top of the hair below the curl point under B, and the reverse by five berries, with one under the left foot of the A in AMERICA. Untoned surfaces reveal fine hairlines under magnification. (#6873)

**1798 Heraldic Eagle, Pointed 9 Dollar
Choice VF, B-12, BB-120**

- 917 1798 Large Eagle, Pointed 9 VF35 ANACS.** B-12, BB-120, R.4. A scarce Bolender variety identified by a repunched obverse star 10 and a slender die crack through the ST in STATES to the rim. Contact marks include a slight reverse rim ding at 2 o'clock and a tick on the neck, but the cream-gray surfaces are otherwise surprisingly unabraded. (#6873)
- 918 1798 Large Eagle, Pointed 9—Plugged, Repaired—ANACS. XF45 Details.** B-24, BB-124, R.2. An oval hole near 11:30 has been crudely plugged. Toned deep sea-green and golden-tan. A few moderate marks are noted throughout the obverse. Softly struck on the right-side reverse stars, as is characteristic of the Bolender variety. (#6873)

**1798 Heraldic Eagle Silver Dollar
B-29, BB-119, Choice AU**

- 919 1798 Large Eagle, Pointed 9 AU55 NGC.** B-29, BB-119, R.4. A splendidly detailed and partly lustrous example of this transitional silver dollar date. After a pair of early Small Eagle dies, the remainder of the year's issue consists of the Heraldic Eagle type. This example of this very scarce variety has light honey-gold toning and a good strike. Prolonged study beneath a loupe discovers a few unobtrusive marks, such as near the D in UNITED and the E in AMERICA. (#6873)

- 920 1798 5 Stripes, Pointed 9—Improperly Cleaned—NCS. VF Details.** B-6, BB-96, R.3. Bowers-Borckardt Die State V, with die crack to the left of the 8 in the date. A moderately circulated example with few significant abrasions. The surfaces have retoned slate and gold-gray from a past cleaning. (#6874)

- 921 1798 5 Stripes, Pointed 9, 10 Arrows—Improperly Cleaned—NCS. VF Details.** B-17, BB-101, R.5. Die State III. The date is wide and the 8 just touches the bust, and there are five lines in each shield element. The cracks at the left obverse border and incipient crack over I in AMERICA confirm the die state. Semibright surfaces reveal light hairlines under magnification. A couple of rim bruises are noted on the reverse. David Bowers (1993) says of this rare variety: "Probably about 70 to 120 are known, most of which are well circulated." (#6874)

**Choice AU 1798 Dollar, B-6, BB-96
Heraldic Eagle, Knob 9, Five Stripes**

- 922 1798 5 Stripes, Knob 9 AU55 NGC.** B-6, BB-96, R.3. Bowers-Borckardt Die State IV with a die crack near the I in AMERICA. Substantial luster shimmers across this lightly circulated caramel-gold and slate-gray Heraldic Eagle dollar. The obverse has a few deep russet freckles. Criss-cross adjustment marks on the reverse are all of mint origin. (#6874)

- 923 1798 Large Eagle, 10 Arrows—Improperly Cleaned—NCS. VF Details.** B-13, BB-108, R.3. The most available of any 10 Arrows variety, though still scarce in an absolute sense. This moderately worn gold-gray example has unnaturally luminous surfaces from a past cleaning, yet it remains readily collectible. (#6876)

- 924 1798 Large Eagle, 10 Arrows VF25 NGC.** B-13, BB-108, R.3. Die State II In this die state, a prominent vertical die crack rises from the right side of the L in LIBERTY toward the rim. Deep purple, sky-blue, and gray toning covers both sides. Fairly well defined and devoid of significant marks. (#6876)

Satiny 1798 B-13, BB-108 Dollar, MS61

- 925 1798 Large Eagle, 10 Arrows MS61 NGC.** B-13, BB-108, R.3. The obverse is easily identified by a die flaw between the bust and star 13, and there is a die crack from the rim to the lower right serif of the L in LIBERTY. Only 10 arrowheads are visible on the reverse, a telltale diagnostic for this die. After striking BB-107 the reverse die was lapped, and the five small berries now have faint or nonexistent stems. Although this variety is relatively available in grades through XF, the Bowers-Borckardt reference states that it is "exceedingly rare" in Mint State. Their list of notable specimens, while not quite a Condition Census, features only three Uncirculated examples, two of which grade MS60.

Hints of gold and rose around the margins accent the mostly medium gray surfaces of this exquisitely preserved representative. There are prominent adjustment marks in the center reverse, with a corresponding area of weakness on Liberty's hair. Plenty of luster radiates throughout the fields and enhances the eye appeal. This is a Die State IV piece, with a die crack from the rim below the 17 in the date that progresses through the first five stars. A spectacular representative from the first year of the Heraldic Eagle reverse. (#6876)

**Wide Date, Pointed 9, B-23, BB-105
1798 Heraldic Eagle Dollar, XF**

- 926** 1798 Large Eagle, Wide Date, Pointed 9 XF40 NGC. B-23, BB-105, R.3. Deep navy-blue and apple-green toning encompasses the fields, while the devices are dove-gray. A well detailed Bust dollar that has no more than the expected quantity of scattered small marks. Mildly granular near 3 o'clock on the reverse. (#6877)

**Partly Lustrous 1799 Dollar
B-17, BB-164, 7x6 Stars**

- 927** 1799 7x6 Stars PCGS Genuine. B-17, BB-164, R.2. Bowers-Borckardt Die State V. A spot has been tooled on the bust truncation above the 7 in the date. A hair-thin vertical pinscratch crosses the portrait. Minor field marks are present near the chin. Otherwise, this is a pleasing piece that has considerable remaining luster and only minor wear on the scroll, the eagle's head, and Liberty's face and drapery. Attractively toned orange and stone-gray. (#6878)
- 928** 1799 7x6 Stars PCGS Genuine. B-17, BB-164, R.2. Bowers-Borckardt Die State II, with crack through the first part of UNITED. A moderately worn example, toned deeply with olive and violet shadings dominant, shows a pair of obverse rim bumps, one above the E in LIBERTY and the other to the right of the tip of the bust. (#6878)

**Charming 1799 Silver Dollar VF30
B-21, BB-169, 7x6 Stars**

- 929** 1799 7x6 Stars VF30 PCGS. B-21, BB-169, R.3. Bowers-Borckardt Die State III. Slate-gray device high points are accompanied by honey-gold and powder-blue patina. Traces of luster cling to design crevices, and all letters in E PLURIBUS UNUM are readable. Neither side has any reportable marks. (#6878)

**Choice VF 1799 Dollar
7x6 Stars, B-9, BB-166**

- 930** 1799 7x6 Stars VF35 PCGS. B-9, BB-166, R.1. Bowers-Borckardt Die State V. The familiar "Apostrophe" variety, named for a die lump after the second S in STATES. Traces of luster cling to protected areas of this tan-gold and green-gray representative. A couple of light marks on the right obverse field are unimportant for the VF35 grade.
Ex: Long Beach Signature (Heritage, 6/2006), lot 2028, which realized \$2,760. (#6878)

**Appealing 1799 7x6 Stars Dollar
B-12, BB-160, Die State III, XF40**

- 931** 1799 7x6 Stars XF40 NGC. B-12, BB-160, R.3. Die State III. The variety is confirmed by the closeness of stars 11, 12, and 13, a lack of berries on the branch, and a defect in the upper left part of the U in UNITED. Cracks to the left and right of the 1 in the date confirm the die state. Mauve-gray patination bathes both sides of this sharply defined piece, each of which is remarkably devoid of mentionable marks. Great overall appeal for the designated grade. (#6878)

**Ex: Hesselgesser Choice XF 1799 Dollar
7x6 Stars, B-12, BB-160**

- 932** 1799 7x6 Stars XF45 PCGS. CAC. *Ex: Hesselgesser.* B-12, BB-160, R.3. Bowers-Borckardt Die State III. Luster brightens many design elements of this stone-gray Draped Bust dollar. Both sides are free from all but the most minor marks. Evenly struck and attractive. The Dr. Hesselgesser Collection is the finest PCGS Registry Set of early dollars by die variety. (#6878)

**Notable 1799/8 Dollar, 13 Stars Reverse
B-1, BB-142, MS61**

933 1799/8 13 Stars Reverse MS61 NGC. B-1, BB-142, R.4. Die State III, the most common, with significant crumbling of the reverse die at the I of AMERICA. Both the B-1 and B-2 varieties are very scarce, and since the 1799/8, 13 Stars Reverse type merits its own listing in the *Guide Book*, the collector going by that reference must acquire an example of either variety, and the die-hard enthusiast will purchase both. This Mint State representative of the former has soft, pleasing luster beneath dappled green-gold and lavender-violet patina. Well-defined with a single abrasion of note to the left of the date. Great overall eye appeal.(#6884)

934 1799 Irregular Date, 15 Stars Reverse VF20 PCGS. B-4, BB-153, R.4. Chestnut-gold and powder-blue compete for territory across the obverse, while the reverse is mostly walnut-brown and stone-gray. Moderately abraded, but the only consequential marks are found on Liberty's neck.(#6879)

**Pleasing 1800 Silver Dollar
B-8, BB-188, AU53**

935 1800 AU53 PCGS. B-8, BB-188, R.4. Bowers-Borckardt Die State IV with a prominent crack through much of AMERICA. A partly lustrous piece with pleasing sharpness of detail on Liberty's curls and the eagle's wings. This lightly toned chestnut-brown Bust dollar has only a few minor field marks and will impress even the jaded specialist.(#6887)

XF Dotted Date 1800 Dollar, B-14, BB-194

936 1800 Dotted Date XF40 ICG. B-14, BB-194, R.3. A collectible representative of this memorable *Guide Book* variety. Toned deep golden-brown and gunmetal-gray. There are no consequential marks, although a loupe reveals occasional hairlines. All letters in E PLURIBUS UNUM are at least partly legible.(#6889)

Noble VF30 1800 Dollar, B-17, BB-196

937 1800 12 Arrows VF30 NGC. B-17, BB-196, R.1. Cream-gray devices accompany orange and lilac tinged fields. Sea-green toning adorns the borders. This nicely defined example shows moderate wear on the cheek and bust truncation. A faint pinscratch on the cheek is only apparent beneath a glass. Die State IV, which Bowers considered scarce. The clash marks near OF and above the bust have been removed through die polishing, and a crack from the ribbon toward star 6 is present.
Ex: Long Beach Family Collection (Heritage, 8/2006), lot 3694. (#6890)

938 1801—Cleaned—ANACS. XF40 Details. B-3, BB-213, R.3. Bowers-Borckardt Die State II. The charcoal-gray toning is original and undisturbed on the reverse, but the obverse field and portrait are hairlined. A few old marks are concealed near the ME in AMERICA.(#6893)

- 939 1802/1 Wide Date—Environmental Damage—NCS. XF Details. B-2, BB-233, R.4. A well-defined example with only light wear. The surfaces, mixed blue-green and silver-gray, show aftereffects of environmental damage, but the eye appeal is strong despite this flaw. (#6899)

Lightly Toned AU50 1803 Small 3
Bust Dollar, B-5, BB-252

- 940 1803 Small 3 AU50 NGC. B-5, BB-252, R.3. Caramel-gold and pearl-gray toning embraces this partly lustrous and lightly circulated Bust dollar. Tiny marks are distributed, but none singularly distract. Struck a couple of degrees off-center toward 2:30, with a wider rim present on the left than on the right. (#6900)

- 941 1803 Large 3—Improperly Cleaned—NCS. VF Details. B-6, BB-255, R.2. Bowers-Borckardt Die State II. The 3 in the date has a thick top and is double-punched at its base, the first A in AMERICA touches the third feather, and a leaf points more towards the left corner of the base of the I in AMERICA. A faint hairline crack connecting stars 10 and 11 confirms the die state. Light hairlines show up under high magnification. The design elements are sharply defined over both sides, and semibright surfaces are retoning light to medium gray. Minimally abraded for a coin that saw moderate circulation. (#6901)

Large 3 1803 Bust Dollar, B-6, BB-255, AU50

- 942 1803 Large 3 AU50 NGC. B-6, BB-255, R.2. Bowers-Borckardt Die State III. This deeply toned Heraldic Eagle dollar displays gold, aqua, and plum-mauve shades when rotated beneath a light. The devices are splendidly detailed, and luster shimmers from the design elements. Abraded near the O in OF, but otherwise a delightful example of this formidable and coveted type. (#6901)

GOBRECHT DOLLARS

Extremely Rare PR62 1836 Gobrecht Dollar, Judd-63
Name Below Base, Starless Obverse and Reverse
One of Only Three Known, The Farouk-Baldenhofer Specimen

943 1836 Name Below Base, Judd-63 Restrike, Pollock-63, R.8, PR62 NGC. Silver. Plain Edge. Die Alignment III (the center of Liberty's head is opposite the right edge of the N in ONE). This extremely rare muling combines the Name Below Base, Starless Obverse dated 1836 with the Starless Reverse of 1838. Only three such pieces are known.

These rarities obviously have their story intertwined with that of the Name Below Base Judd-58 dollars. Much recent research has been conducted on those pieces, and it is now generally accepted that none were struck in 1836. No Die Alignment I pieces are known, and no records exist of these coins until the late 1850s. This would be the earliest date the Judd-63 dollars could have been struck, and it is generally believed that they were actually produced sometime between 1867 and 1878, a time period that would correspond with one of the tenures of Henry Linderman as Mint director.

An interesting recent discovery by John Dannreuther further underscores the late striking period for the Name Below Base dollars. These coins all show effacement of C. GOBRECHT F. from the base of the rock—a move that was clearly done so that it could be added again below the base.

The Judd-63 dollars were obviously produced for sale to collectors as there was no obvious need for a starless obverse and reverse combination. All known examples show the same diagnostics. The reverse shows die cracks through the tops of MERI, the base of LAR in DOLLAR, and the top of TE in UNITED. All examples also show a raised die spur on the right side of the D in UNITED.

Only three silver strikings of Judd-63 are known:

1. Anthon Sale (Bangs & Co., 10/1884), lot 117; Garrett Sale (Stack's, 3/1976), lot 252; Clemente Collection (Bowers and Merena, 5/1994), lot 1057; L.K. Rudolf (Stack's, 5/2003), lot 2092.
2. William C. Wilson; F.C.C. Boyd (most likely acting as an agent); Virgil Brand (2/12/1919); Farouk Collection (Sotheby's, 2/1954), lot 2020; A.H. Baldwin & Co.; received by the present consignor from W.G. Baldenhofer, 10/6/1956 (flip included). This is the plate coin in Breen's *Proof Encyclopedia* (1977) and his *Complete Encyclopedia* (1988). **The present specimen.**
3. H.O. Granberg, the first numismatist to assemble a set of all 1836 Gobrecht dollar patterns, which were displayed at the 1914 ANS exhibit; Waldo Newcomer; Farouk Collection (Sotheby's, 2/1954), lot 1717; A.H. Baldwin & Co. (Baldwin purchased both of Farouk's Judd-63 Restrike Gobrecht dollars); Alfred Ostheimer (Lester Merkin, 9/1968), lot 329; Philadelphia 2000 Auction (Heritage, 8/2000), lot 6174. This is the plate coin above numbers 46 and 48 in the book *United States Pattern, Trial, and Experimental Pieces* by Edgar H. Adams and William H. Woodin (1913). This coin now a part of the Dr. Julius Korein Collection housed at the ANS.

This particular piece shows the deep, watery proof fields that are consistent with proof dollars struck after 1858. Light hairlining explains the grade, but in reality the coin appears finer than a PR62. The centers are generally much lighter in color, almost brilliant, than the margins which gradually deepen to rose-golden. Close examination with a loupe reveals a number of minuscule lint marks on each side. The only mentionable defect is mint-made: an irregular planchet flaw on the reverse below the right foot of the F in OF. This defect is just barely visible in the Breen texts.

From The Frank M. Stirling Collection. (#11239)

**Rare, High Grade 1839 Gobrecht Dollar, PR63
Judd-104 Restrike**

- 944 1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR63 PCGS.** Silver. Reeded Edge. Die Alignment IV (center of Liberty's head opposite the right side of the F in OF). The dollars of 1839 are neatly divided into two categories, restrikes and originals. They are also known in Die Alignment III and IV. All originals are in Die Alignment IV, and they show none of the microscopic die cracks on the reverse. Restrikes, believed to have been struck from 1857 to 1859, are also in Die Alignment IV but do show the tiny die cracks through the reverse lettering. A second set of restrike 1839 dollars are found in Die Alignment III (center of Liberty's head opposite the N in ONE). These pieces are believed to have been struck in the late 1860s, possibly later. This Die Alignment IV coin shows faint die cracking that connects the tops of MERI, but we see no evidence of a crack between TE and no trace of a die crack at the bottom of LAR. This, of course, indicates that this coin was one of the first restrikes produced in the late 1850s.

The condition of 1839 dollars varies widely according to when the coins were produced. Original coins struck in 1839 are rarely found above PR60. Die Alignment IV restrikes, such as this piece, are generally seen in PR60 or better condition. The Die Alignment III restrikes are almost always found in high grades, i.e., PR63 or finer.

The surfaces on this piece are murky gray with a golden-blue undertone. Nevertheless, the brightness of the mirrored fields is abundantly evident on each side. The striking definition is strong in all areas, and there are no singularly mentionable or noticeable contact marks on the obverse or reverse. Population: 17 in 63, 9 finer (4/09).(#11446)

SEATED DOLLARS

- 945 1846 AU53 PCGS.** Medium intensity grayish-gold patination bathes both sides of this AU dollar. Nicely defined with traces of luster in the protected areas and minimally abraded.(#6932)
- 946 1846 AU58 NGC.** Just a touch of wear visits each side of this Seated dollar. The fields retain much of their original luster, filtering through layers of rich blue-violet and coffee-rose patina. Gorgeous eye appeal.(#6932)
- 947 1846-O XF45 PCGS.** Dappled gold-orange and silver-blue color overall with dots of deeper toning visible at the margins. Despite light wear, this well struck O-mint Seated dollar retains considerable frosty luster in the fields.(#6933)
- 948 1847 AU55 PCGS.** Well-defined in the centers with still-lustrous fields. Lightly abraded and primarily gold-gray with a diagonal streak of deeper toning at the crook of Liberty's elbow. Overall, a pleasing example of this challenging Seated dollar issue.(#6934)
- 949 1849 AU55 PCGS.** Lightly toned surfaces show traces of luster in the recesses. Well defined, save for the usual weakness in the star centers and the hair atop Liberty's head. A few grade-consistent marks are visible.(#6936)
- 950 1859 AU58 ANACS.** Whispers of lemon-yellow make occasional appearances over both sides of this near-Mint State dollar. Bright surfaces display ample luster and exhibit well struck design features. A few minute circulation marks do not disturb. Scarce in all grades, as most business strikes were shipped to China.(#6946)
- 951 1859-O MS61 NGC.** Semiprooflike in the fields with pale yellow accents to the silver-gray patina. Well struck overall, if a trifle soft at the periphery, and minimally marked for the grade.(#6947)

Important 1860 Seated Dollar, MS64

- 952 1860 MS64 NGC.** For the second year in a row, the Philadelphia Mint produced a sizeable number (217,600 pieces) of Seated Liberty silver dollars in 1860. This issue is seldom encountered in either circulated or Mint State grades. The surfaces on this important coin display soft luster and are deeply toned in steel-gray patina accented with golden hues on each side. The design features are well impressed, and marks are mostly small and well scattered, although several reeding marks appear in the upper reverse field. Census: 16 in 64, 7 finer (4/09).(#6949)

- 953 **1860-O MS60 PCGS.** Well-defined on the central devices with no trace of wear. Gold-kissed fields show considerable reflectivity but also a number of light to moderate abrasions. Great eye appeal for this antebellum O-mint issue. (#6950)
- 954 **1860-O MS61 PCGS. CAC.** Intensely lustrous, with a flashy semiprooflike sheen across both sides. The bright surfaces are entirely untoned and brilliant-white. Typically bagmarked for an MS61 example. This issue is among the most common in the series at lower Mint State grade levels, making it a good choice for the type collector. (#6950)
- 955 **1860-O MS62 ANACS.** A lustrous and nicely struck New Orleans type coin, untuned save for occasional wisps of orange-gold along the borders. The fields display distributed small marks, characteristic of its grade. (#6950)
- 956 **1861—Improperly Cleaned—NCS. AU Details.** A better Civil War date, scarcer than implied by its production of 77,500 pieces. A well struck cream-gray example with lightly cleaned and typically abraded surfaces. (#6951)

Elusive 1863 Seated Dollar MS62

- 957 **1863 MS62 PCGS.** Pearl-gray and golden-brown with the richest patina near the rims. Sharply struck and satiny with the expected small field marks, more apparent on the reverse. This Civil War date has a miserly business strike mintage of only 27,200 pieces. Encased in a green label holder. Population: 7 in 62, 38 finer (4/09). (#6953)

Scarce Gem 1864 Seated Dollar

958 **1864 MS65 NGC.** This Civil War-issue Seated dollar is a scarce one to find in full Gem condition. The mintage was a minuscule 30,700 business strikes, compared to later issues in the six- or seven-digit range. Even with that meager production, most of the coins were exported, and they failed to circulate domestically. Today, there are only a few hundred survivors. Even that estimate may be too ambitious, as just 183 examples have been certified by NGC and PCGS combined in all grades, a figure that undoubtedly includes numerous duplications (4/09).

This piece is sharply struck throughout, with strong curls on Liberty. The eagle and claws are boldly defined, areas that are weakly struck on many Seated dollars. Liberty's head and all of the obverse stars are likewise sharply, if not fully struck. This excellence of overall detail is quite unusual for the type, and doubtless helps explain the rare Gem grade assessment by NGC. The coin is toned with a blush of light gold over champagne-gray coloration. The fulsome mint luster that shimmers over both sides is of a beautiful, satiny texture. We note a long thin line down the right obverse field, close to the inside stars, and a similar but much shorter faint line just below the stem on the reverse. Fine die lines, as struck, appear around the upper and upper left obverse stars. Census: 8 in 65, 0 finer (4/09).

Ex: *Heritage* (1/2005), lot 30279, which realized \$21,850.
From *The Joseph C. Thomas Collection, Part Two*. (#6954)

Rare 1868 Silver Dollar, MS63 Prooflike

- 959 1868 MS63 Prooflike NGC. Many if not most 1868 dollars were exported, accounting for their relative rarity today (David Bowers, 1993). NGC and PCGS have certified slightly more than 40 Mint State specimens in all grades. To date, NGC has given a Prooflike designation to only two examples including the present Select piece (4/09). Untoned surfaces display nice field-motif contrast and just a few minuscule grade-defining marks. Well struck, save for softness in the right-border stars and the hair atop Liberty's head. (#6961)

Historic XF 1870-CC Dollar

- 960 1870-CC XF40 PCGS. Variety 3-A. Breen-5485, the Closely Spaced CC, which he considered rare. An unabraded deep charcoal-gray representative of this introductory Carson City issue. Nicely struck save for moderate softness on the eagle's neck and the horizontal shield lines. Only 12,462 pieces were struck. (#6964)

Appealing MS62 1872 Seated Dollar

- 961 1872 MS62 NGC. Well struck for this penultimate Seated dollar issue with warm luster beneath rich patina. Blue-violet and peach-magenta elements at the upper obverse and lower reverse give way to gold-orange toning elsewhere. Several light abrasions on the figure of Liberty contribute to the grade. Census: 28 in 62, 37 finer (4/09). (#6968)

AU55 Sharpness 1872-CC Seated Dollar

- 962 1872-CC—Cleaned—ANACS. AU55 Details. This rare Carson City dollar is moderately bright, but the devices are richly detailed and display considerable luster. Thin marks are near Liberty's foot and above ONE, but this is unquestionably an important survivor from a meager mintage of only 3,150 pieces. (#6969)

Appealing 1872-S Seated Dollar, XF45

- 963 1872-S XF45 PCGS. The last collectible S-mint Seated dollar issue, since the 700 pieces allegedly struck there in 1873 either never existed or did not survive. This lightly worn example has toned deep green-gray with glints of gold-orange near the rims. Marks are few and the eye appeal is high. Population: 23 in 45, 49 finer (4/09). (#6970)

Scarce 1872-S Seated Dollar, AU50

- 964 1872-S AU50 NGC. Ex: Pittman. Many of the low-mintage (9,000 business strikes) 1872-S dollars were either melted at the San Francisco Mint after April 1873 or exported to the Orient (David Bowers, 1993). Splashes of multicolored toning concentrate at the obverse border of this AU specimen. This well defined piece reveals a few minute obverse circulation marks. This issue is extremely scarce in circulated grades and rare in Mint State. (#6970)

PROOF SEATED DOLLARS

Exceptional PR64 1854 Seated Dollar

- 965 1854 PR64 PCGS. CAC.** While there are no recorded mintage figures for proof 1854 Seated dollars—as is the case for most pre-1858 proof coins—Walter Breen’s *Proof Encyclopedia* in 1987 estimated a “couple of dozen survivors.” NGC and PCGS together have certified 37 pieces, but those figures likely represent only 20 or so different examples.

Breen also notes a “triangular defect at base, above and r. of 5, possibly serif of a misplaced 4?” On this example the diagnostic stray punch is clear up and to the right of the 5. This piece displays none of the roller marks or planchet adjustment marks that are often seen on this issue, most notably on the Phil Kaufman coin (Heritage, 8/2007, lot 1792). The centers are significantly lighter than the peripheries, with shades of rose-blue moving outward, deepening to cobalt-blue at the rims. The bright, mirrorlike fields flash strongly through the toning. This is an appealing piece, high-end for a PR64 coin. Population: 4 in 64, 0 finer (4/09). NGC has certified seven coins in 64, with two finer. (#6997)

Lovely 1858 Seated Liberty Dollar, PR64

The Sole Series Proof-Only Issue Comparable to the 1895 Proof Morgan

- 966 1858 PR64 NGC.** Breen-5456, Reverse of 1857. The mintage of this proof-only issue is variously estimated at from 225 to 300 pieces or a bit more, up considerably from the figure of 80 pieces that was touted by many numismatic scholars, apparently dating all the way back to the famous Chapman brothers coin dealers. It is the sole proof-only issue among Liberty Seated dollars and, as Bowers says, “This is the Liberty Seated series’ counterpart to the Proof-only 1895 dollar in the Morgan series.” The present-day *Guide Book* gives a figure of 300 pieces, apparently based on the research of Liberty Seated specialist Weimar White (Bowers, *Silver Dollars & Trade Dollars of the United States*).

Whatever the true number, this issue is the object of intense desire among numismatists, even those who, to paraphrase Bowers further, will never own another Liberty Seated dollar. And it is certain to remain an elusive rarity in the future. In PR64 condition, NGC and PCGS have certified 17 coins, with 13 pieces finer (4/09). The present example offers lovely pink-champagne and gold surfaces with brilliant luster and a superlative strike. The Reverse of 1857 can be distinguished by a bit of die rust on the L in DOL. and on the rim below. A significant opportunity for the Seated dollar specialists, or just for collectors who genuinely love truly rare coins. (#7001)

Sharply Struck 1865 Select Proof Dollar

- 967 **1865 PR63 PCGS.** The 1865 proof dollar is subject to pressure from date collectors owing to the export of most circulation strikes of this date. Light gold-beige, sky-blue, and grayish patination occupies both sides of this Select specimen, and a decisive strike imparts sharp delineation to the design elements. Minor handling marks limit the grade. (#7008)

First-Year 1866 With Motto Dollar, PR65 Cameo

- 968 **1866 Motto PR65 Cameo NGC.** Apparently saved in larger numbers because of the novelty of the added motto to the reverse. The additional coins that were saved were fortuitous for collectors as many (such as Jimmy Hayes) collect first-year dates. This is a brilliant, sparkling proof that has deeply mirrored fields and noticeably frosted devices, which provide significant contrast on each side. Aside from a few stray hairlines, the surfaces are unmarred. (#87014)

Colorful PR63 1873 Seated Dollar

- 969 **1873 PR63 PCGS.** Dramatically toned in iridescent fire-red, lime-green, and cobalt-blue. The strike is exceptional, and the fields have only infrequent hairlines. IN GOD WE is die-doubled, usual for this final-year proof date. A mere 600 proofs were produced. Population: 49 in 63, 50 finer (4/09). (#7021)

TRADE DOLLARS

- 970 **1873-CC XF45 PCGS.** Deep rose-gray color dominates, though lighter silver areas appear at the high points, an aftereffect of the coin's light wear. Overall, a solid example of the initial Carson City Trade dollar issue. (#7032)
- 971 **1874-CC—Improperly Cleaned—NCS Genuine.** This Carson City Trade dollar shows only minor rub on the high points. The surfaces show little patina, though there are a number of hairlines and a degree of microporosity from a past cleaning. Still, a readily collectible example. (#7035)
- 972 **1874-CC PCGS Genuine.** Pleasingly detailed with luminous peach-gray and gold toning over subdued surfaces. Lightly abraded with scattered hairlines but also excellent detail. Rub is minimal. (#7035)
- 973 **1874-CC MS60 ANACS.** Tall CC. A good strike with any softness relegated to the eagle's right (facing) claw. Close to untoned, with ample mint flash and scattered moderate field marks. Scarce in Uncirculated condition, since most pieces were shipped to the Orient. (#7035)

Pleasing Select 1874-CC Trade Dollar

- 974 **1874-CC MS63 NGC.** Tall CC. No period after FINE. Broken serif in the E in AMERICA. Lustrous and lightly toned with a pleasing strike and a minimally abraded reverse. The obverse has only scattered unimportant marks. Mildly granular near 4 o'clock on the reverse. The 1874-CC was chiefly exported, and nice Uncirculated examples are very scarce. Census: 27 in 63, 22 finer (4/09). (#7035)

Elusive Gem 1876 Trade Dollar

- 975 **1876 MS65 PCGS.** Type One Obverse, Type Two Reverse. Delicate almond-gold toning visits the reverse, but the obverse is nearly brilliant. Booming luster and a well preserved reverse ensure the quality. A good strike with minor incompleteness on the right (facing) leg. The obverse field has a few faint grazes. Population: 18 in 65, 8 finer (4/09).
Ex: New York Signature (Heritage, 7/2002), lot 8809. (#7041)

Formidable Gem 1876 Trade Dollar

- 976 **1876 MS65 PCGS.** Type One Obverse, Type Two Reverse. An exactly struck Gem with dynamic cartwheel sheen and only a wisp of gold toning. The reverse is nearly pristine, and the obverse is unabraded save for a faint graze on the left field. Rare in such quality. Population: 18 in 65, 8 finer (4/09).(#7041)

- 977 **1876-S MS62 NGC.** Type One Obverse and Reverse. Large S. Splashes of pastel orange-tan and violet patina visit the lustrous surfaces of this S-mint trade dollar. The design elements are generally well struck, save for the typical softness on the right (facing) claw. Small abrasions are noted on each side, including several on Liberty's cheek.(#7043)

- 978 **1877 MS63 NGC.** This is a pleasing Trade dollar despite noticeable striking softness, which leaves Liberty's head and most of the obverse stars rather flat. The reverse high points are likewise weak, especially the eagle's head, talons, and wing tips. Still a satiny example with soft, shimmering luster and a light golden-gray cast across the two sides. Lightly marked for the grade.(#7044)

Exquisite Near-Gem 1877-S Trade Dollar

- 979 **1877-S MS64 PCGS.** Minute S mintmark, believed rare by Breen. Rich golden-brown overall with peripheral ruby-red and navy-blue freckles. Fully struck on the eagle's legs, and only slight inexactness is seen on Liberty's hair and the two nearby stars. Lustrous and beautifully preserved.(#7046)

Lovely MS64 1877-S Trade Dollar

- 980 **1877-S MS64 PCGS.** A dazzling, fully brilliant Trade dollar exhibiting the kind of cartwheel luster one usually finds only on early S-mint Morgan dollars. Terrific eye appeal with only one readily discernible flaw, a thin abrasion noted just above Liberty's knees. PCGS has graded 32 finer pieces (4/09).
From The Joseph C. Thomas Collection, Part Two.(#7046)

San Francisco Mint, the "Granite Lady"

- 981 1878-S MS62 PCGS. A sharply impressed and subdued charcoal-gray example that displays caramel-gold and sky-blue upon rotation beneath a light. The reverse is unabraded, and the obverse field has only moderate marks. (#7048)

Wonderful 1878-S Trade Dollar, MS66

- 982 1878-S MS66 PCGS. The 1878-S Trade dollar mintage exceeding 4 million coins was among the highest of the series, as were the 1875-S, 1876-S, and 1877-S emissions that preceded it. The four issues taken together are the most common of the series, collectively comprising more than 23 million coins and totaling nearly two-thirds of all Trade dollars ever struck. To put such a figure in perspective, Bowers' silver dollar reference notes that the total \$36 million in Trade dollars struck (all issues) was "an amount over four times greater than all of the silver dollars that had been coined from 1794 until the denomination was suspended in 1873."

All those statistics would soon be turned topsy-turvy, of course, with the enormous emissions of Morgan silver dollars that loomed ahead.

Collectors today nonetheless consider the large emission of 1878-S Trade dollars fortunate, as it enables the existence of many superlative high-grade examples such as the present piece. Both sides of this Premium Gem are mostly brilliant, showing just the faintest flecks of golden color on the obverse. The coin is fully struck throughout, with bright, frosted mint luster and premium eye appeal. The only singular mark is a milling mark between stars 3 and 4. Seldom seen finer, and a wonderful type coin. Population: 17 in 66, 2 finer (4/09). (#7048)

PROOF TRADE DOLLARS

Choice Cameo Proof 1874 Trade Dollar

- 983 1874 PR64 Cameo NGC. "Patched Letters Reverse," as are most extant proof 1874 Trade Dollars. After the first-year 1873, the 1874 is the rarest proof Trade Dollar produced through 1883. As with the preceding year, proofs of this type were not popular with collectors in 1874, and the survival of high grade examples was more a matter of chance than deliberate numismatic activity. This is a lovely near-Gem whose shimmering fields would probably warrant a higher grade were it not for a few faint hairlines. Both sides are toned in light golden hues on the devices. An attractively original and boldly cameoed example that boasts a needle-sharp strike. Census: 15 in 64 Cameo, 10 finer (4/09). (#87054)

Stunning 1878 Trade Dollar, PR63 Cameo

- 984 1878 PR63 Cameo PCGS. CAC. The 1878 was the first proof-only Trade dollar made for collectors (900 pieces). Stunning Cameo contrast characterizes both sides of this Select example, and a solid strike delivers bold definition to the design features. Untoned surfaces reveal just a few wispy field marks that barely prevent the next highest grade. (#87058)

Colorful PR66 ★ Cameo 1879 Trade Dollar

- 985 1879 PR66 ★ Cameo NGC. This issue marks the beginning of the Trade dollar's proof-only run. The present specimen, a gorgeous Premium Gem, offers both moderate contrast and attractive patina, the latter restricted to blue-green bands on the obverse but expanding to broad zones of the same colors plus gold-orange and violet on the reverse. Notably appealing, particularly for the toning aficionado. From The Joseph C. Thomas Collection, Part Two. (#87059)

Immaculate 1880 Trade Dollar, PR68 Ultra Cameo
Single Finest Certified

986 **1880 PR68 Ultra Cameo NGC.** The last business strike Trade dollar was coined in 1878. Proofs continued for an additional seven years, although the final two, the 1884 and 1885, are clandestine issues, prohibitive rarities whose existence was unknown until 1908, when they emerged from the estate of Philadelphia coin dealer William Idler. This long run of proof-only years is unprecedented except in the half cent series, which had proof-only dates in 1836, and again from 1840 to 1848. This brings to mind the question, why were the proof-only Trade dollars struck when there was no chance that the series would be resumed for commercial production? The Trade dollars were unwelcome in domestic circulation because they were not legal tender, and their bullion value was less than their face value. Collectors then—as now—however, enjoyed the look of a large silver coin in brilliant proof finish. In fact, proof Trade dollar mintages were higher than proof Morgan dollar emissions between 1878 and 1880. Between 1881 and 1883, proof Morgan dollar mintages were only slightly higher than corresponding Trade dollar productions. The real question, then, is why proof Trade dollar mintage essentially ended after 1883. Congress did not repeal the law authorizing Trade dollars until February 1887. Presumably, turnover within an important Treasury or Mint position contributed to the decision to omit production of 1884 proofs, which then became Mint policy.

This is a magnificent specimen, as close to perfection as is imaginable for a coin of this vintage. The strike is razor-sharp, even on the eagle's claws and Liberty's hair. All legends and devices are thickly frosted throughout. Dramatic contrast between the motifs and the darkly mirrored fields confirms the elusive Ultra Cameo designation. The fields are as smooth as if the piece were lifted from the dies with a gloved hand and never handled since. The only visible barrier to perfection is some near-imperceptible horizontal ticks near the base of 80 in the date that will serve as pedigree identifiers. This outstanding piece is the single finest certified by either NGC or PCGS (4/09).

Ex: Heritage (1/2006), lot 1152, which realized \$74,750.

From The Joseph C. Thomas Collection, Part Two. (#97060)

Choice Proof-Only 1881 Trade Dollar

- 987 1881 PR64 PCGS. This proof-only near-Gem offers noticeable contrast between the frosted motifs and the glassy fields. Undesignated as Cameo, however, likely due to encapsulation within a green label holder. Light gold toning visits the fully struck surfaces. Only 960 pieces were struck, less than half the prior year's production.(#7061)

VOL. I.

PATHEM, E. J., MARCH, 1885.

No. 3.

THE REDEMPTION OF THE
TRADE DOLLARS.

Since Congress passed the bill authorizing the redemption of the trade dollars, the professional examiners and counters in the Sub-Treasuries at New York and San Francisco have been kept busy receiving the large sums forwarded from all parts of the country. As the dollars can only be redeemed in their condition, and as each piece has to be carefully scrutinized to see that it is neither defaced, mutilated, nor stamped, it will probably be five or six months before the work is completed.

It is the common belief that at the time the value of trade dollars fell to eighty-eight cents, large quantities were bought by bullion brokers speculating on a possible rise. If anyone had bought the coins in 1883, at their lowest price, and held them until the passage of the redemption act, he would really have lost money, as the profit on the four years investment would only be twelve cents. A larger profit than this could have been obtained by investing in Government bonds.

The Treasury Department has issued the following statement to holders of trade dollars:—

TREASURY OF THE UNITED STATES,
WASHINGTON, MARCH 7, 1885.

Going to the present inadequate provision for the reception and storage of trade dollars, the redemption of which is provided for under the act of Congress passed Feb. 20, 1885, the following regulations will be observed, in order, as far as practicable, to comply with the terms of the law:

Trade dollars, if not defaced, mutilated, or stamped, will be redeemed or exchanged at the office of the Treasurer of the United States. Requests for the redemption of these

coins stating the amount held should be forwarded to the above-named officers, who will file applications and notify holders in their turn when presentation may be made and payment obtained. The notification by the holders of trade dollars to the Treasurer or Sub-Treasurer of the United States of the amounts held by them respectively will be held to be a sufficient presentation of the coins within the meaning of the law, and will entitle the holders in the order of reception of such notifications to deposit such coins in the respective Sub-Treasuries when notified that such deposits can be received at those offices. Notifications must be filed with the Sub-Treasurers on or before Aug. 1, 1885. After notifying these officers, and upon receipt of notification from them, such coins may be forwarded by express or otherwise, transportation charges being prepaid, when receipts will be issued for the amounts purporting to be contained in the deposits on their reception. Upon the count and ascertaining of the amount of such deposit payment will be made therefor in standard silver dollars or in fractional silver coin at the option of the holder. Defaced, mutilated, or stamped trade dollars found in deposits will not be redeemed or exchanged by any of the Sub-Treasury officers, but they will be returned to the depositor or purchased as bullion in sums of \$10 or upward by the United States mint at the option of the depositor. U. N. JOHNSON, TREASURER UNITED STATES.

Approved: C. S. FAIRCHILD, Acting Secretary of the Treasury.

Most of the dollars presented for redemption are held by banks for large business houses, and, as they were but a short time in circulation, are in very good condition. There is probably not more than one fourth of the original mintage of trade dollars still in this country; the remainder has been exported, principally to China.

Incredible PR66 Ultra Cameo
1881 Trade Dollar

- 988 1881 PR66 Ultra Cameo NGC. If one examines Mint Chief Engraver William Barber's work with a critical eye towards its artistry, one will note that he preferred somewhat more "open" fields on his many designs for circulating and pattern coinage. Note how much more "open" or "white" space is visible on the Trade dollar than on the Liberty Seated dollars that precede it, or on the Morgan dollars that followed.

High-end Ultra Cameo proof Trade dollars thus become the perfect vehicle to examine the artistic and aesthetic differences among these wonderful coins. On this top-shelf proof, the brilliance dominates, even though both sides have a slight overlay of golden patina. The stark contrast is a function of the thickly frosted devices, the unfathomably deep mirrors, and the considerable amount of open area in the fields, as mentioned. From the original proof mintage of 960 coins, this piece is one of five Ultra Cameos so graded at NGC, and there are only two finer (4/09).(#97061)

Phenomenal 1882 Trade Dollar
PR66 Ultra Cameo

- 989 **1882 PR66 Ultra Cameo NGC.** From a proof-only mintage of 1,097 pieces, the 1882 Trade dollar is reasonably available today in the context of the series. However, coins at the PR66 Ultra Cameo level are decidedly rare. NGC has certified only nine coins in this grade, with five finer (4/09). The issue was quite popular with contemporary collectors, who frequently purchased more than one specimen from the Mint. A case in point was collector James B. Wilson. When dealer Thomas Elder sold his collection in October 1908, lots 215, 216, and 217 were all 1882 proof Trade dollars. Wilson's collection also included three examples of the 1881 and 1883 proof Trade dollars, so his pattern seems consistent.

The present coin is a phenomenal specimen, with brilliant, untoned surfaces. The dramatic black-on-white contrast between the deeply mirrored fields and frosty, lustrous devices is truly spectacular. Overall eye appeal is stunning.

From The Joseph C. Thomas Collection, Part Two. (#97062)

EARLY PROOF SET

Extraordinary 1898 Six-Piece Proof Set, PR65 to PR67

990 Six-Piece 1898 Proof Set PCGS. A fabulous set, including:

1898 Cent PR65 Red and Brown PCGS. The obverse is almost full red, while the reverse devices are outlined in deep emerald-green. A well-produced proof with orange-peel surfaces.

1898 Nickel PR65 PCGS. The fields are somewhat shallowly mirrored, and each side is toned in shades of lilac and streaky reddish-golden.

1898 Dime PR66 Cameo PCGS. A spectacular coin. The fields are deeply mirrored, and there is significant mint frost over the devices providing cameo contrast. Much brilliance remains on each side, but light tan and blue toning is also present. Compare the size of this coin to the circle of brilliance on the dollar in this set. It seems obvious to us that this dime must have rested over the center of the obverse of the dollar for many years, leaving a circle of perfect brilliance.

1898 Quarter PR67 Cameo PCGS. To our eyes, this appears to be a perfect coin. The obverse is mostly brilliant, with an arc of golden-brown on the right side, and there is thick, contrasting mint frost on Liberty. The reverse is uniformly toned a deep, finely speckled blue with red undertones. Even with the heavy toning, the frosted contrast is abundantly clear.

1898 Half PR67 PCGS. The fields show extraordinary depth of mirrored reflectivity on each side. This mirroring brightens and enlivens the rich, multicolored toning that covers each side of this magnificent coin.

1898 Dollar PR66 Cameo PCGS. While we try not to play favorites, in this case we just cannot help it. This is a coin with a story to tell. As we noted above in the description for the dime, the dollar has a solid brilliant center surrounded by iridescent moss-green and rose patina. We believe that the dime rested atop the dollar for many, many years and left a perfect, untuned center, around which the remainder of the dollar toned to various degrees. Extraordinary surfaces and preservation. This is truly a set that must be seen to be appreciated. (Total: 6 coins)

MORGAN DOLLARS

Gem Prooflike 1878 Morgan Dollar 7/8TF Strong, VAM-40

- 991 1878 7/8TF Strong MS65 Prooflike NGC. VAM-40, R.5. Per vamworld.com, "the VAM-40 is among the more difficult strong 7/8 tailfeather varieties to locate." This is a precisely struck and essentially brilliant Gem that exhibits dazzling luster and only minor abrasions. Census: 9 in 65 Prooflike, 0 finer (4/09). (#7079)

VAM-41A 1878 7/8TF Morgan Gem Deep Mirror Prooflike

- 992 1878 7/8TF Weak MS65 Deep Mirror Prooflike PCGS. VAM-41A. Dramatic field reflectivity leaves no doubt concerning the Deep Mirror Prooflike status of the present Gem. The piece is brilliant and well struck, although the reverse die was lapped, removing portions of the wing feathers. Marks are scarce and inconsequential. Many Morgan specialists are chasing the 1878 VAMs, particularly those of the 8TF and 7/8TF varieties. (#97071)

Brilliant Prooflike MS66 1878 Flat Breast Dollar

- 993 1878 7TF Reverse of 1878 MS66 Prooflike NGC. This is a splendid representative of the first-year 1878 Morgan dollar, with the so-called Reverse of 1878 showing a convex design on the eagle's breast area. Brilliant and intensely reflective in the fields, with impressively preserved surfaces and a flashy, clean appearance that is exceedingly pleasing. Census: 23 in 66 Prooflike, 0 finer (4/09).

- 994 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike ANACS. The crisply struck devices have pleasing frost, and both fields exhibit blatant reflectivity. Gold-orange patina graces the rims. Well struck and flashy with a few minor bagmarks. The obverse is die doubled, most notably on the upright of the B in PLURIBUS. Ex: Long Beach Signature (Heritage, 2/2007), lot 5354. (#97075)

- 995 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike NGC. Both sides have deeply mirrored fields and faint cameo contrast. A virtually brilliant example that has a crisp strike, a well preserved reverse, and a few marks on the face and left obverse field. (#97075)

Bold 1878 Morgan Dollar, MS65 Reverse of 1879

- 996 1878 7TF Reverse of 1879 MS65 PCGS. This frosty and lustrous Gem is only a mark or two away from the finest quality that PCGS has ever certified. Both sides exhibit bold design definition with exceptional aesthetic appeal. PCGS has only certified six finer examples (4/09). (#7076)

- 997 1878-CC MS65 PCGS. Lustrous surfaces exhibit speckles of light tan-gold and gray patina which nearly masks the remnants of a faint fingerprint in the left obverse field. An exacting strike sharpens the design features, including excellent detail in the hair above Liberty's ear. A few minute contacts are insignificant. (#7080)

- 998 1878-CC MS65 NGC. Intense mint frost is the primary attribute of this Gem Morgan dollar, from the first year of the series. Russet-gold and lilac peripheral toning further enhances the impressive eye appeal of the piece. Well struck with only slight marks. (#7080)

- 999 1878-CC—Reverse Rotated 65 Degrees Clockwise—MS65 PCGS. A well-defined Gem with fresh luster and only occasional hints of milky toning over parts of the fields. Minimally marked with bright eye appeal and a rotated reverse for added interest. (#7080)

Wonderful 1878-CC Morgan Dollar, MS66

- 1000 1878-CC MS66 PCGS. A highly lustrous Premium Gem, with brilliant silver surfaces hidden beneath delicate rose and gold toning accented by peripheral iridescence. As the first year of issue for the design and the first Morgan dollar struck at the highly popular Carson City Mint, 1878-CC dollars disappear from the marketplace almost as soon as they appear. PCGS has only certified four finer pieces (4/09). (#7080)

- 1001 1878-CC MS65 Prooflike NGC.** Pronounced field-device contrast shows on both sides of this untuned Gem. A powerful strike leaves sharp definition on the design elements, including the hair at Liberty's ear and on the eagle's breast feathers. Light reverse field grazes are all that limit the grade.(#7081)

**Outstanding 1878-CC Morgan
MS65 Deep Mirror Prooflike**

- 1002 1878-CC MS65 Deep Mirror Prooflike NGC.** This is an outstanding Gem that displays a high degree of field-motif contrast. The mildly frosted design features are the recipients of a powerful strike (not unusual for this issue), as evidenced by sharp delineation in the hair over Liberty's ear and on the breast feathers. Wisps of reddish-tan and cobalt-blue cling to the rim areas, a pleasing frame for essentially untuned centers. Some minute obverse milling marks preclude an even higher grade. Census: 32 in 65 Deep Mirror Prooflike, 0 finer (3/09).(#97081)

- 1003 1879 MS66 PCGS.** The silver-white surfaces of this gorgeous Premium Gem exude radiant luster and possess sharply struck design features. Both sides are well cared for. Population: 85 in 66, 1 finer (4/09).(#7084)

- 1004 1879 MS66 NGC.** A lovely, satiny Premium Gem from just the second year of the Morgan dollar series. Untuned with impressive cartwheel luster in the fields and carefully preserved surfaces that lack any noteworthy marks. Census: 46 in 66, 5 finer (4/09).(#7084)

Flashy Near-Mint 1879-CC Dollar

- 1005 1879-CC AU58 NGC.** Normal CC. This mildly prooflike near-Mint representative is close to brilliant, but has a hint of golden-brown toning across the reverse periphery. A good strike with only minor incompleteness of detail on the eagle's breast and the hair above the ear. A loupe reveals a couple of faint thin marks on the cheek.(#7086)

Remarkable 1879-CC Dollar, MS62

- 1006 1879-CC MS62 PCGS.** The desirable Normal Mintmark variety, and in this case in an older green-label holder. Both sides have remarkable eye appeal, the obverse with reflective fields and the reverse with satiny luster. The surface exhibit lightly scattered marks, mostly on the obverse, and entirely trivial.(#7086)

Appealing Select 1879-CC Dollar

- 1007 1879-CC MS63 NGC.** Lightly frosted on the high points of the devices, with smooth and creamy luster enlivening gold-kissed fields. The strike is strong overall, if a trifle soft at the hair over Liberty's ear. Great eye appeal for this popular issue, which was underrepresented in the GSA holdings compared to other Carson City dates from 1885 and before.(#7086)

Coveted Choice Mint State 1879-CC Dollar

- 1008 1879-CC MS64 PCGS.** Clear CC. Honey-gold freckles adorn the margins of this key-date Carson City dollar. A few wispy grazes appear on the cheek and neck, but the fields are clean and the luster is commendable. The reverse is well preserved, despite a hidden mark on the right (facing) claw. Nicely struck and widely collected.(#7086)

Scarce 1879-CC Gem Dollar

- 1009 1879-CC MS65 PCGS.** Normal CC. The 1879-CC Morgan dollar is plentiful in Extremely Fine through the lower levels of Mint State. Near-Gems are available with a bit of searching, and MS65 pieces are legitimately scarce. PCGS and NGC have graded a mere three specimens finer—all Premium Gems.

The fields of this lovely Gem display slightly prooflike characteristics, establishing mild contrast with the devices. A well executed strike leaves strong definition on the design features, including a good amount of detail in the hair over Liberty's ear and on the eagle's breast feathers. The only toning visible is a sliver of light gold at the left obverse margin. Nicely preserved surfaces are devoid of significant contacts. Population: 85 in 65, 2 finer (4/09). (#7086)

Memorable 1879-CC Dollar MS64 Deep Mirror Prooflike

- 1010 1879-CC MS64 Deep Mirror Prooflike NGC.** Not only is this spectacular coin the first key CC-mint issue in the series, but it is a near-Gem with Deep Mirror Prooflike certification from NGC, and as such also a rarity and an eternally popular Morgan dollar. Few such specimens of the 1879-CC exist, since most examples of the issue show rather shallow prooflike tendencies, or none at all. This is a true Deep Mirror Prooflike, however, with lavish mint frost on the devices and limitless mirrors in the fields, yielding the coveted black-on-silver appearance. A couple of light scrapes prevent an even finer grade, but this tremendous coin has much to delight the viewer. Census: 11 in 64 Deep Mirror Prooflike, 1 finer (4/09). (#97087)

- 1011 1879-CC Capped Die AU58 NGC.** VAM-3. A Top 100 Variety. An even coating of silver-gray patina covers the surfaces of this well detailed example. Small marks and hairlines are scattered across each side. (#7088)
-

Appealing Select 1879-CC Capped Die Dollar

- 1012 1879-CC Capped Die MS63 PCGS.** VAM-3. A Top 100 Variety. The "Capped Die" is underrated compared to the Normal Mintmark varieties, though less so than in prior decades. This example is well struck and generally silver-gray with a few dots of deeper color near the rims. Pleasingly lustrous with few abrasions for the grade. (#7088)
-

**Lustrous 1879-CC Dollar, MS64
VAM-3, Capped Die**

- 1013 1879-CC Capped Die MS64 PCGS.** VAM-3. A Top 100 Variety. Actually a repunched mintmark variety, with the medium CC mintmark over a smaller one, though the die chipping around the date is far more noticeable. Reddish-purple patina concentrates at the margins of this near-Gem. Lustrous surfaces exhibit well struck design features and reveal some minute marks that preclude Gem status. PCGS has seen only eight coins finer (4/09). Housed in a green label holder.(#7088)

Luminous Near-Gem 1879-CC Capped Die Dollar

- 1014 1879-CC Capped Die MS64 PCGS.** VAM-3. A Top 100 Variety. The so-called "Capped Die," though it is more properly termed the Medium Over Small Mintmark. This near-Gem offers excellent quality and eye appeal. Subtle silver, rose-gray, and gold shadings drape each side, and hints of frostiness visit the central devices. PCGS has graded only eight finer examples for the variety (4/09).(#7088)
- 1015 1879-O MS64 PCGS.** The silver-gray surfaces of this near-Gem exhibit well struck design elements and ebullient luster. Some inoffensive grazes preclude Gem status.(#7090)

Meritorious Gem 1879-O Morgan Dollar

- 1016 1879-O MS65 NGC.** This minimally toned Gem has exceptional luster and a virtually full strike. Only the occasional faint obverse graze denies an even higher third-party assessment. The 1879-O is plentiful in MS61 through MS64, but is difficult to secure in MS65. NGC has encapsulated only eight pieces in finer grades (4/09).(#7090)

- 1017 1879-O MS65 NGC.** Well struck through the centers, with pleasingly detailed hair above the ear and only a hint of flatness on the eagle's breast. The surfaces are unusually smooth, with Liberty's cheek particularly clean, and the eye appeal is great. This O-mint issue is a rarity any finer, with NGC certifying only eight numerically superior pieces (4/09).(#7090)

Exemplary MS68 1879-S Morgan

- 1018 1879-S MS68 PCGS.** A magnificent silver type coin. Potent luster sweeps the essentially immaculate fields. The cheek displays only the faintest grazes. The strike is exemplary, and only a whisper of chestnut toning graces each side. Certified in a green label holder. Population: 75 in 68, 0 finer (4/09).(#7092)
- 1019 1879-S Reverse of 1878 MS64 PCGS.** A Top 100 Variety. The ever-popular Reverse of 1878 variant, offered here as a near-Gem. Immensely lustrous with glimpses of golden toning over pale silver-gray surfaces.(#7094)
- 1020 1880 MS66 NGC.** Faintly toned and thoroughly lustrous with a penetrating strike and a gorgeously preserved reverse. The obverse has only occasional delicate grazes. The 1880 is readily secured in typical Mint State condition, but becomes rare at the MS66 level. Census: 36 in 66, 0 finer (4/09).(#7096)
- 1021 1880-CC MS65 PCGS.** A well struck Gem with pleasing luster and disparate sides. The obverse is deeply toned rose, orange, and violet, while the reverse is pale silver-gray with a hint of golden-peach at the rims.(#7100)
- 1022 1880-CC MS65 PCGS.** Brightly lustrous with considerable frostiness on the devices. Touches of cloud-white toning are visible in the fields. A lovely Carson City Gem housed in a green label holder.(#7100)
- 1023 1880-CC MS65 PCGS.** An original stone-gray Gem with smooth fields, a good strike, and satin luster. Scarcer than its 1881 to 1884 Carson City successors. Certified in an old green label holder.(#7100)
- 1024 1880-CC MS65 PCGS.** Delicate peach tints visit each side of this lustrous Gem. Well struck overall with only slight softness at the centers. Attractive and desirable, a great Carson City Morgan dollar.(#7100)

**Impressive 1880-CC Dollar
MS65 Deep Mirror Prooflike**

- 1025 1880-CC MS65 Deep Mirror Prooflike NGC.** Vivid blue and golden colors encircle the perimeter of each side, which contrasts nicely against the frosted and untuned devices. The highly reflective fields show only a few tiny marks, and none are worthy of specific mention. Strong cameo contrast enhances the outstanding eye appeal. Only 591,000 pieces were minted, and they are seldom seen in better Uncirculated grades and with Deep Mirror Prooflike fields. NGC has certified none finer (6/08).(#97101)

- 1026 1880-CC 8 Over High 7 MS64 PCGS.** VAM-5. A Top 100 Variety. Remains of a 7 sit high within the second 8 in the date. Sharply struck motifs stand amid partially prooflike fields, and wisps of light gold-tan color concentrate at the margins. A few minute marks preclude Gem status.(#7102)

- 1027 1880-CC 8 Over High 7 MS65 PCGS.** VAM-5. A Top 100 Variety. An appealing Gem example of this popular overdate, with the underdigit high on the obverse and a Reverse of 1879. Frosty centers are faintly silver-gray with gold-orange peripheral tints. The fields shine and show impressive cartwheels.(#7102)

- 1028 1880-CC 8 Over Low 7 MS65 PCGS.** CAC. VAM-6. A Top 100 Variety. The "low" overdate for the 1880-CC dollar when paired with the Reverse of 1879. This minimally toned Gem has strong cartwheel luster with ample frostiness over the fields.(#7104)

- 1029 1880-CC 8 Over Low 7 MS65 PCGS.** VAM-6. A Top 100 Variety. A lovely Gem example of this popular overdate variety. Both sides of the coin have a complete coating of opaque, creamy-white patina. The surfaces only show a few superficial grazes. (#7104)

- 1030 1880/79-CC Reverse of 1878 MS64 PCGS.** VAM-4. A Top 100 Variety. Strongly struck with thick frost across the high points and a degree of pale silver-gray toning in the fields. The overdate is clear under magnification. A highly desirable near-Gem.(#7108)

- 1031 1880/79-CC Reverse of 1878 MS65 PCGS.** VAM-4. A Top 100 Variety. The early Morgan dollar issues from 1878 through 1880 are notoriously rich with VAM varieties. This is especially true of issues from the Carson City Mint. This piece is splendidly arrayed in a thick coating of snow-white mint frost across both sides. The radiant surfaces are well preserved and only show a few minor marks, mostly on the obverse.(#7108)

**1880/79-CC Dollar, Reverse of 1878
MS64 Deep Mirror Prooflike**

- 1032 1880/79-CC Reverse of 1878 MS64 Deep Mirror Prooflike PCGS.** An amazing near-Gem 1880/79-CC dollar, struck from the old reverse hub with flat breast feathers and other minor differences. Both sides are entirely brilliant with no evidence of toning. The surfaces are exceptional for the grade. Population: 16 in 64 Deep Mirror Prooflike, 3 finer (4/09).(#97109)

- 1033 1880-O MS64 PCGS.** Impressively lustrous beneath patina that is by turns subtle and dramatic. The obverse has faint silver-gray and green-gold color, while the upper reverse shows prominent rainbow bands. PCGS has graded 20 finer pieces (4/09).(#7114)

Near-Perfect 1880-S Morgan Dollar, MS68

- 1034 1880-S MS68 PCGS.** According to the third edition of *A Buyer's Guide to Silver Dollars & Trade Dollars of the United States*, the 1880-S is one of the most common of all Morgan dollars, and is second only to the ubiquitous 1881-S as the most common issue of the series. At the MS68 grade level, however, no silver dollar issue is easy to find. This remarkable specimen is fully struck, with untuned creamy-white surfaces that are immaculately preserved and virtually pristine. A simply beautiful and conditionally elusive example from the San Francisco Mint. PCGS has certified only five finer (4/09).(#7118)

Formidable MS68 Prooflike 1880-S Dollar

- 1035 1880-S MS68 Prooflike NGC.** Medium S. From an issue renowned for its good production criteria, this exquisitely struck Superb Gem example is nearly bereft of toning and has only inconsequential contact. The fields offer dazzling, flashy luster. Those who desire the finest-quality Morgan dollar for a silver type set need look no further.(#7119)

**1880-S Dollar, MS67 Deep Mirror Prooflike
The Ultimate Type Coin**

- 1036 1880-S MS67 Deep Mirror Prooflike NGC.** This is an exquisite and Superb Gem with amazing aesthetic appeal. The surfaces on each side are absolutely brilliant without any evidence of toning. With deeply mirrored fields and lustrous devices, this lovely dollar has exceptional contrast. Census: 17 in 67, 3 finer (4/09). (#97119)
- 1037 1881-CC MS64 PCGS.** The highly lustrous surfaces of this near-Gem are essentially untoned and exhibit sharply struck design elements. A few minor marks deny Gem classification. (#7126)
- 1038 1881-CC MS66 PCGS.** Strongly frosted on the devices with gorgeous cartwheel luster. Each side is largely pale silver-gray with one dot of crimson toning at the E in AMERICA on the reverse. (#7126)
- 1039 1881-CC MS66 NGC.** An outstanding piece with pleasing maroon accents in the margins. Eye-catching cartwheel luster graces the fields, and the devices are nicely frosted. Only a few delicate grazes on the left obverse limit the grade. (#7126)

Gorgeous 1881-CC Morgan, MS67

- 1040 1881-CC MS67 PCGS.** An absolutely incredible Superb Gem, this brilliant and frosty example has bold design definition with a complete absence of surface marks other than the most trivial blemishes that might be expected for the grade. PCGS has only certified three finer pieces (4/09). (#7126)
- 1041 1881-CC MS64 Deep Mirror Prooflike PCGS.** Well struck with frosted alabaster-gold devices and glassy, deeply reflective fields. Scattered, mostly trivial marks define the grade. This is one of the more common Carson City issues with Deep Mirror Prooflike surfaces, and near-Gems like this one are relatively easy to obtain. (#97127)
- 1042 1881-O MS65 NGC.** A Gem O-mint dollar with strong and shining luster and above-average detail for the issue. Minimally toned overall with great eye appeal. NGC has graded only eight numerically finer pieces (4/09). (#7128)
- 1043 1881-S MS67 ★ NGC. CAC.** Dramatically toned with vibrant luster and fantastic eye appeal, as befits a Superb Gem. Blue, violet, magenta, and orange peripheral shadings grace the obverse, while the reverse shows only glimpses of gold at the rims. (#7130)

Conditionally Scarce 1881-S Morgan, MS68

- 1044 1881-S MS68 PCGS. CAC.** The 1881-S is famous for being one of the most common issues in the Morgan dollar series, if not *the* most common. At the lofty MS68 grade tier, even the 1881-S becomes conditionally scarce. This example boasts great technical merit as well as splendid eye appeal. Lovely champagne and turquoise patina blankets the obverse while the reverse shows similar coloration, but only near the periphery. Fully struck, intensely lustrous, and virtually pristine, this is simply a great Morgan dollar in every respect. Population: 87 in 68, 2 finer (4/09). (#7130)

Exemplary MS68 1881-S Morgan Dollar

- 1045 1881-S MS68 NGC. CAC.** The 1881-S is one of the best-produced issues in the Morgan dollar series, prompting David Bowers (2006) to write: "Specimens nearly always are sharply struck and beautiful." This MS68 example is even nicer than usually seen, with shimmering cartwheel luster, satin-smooth surfaces, and a bold strike, further enhanced by loving post-strike preservation. Liberty's cheek is essentially immaculate, and the light gold, plum, and blue rim toning completes a marvelous package. Certified in a prior generation NGC holder. (#7130)
- 1046 1882 MS66 NGC.** Well struck with an intense frosty sheen over the icy-white surfaces. Impressively preserved, with just two or three faint marks noted on each side. A lovely Premium Gem example of this scarcer Philadelphia Mint issue. (#7132)
- 1047 1882-CC MS66 PCGS.** Strongly struck with bright luster. Hints of twinkling frost enliven the carefully preserved devices. PCGS has graded just 50 finer examples of this popular GSA holdings issue. (#7134)
- 1048 1882-CC MS66 NGC.** Pleasing detail overall with only a hint of softness visible at the high points. Bright silver-white surfaces show only a few faint rim flaws that preclude an even finer designation. A great Carson City Morgan dollar. (#7134)
- 1049 1882-CC MS66 PCGS.** A beautiful Premium Gem from the Carson City Mint, with shimmering mint frost over the snow-white surfaces. There are very few post-striking flaws on either side, just a few mild die clash marks. A readily available issue, recommended for type purposes. (#7134)
- 1050 1882-CC MS66 Prooflike NGC.** The brilliant fields appear watery under a light and show pleasing contrast against the icy devices. A powerfully impressed and vibrant Premium Gem. Census: 32 in 66 Prooflike, 2 finer (4/09). (#7135)

- 1051 1882-CC MS66 Prooflike NGC.** Prominently flashy fields approach the depth of reflectivity required of a Deep Mirror Prooflike designation. This brilliant Premium Gem has a few faint marks on the left obverse but is otherwise undisturbed. (#7135)
- 1052 1882-CC MS65 Deep Prooflike NGC.** Profoundly mirrored with intense contrast between the fields and the rich silver-white frost of the devices. Sharply struck and gorgeous. NGC has graded just four numerically finer Deep Prooflike pieces (4/09).(#97135)
- 1053 1882-CC MS65 Deep Mirror Prooflike PCGS.** Fully brilliant and entirely untoned, this Gem Deep Mirror Prooflike 1882-CC Morgan is one of the most eye-appealing examples imaginable. PCGS has graded just 61 finer DMPL examples (4/09).(#97135)
- 1054 1882-CC MS65 Deep Mirror Prooflike ANACS.** A well struck Carson City type coin that boasts flashy fields and a precise strike. Golden-brown and powder-blue enrich the peripheries. A clean-cheeked Gem with only minor contact near the chin. (#97135)

**Astonishing 1882-CC Morgan Dollar
MS66 Deep Mirror Prooflike**

- 1055 1882-CC MS66 Deep Mirror Prooflike PCGS.** For a Carson City dollar, this piece is nothing less than astonishing. Generally CC-mint dollars are found with generous abrasions, but this is a smooth, virtually unabraded example that is brilliant throughout. The devices are heavily frosted with sharply contrasting deeply mirrored fields, and the strike is precise. Population: 60 in 66 Deep Mirror Prooflike, 1 finer (4/09).(#97135)

**Brilliant 1882-O Silver Dollar
MS65 Deep Mirror Prooflike**

- 1056 1882-O MS65 Deep Mirror Prooflike PCGS. CAC.** An older green-label PCGS holder houses this brilliant Gem. The date is conditionally rare with Deep Mirror Prooflike surfaces. This example looks just like a proof at first glance, with splashes of delicate gold toning on each side. Population: 20 in 65 Deep Mirror Prooflike, 1 finer (4/09).(#97137)
- 1057 1882-S MS65 Deep Prooflike NGC.** Pleasingly detailed with fantastic mirrors on each side. The centers are minimally toned, while the margins show glimpses of gold-orange. NGC has graded eight finer Deep Prooflike pieces (4/09).(#97141)
- 1058 1883-CC MS66 NGC.** A pale silver-gray Premium Gem, crisply struck with creamy luster. Carefully preserved and attractive. NGC has certified just 89 numerically finer pieces (3/09).(#7144)

- 1059 1883-CC MS65 Deep Mirror Prooflike PCGS.** Mostly brilliant, crisply struck, and minimally marked. Eye-catching deeply mirrored fields create stunning black and white cameo contrast against the frosted devices. A number of fine die lines are noted around the eagle. Housed in an old green label PCGS holder.(#97145)
- 1060 1883-CC MS65 Deep Mirror Prooflike NGC.** Well struck and untuned with a rich frosty sheen across both sides and impressive depth of reflectivity in the glassy fields. A few scattered marks and luster grazes prevent an even finer grade assessment. (#97145)
- 1061 1883-CC MS65 Deep Mirror Prooflike PCGS.** Boldly struck and lightly toned, with definite contrast evident between the watery fields and the frosted, creamy-beige devices. A few stray die striations are noted on each side. Minimally marked, as expected for a Gem, and ensconced in an early-generation PCGS holder with a green label.(#97145)

**Incredible 1883-CC Morgan
MS66 Deep Mirror Prooflike**

- 1062 1883-CC MS66 Deep Mirror Prooflike PCGS.** This remarkable Premium Gem, in its green-label PCGS holder, has fully brilliant and untuned silver surfaces. The fields are fully mirrored, and the devices are brilliant with satiny luster. A scarce issue, with only two finer Deep Mirror Prooflike examples certified by PCGS (4/09). (#97145)
- 1063 1883-S MS63 NGC.** Aside from a touch of softness at the hair over Liberty's ear, this Select coin is well-defined. A handful of scattered abrasions determine the grade, but the minimally toned obverse is comparatively clean.(#7148)
- 1064 1883-S MS63 PCGS.** Bold design features, satiny luster, and full brilliance define this Select Mint State piece that will easily find a happy new home. While the date is scarce, examples are plentiful enough that any collector can acquire a nice one.(#7148)
- 1065 1883-S MS63 PCGS.** Strongly struck with warm and inviting luster. This Select piece has no severe abrasions, but a collection of smaller marks and a curving on the faintly toned portrait account for the grade.(#7148)
- 1066 1883-S MS63 PCGS. CAC.** Well-defined overall with only trifling softness noted at the hair over Liberty's ear. This minimally toned example offers gorgeous luster, though scattered light abrasions preclude a finer grade.(#7148)

Lustrous 1883-S Morgan Dollar, MS64

- 1067 1883-S MS64 PCGS.** Light pearl-gray toning graces this highly lustrous and exactly struck near-Gem. The portrait and reverse are beautifully preserved, and the obverse field has only minor marks. Unlike the 1878 to 1882 San Francisco issues, the 1883-S is scarce in Mint State and rare in Gem condition. PCGS has only certified 18 finer examples (4/09).(#7148)

Shining Near-Gem 1883-S Morgan Dollar

- 1068 1883-S MS64 PCGS.** Brilliant and dazzling, with booming cartwheel luster and well struck design elements. Even the hair detail directly above Liberty's ear is crisply reproduced. There are few surface blemishes, but a couple of shallow milling marks are noted on each side of this otherwise carefully preserved near-Gem. (#7148)

Vibrant Superb Gem 1884-CC Morgan

- 1069 1884-CC MS67 NGC.** This essentially brilliant Superb Gem Carson City type coin has vibrant cartwheel sheen and a penetrating strike. Marks are uncommonly absent, even on the susceptible focal point of Liberty's cheek. It would require a Herculean labor to improve upon the present representative. Census: 86 in 67, 0 finer (4/09).(#7152)

Outstanding MS67 1884-CC Dollar

- 1070 1884-CC MS67 NGC.** While the 1884-CC is one of the most common Carson City Morgan dollars in almost all grades, it is seldom seen in Superb Gem and is virtually impossible to locate any finer. A few wispy luster grazes are all that keep this outstanding piece from the flawless category. The strike is full, and the eye appeal is spectacular. PCGS has certified just three examples finer, and NGC reports none above MS67 (4/09).(#7152)

- 1071 1884-CC MS65 Deep Mirror Prooflike NGC. CAC.** Decisively struck with absolute contrast between the bold mirrors and the thickly frosted devices. A handful of minor marks in the fields are consistent with the grade assigned. (#97153)

- 1072 1884-CC MS65 Deep Mirror Prooflike PCGS.** Magnificently mirrored fields and nicely frosted motifs combine for pleasing white-on-black contrast. Precisely struck and only lightly abraded. An impressive Carson City Gem. (#97153)

- 1073 1884-CC MS65 Deep Mirror Prooflike PCGS.** The deep, watery reflectivity in the fields makes this piece look like a proof, at first glance. The devices are boldly struck and the silver-gray surfaces are essentially untuned, save for a couple of small, milky patches on the obverse. A couple of minor blemishes are found on each side. (#97153)

- 1074 1884-CC MS66 Deep Mirror Prooflike NGC.** This exactly struck and essentially brilliant CC-mint dollar has exceptional reflectivity and only minor field contact near IN GOD WE TRUST. Census: 41 in 66 Deep Mirror Prooflike, 3 finer (4/09). (#97153)

- 1075 1884-CC MS66 Deep Mirror Prooflike PCGS. Ex: DCT Collection.** Both sides of this exquisite Carson City Morgan dollar display only a hint of tan toning. The devices have a generous amount of mint frost and provide contrast with the glassy fields. PCGS has only certified three finer Deep Mirror Prooflike examples of this issue (4/09). (#97153)

- 1076 1884-S AU58 PCGS.** Strong remaining luster with just a trace of friction evident on the high points. Largely pale silver-gray though with subdued lilac and golden-brown elements at the lower and left reverse periphery. (#7156)

Elusive 1884-S Dollar, MS61

- 1077 1884-S MS61 ICG.** Worn examples of the 1884-S Morgan are plentiful today, as large quantities were released into circulation in the late 19th century. Mint State pieces are elusive in all levels. This is a well struck specimen, including in the centers, areas that are often weak. Luminous, essentially untuned surfaces reveal a few scattered minute marks. (#7156)

Desirable Uncirculated 1884-S Dollar

- 1078 1884-S MS61 NGC.** The 1884-S is notoriously scarce in Uncirculated grades, although AU examples are fairly plentiful. One theory is that a bag was opened at a Nevada casino in the 1950s, and the coins spent an evening scooted across the gambling tables. More likely, 1884-S bags were at the front of the vault, and went into 19th century circulation while the 1878-S through 1882-S bags remained in Treasury holdings for additional decades. This is a well struck and lightly toned example with blazing luster and conservatively assessed surfaces. (#7156)

Scarce MS62 1884-S Morgan Dollar

- 1079 1884-S MS62 NGC.** A bit softly struck in the centers, but mostly lustrous and showing light pastel-golden toning over both sides. There are several small to medium-sized marks, as one would expect for a coin at this grade level. The 1884-S is a notoriously scarce and difficult issue in Mint State, compared to other Morgan dollars with similar mintage levels. (#7156)

- 1080 1885-CC MS64 PCGS.** Silver-gray surfaces are awash in pleasing luster and display just a hint or two of light tan color at the margins. A well executed strike leaves crisp definition on the design elements, including the hair over Liberty's ear and the eagle's breast feathers. An unobtrusive graze or two precludes Gem status. (#7160)

- 1081 1885-CC MS66 NGC.** Strongly struck with considerable frostiness on the central devices. The fields are soft silver-gray with glimpses of peach. Winning eye appeal for this popular GSA issue. (#7160)

- 1082 1885-CC MS66 PCGS.** Lustrous silver-gray surfaces display partially prooflike fields that offer a mild contrast with frosty design elements that are sharply impressed, though the hair over Liberty's ear and the eagle's breast feathers are a tad soft in places. Both sides are impeccably preserved, revealing just a few minor luster grazes in the left (facing) obverse fields. PCGS has certified only 38 coins finer (4/09). (#7160)

- 1083 1885-CC MS66 NGC.** A fully brilliant Premium Gem with excellent eye appeal and bold design features. A few tiny surface marks on either side are entirely inconsequential, and do little to limit the grade. (#7160)

- 1084 1885-CC MS65 Prooflike PCGS.** An amazing Prooflike Gem, this 1885-CC Morgan dollar is entirely brilliant with no toning on either side. A few scattered marks, mostly on the reverse, are entirely trivial. PCGS has only certified 29 finer prooflike examples. (#7161)

- 1085 1885-CC MS65 Prooflike NGC.** An amazing Prooflike Gem 1885-CC Morgan dollar with excellent contrast. The fields are deeply mirrored and the devices are highly lustrous. NGC has graded just 24 finer examples (4/09). (#7161)

- 1086 1885-CC MS65 Deep Mirror Prooflike PCGS.** Each side has a wisp of gold toning, but cameo contrast is nonetheless evident between the frosted motifs and the flashy fields. The reverse is particularly well preserved.

Ex: Dallas Signature (Heritage, 7/2006), lot 2826, which realized \$2,760. (#97161)

Amazing MS66 Deep Mirror Prooflike 1885-CC Morgan Dollar

- 1087 1885-CC MS66 Deep Mirror Prooflike PCGS.** Few examples of this issue match this one for quality and sheer eye appeal. This is an amazing piece with deeply mirrored fields and frosted devices, which when combined create a stunning cameo effect. Brilliant throughout. Population: 40 in 66 Deep Mirror Prooflike, 2 finer (4/09). (#97161)

- 1088 1885-S MS65 PCGS.** Essentially untoned surfaces display semiprooflike fields, especially on the obverse. The design elements are generally well struck, with partial detail apparent in the hair over Liberty's ear. A few light grazes are not bothersome. (#7164)

- 1089 1885-S MS65 NGC.** Sharply struck with shining luster. A touch of frostiness catches the light at the tops of the devices. Marvelously preserved with stunning eye appeal. NGC has graded just 13 finer pieces (4/09). (#7164)

Rarely Seen 1885-S Morgan Dollar MS64 Deep Mirror Prooflike

- 1090 1885-S MS64 Deep Mirror Prooflike NGC.** The 1885-S dollar is fairly obtainable in lower Prooflike grades, but is seldom seen as a Deep Mirror Prooflike and in high grade. This is a magnificent, untuned example with lovely contrast between the fields and devices. The strike is nearly full, and there are no abrasions worthy of mention. Bowers (1993) believes that there are only 75 to 150 DMPL 1885-S dollars, and virtually all are in lower grades than the present specimen. When this piece was offered in our July 2002 sale, we reported that NGC and PCGS combined had certified just seven coins in MS64 Deep Mirror Prooflike, with one piece finer. Not a single additional piece has been added in MS64 DMPL or finer by either grading service since then (4/09). This is an excellent opportunity to acquire one of the few top-notch examples. (#97165)

Stunning 1886 MS68 Dollar

- 1091 1886 MS68 NGC.** Those collectors who seek the ultimate quality Morgan dollars should consider this piece, one of just 10 that NGC has assigned the lofty MS68 grade. Both sides of this stunning piece have brilliant silver luster with satiny surfaces, and each is sharply defined. The fields are reflective and the surfaces are nearly pristine, with a trace of light gold toning at the bottom of the reverse. (#7166)

Important 1886-O Dollar, MS64

- 1092 1886-O MS64 PCGS.** Both sides of this near-Gem are thickly frosted with a silver-gray sheen that is virtually devoid of toning. A well executed strike delivers above average definition to the design features. NGC and PCGS combined report a mere four coins above the MS64 grade level (4/03), a fact that further enhances the importance of the present offering. (#7168)

Original 1886-S Dollar, MS65

- 1093 1886-S MS65 PCGS.** This wonderfully impressive coin shows surfaces that are highly lustrous with solid overall detail and splashes of rose, blue-green, and violet patina in the fields. Soft silver-gray shadings drape the centers. This underrated issue has a mintage of just three-quarters of a million pieces, and Gems are elusive, with anything finer a rarity: PCGS has graded only 33 such coins (4/09). (#7170)

- 1094 1886-S/S MS65 NGC.** VAM-2. A Top 100 Variety. Strongly lustrous with a bit of flash and above-average detail for this issue. The essentially untoned surfaces have few marks for the grade. A coin that would be remarkable for the issue even if it did not have the overmintmark.

- 1095 1887 MS66 Deep Prooflike NGC.** This piece is sharply struck and impressively preserved, with a lovely cameo effect produced by the combination of white frosted devices and dark, deep mirror fields. A great example of an issue rarely found with Deep Prooflike surfaces. Census: 12 in 66 Deep Prooflike, 0 finer (4/09). (#97173)

- 1096 1887-O MS65 NGC.** Traces of golden-tan gravitate to the margins of this attractive Gem, and highly lustrous surfaces exhibit well struck motifs, save for minor softness in the centers. The few minute marks are grade-consistent. This issue is elusive any finer, as NGC and PCGS have seen only 11 pieces in higher grades. Census: 97 in 65, 3 finer (4/09). (#7176)

Gorgeous 1887-O Morgan, MS65 Prooflike

- 1097 1887-O MS65 Prooflike PCGS.** A sensational prooflike Gem, this dollar is entirely brilliant with bright, untuned silver surfaces. The fields are completely mirrored of nearly unlimited depth, with frosty silver luster on the devices. Population: 15 in 65 Prooflike, 2 finer (4/09). (#7177)

- 1098 1887/6-O MS62 NGC.** VAM-3. A Top 100 Variety. This O-mint overdate enjoys considerable popularity. This example, though it shows considerable striking softness, has pleasing silver-gray luster with glimpses of golden-tan. (#7178)

- 1099 1887/6-O MS63 NGC.** VAM-3. A Top 100 Variety. The New Orleans counterpart to the Philadelphia overdate, discovered soon after the mother-Mint variety. This lustrous example has light gold-peach toning over the centers framed in bright silver-white. Slight striking softness in the centers with faint, wispy abrasions. (#7178)

- 1100 1887/6-O MS63 PCGS.** VAM-3. A Top 100 Variety. The striking characteristics are generally bold, although the centers exhibit typical New Orleans Mint softness. Lustrous and essentially untuned, with surface marks that seem consistent with the Select Mint State grade level. (#7178)

- 1101 1887/6-O MS63 PCGS.** VAM-3. A Top 100 Variety. Not an obvious overdate, but one that has proven popular with collectors as a distinct *Guide Book* variety. This untuned Select example is highly lustrous, with a rich satiny sheen across both sides. A mildly scuffy cheek limits the grade. (#7178)

- 1102 1887-S MS65 NGC.** Dazzling luster sweeps this boldly impressed better date Gem. Faint chestnut toning is most apparent on the left obverse. Minor roller marks on the cheek are of mint origin. (#7180)

- 1103 1887-S MS65 PCGS.** A well executed strike leaves strong detail on the design elements of this Gem. Partially prooflike surfaces are covered in soft champagne-gold patina on the obverse, while the reverse features deep purple, gunmetal-blue, and orange-gold. Some small marks are noted on Liberty's portrait. While the 1887-S is readily available through MS64, Gems are scarce, and anything finer is rare. (#7180)

Fully Struck Superb Gem 1888 Morgan

- 1104 1888 MS67 NGC.** The 1888 Morgan dollar is an available date, and a favorite of type collectors. The present specimen is a magnificent example of this issue. The coin is fully struck, with exquisite detail on Liberty's hair and the eagle's breast. Full cartwheel mint luster is present on both sides. Only one coin has been certified finer at NGC and PCGS combined. Census: 41 in 67, 1 finer (4/09).(#7182)

Stunning Gem Deep Mirror Prooflike 1888-O Silver Dollar

- 1105 1888-O MS65 Deep Mirror Prooflike ANACS.** This stunning Gem is extremely important for its rarity in Deep Mirror Prooflike preservation. The 1888-O Morgan dollars usually come with satiny or frosty luster, rarely with prooflike surfaces. The present piece has lustrous devices framed by fully mirrored fields. Both sides have faint champagne toning with peripheral gold accents. (#97185)
- 1106 1888-O Doubled Die Obverse AU50 PCGS.** VAM-4. A Top 100 Variety. The famous Hot Lips variety, photographed on page 219 of the 2009 *Guide Book*. This lightly toned and partly lustrous example has a thin mark above the jaw but is otherwise attractive. (#7308)
- 1107 1888-S MS65 PCGS.** Coruscating mint frost produces splendid cartwheel effects across each side of this marvelously attractive Gem. Well preserved and free of significant marks. Utterly white and untoned. This San Francisco issue is scarce at the MS65 grade level, and rare any finer. (#7186)
- 1108 1888-S MS65 PCGS.** CAC. A brilliant and sharply struck Gem with booming luster and virtually brilliant surfaces. The lower cheek shows a trace of mint-made roller marks, but the preservation is exemplary for the MS65 level. The mintmark is repunched. The 1888-S is a lower-mintage date rarely encountered any finer. (#7186)

Elusive 1888-S Gem Prooflike Dollar

- 1109 1888-S MS65 Prooflike NGC.** The 1888-S, though somewhat scarce, can be located in the lower levels of Mint State, including Prooflike. Gems with Prooflike surfaces such as this piece, however, are elusive. Reflective fields highlight the frosted motifs, and just a touch of light gold color gravitates to the margins. Exceptionally well defined for an issue that often comes weakly struck. Census: 7 in 65 Prooflike, 0 finer (4/09).(#7187)
- 1110 1889-CC VF20 PCGS.** Medium-gray surfaces show a touch of brown toning. This moderately circulated example shows light marks and a depression at Liberty's jawline. Overall eye appeal is pleasing. (#7190)
- 1111 1889-CC VF20 PCGS.** This midrange example shows hints of flashiness to the fields. Light silver-gray surfaces are faintly abraded. Overall, a pleasing example of this key Carson City issue. (#7190)

Desirable 1889-CC Dollar, AU53

- 1112 1889-CC AU53 NGC.** Both sides of this CC-mint example possess luster in the protected areas, and low to medium intensity golden-tan patination clings to the reverse margins. Except for minor softness in the centers, the design motifs are well defined. A handful of unobtrusive surface and rim marks are mentioned for complete accuracy only. This is the rarest and most desired issue among Carson City dollars. (#7190)

Popular 1889-CC Dollar, AU55 Details

- 1113 1889-CC—Cleaned—ICG. AU55 Details.** The 1889-CC is one of the keys in the Morgan dollar series, and is the most elusive of the Carson City issues. The current AU55 Details specimen exhibits sharply defined design features. The surfaces are semibright from a cleaning but are retoning pastel sky-blue, greenish-yellow, and orange on the obverse, and deeper cobalt-blue, purple, and orange at the reverse margins. A handful of small marks are not out of context for a briefly circulated coin. (#7190)

Sharp 1889-CC Key Date Morgan Dollar, AU55

- 1114** 1889-CC AU55 NGC. The silver-gray surfaces of this Choice AU key date representative display traces of luster in the recessed areas. Sharp definition is apparent on the design features despite a touch of high-point wear. The surfaces are relatively clean, with just a few small marks occurring on Liberty's cheek. (#7190)

Borderline Uncirculated 1889-CC Dollar

- 1115** 1889-CC AU58 NGC. This Borderline Uncirculated key-date Carson City Morgan has minimally abraded slate-gray surfaces. The centers display only a whisper of friction, and the cartwheel luster is close to complete. Unlike other CC-mint issues from the 1880s, the 1889-CC never emerged in any quantity from the GSA hoard. (#7190)

Near-Mint 1889-CC Morgan Silver Dollar

- 1116** 1889-CC AU58 NGC. The key date among Carson City Morgan dollars, and one of the most important dates among all Morgan dollars coined from 1878 to 1921. This highly lustrous near-Mint piece faint gray-gold toned surfaces with traces of additional iridescence. The 1889-CC is found on collectors' want lists more often than not. (#7190)

**Impressive 1889-CC Morgan Dollar
MS61 Deep Mirror Prooflike**

- 1117** 1889-CC MS61 Deep Mirror Prooflike ICG. This key-date Morgan issue from the Carson City Mint needs no introduction to aficionados of this popular series. It is an issue that is rare and in demand in all grades. Mint State pieces are few and far between, and Deep Mirror Prooflike examples are among the most desired of all the many entries in the long Morgan dollar series. This brilliant silver-white Mint State coin has impressive mirrors with deep contrast. The lower Mint State grade is explained by the numerous light abrasions and bag marks that are consistent with the grade, but the only ones requiring singular mention are in the field below STATES on the reverse. The strike is as bold as ever found on an 1889-CC. This piece will elicit spirited bidding. (#97191)

Appealing 1889-CC Morgan Dollar MS63 Deep Mirror Prooflike

- 1118 1889-CC MS63 Deep Mirror Prooflike PCGS.** The 1889-CC is one of the great keys in the Morgan dollar series, and the most elusive of the Carson City issues. Deep Mirror Prooflike examples, such as the present Select coin, are especially challenging.

Deeply mirrored fields highlight the lightly frosted motifs, and just occasional whispers of light gold color visit the obverse. A decisive strike imparts sharp definition to the design features, including the hair at Liberty's ear and the eagle's breast feathers. A scattering of inoffensive grazes prevents a higher grade; nevertheless, this piece generates above-average eye appeal. Housed in a green label holder. Population: 46 in 63 Deep Mirror Prooflike, 16 finer (4/09). (#97191)

- 1119 1889-S MS65 PCGS.** The highly lustrous surfaces of this Gem display a few splashes of gold color, more extensive and slightly deeper on the obverse. The design elements are well brought up. A few grade-consistent marks are not bothersome. (#7194)
- 1120 1889-S MS65 NGC.** Bright luster emanates from the untoned surfaces of this S-mint Gem. The design elements are well struck except for some softness in the obverse center. Minimally marked for the assigned grade, and difficult to locate any finer. (#7194)
- 1121 1889-S MS65 PCGS. CAC.** Though its mintage is just 700,000 pieces, the 1889-S is slightly underrated due to the Carson City issue of the same year. Still, specialists know how challenging the issue can be any finer than this Gem. It is well struck and minimally toned with strong cartwheel luster. (#7194)

Charming 1889-S Dollar, MS66

- 1122 1889-S MS66 NGC.** The cheek of Liberty is smooth and problem-free, and each side shows a lovely mixture of champagne and lilac toning with strong underlying mint frost. Highly elusive so fine. This issue is commonly associated with the Redfield Hoard, but the overall quality and striking characteristics apparent here are inconsistent with those coins. Census: 25 in 66, 0 finer (4/09). (#7194)
- 1123 1890 MS65 NGC.** Dramatic ruby-red, orange, apple-green, and navy-blue patina endows the obverse. The reverse has similar bands of color, but they are confined to the periphery. Lustrous and nicely struck. NGC has certified only four pieces finer in higher grades (4/09). (#7196)
- 1124 1890-CC MS64 PCGS. CAC.** Strongly struck with powerful luster. Light milky toning visits each side with a hint of gold near the rims. Great quality and eye appeal for a coin not given a Gem grade. (#7198)
- 1125 1890-CC MS64 PCGS.** Strongly struck with lovely luster. Most of each side is light silver-gray, but a zone of peach toning appears above Liberty's cap. Great visual appeal. (#7198)
- 1126 1890-CC MS64 PCGS.** Lovely luster shines through thin veils of cloud-white patina. The strike is razor-sharp, and there are no singularly mentionable distractions. (#7198)
- 1127 1890-CC MS64 PCGS.** Strongly struck with attractive luster and hints of frostiness on the high points of the devices. A lovely near-Gem without overt abrasions, a great Carson City dollar. (#7198)
- 1128 1890-CC MS64 PCGS.** Crisply detailed with shining surfaces that offer considerable flashiness, though not enough reflectivity for a Prooflike designation. A few minor abrasions on the portrait account for the grade. (#7198)
- 1129 1890-CC MS64 NGC.** A terrific cartwheel sheen travels through the fields of this untuned example. The design elements are crisply struck, including the hair detail above Liberty's ear and the eagle's breast feathers. A luster graze in the left obverse field precludes a Gem grade assessment by NGC. (#7198)

Attractive Gem 1890-CC Silver Dollar

- 1130 1890-CC MS65 PCGS.** This issue is not rare in Gem condition, but, like many of its Carson City counterparts, it is decidedly scarce at this grade level considering its original mintage of 2.3 million pieces. That is not because of poor production standards; it is likely that more coins were released into circulation in the western states than would have occurred with Philadelphia or New Orleans Mint coins. This Gem is well struck and nicely preserved, with just a few shallow marks on Liberty's cheek, and attractive russet-gold toning near the peripheries that increases the coin's overall eye appeal. (#7198)

- 1131 1890-O MS65 PCGS.** This O-mint Gem possesses a radiant sheen and displays just a wisp or two of gold color under high magnification. Sharply struck except for the usual softness in the centers. A few unimportant grade-consistent marks do not detract. Difficult to locate any finer. (#7200)

- 1132 1890-O MS64 Deep Mirror Prooflike PCGS.** Excellent reflectivity with pleasing contrast, particularly on the reverse with its richly frosted eagle. Well-defined with scattered wispy marks in the fields but few significant abrasions. PCGS has graded 17 finer Deep Mirror Prooflike pieces (4/09). (#97201)

- 1133 1890-O MS64 Deep Mirror Prooflike PCGS.** Whispers of orange-gold patina gravitate to the margins of this near-Gem. Deeply mirrored fields accentuate the sharply struck devices. Occasional minor marks preclude Gem status. (#97201)

- 1134 1890-S MS66 PCGS.** Rich plum, rose, and nectarine shadings grace the margins of this immensely lustrous S-mint Morgan dollar, while the centers are minimally toned. A sharply struck Premium Gem with great eye appeal. Conditionally rare any finer; PCGS has graded just six better examples (4/09). (#7202)

Delightful Deep Prooflike Gem 1890-S Dollar

- 1135 1890-S MS65 Deep Prooflike NGC.** At first glance, this coin could be mistaken for a proof, with its pristine fields and intense surface reflectivity. Thickly frosted devices contrast with blinding mirrors. Each side is essentially brilliant, with just a touch of pink-champagne at the rims. Between the Deep Prooflike fields and the lack of abrasions, this is a conditionally rare coin. Census: 6 in 65 Deep Prooflike, 0 finer (4/09). (#97203)

- 1136 1891-CC MS64 NGC. CAC. VAM-3.** A Top 100 Variety. The popular Spitting Eagle variant, offered here as a vibrantly lustrous near-Gem. The crisply struck obverse exhibits rich orange-gold patina, while the contrasting reverse is minimally toned. (#7206)

- 1137 1891-CC MS64 NGC. CAC. VAM-3.** A Top 100 Variety. The so-called Spitting Eagle. One of the most famous and popular VAMs in the entire Morgan dollar series. Visually compelling golden-brown, sky-blue, and purple-rose toning occurs near the obverse and reverse peripheries. A highly lustrous near-Gem with few blemishes on either side. (#7206)

- 1138 1891-CC MS64 PCGS.** Solidly struck and attractive with considerable frostiness on the high points. This pale silver-gray near-Gem shows isolated wispy abrasions, but there are no singularly mentionable marks to report. (#7206)

Lustrous 1891-CC Gem Dollar

- 1139 1891-CC MS65 PCGS.** The 1891-CC is readily available through the near-Gem level, and even Gems can be acquired with some patience and searching. This lustrous MS65 specimen displays traces of light golden-tan color at the obverse periphery. The design elements are generally well struck, including partial detail in the central areas. A few light, grade-consistent grazes are noted. Housed in a green label holder. (#7206)

- 1140 1891-O MS63 Deep Prooflike NGC.** Sharply struck with immensely reflective fields beneath thin veils of intermittent silver-gray. Powerful eye appeal and remarkable condition rarity; this O-mint issue is not known for Deep Prooflike survivors, particularly not with the level of contrast offered here. (#97209)

- 1141 1891-S MS65 PCGS.** An impressively lustrous and colorful Gem. Patchwork gold-orange, rose, and violet shadings dominate the obverse, while the shining reverse shows only splashes of canary-yellow, orange, and lavender toning around a minimally patinated center. (#7210)

- 1142 1891-S MS64 Deep Prooflike NGC.** Sharply struck with considerable frostiness on the central devices. The silver-white fields are deeply mirrored, if not entirely smooth. Scattered light marks account for the grade. Census: 37 in 64 Deep Prooflike, 5 finer (4/09). (#97211)

- 1143 1892-CC MS63 PCGS.** Though the centers show a degree of striking softness, the pale silver-gray surfaces are immensely lustrous and contribute to the coin's strong eye appeal. The obverse is well-preserved but the reverse shows an abrasion on the eagle's breast. (#7214)

- 1144 1892-CC MS63 PCGS.** Lightly frosted devices are highlighted by semiprooflike fields. Nicely struck throughout. A few light grazes limit the grade. (#7214)

- 1145 1892-CC MS63 PCGS.** A softly struck but pleasingly lustrous piece, silver-gray in the centers with striking peripheral toning. Blue, violet, and reddish-orange shadings appear on the obverse, while the reverse shows the last color and a touch of gold. (#7214)

- 1146 1892-CC MS64 PCGS.** Crisply detailed with strong and pleasing luster. The pale silver surfaces show occasional touches of gold color close to the rims. Minimally marked for the grade. (#7214)

- 1147 1892-CC MS64 PCGS.** Pleasingly detailed with vibrant cartwheel luster and considerable frostiness on the central devices. Occasional glimpses of cloud-gray toning do not dampen the eye appeal of this remarkable near-Gem. The 1892-CC, like other post-1885 Carson City Morgan dollar issues, had low representation in the GSA sales. (#7214)

Notable Gem 1892-CC Dollar

- 1148 1892-CC MS65 PCGS.** As a later date among Carson City Morgan dollars, the 1892-CC was little-represented in the GSA holdings, and high-grade survivors are elusive. Anything finer than this Gem is a condition rarity. The boldly impressed design elements are wonderfully frosted, and the fields have strong luster beneath gold-gray toning that yields to violet and blue-green near the rims. (#7214)

Radiant 1892-CC Gem Dollar

- 1149 1892-CC MS65 PCGS.** This untoned Gem exhibits well struck design elements and radiantly lustrous surfaces. The few light grazes scattered about are within the parameters of the grade designation. David Bowers (2005) writes that "year in and year out this coin has been in great demand." Difficult to acquire any finer. (#7214)

Shimmering MS65 1892-O Silver Dollar

- 1150 1892-O MS65 NGC.** Wisps of almond-gold toning grace this attractively preserved Gem. Potent luster shimmers throughout the undisturbed surfaces. The obverse center has traces of mint-made roller marks, uneffaced by the usual New Orleans strike. An important conditional rarity from a difficult year to collect in Mint State. Census: 71 in 65, 4 finer (4/09). (#7216)

Lovely Gem 1892-O Silver Dollar

- 1151 1892-O MS65 NGC.** Delicate caramel-gold toning visits this thoroughly lustrous and beautifully preserved better-date Gem. The centers show moderate softness, as usual for O-mint issues of the era. The peak of the 2 is lightly repunched. The 1892-O is plentiful in VF and available in typical Mint State, but in MS65 it is rarer than the low-mintage 1893. Census: 71 in 65, 4 finer (4/09). (#7216)

Dazzling 1892-O Dollar, MS65

- 1152 1892-O MS65 NGC.** Dazzling luster emanates from both sides of this O-mint representative, each of which displays a few whispers of golden-tan color. The design elements are better struck than typically seen for the issue, though the centers still reveal some softness. Roller marks are visible on the central devices. (#7216)
- 1153 1892-S AU53 NGC.** Untoned with traces of luster in the recesses and revealing just a few minor surface and rim marks. The design features exhibit nice detail. What appear to be small specks of glue are visible in the right obverse field. (#7218)
- 1154 1892-S—Cleaned—ICG. AU58 Details.** Whispers of barely discernible light tan-gold color reside on lightly cleaned surfaces that retain a fair amount of luster. Except for the central areas, sharp detail is apparent on the design elements. A few minor circulation marks are visible. A difficult date to obtain in Mint State. (#7218)

Near-Mint 1892-S Morgan Dollar

- 1155 1892-S AU58 NGC.** An attractive and lustrous example of this semikey issue. The 1892-S is relatively plentiful in lower circulated grades, indicating that much of the mintage entered commerce at the time they were struck. Since high grade pieces, especially near-Mint or Mint State examples, are rare, there were probably no hoards of the date. This piece has pleasing silver-gray surfaces with only a few trivial marks. (#7218)

1156 1893 MS63 PCGS. Wisps of russet visit the peripheries of the lustrous surfaces of this Select Morgan, and are slightly deeper in hue on the obverse. Generally well struck, and revealing a few minor grade-defining marks. (#7220)

1157 1893 MS64 PCGS. Aside from trifling softness at the hair over Liberty's ear, this near-Gem is crisply struck. Its vibrantly lustrous surfaces show intermittent silver-gray patina. (#7220)

Enticing Gem 1893 Morgan Dollar

1158 1893 MS65 PCGS. The low mintage of the 1893 dollar makes it enticing to collectors, particularly in Gem Mint State. This lustrous and faintly toned example has a crisp strike and a well preserved obverse. Moderate contact is present on the eagle's breast and on the field above the arrows. A small reverse rim nick at 1 o'clock merits only passing mention. Liberty's profile is lightly die doubled, and the peak of the 3 is recut. PCGS has only certified three finer pieces (4/09). (#7220)

Low Mintage MS65 1893 Morgan

1159 1893 MS65 NGC. Among the lowest mintage Philadelphia issues, the 1893 is also essentially unobtainable above the MS65 level. This is a nicely struck Gem with blazing luster and exceptionally clean surfaces. A wonderful addition to a high quality collection of this perennially popular series. (#7220)

Lustrous 1893 Gem Dollar

1160 1893 MS65 NGC. Peripheral gold-orange, electric-blue, and purple toning is deeper and more extensive on the obverse of this lustrous Gem. Generally well struck save for the usual softness in the centers. A few minor marks likely preclude an even finer grade. Extremely difficult to obtain any finer. Census: 74 in 65, 3 finer (4/09). (#7220)

Gem 1893 Morgan Silver Dollar

1161 1893 MS65 PCGS. CAC. A frosty Gem, this 1893 Morgan dollar has full silver brilliance on both sides, with partial peripheral patina. A scarce low mintage issue, the 1893 garners considerable attention due in part to the fame of its branch mint cousins. It is the logical choice for the collector who seeks a single 1893 Morgan dollar for a date set. PCGS has only certified three finer examples of this issue (4/09). (#7220)

Lovely 1893 Dollar, MS65

1162 1893 MS65 NGC. The year 1893 is remarkable insofar as all four of the Morgan dollar issues bearing this date—including emissions from the mints in Philadelphia, Carson City, San Francisco, and New Orleans—are semikeys or better in the series. This lovely Gem example from the Philadelphia Mint is well struck and untuned, with shimmering mint frost over both sides and minimal marks, as expected for the grade. Census: 73 in 65, 3 finer (4/09). (#7220)

Vibrant MS62 1893-CC Dollar

1163 1893-CC MS62 NGC. Ex: Richmond Collection. An incredibly lustrous piece, well-defined and minimally toned with just a hint of pink over parts of the fields. Though scattered wispy abrasions and a number of ticks preclude Select status, the overall eye appeal is high for the grade assigned. An eminently collectible example of this final Carson City Morgan dollar issue. (#7222)

Attractive MS62 1893-CC Dollar

- 1164 1893-CC MS62 PCGS.** Attentively struck with particularly strong definition on the eagle's breast. Light silver-gray centers give way to faint golden elements close to the rims. Despite a number of scattered marks, this final-year Carson City dollar offers better eye appeal than the MS62 designation might suggest. (#7222)

Exceptional 1893-CC Dollar, MS63

- 1165 1893-CC MS63 PCGS.** The 1893-CC dollar is usually weakly struck and heavily bagmarked. The Select offering presented here is a refreshing exception. The design features are well impressed, with good detail in the hair over Liberty's ear and on the eagle's breast feathers. Moreover, the grade-defining marks on Liberty's cheek and neck mostly take the form of light grazes. Lustrous surfaces are essentially untoned. (#7222)

Desired Select 1893-CC Morgan Dollar

- 1166 1893-CC MS63 PCGS.** The reverse is brilliant, while the obverse alternates between slate-gray and blended forest-green and plum-mauve. Pleasing luster bathes this semi-key Carson City dollar, which is surprisingly unabraded save for a tick on the chin. Slight striking bluntness at the centers, usual for the issue. (#7222)

Notable 1893-CC Dollar, MS64

- 1167 1893-CC MS64 PCGS.** Bright luster exudes from the untuned surfaces of this near-Gem, and the design features are sharply defined. This is a significant attribute of this particular piece, as many specimens are weakly struck. Minor obverse marks prevent Gem status. Highly desirable as the last of the Carson City dollars. (#7222)

Popular Choice 1893-CC Morgan

- 1168 1893-CC MS64 PCGS.** The swan song of the Carson City Mint, the 1893-CC Morgans were unfortunately mostly bagmarked from being tossed around roughly. This piece shows few such abrasions, although the cheek displays minor contact beneath the dappled tan-gray patina. PCGS has certified only nine pieces finer—eight in MS65, one in MS66 (4/09). (#7222)

Low Mintage 1893-O Select Dollar

- 1169 1893-O MS63 PCGS.** Semiprooflike fields establish modest variance with the well struck devices. Orange-gold, purple, and electric-blue patina concentrates at the obverse margins, while splashes of light gold and violet visit the reverse. A handful of minute marks limit the grade. From a low mintage of 300,000 pieces. (#7224)

Attractive, Lustrous 1893-O Dollar, MS64

- 1170 1893-O MS64 PCGS. CAC.** As in San Francisco, the New Orleans Mint coined silver dollars dated 1893 only in January of that year. The mintage of 300,000 pieces experienced considerable attrition, with few examples surviving unscathed. Q. David Bowers, in his *A Guide Book of Morgan Silver Dollars*, is unusually direct about the issue, starting its entry with the following sentence: "If you like a challenge, the 1893-O presents one."

Many Mint State 1893-O dollars suffer from weak strikes and dull luster. While this rose-tinged silver-white coin shows a degree of high point softness, its luster is uncommonly strong, and the overall visual appeal is impressive. Liberty's cheek is clean, and the surfaces show more luster grazes than actual contact marks. Anything finer is highly elusive; PCGS has graded only seven such pieces (4/09).(#7224)

- 1171 1893-S AG3 NGC.** Though heavily worn, this key-date Morgan dollar shows a clear date and mintmark. Despite this, the rim and fields are merged. Silver-gray with a small rim bump above the L in PLURIBUS on the obverse.(#7226)

Desirable Very Good 1893-S Dollar

- 1172 1893-S VG8 ANACS.** Deep slate-blue and dusky cloud-gray toning dominates this well-worn but minimally marked key-date dollar. The eye appeal is excellent for the grade. While the 1893-S has the highest availability in VF, lesser-graded examples such as this VG coin also serve an important role in many collections.(#7226)

1893-S Morgan Dollar, VG Details

- 1173 1893-S—Damaged—NCS. VG Details.** A handful of small attempted puncture marks are noted on the reverse, appearing close to the eagle's head, on the upper right (facing) wing, and just below the E in STATES. This is apparently the damage that the NCS holder alludes to. Otherwise, the surfaces exhibit a uniform layer of brownish-gray coloration and good design detail for the VG Details grade level. An affordable example of the prime key date in the Morgan dollar series.(#7226)

Appealing Fine 15 1893-S Dollar

- 1174 1893-S Fine 15 ANACS.** An appealing representative that falls just below the VF median for this key issue. The obverse shows a mixture of gold-gray and silver-blue color; on the reverse, the toning deepens and the contrast between the hues becomes more stark. Modestly abraded with strong visual appeal. (#7226)

Popular VF 1893-S Dollar

- 1175 1893-S VF20 PCGS.** Traditionally, VF is the condition in which a plurality of 1893-S dollars are found. By VF20 standards, this is a well-preserved piece, with above-average detail remaining for a VF example and few significant abrasions. A mix of olive-gold and silver-gray toning embraces each side. (#7226)

Important Choice AU 1893-S Morgan Dollar

- 1176 1893-S AU55 PCGS.** The rarity and importance of the 1893-S issue is well known to Morgan dollar collectors. Jeff Garrett and Ron Guth chose to include the '93-S as entry number 83 in their book on the *100 Greatest U.S. Coins*, wherein they included the following comments: "The 1893-S Silver Dollar has the lowest mintage of any of the Morgan Dollars issued between 1878 and 1921, making it one of the rarest and most valuable coins in the series. In fact, the 1893-S Silver Dollar is the most valuable of any of the dates made for circulation." This Choice AU example is particularly attractive for the grade, with mostly unmarked surfaces that show a uniform layer of rose-gray patina across each side. Boldly struck and lightly worn from brief circulation, with significant glints of original luster still evident near the devices." Population: 24 in 55, 43 finer (3/09). (#7226)

Desirable 1893-S Morgan Dollar, AU55
Coveted Key to the Series

- 1177 1893-S AU55 NGC.** New information about the 1893-S, always considered the key date in the Morgan dollar series, has further cemented the issue's status as the least available coin in the series. In *A Guide Book of Morgan Silver Dollars*, third edition, Q. David Bowers reports an initial mintage of 77,000 pieces for the 1893-S. This figure has been revised downward from the long-accepted total of 100,000 coins. The new, lower figure does not surprise Morgan dollar collectors, who have long been aware of the rarity and desirability of this date.

The present coin is a completely original specimen, with light gray surfaces and just a touch of peripheral color. Significant traces of mint luster remain around the protected areas. The only mark of note is located on the reverse field, below OD in GOD. Census: 22 in 55, 39 finer (4/09). (#7226)

- 1178 1894 AU58 NGC.** Just a touch of rub is visible on this lustrous Philadelphia Morgan dollar. Minimally abraded on the reverse, though two significant marks are noted on the portrait. (#7228)
- 1179 1894 AU58 NGC.** Gold-orange in the fields with lustrous silver-gray centers. Though the hair over Liberty's ear shows appreciable striking weakness, there is only a touch of actual wear. (#7228)

Low Mintage 1894 Dollar, MS61

- 1180 1894 MS61 NGC.** A well executed strike imparts strong delineation to the design elements of this popular Philadelphia Mint representative. Luminous surfaces display a satinlike texture and reveal a scattering of minute surface and rim marks. Mint State coins are mostly in the lower ranges, through MS62 (Bowers, 2005). (#7228)

Pleasing MS61 1894 Morgan Dollar

- 1181 1894 MS61 PCGS.** Light chestnut toning enriches this lustrous and minimally bagmarked rare date dollar. There is no sign of friction on the eagle's breast or on the hair above the ear. Only the 1893-S and 1895 have a lower business strike mintage than the 1894, which is widely pursued by collectors in any condition. (#7228)

Challenging 1894 Morgan Dollar, MS62

- 1182 1894 MS62 NGC.** An impressive Mint State example of the scarce 1894 Morgan, this piece should garner considerable bidding interest at the sale. It has lovely satin surfaces with brilliant silver luster and bold design features. With a mintage of only 110,000, it is the lowest-production Philadelphia Mint business strike Morgan dollar. (#7228)

Scarce 1894 Morgan Dollar, MS62

- 1183 1894 MS62 PCGS.** This untuned example shows above-average definition, but high point detailing is less than complete. The mint luster is superior, especially for the grade, but numerous small abrasions pepper the surfaces, accounting for the MS62 grade. The 1894 has an impressively low mintage of only 110,000 pieces. (#7228)

Elusive 1894 Dollar, MS63

- 1184 1894 MS63 NGC.** A wonderful piece with frosty mint luster and slight champagne toning. The Morgan dollar aficionado will want to consider this example carefully, as similar pieces are seldom available in the numismatic arena. The mintage of just 110,000 coins easily explains its elusive nature. (#7228)

Pleasing Select 1894 Morgan Dollar

- 1185 1894 MS63 PCGS.** Scintillating luster sweeps the pleasantly bagmark-free surfaces of the present Select key date dollar. The centers show only a hint of incompleteness, but the remainder of the strike is exemplary. Among Philly issues, only the ephemeral 1895 has a lower business strike production. (#7228)

Desirable 1894 Dollar, MS64

- 1186 1894 MS64 NGC.** This low-mintage issue (110,000 circulation strikes) is one of the key dates from the Philadelphia Mint. Glowing luster exudes from both sides of this near-Gem, each of which exhibits relatively well struck design features. Essentially untuned surfaces reveal a few light marks that preclude Gem status. NGC has seen a mere four finer examples (4/09). (#7228)

- 1187 1894-O MS62 PCGS.** Soft luster resides on both sides of this O-mint representative, each of which displays a couple of splashes of tan patina. The centers are weak, which is typical of this chronically poorly struck issue. Minute contact marks occur over the obverse. (#7230)

- 1188 1894-O MS62 PCGS.** Whispers of peripheral lemon coloration are slightly deeper and more extensive on the reverse. Well struck except for the usual softness in the centers. Minute obverse marks limit the grade. (#7230)

- 1189 1894-S MS62 PCGS.** Soft luster resides on both sides of this S-mint representative. Hints of light gold color gravitate to the margins, especially on the obverse. The design elements are generally well struck. (#7232)

- 1190 1894-S MS64 PCGS.** An appealing specimen for the Choice Uncirculated grade level, by virtue of its intense mint luster and essentially untuned appearance. A few small marks and luster grazes preclude a finer grade assessment. The centers are softly struck on both sides. (#7232)

Important Gem 1894-S Morgan

- 1191 1894-S MS65 NGC.** A richly frosted Gem with vivacious cartwheel luster throughout the dappled toning. The obverse is silver-gray with orange-gold swaths, while the reverse has powder-blue fields and sun-gold margins. A few small abrasions are well concealed by the toning and the strike is sharp over all features, save for the central high points. Census: 39 in 65, 8 finer (4/09). Ex: Long Beach Signature (Heritage, 2/2003), lot 7522. (#7232)

Appealing Near-Mint 1895-O Morgan Dollar

- 1192 1895-O AU58 NGC.** Well-defined with immense luster gracing the gold-kissed silver-gray surfaces. Scattered wispy abrasions are present in the fields, but the only wear is a touch of rub visible on the highest design elements. Great eye appeal for this popular New Orleans date with a low mintage. (#7236)

Notable AU58 1895-O Dollar

- 1193 1895-O AU58 PCGS. CAC.** Only a slight trace of wear on the high points of the obverse separates this lovely coin from a full Mint State grade. It has brilliant silver surfaces with frosty luster and only a slight number of tiny surface marks, certainly less than usual. A highly desirable example that seems destined for an excellent Morgan dollar collection. (#7236)

**Near-Mint 1895-S Silver Dollar
VAM-3, S Over Tilted S, Hot 50**

- 1194 1895-S AU58 NGC. VAM-3. A Hot 50 Variety.** The mintmark was initially entered at an awkward, tilted angle, to the left of its proper position. This variety is one of two premium 1895-S VAMs; the other is the VAM-4 S Over Horizontal S. Of course, any 1895-S is desirable in AU58, as it is a low-mintage issue. This piece is lustrous and lightly toned, with attractive surfaces and minor central incompleteness of strike. (#7238)

Sharp, Lustrous 1895-S Select Dollar

- 1195 1895-S MS63 NGC.** Splashes of peripheral golden-tan, reddish-gold, and sky-blue patina are more prevalent and deeper in shade on the reverse of this lustrous Select specimen. The strike is sharp, save for minor softness in the obverse center. Minute marks limit the grade, but they are less extensive and severe than ordinarily encountered on this issue. (#7238)

Flashy Select 1895-S Dollar

- 1196 1895-S MS63 PCGS.** A flashy Select low mintage silver dollar that appears brilliant at first glance, but has occasional wisps of golden-tan toning. No marks merit singular mention, and the eye appeal is impressive. A good strike with only slight softness at the centers. The 1895-S is the key to a date set of Morgan dollars. (#7238)

Impressive MS64 1895-S Dollar

- 1197 1895-S MS64 PCGS.** The strike is boldly defined and the surfaces show frosty silver luster with excellent overall appearance. This near-Gem is a highly desirable coin in a popular grade. MS64 is the finest level that an 1895-S can be found with comparative ease. PCGS has only graded 29 finer examples (4/09) of this issue, so for those who desire strict Gem quality, the search may be long and difficult. (#7238)

Shimmering 1895-S Morgan, MS64

- 1198 1895-S MS64 PCGS.** Three mints coined Morgan dollars in 1895, but only proofs were coined in Philadelphia. For those collectors who desire just one Morgan from each year of issue, the 1895-O is best in circulated grades, and the 1895-S is best in Mint State grades. This Choice example has frosty luster with a trace of light golden toning at the right obverse border. PCGS has only certified 29 finer pieces (4/09).(#7238)

Pursued Choice 1895-S Dollar

- 1199 1895-S MS64 NGC.** A flashy and attractively preserved representative of this low mintage San Francisco emission. The cheek displays delicate golden patina, although the remainder of the coin is only minimally toned. Faint marks on the portrait limit the grade. Just 13 pieces are certified finer by NGC (4/09).(#7238)

Semiprooflike Gem 1895-S Morgan Dollar

- 1200 1895-S MS65 NGC.** This is a special coin. Most examples of this issue show extensive bagmarks and other abrasions, but this is a relatively mark-free Gem, aside from the usual quota of small abrasions. More importantly, however, this piece has rather unusual surfaces. The typical 1895-S, like many of its predecessors, shows thick mint frost that liberally coats the devices. Not so this piece: The surfaces are brilliant and semiprooflike, in that regard more like a Mint State 1893-S, many of which also show some prooflikeness. The strike is excellent, as usually seen on the 1895-S. Of course, in Gem condition any 1895-S is an elusive and popular rarity. NGC has certified only 10 pieces at this level, with a mere three finer (4/09).(#7238)

Superb Gem 1896 Morgan Dollar

- 1201 1896 MS67 NGC.** This lustrous, frosty stone-white Superb Gem offers an excellent strike and equal surface quality. Though this issue of nearly 10 million pieces is readily available in most Mint State grades, MS67 pieces are scarce. None finer appear in the combined certified population data (4/09).(#7240)

- 1202 1896-O MS61 PCGS.** The lustrous surfaces of this O-mint representative display hints of peripheral tan-gold color, joined by splashes of deeper gold on the eagle. The design elements are well brought up. A few minute contacts and grazes limit the grade. (#7242)
- 1203 1896-O MS62 PCGS.** Warm golden overtones grace the margins, while the centers have intermittent milky toning over otherwise silver-gray surfaces. Well struck for the issue with only a few wispy abrasions precluding Select status. (#7242)
- 1204 1896-O MS62 PCGS.** A scarcer issue in high grades, this dollar has the typical slightly soft O-mint strike. Though the color is essentially white, a touch of russet-gray occurs on the obverse of this amply lustrous piece. A few small obverse marks are noted. (#7242)
- 1205 1896-S MS61 PCGS.** Faint reddish-tan and gray-blue speckles visit the margins of this luminous Morgan, and a well directed strike leaves strong definition on the design features. Light obverse grazes barely preclude the next highest grade. (#7244)

Bold, Flashy MS63 1896-S Dollar

- 1206 1896-S MS63 PCGS.** Bright and flashy, with amazing cartwheel luster in the fields and essentially brilliant silver-white surfaces that show a small amount of orange-gold color on the reverse. Boldly struck with a mildly scuffy appearance on the obverse that limits the grade. A generally appealing Select Uncirculated example of this somewhat scarce San Francisco Mint Morgan dollar. (#7244)

Scarce 1896-S Morgan Dollar, MS64

- 1207 1896-S MS64 NGC.** According to Wayne Miller, the 1896-S Morgan dollar is very scarce in Uncirculated condition, despite a high mintage of 5 million pieces. This near-Gem example is well struck and lustrous, with smoky plum-gray toning in the fields and light golden accents at the peripheries. A couple of small milling marks on Liberty's portrait limit the grade. NGC has only certified 24 finer examples (4/09). (#7244)
- 1208 1897-O MS62 PCGS.** Lemon-yellow peripheral patina is slightly deeper in hue on the obverse of this O-mint representative. Well struck save for the usual softness in the centers. Lustrous surfaces reveal grade-limiting marks on the upper reverse. (#7248)

Exceptional 1897-O Dollar, MS63

- 1209 1897-O MS63 PCGS.** David Bowers (2005) writes that the 1897-O is a "cherry-picker's dream" because most are poorly struck with subpar luster. This Select example, while not quite full, exhibits above-average definition, including partial detail at the hair over Liberty's ear and on the breast feathers. Its surfaces yield pleasing luster and whispers of light golden-tan color. The only noteworthy blemishes are some small bright marks to the right of the last reverse star. Nevertheless, an exceptional representative of this typically poorly made issue. (#7248)

Rare 1897-O Morgan, MS61 Deep Prooflike

- 1210 1897-O MS61 Deep Mirror Prooflike NGC.** NGC and PCGS see few 1897-O Deep Mirror Prooflike coins. The current MS61 coin displays excellent field-motif contrast and is sharply struck, including the central areas, which are usually weak on this date. Untoned surfaces possess several light marks and grazes, accounting for the grade. Census: 2 in 61 Deep Prooflike, 6 finer (4/09). (#97249)
- 1211 1898-O MS67 NGC.** Boldly impressed in the centers with warm and inviting luster. Minimally toned save for hints of green-gold at the rims and in the reverse fields. NGC has graded just one finer example (4/09). (#7254)
- 1212 1898-O MS67 Prooflike NGC.** Nearly bereft of toning, and the smooth, flashy fields provide exemplary eye appeal. The strike is above average. The 1898-O is plentiful in Uncirculated grades, but prooflike pieces are scarce and almost never seen in the present outstanding condition. Census: 3 in 67 Prooflike, 0 finer (4/09). (#7255)
- 1213 1898-S MS65 NGC.** The majority of Mint State survivors from this scarcer San Francisco Mint issue came from the famous Redfield Hoard. This Gem example displays scintillating cartwheel luster in the fields, and essentially untoned surfaces that reveal a slight degree of gold color near the center of the reverse. (#7256)

Wonderful MS66 1898-S Dollar

- 1214 1898-S MS66 PCGS.** Well-defined with bright silver-white luster. This delightfully well-preserved Premium Gem offers noteworthy eye appeal. Despite a mintage of over 4.1 million pieces, the 1898-S is a borderline condition rarity in MS66 and is nearly unavailable any finer; PCGS has graded only three coins in the latter state (4/09). (#7256)

Rare Superb Gem 1898-S Morgan Dollar

- 1215 1898-S MS67 PCGS.** This is a simply gorgeous specimen, with fully struck design elements and splendid, coruscating luster across both sides. Lovely champagne-rose toning adorns the peripheries, leaving the silver-gray centers essentially untuned. Expertly preserved, seemingly since immediately after leaving the dies, this piece shows none of the usual bagmarks or tiny chatter marks that are common to Uncirculated Morgan dollars. The 1898-S is a common date, readily available at lower grades of Mint State, but Superb Gems are rare. Population: 2 in 67, 1 finer (4/09). (#7256)

- 1216 1899-O MS67 PCGS.** Dazzling luster exudes from the color-free surfaces of this Superb Gem, and the design features are well impressed. A few small marks are visible on the obverse portrait. Population: 86 in 67, 1 finer (3/09). (#7260)
- 1217 1899-S MS65 PCGS.** A few wisps of light tan color appear under magnification. Radiantly lustrous, well struck, and nicely preserved. (#7262)
- 1218 1899-S MS65 PCGS. CAC.** Hints of silver-gray patina drape shining fields with strong cartwheels. Aside from a touch of softness at the hair over Liberty's ear, this is a well-defined Gem. (#7262)

Lustrous Superb Gem 1900 Morgan

- 1219 1900 MS67 NGC.** Delicate almond-gold toning denies full brilliance, but the vibrant luster and splendidly smooth fields ensure the eye appeal. The face has only faint grazes, and the strike leaves only slight incompleteness at the centers. The 1900 is plentiful in typical Mint State, but Superb Gems are decidedly rare. Census: 34 in 67, 0 finer (4/09). (#7264)

Radiant 1900-O/CC Dollar, MS66 Early Die State VAM-8

- 1220 1900-O/CC MS66 PCGS. VAM-8.** A Top 100 Variety. This early die state lacks the die chip in the upper loop of the G in GOD. Radiantly lustrous untuned surfaces exhibit sharply struck design elements. A few minor grazes might preclude an even higher grade. Housed in a green label holder. (#7268)
- 1221 1901 MS61 NGC.** This piece has satiny luster that is quite attractive. There are a few small abrasions that account for the grade, and each side shows just a bit of scattered golden-brown and red-brown patina. A scarce Mint State example of this important, key date Morgan dollar. (#7272)
- 1222 1901 MS61 ICG.** An essentially brilliant example of this famous conditional rarity. Lustrous and only lightly abraded, with just a hint of striking incompleteness at the centers. The eye appeal is excellent for the MS61 level. (#7272)

Desirable Select 1901 Morgan

1223 1901 MS63 NGC. Lustrous and only minimally abraded, with a sharp strike aside from minor blending on the eagle's breast. A noted conditional rarity, nearly unaffordable any finer despite a mintage of close to 7 million pieces.
Ex: Central States Signature (Heritage, 5/2004), lot 8762. (#7272)

1224 1901-S MS62 ICG. Luminous surfaces exhibit well struck devices and show just an occasional hint of barely discernible tan color. Light marks are visible on the obverse. (#7276)

1225 1901-S MS65 NGC. This untoned Gem displays partially prooflike fields that offer modest variance with the devices. The strike is quite sharp, evidenced by good detail in the hair above Liberty's ear. A few grade-consistent marks are not bothersome. David Bowers (2005) writes that the 1901-S is the most elusive San Francisco Mint dollar since 1896. (#7276)

1226 1901-S MS65 NGC. The highly lustrous surfaces of this Gem display just a whisper of light tan-gold color. The design elements are well struck, including partial detail in the hair over Liberty's ear. A few grade-consistent marks do not disturb. Scarce in MS65, and rare any finer. Census: 86 in 65, 7 finer (4/09). (#7276)

Distinctive MS64 Prooflike 1902 Dollar

1227 1902 MS64 Prooflike PCGS. Both sides show distinct reflectivity, though as is often the case for Prooflikes of later issues, contrast is minimal. This coin is well-defined with hints of lemon-gold toning near the rims and silver-white color elsewhere. A great Prooflike near-Gem from an issue rarely found with such surfaces. Population: 23 in 64 Prooflike, 20 finer (4/09). (#7279)

1228 1902-S MS65 NGC. Boldly struck with light champagne-gray toning and a few minor marks on each side. Satiny and highly lustrous. Die striations are evident on the right half of the reverse. A scarcer San Francisco Mint issue at the Gem grade level. (#7282)

Brilliant 1903 MS67 Dollar

1229 1903 MS67 NGC. Brilliant and untuned with a near-full impression and no singularly mentionable imperfections. A striking dollar with frosty fields and a sparkling appearance. Quite rare in this elevated condition, with only two pieces certified finer by NGC and PCGS combined (4/09). (#7284)

1230 1903-O MS65 Prooflike PCGS. The 1903-O is famous for its one-time rarity, which ended suddenly with the release of long-held Treasury bags in the early 1960s. Brilliant and boldly impressed with flashy fields and a well preserved reverse. Encapsulated in an old green label holder. Population: 16 in 65 Prooflike, 3 finer (4/09). (#7287)

Vibrant 1903-S Morgan, MS63

1231 1903-S MS63 PCGS. Precisely struck and lustrous with only a hint of golden toning. The obverse field is smooth, although the cheek has scattered minute marks. The reverse is clean save for an inconspicuous mark concealed on the lower wreath. All S-mint dollars from this decade are challenging in Mint State, but the 1903-S is particularly coveted. (#7288)

Elusive 1903-S Morgan, MS64

1232 1903-S MS64 NGC. All of the San Francisco Mint Morgan dollars coined during the first decade of the 20th century are scarce or rare, the 1903-S and 1904-S issues rarer than the others. This lovely example has nearly full brilliance with only a faint trace of delicate toning on each side. (#7288)

1233 1903-S Small S XF40 ANACS. VAM-2. A Top 100 Variety. A lightly circulated but thoroughly pleasing representative of this popular "micromintmark" variety. Silver-gray color dominates with gold-orange elements present at parts of the rims. (#7306)

Lovely MS65 1904 Dollar

- 1234 1904 MS65 PCGS.** An extremely important date, the last of the pre-1921 Philadelphia Morgan dollars and an issue that is conditionally rare any finer; PCGS has certified only 14 such pieces (4/09). This Gem has largely brilliant and highly lustrous silver-white surfaces with just a hint of golden patina in the obverse fields. (#7290)

Appealing 1904-O Dollar, MS67 Prooflike

- 1235 1904-O MS67 Prooflike NGC.** An extraordinary Superb Gem with prooflike surfaces, and extremely rare as such. In fact, few have been certified so fine, and none any finer. This piece is entirely brilliant with untoned silver surfaces, sharp design details, satiny luster, and amazing eye appeal. Census: 3 in 67 Prooflike, 0 finer (4/09). (#7293)

Bright 1904-S MS62 Dollar

- 1236 1904-S MS62 PCGS.** The bright surfaces of this S-mint representative are untoned and exhibit well struck design features, except for minor weakness in the centers. The most notable grazes are located on Liberty's cheek and neck. About 2 million examples of the 2.304 million-piece mintage were probably melted. (#7294)

Elusive Choice 1904-S Dollar

- 1237 1904-S MS64 PCGS.** A virtually brilliant near-Gem that boasts dynamic luster and impeccably smooth surfaces. Only the eagle's breast and the hair above the ear lack an intricate strike. After 1904, hubs for the Morgan dollar design were destroyed, since hundreds of millions of silver dollars reposed in Treasury vaults and the denomination was considered finished. For its 1921 revival, new hubs had to be created by the designer of the series, George T. Morgan, who by then was the Mint's chief engraver. (#7294)

PROOF MORGAN DOLLARS

- 1238 1878 8TF PR60 PCGS.** VAM-14.8. Well-defined with a mix of silver-gray and orange patina. Though a number of hairlines and a handful of contact marks are present in the fields, there is no evidence of rub on the high points. (#7311)

Impeccable 1878 8 Tailfeathers Dollar, PR66 Cameo

- 1239 1878 8TF PR66 Cameo NGC.** VAM-14.8. Blunt upper beak. The key diagnostic here is the doubled spike in front of Liberty's eye and the string of small die chips below it. David Bowers writes in his *Silver Dollars and Trade Dollars of the United States*: "Probably 300 to 500 1878 8 TF Proof dollars were minted. The number is not known, and estimates have ranged from about 250 upwards. Today, Proofs are rare."

NGC and PCGS have certified a couple of hundred or so 1878 8 Tailfeather proof dollars, only about 35 of which are designated Cameos. This Premium Gem Cameo displays whispers of barely discernible gold color at the margins. The design elements are well brought up, including the hair over Liberty's ear and the eagle's breast feathers. Impeccably preserved surfaces reveal just a few minor ticks on the cheek. Light roller marks are visible on the chin. Census: 9 in 66 Cameo, 5 finer (4/09). (#87311)

- 1240 1880 PR63 PCGS.** This charming proof type coin has dusky sun-gold toning that deepens slightly on the cheek and borders. A good strike with only minor incompleteness on the hair above the ear. A few faint field hairlines are of little consequence. (#7315)

- 1241 1880 PR62 Cameo PCGS.** An appealing proof specimen from the Philadelphia Mint, with the expected crispness of striking detail and watery, mildly reflective fields. The devices are lightly frosted, creating a modest cameo effect on both sides. (#87315)

Spectacular 1884 Morgan Dollar, PR67 Cameo

- 1242 1884 PR67 Cameo NGC.** The white-on-black contrast is obvious and seamless. This essentially brilliant Superb Gem is void of hairlines. The strike is exquisite, even on the curls above Liberty's ear, which are sometimes blunt on proofs. Perusal beneath a loupe fails to locate any grade-limiting marks or spots. The appearance is the same today as when the piece fell from the dies 125 years ago. Although business strike production exceeded 14 million pieces, just 875 proofs were issued, and most cluster in the PR62 to PR65 grades. Census: 8 in 67 Cameo, 2 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#87319)

Sharp 1886 Dollar, PR66

- 1243 1886 PR66 NGC.** The Morgan dollar saw a production of 886 proofs in 1886. Both sides of this Premium Gem proof display relatively strong field-device contrast, with each showing nearly imperceptible peripheral gold color. A powerful strike leaves crisp delineation on the design elements. Some minute carbon flecks are visible on the lower obverse and reverse. Census: 27 in 66, 9 finer (4/09). (#7321)

Deeply Mirrored 1888 Dollar, PR64 Cameo

- 1244 1888 PR64 Cameo PCGS.** Breen-5600, "Very rare." The 18 in the date is clearly recut. Pale golden patina is seen over each side, but the general impression is of a brilliant coin. The centers are almost completely struck, and this specimen is attractively preserved with irrefutable white-on-black contrast. A mere 832 proofs were struck. (#87323)

Flashy PR66 1889 Morgan Dollar

- 1245 1889 PR66 NGC.** The luminous surfaces of this Premium Gem proof display faint wisps of tan-gold color and are impeccably preserved (a few obverse "hairlines" are on the holder, not the coin). A solid strike completes the design features. Impressive overall eye appeal. Census: 17 in 66, 7 finer (4/09). (#7324)

Bold 1890 Morgan Dollar, PR65

- 1246 1890 PR65 PCGS.** A lovely Gem with deep violet, blue, green, and iridescent toning on the obverse, masking the contrast created through mirrored fields and lustrous devices. The boldly detailed reverse also exhibits nice contrast beneath delicate rose, blue, and iridescent toning. Population: 18 in 65, 21 finer (4/09). (#7325)

- 1247 1891 PR62 PCGS.** The green-gold and periwinkle toning that dominates the obverse is more dusky on the reverse. A trifle softly struck at the hair over the ear, as is often the case for this year's proofs, with scattered hairlines and a handful of contact marks. (#7326)

- 1248 1892 PR61 PCGS.** Primarily gold-gray and claret, the latter color dominant at the margins. Well-impressed for a proof of its year, though each side shows a number of hairlines and a handful of scattered contact marks. (#7327)

- 1249 1892 PR62 ANACS.** Boldly struck with a chromelike gleam and minimal contrast. Occasional milk-spots are present in the fields, as are scattered hairlines. (#7327)

Appealing 1892 Dollar, PR65

- 1250 1892 PR65 NGC.** The Morgan dollar saw a fairly high mintage of 1,245 proofs in 1892. The reflective fields of this Gem survivor highlight somewhat the design elements, rendering a pleasing overall appeal. While this issue often exhibits a below-average strike, the detail on this coin is quite sharp. Barely discernible soft golden-tan color occurs on the reverse, and each side is devoid of significant marks. (#7327)

**1896 Morgan Dollar, PR68 Cameo
Impressive White-on-Black Proof**

- 1251 1896 PR68 Cameo NGC.** There are two Morgan dollar dates from the 1890s that seem to consistently show better surface preservation and overall eye appeal than any others—1896 and 1898. This piece was certainly the beneficiary of such preservation. As one might deduce from the grade, the surfaces are virtually perfect. Examination with a magnifier reveals a couple of thin diagonal slide marks on Liberty's cheek, but they have no effect on the overall presentation or grade of this magnificent proof dollar. The surfaces show pale golden patina throughout. The fields are deeply mirrored, with heavily frosted devices that show a two-toned contrast that is immediately evident to even the most casual viewer. A splendid and virtually unimprovable proof type coin. Census: 5 in 68 Cameo, 1 finer (4/09).

From The Joseph C. Thomas Collection, Part Two. (#87331)

Stunning PR66 Ultra Cameo 1896 Dollar

- 1252 1896 PR66 Ultra Cameo NGC.** The 1896 proof Morgan dollars have been held up as examples of the finest silver proof coinage of the 19th century, and when one examines specimens such as this Premium Gem with Ultra Cameo contrast, it is difficult to disagree. Each side offers a strong black-and-white effect at most angles, though the broad, frosted expanse of Liberty's cheek shows a hint of gold when tilted just so. Its technical preservation is as laudable as its eye appeal, and only a handful of flaws virtually invisible to the unaided eye preclude an even finer designation. Census: 7 in 66 Ultra Cameo, 22 finer (4/09). (#97331)

Deeply Toned PR64 1898 Morgan Dollar

- 1253 1898 PR64 NGC. CAC.** As knowledgeable collectors know, the 1898 is probably the best produced of all proofs in the Morgan series. This piece shows deep slate-blue, violet, and sea-green shadings when it is tilted under a light. The bright, mirror-like fields give the coin "life." Only a few faint hairlines appear beneath the toning. Census: 44 in 64, 69 finer (4/09). (#7333)

Lovely 1903 Morgan, PR64

- 1254 1903 PR64 NGC.** An exquisite near-Gem proof, this 1903 Morgan dollar is mostly brilliant with bright champagne surfaces that are accented with peripheral iridescence. The fields are fully and deeply mirrored, while the devices exhibit satiny luster, creating a hint of cameo contrast. (#7338)

Intriguing 1921 Zerbe Proof Morgan Dollar, PR65

- 1255 1921 Zerbe PR65 NGC.** Due to a delay in the production of Peace dollars in 1921, various collectors, including Farran Zerbe, were perturbed. In appeasement, the Mint struck a small quantity of so-called "Zerbe proofs," coins with substantial mirrors that also show prominent die polishing lines. This sharply struck example shows hints of golden peripheral toning around essentially silver-white centers. Census: 10 in 65, 9 finer (4/09).
From The Joseph C. Thomas Collection, Part Two. (#7341)

PEACE DOLLARS

- 1256 1921 MS65 PCGS.** VAM-1G. Struck from the obverse die used to coin matte proofs. A highly lustrous Gem with brilliant surfaces that are virtually free of marks. Softness is noted at the centers, as usual for this high relief issue. (#7356)
- 1257 1921 MS65 NGC.** This satiny Gem has a stone-gray obverse with light peripheral autumn-gold and russet freckles. The reverse is mottled medium brown and cream-gray, with the deepest toning near the rims. Well preserved with typically brought up centers. (#7356)
- 1258 1921 Peace MS65 PCGS.** VAM-3. A Top 50 Variety. The rare Line Through L, with the first L in DOLLAR on the reverse passing beneath a ray. This luminous Gem is softly struck as usual but pleasingly preserved beneath gray-gold toning. Great eye appeal. Population: 7 in 65, 0 finer (4/09). (#133734)
- 1259 1922-D MS66 NGC.** The striking definition is unusually sharp and crisp on both sides of this highly impressive Premium Gem. The lustrous silver-gray surfaces are mostly untuned, save for an occasional wisp of tan-gold color. Surface marks are minimal. (#7358)
- 1260 1922-S MS65 NGC.** Largely silver-white with splashes of gold visible mostly at the margins. A well-struck Gem with vibrant luster and great eye appeal. NGC has graded 11 numerically finer pieces (4/09). (#7359)

Magnificent MS66 1923-D Dollar

- 1261 1923-D MS66 NGC.** Cartwheel luster blasts through the deep apple-green, plum-mauve, and autumn-gold patina. A high mintage issue, but rare at the MS66 level and unavailable any finer. The right obverse border displays an interesting network of slender die cracks. In a former generation holder. Census: 21 in 66, 0 finer (4/09). (#7361)
- 1262 1924-S MS64 PCGS.** Splendid medium-brown and yellow-green toning graces the obverse. The reverse has only delicate olive patina. Lustrous and well defined. Considerably scarcer than its 1923-S predecessor. (#7364)
- 1263 1924-S MS64 PCGS.** Olive-gold and stone-gray embrace this lustrous scarce date dollar. Glimpses of russet-brown are noted near the obverse margin. The strike is above average, and only a concealed mark within the hair prevents classification as a full Gem. (#7364)
- 1264 1924-S MS64 PCGS.** Immensely lustrous with wisps of golden-tan across each side. Prominently clashed (as produced) above the tail feathers and near Liberty's forehead. Well-preserved and attractive. Certified in a green label holder. (#7364)
- 1265 1924-S MS64 PCGS.** Light golden patina and dazzling cartwheel luster ensure the eye appeal of this better date silver dollar. Crisply struck and pleasing despite the expected minor obverse grazes. (#7364)

Highly Lustrous 1925-S Gem Dollar

- 1266 1925-S MS65 NGC.** The highly lustrous surfaces of this Gem display wisps of barely discernible yellow-gold and violet under magnification. The design features are generally well struck, though the reverse center shows the usual minor softness. A few grade-consistent marks do not distract. (#7366)

Splendid Gem 1925-S Peace Dollar

1267 1925-S MS65 NGC. For advanced Peace dollar specialists, the acquisition of a Gem 1925-S represents an important step toward the completion of the finest quality set. NGC and PCGS have combined to certify 92 submissions as MS65, but neither service has graded even one finer example. This Gem is highly lustrous with fully brilliant, untuned silver surfaces and few marks of any sort. The strike is well above average, but even this piece has evidence of slight weakness at the centers, especially evident on the obverse. Census: 56 in 65, 0 finer (4/09).(#7366)

1268 1926-D MS66 NGC. Delicate honey-gold toning adorns this thoroughly lustrous Denver Mint dollar. The major devices are exactly struck, and the fields are beautifully smooth. The face and nearby hair show only faint marks.(#7368)

1269 1927 MS65 PCGS. Well struck for the issue with faint golden overtones across immensely lustrous surfaces. Well struck with a few modest marks and a couple of dots of deeper toning on the eagle. This Philadelphia issue is available at the Gem level but a rarity any finer; PCGS has certified only five higher-grade representatives (4/09).(#7370)

1270 1927-D MS64 NGC. CAC. Boldly impressed with subtle but appealing luster beneath rich patina. Gold-gray and orange toning elements dominate this faintly abraded yet attractive near-Gem.(#7371)

1271 1927-D MS64 NGC. CAC. Dappled gold-orange and silver-gray elements dominate the eye appeal of this subtly lustrous near-Gem. Well-defined in the centers with only a few small abrasions influencing the grade.(#7371)

Semikey 1927-S Peace Dollar, MS65

1272 1927-S MS65 NGC. The 1927-S Peace dollar has a small recorded mintage of 866,000 pieces, and it is one of the rarest issues in the series at the Gem level. The present coin is a pleasing Gem specimen, with a sharply detailed strike, and highly lustrous surfaces. Lovely golden toning is seen around the margins. Census: 69 in 65, 1 finer (4/09).(#7372)

Elusive Gem 1928 Peace Dollar

1273 1928 MS65 PCGS. The 1928 Peace dollar is in great demand due to its low mintage figure of 360,649 pieces. Light olive-green and violet colors reside on the lustrous surfaces of this Gem, some taking on a uniform pattern, some speckled. Well struck and minimally marked. PCGS has seen only 11 coins finer (4/09).(#7373)

1274 1934 MS66 PCGS. The 1934 is scarce in Premium Gem and virtually impossible to locate in a higher grade. Creamy surfaces are accented by pale gold toning in the fields, which complements the sharp strike and delightful cartwheel luster. PCGS has certified just three examples finer (4/09).(#7375)

1275 1934 MS66 PCGS. Iridescent sky-blue, pearl-gray, and honey-gold adorn this lustrous Premium Gem. Potent luster sweeps the virtually immaculate fields and devices. Only three pieces certified finer by PCGS for this low mintage Philadelphia issue (4/09).(#7375)

1276 1934-D MS65 NGC. Boldly impressed with powerful luster. This slightly frosty Gem is essentially silver-white with just a hint of canary-yellow over the outer fields.(#7376)

1277 1934-D MS65 PCGS. Largely silver-white with a suggestion of gold in the fields around the portrait. The luster is bright and the strike is pleasing. PCGS has certified 62 finer pieces (4/09).(#7376)

1278 1934-S AU58 PCGS. This key date silver dollar has full cartwheel luster, and friction is practically impossible to find. A lightly toned example that may be certified as Borderline Uncirculated, but has all the eye appeal of an MS61 at half the price.(#7377)

1279 1934-S MS62 PCGS. Lightly toned and lustrous with delicate almond-gold patina. A few grazes are distributed, but the eye appeal is nonetheless impressive for the MS62 level. The 1934-S is the key to the series in most Mint State grades, although several issues (most notably the 1928) have lower mintages.(#7377)

Frosty MS64 1934-S Dollar

1280 1934-S MS64 PCGS. CAC. A lovely near-Gem representative of this Depression-era Peace dollar issue, which has a mintage of just over 1 million pieces. The strike is pleasing and above-average, though the hair over Liberty's ear shows a touch of the usual softness. Surfaces are frosty silver-white with occasional hints of peripheral golden-tan.(#7377)

Appealing MS64 1934-S Dollar

- 1281 1934-S MS64 NGC.** A pleasing representative from this 1930s issue of just over a million pieces. Though the centers show a degree of striking softness, the overall eye appeal is pleasing. Bright silver-white surfaces show occasional abrasions that preclude Gem status. NGC has graded 86 numerically finer pieces (4/09).(#7377)

Lovely MS64 1934-S Dollar

- 1282 1934-S MS64 PCGS.** Beautiful detail for the issue with ample frostiness on the eagle. The luster is impressive, and only a few tiny ticks are visible on the portrait. The 1930s revival of the Peace dollar design lasted just two years, and none of the issues struck that decade had a mintage of more than 2 million pieces. (#7377)
- 1283 1935 MS66 PCGS.** A lovely Premium Gem, this 1935 Peace dollar has brilliant and satiny silver surfaces with splashes of delicate gold toning. It is tied for the finest that PCGS has certified (4/09).(#7378)
- 1284 1935-S MS65 NGC.** Immensely lustrous with light gold-gray overtones. The strike is pleasing, and Liberty's portrait is nearly untouched. The single finest example certified specifically as a "3 Rays" coin by NGC (4/09).(#7379)

SACAGAWEA DOLLAR

Impressive 2000-P 'Cheerios' Dollar, MS68

- 1285 2000-P Cheerios MS68 PCGS.** FS-901, although listed as FS-401 on the PCGS holder. The coin drop in 2000 put 5,500 Sacagawea dollars of that date in specially marked boxes of Cheerios cereal. At first, it was considered a mere publicity stunt, until sharp-eyed collectors realized that the coins were struck from a slightly modified design that was different than the regular production issues. It was in June 2005 that collector Pat Braddick noticed his dollar was from a slightly different reverse hub. Did the Mint produce coins from this modified design on purpose? The present piece is a brilliant and bold example that is tied for the finest PCGS has certified. The bright yellow surfaces of this "golden dollar" are pristine and virtually perfect. Population: 15 in 68, 0 finer (4/09).(#147231)

COMMEMORATIVE SILVER

- 1286 1893 Isabella Quarter MS65 NGC.** From rose to violet and blue, this shining Gem Isabella quarter offers both outstanding toning and the underlying luster to make the patina shine. In addition, it is strongly struck and carefully preserved, making it a great selection for the classic silver commemorative type or date set. (#9220)

Beautiful 1900 Lafayette Dollar, MS64

- 1287 1900 Lafayette Dollar MS64 PCGS.** DuVall 2-C. The final S in STATES is repunched to the west, with extra outlines along the right side of that letter. This natural beauty has medium yellow toning on both sides with peripheral iridescent highlights. The strike is sharp, and the surfaces possess only trivial marks. (#9222)

Popular Choice 1900 Lafayette Dollar

- 1288** 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. Warm gold-orange and rose-gray toning embraces each side of this near-Gem Lafayette dollar. It is pleasingly struck overall with a degree of detail on the mounted Lafayette's boot. Overall, a great example of the lone one dollar classic silver commemorative issue. (#9222)

Lustrous 1900 Lafayette Dollar, MS64

- 1289** 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C. The second S in STATES is repunched with the original cutting to the east. A fully brilliant silver-gray example, this piece has accompanying peripheral gunmetal toning on both sides. It is sharply struck with excellent eye appeal. (#9222)

Richly Toned 1900 Lafayette Dollar, MS65

- 1290** 1900 Lafayette Dollar MS65 NGC. DuVall 2-C. Medium charcoal coloration on both sides with blends of gold, green, and crimson intermixed. The reverse is a bit lighter than the obverse. Commems have long been one of the most popular series for collectors and the appearance of a Gem Lafayette dollar has always stirred excitement. Destined for the finest set. (#9222)
- 1291** 1938-S Arkansas MS66 PCGS. Freckles of light tan patina dot silver-gray surfaces that reveal accents of golden-brown, green, yellow, and crimson around the obverse periphery. The design elements are well executed. A few trivial marks on the female portrait are mentioned for accuracy. Population: 58 in 66, 0 finer (4/09). (#9247)
- 1292** 1939-D Arkansas MS66 NGC. The obverse is generally light silver-gray with gold-orange and deep blue-violet peripheral tints, this last color also appearing as scattered dots. The reverse has similar but deeper coloration with gold-orange more prominent throughout the fields. Census: 30 in 66, 8 finer (4/09). (#9250)

- 1293** 1939-D Arkansas MS66 PCGS. Light gold peripheral toning frames nearly brilliant centers. The design elements are boldly executed. A few minute marks are noted on Liberty's cheek. PCGS has graded six finer pieces (4/09). (#9250)

Magnificent 1935/34-D Boone Half Dollar Low Mintage, MS68

- 1294** 1935/34-D Boone MS68 PCGS. The Boone Bicentennial commemorative half dollars, first issued in 1934, continued to be minted through 1938. The 1935 issue was the subject of one of the biggest scandals of the era. A special mintage of these coins was authorized with the 1935 date on the obverse, and a small 1934 date on the reverse to retain the actual 200th anniversary date of Boone's birth on the coins. Only 2,003 pieces of this variety were coined at the Denver Mint, with a similar small mintage at San Francisco. Unscrupulous distributors advertised the rarity of these coins and solicited orders from the collecting public. Most of the orders were returned unfilled, with a note stating the supply had been exhausted before the orders were received. In reality, the distributors hoarded the coins to create heightened demand, and sold them for exorbitant prices when demand peaked. This practice resulted in public outrage when the details became known, as revealed in many letters to *The Numismatist* in 1936.
- The present coin is a magnificent specimen, sharply struck, with lustrous surfaces and subtle gray-gold and lilac toning. Only 12 coins have been certified at the MS68 level by NGC and PCGS combined, with none finer at either service (4/09). (#9263)
- 1295** 1937-S Boone MS67 NGC. Golden accents adorn this otherwise pearl-gray Superb Gem. Fully struck as usual, and virtually devoid of minuscule abrasions. A mere 2,506 pieces were struck. Census: 28 in 67, 4 finer (4/09). (#9272)

- 1296 1938 Boone PDS Set MS66 PCGS.** Includes: 1938, thick, pale silver-gray toning overall with orange elements mostly at the margins; 1938-D, peach and light silver-gray with a touch of forest-green near the rims; and the 1938-S, dappled green-gold and silver-blue with striking eye appeal.

Amazing MS67 1936 Bridgeport Half

- 1297 1936 Bridgeport MS67 PCGS. CAC.** This Superb Gem example is nearly the finest certified of the several dozen at NGC and PCGS combined, save for a single specimen at the former service (4/09). The smooth, distraction-free surfaces reveal no mentionable abrasions even under a loupe, and both sides show silver-gray with arcs of peripheral gold.(#9279)

Exceptional 1892 Columbian Half Dollar, MS67

- 1298 1892 Columbian MS67 NGC.** The Columbian half has an enduring popularity with collectors. It also has distinctive toning that can truly be called "Columbian half toning." This is such a piece. The obverse has teal colored patina for the most part, while the reverse is reddish in the center with a blue margin. The fields are bright and give the coin added zest, yielding a touch of prooflikeness. An exceptional coin and free from the surface distractions normally associated with this issue.(#9296)

Superb Gem 1893 Columbian Half

- 1299 1893 Columbian MS67 NGC.** The 1893 Columbian is the first of only three classic commemorative issues to have an original mintage in excess of 1 million pieces. This well struck example offers shining luster beneath gray-rose centers that are surrounded by cobalt-blue margins. A gorgeous Superb Gem. Census: 25 in 67, 2 finer (4/09).(#9297)

- 1300 1935 Connecticut MS67 NGC.** Plum-red, powder-blue, and yellow-gold enrich the margins of this lustrous and pristine Superb Gem. The Charter Oak made a coinage comeback on the 1999 Connecticut statehood quarter. Census: 63 in 67, 1 finer (4/09).(#9299)

- 1301 1922 Grant With Star MS63 NGC.** A luminous example of the popular With Star subtype. Gold-orange and blue-green shadings embrace each side. Only a few scattered, wispy abrasions preclude a finer designation.(#9307)

Dynamic Gem 1922 Grant With Star Half

- 1302 1922 Grant With Star MS65 NGC.** Though the original request for Grant half dollars did not include the With Star variety (which was meant for the gold dollar only), when With Star half dollars came from the Mint, the issuers did not object. This Gem from the limited mintage is delightfully lustrous with amber and gold peripheral shadings around nearly silver-white centers. NGC has graded 51 numerically finer examples (4/09).(#9307)

Radiant 1922 Grant With Star Half Dollar, MS65

- 1303 1922 Grant With Star MS65 NGC.** The radiantly lustrous surfaces of this gorgeous Gem commemorative display light tan, gold, and cobalt-blue patina around the borders, slightly deeper in hue on the obverse. A well executed strike delivers strong delineation to the devices, and both faces are devoid of mentionable marks. Scarce in the Gem level of preservation.(#9307)

Wonderful 1922 Grant With Star Half, MS66

1304 1922 Grant With Star MS66 NGC. The original request from the Ulysses S. Grant Centenary Memorial Association was for 200,000 commemorative gold dollars. Half dollars were not suggested, but the legislation was changed to authorize just 10,000 gold dollars along with 250,000 half dollars. Profits from the various Grant commemorative issues were earmarked to provide suitable memorial buildings in southern Ohio to celebrate the birth centennial of the Civil War general and 18th president. Collectors might assume that the rare With Star variety, with just 4,256 pieces struck, was an addition to the original half dollar design. In reality, the more common No Star variety came after production of the With Star pieces. This wonderfully preserved example boasts uncommon sharpness and vibrancy for the issue, lightly toned at the borders in speckled violet and blue-green shades. Census: 44 in 66, 6 finer (3/09). (#9307)

1305 1928 Hawaiian AU58 NGC. Pleasingly lustrous with light golden accents at the margins. A touch of rub on the high points keeps this attractive piece from a much more expensive Mint State grade. (#9309)

1306 1928 Hawaiian—Improperly Cleaned—NCS. Unc Details. This well struck example of the Hawaiian half shows no trace of wear. Faintly toned silver-gray surfaces show a number of light hairlines from a past cleaning. (#9309)

Lovely 1928 Hawaiian Half, MS64

1307 1928 Hawaiian MS64 NGC. Traces of lemon-yellow toning are visible over portions of the obverse and reverse surfaces, with satiny silver-gray surfaces. The toning pattern is reminiscent of those found in the Bank of Hawaii hoard that was auctioned in 1986. Although several hundred pieces entered the marketplace at that sale, now, nearly a quarter-century later, they are seldom reoffered. (#9309)

Gem 1928 Hawaiian Half Dollar

1308 1928 Hawaiian MS65 NGC. Peach-gold toning enriches the obverse of this well impressed and lustrous Gem. Both sides appear to be unabraded at first glance, although patience and a strong loupe eventually locates minor contact beneath TRUST and on the cheekbone and thigh. The Hawaiian is the most desirable type among the fifty pieces required to complete a collection of classic silver commemoratives by design. (#9309)

Attractive MS65 1928 Hawaiian Half Dollar

1309 1928 Hawaiian MS65 NGC. An attractive Gem example of this famous classic silver commemorative issue, one of the keys to the type set. Both sides offer soft, pleasing luster and solid detail. The obverse is more colorfully toned with silver-lavender and orange shadings, while the reverse has muted gold-gray coloration overall. (#9309)

1310 1935 Hudson MS65 PCGS. This fully brilliant and highly lustrous Gem is a wonderful representative of the low-mintage Hudson half dollar, with a total distribution of just 10,000 coins. There are other commemoratives with lower individual mintages, but the Hudson, Hawaiian, and Spanish Trail half dollars all have the lowest net distribution for any single commemorative design. (#9312)

1311 1924 Huguenot MS67 PCGS. Typical of all Huguenot half dollars, this piece has a mattelike appearance with brilliant champagne surfaces and full mint luster. Both sides have a frame of deeper gold and iridescent toning. Population: 38 in 67, 0 finer (4/09). (#9314)

1312 1934 Maryland MS67 PCGS. Full, smooth, satin textured luster blankets both sides of this silver-tinged representative. Both sides are sharply struck, with uncommonly few abrasions for the type. Population: 44 in 67, 0 finer (4/09).
Ex: *Charlotte ANA Signature (Heritage, 3/2003), lot 6894, which realized \$3,240. (#9328)*

1313 1934 Maryland MS67 NGC. Pastel ice-blue and caramel-gold enrich this lustrous and impeccably preserved Superb Gem. This issue celebrates its 75th anniversary in 2009, which in turn makes the present year the 375th since Maryland was founded. Census: 77 in 67, 3 finer (4/09). (#9328)

Popular 1921 Missouri Commemorative Half, MS66

1314 1921 Missouri MS66 PCGS. Extraordinarily well preserved for this popular early commemorative issue. The strike is very well executed and a radiant, frosty finish is visible beneath irregular speckles of reddish-golden toning. A few wispy blemishes on the frontiersman's neck are only noticed under close scrutiny. Population: 29 in 66, 0 finer (4/09). (#9330)

1315 1923-S Monroe MS65 PCGS. CAC. Few other commemorative issues compare to the condition scarcity of the Monroe half. This marvelous example has frosted mint luster that is lightly and evenly toned on the reverse. The obverse is brilliant in the center, with the same golden toning around the margin. An interesting grease streak is noted at the top of Adams' head. (#9333)

1316 1923-S Monroe MS65 PCGS. An appealing Gem with above-average luster that shines through moderate patina, light silver-gray in the centers with deepening to green-gold and orange close to the rims. (#9333)

Condition Scarcity 1923-S Monroe Half, MS66

1317 1923-S Monroe MS66 PCGS. Splashes of golden-orange, lavender, russet, and violet-blue patina bathe the highly lustrous surfaces of this Premium Gem commemorative, displaying slightly deeper shades on the obverse. A solid strike leaves strong imprints on the design features. Minimally abraded for the designated grade. Readily available through the Gem level, but very scarce in MS66, and rare any finer. Population: 49 in 66, 4 finer (4/09). (#9333)

1318 1933-D Oregon MS67 NGC. Light gray, lustrous surfaces have rose and yellow-gold accents at the margins. This is an essentially immaculate Superb Gem with only minor incompleteness of strike on the back of the wagon. The obverse is die tripled, most evident on HALF. Census: 36 in 67, 2 finer (4/09). (#9343)

1319 1915-S Panama-Pacific MS65 NGC. A well-struck Gem with broad silver-white centers. Arcs of blue-green and peach peripheral toning enhance the eye appeal. Overall, a great example of this popular earlier classic silver commemorative. (#9357)

1320 1915-S Panama-Pacific MS65 PCGS. Deep maroon and gunmetal-blue patina embraces this satiny Gem. The obverse appears pristine, and the reverse has only a couple of trivial ticks near the left border of the shield. A much better silver commemorative type, particularly in high grade. (#9357)

1321 1915-S Panama-Pacific MS66 NGC. A lovely Premium Gem with soft but pleasing luster that is stronger on the reverse and with a better-defined cartwheel. Blue-green and golden-tan peripheral shadings frame minimally toned centers. Elusive any finer, with just 64 numerically superior pieces known to NGC (4/09). (#9357)

1322 1926 Sesquicentennial MS65 PCGS. CAC. Faint golden overtones grace the margins of this gleaming Sesquicentennial Gem. Well struck for the issue with great surface quality and high eye appeal to match. PCGS has certified only eight finer representatives of this famous classic silver commemorative condition rarity (4/09). (#9374)

1323 1926 Sesquicentennial MS65 NGC. Potent luster dominates this minimally abraded Gem. Rich lilac and sun-gold patina contributes to the eye appeal. Washington's cheek displays the texture of the planchet prior to the strike, as always for this conditionally challenging type. (#9374)

1324 1935 Spanish Trail MS65 PCGS. The disastrous Cabeza de Vaca Expedition somehow found commemoration during the profligate issues of the mid-1930s. Only 10,000 pieces were struck, plus eight stray examples chosen for assay. This low type mintage makes Gems desirable. Lustrous and well struck with light tan-gray toning. (#9376)

1325 1935 Spanish Trail MS65 NGC. Glowing luster issues from the untuned surfaces of this lovely, sharply struck Gem. A few inoffensive grazes barely keep from an even higher grade. (#9376)

1326 1935 Spanish Trail MS65 NGC. Primarily silver-white with golden-tan tints in the fields. A lustrous Gem example of the Spanish Trail half, one of the most prized single-issue classic silver commemoratives. (#9376)

1327 1935 Spanish Trail MS65 NGC. Broad zones of blue-green, gold-orange, and peach patina dominate the eye appeal of this Gem. Well-defined devices stand out from subtly lustrous fields. (#9376)

1328 1935 Spanish Trail MS66 PCGS. Glimpses of peripheral silver-blue and gold frame minimally toned centers. This immensely lustrous Premium Gem offers high eye appeal for the issue. (#9376)

Amazing MS67 1935 Spanish Trail Half

1329 1935 Spanish Trail MS67 NGC. Well-defined for a Spanish Trail half with luminous gold, orange, and tan toning overall. Glimpses of green and blue are also visible. The fields and devices are equally smooth. This popular commemorative half dollar key is scarce in MS67 and a rarity any finer, with just six numerically superior pieces known to NGC (4/09). (#9376)

Amazing 1935-D Texas Half, MS68

- 1330** 1935-D Texas MS68 NGC. Impressively struck with the gleaming “halo” luster found on the best examples of the Texas design. Pale silver-blue color is most prominent on this Superb Gem, though the right reverse shows an arc of gold-orange color and similar, albeit lighter shadings are present at the reverse rims. Census: 6 in 68, 0 finer (4/09).(#9383)

MS68 1937 Texas Commemorative, Rare So Fine

- 1331** 1937 Texas MS68 NGC. Typically well struck and highly lustrous, with a coating of milky golden patina over each side, and impressively preserved surfaces that seem mark-free. A conditionally rare example of this popular issue, from the fourth year of the Texas commemorative type. Census: 7 in 68, 0 finer (3/09).(#9390)

Impressive 1938-D Texas, MS68 ★

- 1332** 1938-D Texas MS68 NGC. Splashes of rose-red, sea-green, and gold decorate generous portions of each side. This satiny Superb Gem is remarkably void of marks, and the strike on the winged Victory's hand and knee is unusually sharp. The 1938-D has the lowest mintage of the various Texas silver commemorative issues. Census: 3 in 68 ★, 0 finer (4/09).(#9395)

- 1333** 1925 Vancouver MS66 PCGS. Lustrous, virtually unmarked surfaces exhibit whispers of gold-brown toning, particularly around the rims. Sharply struck devices add to this coin's outstanding eye appeal.(#9399)

- 1334** 1925 Vancouver MS66 NGC. Wholly original and lustrous, exhibiting mottled gray and russet toning over both sides. As with almost any pre-1930 silver commemorative, the Vancouver is moderately available at MS66 but considerably scarcer as a Superb Gem. NGC has graded only 50 numerically finer pieces (4/09).(#9399)

- 1335** 1949 Booker T. Washington MS67 NGC. Warm golden peripheral toning yields to pale silver-gray at the centers. An immensely lustrous Superb Gem, tied for numerically finest certified by NGC or PCGS (4/09).(#9416)

Colorful Superb Gem 1952 Washington-Carver Half

- 1336** 1952 Washington-Carver MS67 NGC. Deep forest-green and plum-red embraces this thoroughly lustrous Superb Gem. Sharply struck, without the planchet chatter often seen on this issue. The only commemorative type to use the word AMERICANISM in its legends. Rare in high grade despite a mintage of more than 1 million pieces. Census: 14 in 67, 1 finer (4/09).(#9434)

Pleasing MS66 1954-D Washington-Carver Half

- 1337** 1954-D Washington-Carver MS66 NGC. This D-mint issue hails from the last year for classic silver commemoratives, and this Premium Gem is tied for numerically finest known to NGC or PCGS (4/09). Delicate silver-blue and pink tints grace well-preserved surfaces with lively luster. The portraits are well-defined for the issue.(#9443)

Fantastic MS68 1936 Wisconsin Half

- 1338** 1936 Wisconsin MS68 PCGS. Incredibly well-preserved for this silver issue dated 1936, the year the commemorative rush was at its greatest height. It is well struck for the design with subtle but pleasing luster beneath dappled patina, orange, peach, and silver-gray. Population: 17 in 68, 0 finer (4/09).(#9447)

COMMEMORATIVE GOLD

Louisiana Purchase Exposition Commemorative Spoon Containing a 1903 Jefferson Gold Dollar

- 1339 1903 Louisiana Purchase/Jefferson Gold Dollar Mounted in a Silver Spoon.** Hendershott 54-190. That the two Louisiana Purchase gold dollar varieties were sold mounted in stickpins, brooches, and spoons is common numismatic knowledge, but few of those objects survive intact today. This spoon, which still contains its 1903 Louisiana Purchase/Jefferson dollar (lightly worn, scratches in the fields, possibly polished in the past), is thus of great interest. The front of the handle has a vignette of bison, riders, a covered wagon, and a train, flanked by the dates 1803 and 1903, while the bowl has a building, captioned FESTIVAL HALL AND CASCADES, the gold dollar mounted below. The back has the name *Martin* engraved on the bowl, with the date 1904 at the top of the handle and STERLING below. The handle reads horizontally: OFFICIAL / W.B. Stevens, Secy. / LOUISIANA PURCHASE EXPOSITION / ST. LOUIS. Between bowl and text is a stylized LE and in small font, COPYRIGHTED / 1902 BY / BERT / BALL.

- 1340 1903 Louisiana Purchase/Jefferson MS64 PCGS.** Shining lemon-gold surfaces with hints of deeper yellow. This is a strongly struck and attractive near-Gem that offers great eye appeal.(#7443)
- 1341 1903 Louisiana Purchase/Jefferson MS66 NGC.** CAC. Immensely lustrous with satiny texture on the subdued yellow-gold surfaces. Strong definition with powerful eye appeal to match.(#7443)
- 1342 1903 Louisiana Purchase/McKinley MS66 PCGS.** CAC. Strongly struck with rich yellow-gold luster. A carefully preserved Premium Gem representative of the McKinley design that offers excellent eye appeal.(#7444)

Great MS66 1904 Lewis and Clark Dollar

- 1343 1904 Lewis and Clark MS66 PCGS.** Both sides of this Premium Gem survivor have flashy orange-gold surfaces, and on the obverse, this flashiness comes from pools of reflectivity in the fields. Sharply struck with a few tiny alloy spots that are visible only at certain angles. PCGS has graded just 15 finer examples for this famous commemorative gold issue.(#7447)

- 1344 1905 Lewis and Clark MS63 PCGS.** CAC. Bright lemon-gold luster lends this Select piece great eye appeal. Well-defined with few overt abrasions, though scattered wispy marks contribute to the grade.(#7448)
- 1345 1905 Lewis and Clark MS63 PCGS.** Pleasingly detailed with light yellow-gold luster and excellent eye appeal for the grade. The Lewis and Clark pieces are the most elusive of the classic commemorative gold dollars, and the 1905 is particularly challenging.(#7448)
- 1346 1915-S Panama-Pacific Gold Dollar MS65 PCGS.** Original peach-gold and lime-green toning alternates across this shimmering and unabraded Gem. A curly lintmark appears on the lower dolphin, as made. Excellent value within the gold commemorative series.(#7449)
- 1347 1917 McKinley MS65 PCGS.** Warm yellow-gold luster with glimpses of peach in the fields. The strike is crisp and the eye appeal is excellent. A noteworthy Gem example from the second year of the McKinley Birthplace design.(#7455)

Reflective 1917 McKinley Gold Dollar, MS66

- 1348 1917 McKinley MS66 PCGS.** CAC. Typical of all 1917 McKinley gold dollars, this beautiful Premium Gem has satiny yellow-gold luster with considerable prooflike surface, especially at the peripheral areas. Examples at this grade level are generally available with only a modest search, but PCGS has only graded 50 finer examples (4/09).(#7455)

Notable MS67 1917 McKinley Dollar

- 1349 1917 McKinley MS67 NGC.** From the second of two McKinley Birthplace issues, this gold dollar is satiny with dusky butter-yellow color overall. Each side offers excellent detail and is carefully preserved, as befits the Superb Gem grade. Neither NGC nor PCGS has certified a numerically finer example (4/09).(#7455)

Bright Gem 1922 Grant With Star Gold Dollar

- 1350 1922 Grant With Star MS65 NGC.** This lemon-gold Gem has vibrant luster, and the strike is complete aside from unavoidable incompleteness on the tree trunk left of the window. Void of detectable marks. Unlike the Grant half dollar, there is little difference in value between the Star and No Star varieties. (#7459)

1922 Grant With Star Gold Dollar Richly Patinated Gem

- 1351 1922 Grant With Star MS65 PCGS.** Highly lustrous with deep orange toning and exceptional aesthetic appeal. This Gem is boldly defined, even down to Grant's intricate hair and beard details. A tiny surface inclusion is noted on the reverse, but the balance of the surfaces on both sides are virtually perfect. (#7459)

Bold 1922 Grant With Star Gold Dollar, MS67

- 1352 1922 Grant With Star MS67 PCGS.** A frosty light yellow-gold example, this Superb Gem exhibits wonderful apricot and rose toning on both sides. The surfaces are pristine and the designs are bold. Although relatively common, even at the Superb Gem level, PCGS has only certified one higher-grade coin (4/09). (#7459)

Delightful 1922 Grant With Star Dollar, MS67

- 1353 1922 Grant With Star MS67 PCGS.** Each side has rich butter-yellow and green-gold color with glimpses of emerald in the fields. The strike is pleasingly above-average and the preservation is excellent, with no individually mentionable flaws. The Grant With Star dollar is elusive in MS67 and nearly impossible to find any finer; PCGS has graded only one such coin (4/09). (#7459)

- 1354 1926 Sesquicentennial MS64 PCGS.** The peach-gold fields and devices are bounded by lime-green near the rims. This thoroughly lustrous example is beautifully preserved aside from a pair of thin marks on Independence Hall. (#7466)

- 1355 1926 Sesquicentennial MS64 PCGS.** Strongly struck with warm and frosty lemon-gold luster. This attractive Sesquicentennial quarter eagle has eye appeal comparable to a higher grade. (#7466)

- 1356 1926 Sesquicentennial MS64 PCGS.** Rich butter-yellow and sun-gold color dominates the eye appeal of this charming near-Gem. Well struck with just a few too many marks for the next grade level. (#7466)

- 1357 1926 Sesquicentennial MS65 PCGS.** A well-defined yellow-gold example with bright and shining luster. Well-preserved with powerful eye appeal that greatly exceeds that of the typical near-Gem. (#7466)

- 1358 1926 Sesquicentennial MS65 PCGS.** Bright yellow-gold color with glimpses of honey at the obverse margins. Strongly lustrous with excellent eye appeal, a great Sesquicentennial Gem. (#7466)

PROOF COMMEMORATIVE GOLD

Brilliant 1903 McKinley Dollar, PR63 Cameo

- 1359 1903 McKinley PR63 Cameo PCGS.** The Louisiana Purchase Exposition gold commemoratives with the Jefferson and McKinley portraits were the first gold issues of the classic commemorative era from 1892 to 1954. It goes without saying that they were also the first gold commemoratives to be struck in proof. Contemporary documents indicate that 100 proofs were produced of each design.

This impressive Cameo proof has brilliant yellow surfaces and sharp design details, with highly mirrored fields around lustrous devices. Only trivial surface marks are detected on each side of this remarkable specimen. Population: 1 in 63 Cameo, 3 finer (4/09). (#87483)

MODERN COMMEMORATIVE

- 1360 1996-P Atlanta Olympics Tennis Silver Dollar Cancelled Proof Die.** A proof die used to strike the Tennis silver dollar Olympic commemorative of 1996, serial number P6-642188. Highly polished steel face with devices incused and frosted.

MODERN BULLION COINS

- 1361 Five-Piece American Eagle 10th Anniversary Proof Set Including 1995-W One-Ounce Silver.** The star of this lot, which comes with outer box, velvet case, and inner booklet, is the uncertified but carefully preserved 1995-W one-ounce silver American Eagle, boldly contrasted and gorgeous. Also includes the four gold American Eagle denominations in similar states, the one-ounce, half-ounce, quarter-ounce, and tenth-ounce. (Total: 5 coins)
- 1362 Five-Piece 1995-W American Eagle Proof Set Including One-Ounce Silver.** The five 1995-W proof American Eagle coins, housed in the original, simple Mint packaging (no closing case). Includes the one-ounce gold, half-ounce gold, quarter-ounce gold, and tenth-ounce gold, but the prime attraction of the lot is the one-ounce silver, key to its series. (Total: 5 coins)

Impressive 1995-W Silver Eagle, PR67 Deep Cameo

- 1363 1995-W Silver Eagle PR67 Deep Cameo PCGS.** An extraordinary Superb Gem Deep Cameo proof that should prove to be somewhat more affordable than those in higher numerical grades up to PR70. The key to the series, the 1995-W silver proof eagle had a mintage of only 30,125 coins. While many or most of those still survive, few carry top certified grades. (#9887)

Extraordinary 1995-W Proof Silver Eagle PR68 Ultra Cameo

- 1364 1995-W Silver Eagle PR68 Ultra Cameo NGC.** An amazing example of the key-date 1995-W proof silver eagle with exceptional mirrored fields of unlimited depth. Every raised design element on each side displays incredible mint frost with superb silver luster. No toning is present on either side. (#9887)

Key 1995-W Silver Eagle, PR69 Ultra Cameo

- 1365 1995-W Silver Eagle PR69 Ultra Cameo NGC.** Just 30,125 pieces were minted, making the 1995-W silver eagle the key date to the proof series. This example has remarkable contrast with deeply mirrored fields and fully lustrous and frosty devices. Both sides are entirely untoned. (#9887)

Gorgeous PR69 Ultra Cameo 1995-W Silver Eagle

- 1366 1995-W Silver Eagle PR69 Ultra Cameo NGC.** Essentially flawless, with a magnifier a virtual must to see what kept this specimen from a perfect grade. The broad silver-black mirrors offer a stark counterpoint to the rich frost of the devices. The 1995-W proof silver American Eagle is a famous modern key issue, with just over 30,000 pieces struck. (#9887)
- 1367 1997-W Four-Piece Platinum American Eagle Set PR69 Deep Cameo PCGS.** All virtually flawless with pronounced contrast, housed in separate PCGS holders with the three largest denominations having close serial numbers. Includes the tenth-ounce, quarter-ounce, half-ounce, and one-ounce pieces. (Total: 4 coins)
- 1368 2006 One-Ounce Gold Eagle MS70 ICG.** ICG certified as a "First Day of Issue" representative that is "ICG Certified #186 of 692." Those data clearly limit the population of this remarkable piece. (#89988)

Ultimate Quality 2006-W One Ounce Gold, PR70 Reverse Proof Strike

- 1369 2006-W One-Ounce Gold Reverse Proof PR70 PCGS.** The specially created "reverse proofs" are dramatic and highly unusual collectors pieces that have a mirrored finish on the design motifs, and frosty luster in the fields. This is a desirable issue for the modern Set Registry collector. (#89995)

1370 2008-W American Buffalo Four-Piece Gold Set PR70 Deep Cameo PCGS. Included are: 2008-W \$5 Buffalo PR70 Deep Cameo PCGS; 2008-W \$10 Buffalo PR70 Deep Cameo PCGS; 2008-W \$25 Buffalo PR70 Deep Cameo PCGS; and a 2008-W \$50 Buffalo PR70 Deep Cameo PCGS. This is the only year the Mint produced four-piece American Buffalo fractional coin sets, and the Mint has subsequently discontinued production of these gold sets. A \$5 piece sold in our December auction for \$299; apparently none of the \$10 coins have been sold at auction; several of the \$25 coins have sold in the range of \$1,150-\$1,265; and a \$50 piece sold in our December auction for \$1,725. (Total: 4 coins)

1371 2009 Ultra High Relief, First Strike MS70 PCGS. A technically flawless example, immensely lustrous with the highly sculptural quality that is the hallmark of this popular modern issue. (#407405)

1372 2009 Ultra High Relief, First Strike MS70 PCGS. A flawless representative of this modern Mint masterpiece. The bold relief and concave, reflective fields combine for a dramatic appearance. (#407405)

COINS OF HAWAII

1373 1883 Hawaii Quarter MS66 PCGS. CAC. Blue-green and peach-orange elements mingle on this lustrous Premium Gem. Well-defined and undeniably appealing. PCGS has graded just 12 finer examples (4/09). (#10987)

Lustrous 1883 Hawaii Half Dollar, MS63

1374 1883 Hawaii Half Dollar MS63 PCGS. CAC. A shimmering, satiny representative of this one-year type, showing hints of champagne color on the essentially silver-gray surfaces. Well struck with a few minuscule marks on the obverse, and a shallow luster graze on the upper left reverse, below KE EA O. The official mintage was 700,000 pieces but far fewer survive today, especially in Uncirculated condition. (#10991)

Gorgeous 1883 Hawaii Half, MS64

1375 1883 Hawaii Half Dollar MS64 PCGS. A stunning near-Gem example of the scarce and popular Hawaii fifty cent piece, or hapalua. This extraordinary piece is fully lustrous with brilliant silver surfaces and faint traces of pale gold toning. The fields are reflective and nearly prooflike, while the devices are frosty, culminating in a lovely presentation. Population: 53 in 64, 11 finer (4/09). (#10991)

Striking Gem 1883 Hawaii Half

1376 1883 Hawaii Half Dollar MS65 PCGS. CAC. Strongly struck with warm luster beneath rich and variegated toning. Steel and blue-gray shadings dominate the obverse, while the hints of peach on that side show up full-bore on the reverse, along with cerulean and violet-pink. A lovely Gem representative of this larger Hawaii silver coin. (#10991)

1377 1879 T. Hobron Hawaii 12 1/2C Token XF45 NGC. Medcalf 2TE-8. These copper tokens were produced by railroad owner Captain Thomas H. Hobron and could be redeemed at his general store in Kahului, Maui. An uncommonly mark-free medium brown example that boasts an even strike. Listed on page 391 of the 2009 *Guide Book*.

ERRORS

1986 Double Denomination Cent on Dime, MS66

1378 1986 Lincoln Cent—Struck on 1986 Dime—MS66 PCGS. This impressive error began with a 1986-P dime that was then mistakenly mixed with Lincoln cent planchets and struck with 1986 Lincoln cent dies. It then found its way out of the Mint and into collectors' hands. Both sides are highly lustrous, with pale gold toning over brilliant gray surfaces.

1998 Bonded Die Cap Cent, MS63 Red

1379 1998 Lincoln Cent—Three Piece Bonded Die Cap—MS63 Red PCGS. Three individual planchets are bonded together on this remarkable error. It started with a single planchet die cap, followed by the introduction of two additional planchets that bonded together. Mostly red with considerable gray zinc, and traces of brown toning in the peripheral areas. This piece is not in a PCGS holder due to its dimensions, but is accompanied by two PCGS photographs. The approximate size is 41 mm x 35 mm x 8 mm.

**Fascinating 1998 Cent Struck
on a 1997-P Dime, MS67**

- 1380 1998 Lincoln Cent—Struck on a 1997-P Dime—MS67 NGC.** Both dates are clearly visible on this double date, double denomination error. Other evidence of the Roosevelt dime impression remains visible on both sides. Double denomination coins are rarities, and those with two different dates particularly so. Here is an important opportunity for the advanced error collector, or for either the Lincoln cent or Roosevelt dime specialist.

**Impressive 1999 Cent Struck
on a 1998 Dime, MS66**

- 1381 1999 Lincoln Cent—Struck on a 1998 Dime—MS66 PCGS.** Obverse on obverse orientation with about 90 degrees of rotation between the two impressions. The date from the dime is visible beneath LIBERTY from the Lincoln cent design. This is a fully lustrous and attractive light gray example with hints of champagne toning on otherwise silver-white surfaces.

**Appealing 2001 Lincoln Cent Struck
on a 2001-P Roosevelt Dime, MS67**

- 1382 2001 Lincoln Cent—Double Denomination on a 2001-P Dime—MS67 PCGS.** A struck 2001-P dime became mixed with cent blanks and received a second strike, this time from cent dies. The strikes were matched obverse-to-obverse, with the Roosevelt portrait undertype outlining most of Lincoln's head. The last digit of the dime's date is weak but visible. This "11 cents" error offers strong and shining luster with superb preservation.

Desirable XF 1925 Nickel on Cent Planchet

- 1383 1925 Buffalo Nickel—Struck on a Cent Planchet—XF40 ANACS.** Weight 3.05 gm, consistent with a bronze planchet (3.11 gm) that has experienced slight wear. This example has dusky olive-brown surfaces that show few significant abrasions. Well-centered so that little of the design is missing, though the tips of the bison's head and tail and much of the word LIBERTY on the obverse are missing.

**Popular 2000-D Jefferson Nickel on
Struck Lincoln Cent, MS66 Red**

- 1384 2000-D Jefferson Nickel—Struck on a Struck Cent—MS66 Red PCGS.** The date and most of IN GOD WE TRUST are on the copper-orange flan, but much of LIBERTY is missing. Close inspection reveals the cent undertype; it is most prominent at Jefferson's jaw, where Lincoln's hair curls stand out, and in the fields above and below Monticello, which show the ends of the Lincoln Memorial.

**Surprising 1968-D Roosevelt Dime
Struck on a Silver Planchet, AU55**

- 1385 1968-D Dime—Struck on a 90% Silver Planchet—AU55 NGC.** 2.5 gm. This piece circulated only briefly before it was saved and recognized for its special nature. Exactly how a 90% silver planchet was struck in 1968 is a mystery, but the weight is consistent with the old silver planchets rather than the new clad composition, and examination of the edge shows no reddish line to suggest a copper core. Unusually well-detailed for the issue, a further clue.

**Intriguing Out-of-Collar Broadstrike
1929-S Quarter, MS62**

- 1386 1929-S Standing Liberty Quarter—Broadstruck Out of Collar—MS62 PCGS.** First impressions can be deceiving: Though an initial glance shows only a richly toned green-gold and rose-violet Mint State quarter, closer examination reveals that it is an out-of-collar broadstrike. The unchecked metal flow is plainest at the lower obverse, where the digits in the date are distorted.

**Undated Washington Quarter, MS62 Red
35% Off-Center on Type One Cent Planchet**

- 1387 Undated Washington Quarter—35% Off-Center on a Type One Cent Planchet—MS62 Red PCGS.** A cent planchet without upset rim, likely brass or bronze composition since there is no evidence of a zinc interior, was struck by quarter dies of unknown date. Uniface obverse, struck widely off center toward 8 o'clock. Parallel abrasions on the hair account for the grade.

**Undated MS64 Silver Washington Quarter
Struck on a Bow-Tie Clipped Planchet**

- 1388 Undated Silver Washington Quarter—Struck on a Bow-Tie Clipped Planchet—MS64 PCGS.** 1.5 gm. When the planchet was punched out of the coinage strip, it had two clips: one a straight clip that cut off what would have been the top of the obverse, and the second an irregular, curving clip that cut off a wedge at the lower obverse. The result is this dramatic bow-tie clip, lustrous with light gold-gray toning.

**1935-Dated Quarter, AU58
Reverse Indented by Dime Flan**

- 1389 1935-? Washington Quarter—Reverse Indented by Dime Planchet—AU58 PCGS.** The consignor states that this is the "earliest date indent known," which might be the case if the field is limited to dime indents on Washington quarters. The dime indent spans from just inside the rim at 6 o'clock, to the top of the eagle's head. Any mintmark is obscured by the indent. Untoned and satiny with little indication of wear.

**1999-D Delaware Quarter
Struck on a Nickel Planchet, MS64**

- 1390 1999-D Delaware Quarter—Struck on a Nickel Planchet—MS64 PCGS.** Both date and mintmark are visible, though the former could be determined solely by the design. On the obverse, parts of AMERICA, WE TRUST, and DOLLAR are off the flan, and on the reverse, much of DELAWARE is cut off. A great example of this popular wrong-planchet error that is also linked to the momentous beginning of the Statehood quarters.

10% Off-Center 1858-O Half VF20

- 1391 1858-O Seated Half—Struck 10% Off-Center—VF20 PCGS.** Struck noticeably off-center toward 5 o'clock so that the bottom half of the second 8 is off the flan, along with portions of ES OF A. Toned dark gray with lighter silver-white high points. Liberty is sharp, and most shield lines are fully separated. A challenging New Orleans type to locate off-center.

**Near-Mint 1875-S Half Dollar
Broadstruck Out of Collar**

- 1392 1875-S Seated Half—Broadstruck Out of Collar—AU58 PCGS. CAC.** At first glance, this San Francisco Seated type coin appears to be struck off-center several degrees toward 10:30. But no design detail is missing, so it is an uncentered broadstrike, with spreading most apparent on the reverse denticles near 1 o'clock. Quite close to Mint State, but the specialist will note slight wear on the thigh. Satiny with medium almond-gold and pearl-gray shadings.

**Popular MS63 1962-D Half Dollar
Struck on a Quarter Planchet**

- 1393 1962-D Franklin Half—Struck on a Silver Quarter Planchet—MS63 PCGS.** All of LIBERTY and most of HALF DOLLAR and AMERICA are off the flan. Satiny and smooth with pleasing golden-brown and lilac toning, though the strike is slightly soft at the high points, as expected for the smaller and lighter planchet. A high quality example of this elusive wrong planchet type combination.

**1964 Kennedy Half Struck on
Silver Quarter Planchet, MS65**

- 1394 1964 Kennedy Half—Struck on a Silver Quarter Planchet—MS65 PCGS.** Type Two Reverse. Uncentered, with the rim intact between 3 and 5 o'clock and most of the border elements off the flan between 7 and 1 o'clock. Just enough of the field is present left of the branch stem to confirm the absence of a mintmark. Exceptionally preserved and desirable. This piece would make a matched set from Philadelphia and Denver with the Gem 1964-D Kennedy struck on a silver quarter planchet, also in this sale.

**Gem 1964-D Kennedy Half Error
on Silver Quarter Flan**

- 1395 1964-D Kennedy Half—Struck on a Silver Quarter Planchet—MS65 PCGS.** Type Two Reverse. Most of LIBERTY is off the flan, as is all of HALF DOLLAR. Lightly toned and lustrous with an immaculate obverse field and only a hint of contact on the cheek. This piece would make a nice acquisition with the 1964 Kennedy struck on a silver quarter planchet, also in this sale.

**Near-Gem 1971-D Eisenhower Dollar
Struck on a Half Dollar Planchet**

- 1396 1971-D Eisenhower Dollar—Struck on a Half Dollar Planchet—MS64 PCGS.** A dramatic wrong-planchet error from the first year of the Eisenhower design. While the central devices are virtually intact, the left peripheral devices are missing, including parts of LIBERTY, IN GOD WE TRUST, and the first two digits of the date. Slight striking weakness overall is consistent with the undersized flan.

**Impressive 1971-D Eisenhower Dollar Error, MS64
Reverse Indented by Dime Planchet**

- 1397 1971-D Eisenhower Dollar—Reverse Indented by Dime Planchet—MS64 PCGS.** Though the obverse of this Eisenhower dollar appears normal, the reverse is anything but ordinary, since it shows a large, round indentation at the upper reverse (described by PCGS as an indentation from a dime planchet, likely due to the shallowness of the indentation, as the diameter is significantly wider than a dime's). An eye-catching and desirable error.

**Desirable 1974 Eisenhower Dollar Error, MS64
Struck on a Half Dollar Planchet**

- 1398 1974 Eisenhower Dollar—Struck on a Half Dollar Planchet—MS64 PCGS.** Though the half dollar planchet was large, it was not nearly large enough to accommodate the entire Eisenhower design; as a result, the entirety of LIBERTY on the obverse and half the date, as well as AMERICA and ONE DOLLAR on the reverse, are off the flan. A lustrous and dramatic error.

**Amazing 1974-D Eisenhower Dollar Error
Reverse Cent Planchet Indent, MS62**

- 1399 1974-D Eisenhower Dollar—Reverse Indented by Cent Planchet—MS62 PCGS.** A great example of this extremely rare error. A cent planchet (not included) was trapped between the dollar planchet and the reverse die. When the piece was struck, the cent planchet obscured much of the eagle, creating a large, nearly round indentation. The obverse shows a long, thin scrape from the Y in LIBERTY to the truncation of the bust that accounts for the grade.

**Astounding 1976 Type Two Bicentennial Dollar
Obverse Indented by Smaller Planchet, MS66**

- 1400 1976 Type Two Eisenhower Dollar—Obverse Indented by Smaller Planchet—MS66 NGC.** The allure of this piece is due to the dramatic nature of the error as well as the wonderful condition of the host coin. NGC states on the label that this 1976 Type Two Eisenhower dollar was indented by a “smaller planchet.” Specifically, it appears that a blank nickel planchet (not included) entered the coining chamber at approximately the same time as the dollar flan. The result is a dramatic indent error that obliterates approximately 20% of the obverse between 1 o’clock and 3 o’clock. A rare error that is sure to witness active bidding.

**Noteworthy Near-Mint Susan B. Anthony Dollar
Struck on a Brass Cent Planchet**

- 1401 Undated Susan B. Anthony Dollar—Struck on a Brass Cent Planchet—AU58 PCGS.** The largest circulating denomination on the smallest denomination’s planchet. Most of the portrait is visible on the obverse, as is the upper right part of the issue’s 11-sided inner rim, but the date and the LI of LIBERTY are off the flan. The planchet is brass and not copper-plated zinc, offering a clue to when it was struck; it must have been produced in the original run for the SBA design, 1979 to 1981, and not during its brief revival in 1999.

- 1402 1999 One-Ounce Gold Eagle—Struck-Through Obverse at 9 O’Clock—MS68 PCGS.** The left obverse field has a shallow and fairly sizeable strike-through. The piece is otherwise flawless. 1999 was a higher-mintage date for the gold American Eagle bullion coin, due to unfounded Y2K fears.

BETTS MEDAL

- 1403 (1863) William Pitt Medal, Betts-515, MS64 NGC.** Bronze, 40 mm. 435 grains. Plain edge. A head and shoulders portrait of Pitt faces left on the obverse, bounded by legend GVLIELMVS PITT. The reverse has a seven-line legend, THE MAN / WHO HAVING / SAVED THE / PARENT PLEADED / WITH SUCCESS / FOR HER / CHILDREN, referring to the Great Commoner’s efforts to repeal the Stamp Act. Deep mint-red toning adorns both sides. A few minor marks and rim nicks prevent an even finer grade assessment.

INGOTS

- 1404 Pair of San Francisco Mint Silver Ingots.** Neither is dated. The **larger ingot** is toned pale gold-gray, with dimensions 89 mm x 58 mm x 11 mm. The bar is slightly curved, so that the surface length is slightly longer than that given. The upper face bears the eagle, arrows, and olive branch hallmark of the San Francisco Mint, dated 1956. A gas bubble affects parts of the eagle’s left (facing) wing and the shield. Beneath the hallmark is the serial number, 812, the weight, 21.60 OZS, and the fineness, 999.75 FINE. The top edge is stamped 249. The **smaller ingot** has an oval imprint on the top side with 999.5 FINE below. The back side has large numeral punches that read 6 07 OZS. Bright overall with slight reddish patina in the recesses. (Total: 2 items)

GSA DOLLAR

- 1405 1891-CC GSA Hoard MS62 NGC. VAM-3.** A Top 100 Variety. The “Spitting Eagle,” though the size of the eagle’s expectoration appears smaller than most. Creamy silver-white luster enlivens moderately abraded surfaces. Band-certified in the holder of issue with box and certificate of authenticity. (#7206)

End of Session Two

SESSION THREE

Floor, Telephone, Heritage Live!™, Internet, Fax, and Mail Signature® Auction #1125
Friday, May 29, 2009, 6:00 PM PT, Lots 1406 - 2139
Long Beach, California

PATTERNS

**Narrow Bust Point Snow-PT32
PR64 1858 Indian Cent
Judd-212, Pollock-256, R.7**

- 1406 1858 Indian Cent, Judd-212, Pollock-256, R.7, PR64 NGC.** Snow-PT32. The rare Pollock subvariety with a narrow bust point. Most examples of Judd-212 (R.4 overall) are Pollock-263 with a broad bust point. Similar in design to the issued 1860 Pointed Bust, although the shield is broad and has an ornamented border. Struck in copper-nickel with a plain edge. Satiny and meticulously struck with undisturbed pastel orange-red and olive toning.
From The Frank M. Stirling Collection. (#11895)

Extremely Rare 1859 Judd-249 Half Dollar, PR61

- 1407 1859 Half Dollar, Judd-249, Pollock-288, High R.7, PR61 NGC.** The Paquet Liberty Seated with Fasces obverse. A homely, disproportionate Liberty is seated on a rock, shield at her lowered right (facing) hand and holding the top of a fasces in her left hand. An olive branch and three arrowheads lie—curiously so—under the shield. Thirteen stars encircle the rim. On the reverse, a cereal wreath encloses a large fraction 1/2 on two lines, with DOLLAR on a third line beneath. Struck in silver with a reeded edge. This piece is lightly hairlined, accounting for the grade, with brilliant silver surfaces and a trace of peripheral iridescence. Less than half a dozen are known.
Ex: Hans M.F. Schulman; M.H. Bolender, 10/1956. Schulman envelope included.
From The Frank M. Stirling Collection. (#12000)

Desirable 1859 Judd-251 Half, PR61

- 1408 1859 Half Dollar, Judd-251, Pollock-290, High R.7, PR61 NGC.** Both sides were designed by Anthony Paquet. The obverse shows a stiff figure of Liberty with right hand resting on a fasces, left hand on a shield. The reverse has 50 CENTS in the center and is surrounded by a wreath of cotton, tobacco, sugar cane, corn, wheat, and oak leaves. Struck in silver with a reeded edge. Lightly hairlined with brilliant silver surfaces. The obverse is lightly hairlined with a splash of peripheral rose, while the reverse has light champagne toning. Only four to six examples are known.
Ex: Hans M.F. Schulman; M.H. Bolender, 10/1954. Schulman envelope included.
From The Frank M. Stirling Collection. (#12006)

**PR65 Red and Brown Judd-272
1860 Half Eagle Pattern
Tied for Finest Certified**

- 1409 1860 Five Dollar, Judd-272, Pollock-320, Low R.6, PR65 Red and Brown PCGS.** The obverse features a bust of Liberty wearing a triple-star ornamented cap and a ribbon inscribed LIBERTY over her shoulder. The Paquet-engraved reverse displays a small heraldic eagle with the tail skewed to the left. This design also has a die blunder in that the V in FIVE is actually an upside-down A. Struck in copper with a reeded edge. Salmon-pink and cream-gray with deeper olive toning over the shield and scroll. This PR65 specimen is tied with one at NGC similarly graded, and there are none finer at either service (4/09).
Ex: FUN Signature (Heritage, 1/2006), lot 4554, which realized \$9,200. (#12079)

**Copper GOD OUR TRUST Judd-297
1862 Liberty Ten, PR65 Brown**

- 1410 1862 Ten Dollar, Judd-297, Pollock-355, Low R.6, PR65 Brown PCGS.** The obverse is of the regular eagle dies for 1862. The reverse is similar to the regular dies design but adds the motto GOD OUR TRUST on a scroll above the eagle. Struck in copper with a reeded edge. This is a pinpoint-sharp and glossy mahogany-brown specimen that can be identified by a nearly straight lintmark between star 1 and the date. Population: 6 in 65 Brown, 0 finer (4/09).
Ex: Long Beach Signature (Heritage, 6/2004), lot 9573. (#60447)

**1863 Indian Cent Pattern, Judd-299
Medal Alignment, PR65 Brown**

- 1411 1863 One Cent, Judd-299, Pollock-359, R.3, PR65 Brown NGC.** An experimental piece struck from the regular dies but without the L on the ribbon. Struck in bronze with a plain edge. Medallion alignment of the dies. This is a richly toned example whose surfaces are bathed in copper-orange and blue-green patina. This well preserved Gem would make an attractive addition to a high-grade Indian cent pattern collection. Census: 8 in 65 Brown, 4 finer (4/09). (#60454)

Extremely Rare 1863 Judd-344 Half Dollar, PR64

- 1412 1863 Half Dollar, Judd-344, Pollock-416, High R.7, PR64 NGC.** A regular issue 1863 obverse is paired with a regular issue (post-1866) With Motto reverse. Although dated 1863, this piece was likely struck in the early 1870s as part of a complete denominational set of 1863 With Motto patterns. Struck in aluminum with a reeded edge. An exquisite strike with wonderful medium gray proof surfaces. Only four or five examples of Judd-344 are known.
From The Frank M. Stirling Collection. (#60506)

**1867 Dollar in Brass, Judd-593, PR65
The Finest Certified of Five Known**

- 1413 1867 Dollar, Judd-593, Pollock-657, High R.7, PR65 NGC.** The obverse and reverse are struck from the regular issue dies for the 1867 Seated dollar, in brass with a reeded edge. According to USPatterns.com, only five examples are known in brass. This is the finest piece certified of this rarity, and it appears significantly finer than the Garrett specimen. The fields show exceptionally deep mirrors, which highlight the subtle iridescence that overlies the essentially problem-free surfaces. Naturally, much of the green color from the brass composition is evident beneath the multicolored toning.
From The Frank M. Stirling Collection. (#60805)

Luminous 1868 Three Cent Nickel, Judd-618, PR63

- 1414** 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR63 PCGS. Similar to the regular issue three cent nickel, but the devices on both sides are set in larger fields. In addition, the Roman numerals on the reverse are smooth and without ribs. Struck in nickel with a plain edge. Gold and lilac hints grace luminous nickel-gray surfaces that show faint, scattered hairlines. A pleasing example of this accessible pattern. (#60834)

Judd-623 1868 Five Cent, Cameo Gem Proof

- 1415** 1868 Five Cents, Judd-623, Pollock-692, Low R.6, PR65 Cameo NGC. The obverse is similar to the contemporary three cent nickel, although larger in scale and with a wide rim. The reverse has 5 CENTS in the center encircled by a laurel wreath, and IN GOD WE TRUST at the top in very small letters. Struck in nickel with a plain edge. A trace of gold toning visits this mostly brilliant Gem. Well struck and unabraded with a small mint-made strike-through on the upper right reverse field. *From The Frank M. Stirling Collection.* (#60840)

PR65 Judd-676 1869 Three Cent Nickel

- 1416** 1869 Three Cent Nickel, Judd-676, Pollock-753, R.4, PR65 PCGS. Similar to the circulating three cent nickel, but the portrait is reduced in scale and the denominational columns are plain rather than ribbed. Struck in nickel with a plain edge. Satiny and untuned with impeccably unabraded surfaces. Population: 8 in 65, 1 finer (4/09). (#60901)

**Incredible 1870 Three Cent Silver, Finest Known
Judd-796, Struck in Silver, High R.7
PR66, Perhaps Three or Four Exist**

1417 1870 Three Cent Silver, Judd-796, Pollock-883, High R.7, PR66 NGC. The obverse is the Seated Liberty design of William Barber, not the same as the production Seated Liberty coinage: Liberty faces left, with her right hand supporting a shield and simultaneously holding a ribbon reading LIBERTY. She bears an olive branch in her left hand, and a Liberty cap protrudes from behind. UNITED STATES is to the left, and OF AMERICA to the right. The date 1870 is in exergue. The same obverse design was also used for the Standard Silver five cent patterns of the year (Judd-809 through 814). On the reverse, somewhat mismatched in size, is the regular-issue reverse for the three cent silver. Struck in silver with a plain edge.

Among the various metals in which this pattern was recorded struck, the silver and aluminum pieces are apparently of the highest rarity. The present example is the sole example in silver with plain edge certified at NGC, and there is a single PR61 certified at PCGS. The famous Lemus Collection, Queller Family Collection Part Two that we auctioned in January had an example of the Judd-797 in silver with reeded edge, but lacked a Judd-796. In fact, this appears to be the first time that we have ever offered an example of this pattern since we began maintaining our Permanent Auction Archives, and we believe that likely only three or four pieces exist today. The only auction appearance we are aware of in the last 30-plus years is the Four Landmark Collections sale (Bowers and Merena, 3/1989, lot 14), a PR63 uncertified piece of which the catalogers wrote that "it is doubtful that as many as four or five specimens exist." On the present Premium Gem example, the bright, reflective fields on this incredible pattern enhance deep rose centers that turn blue around the margins.

From The Frank M. Stirling Collection. (#61039)

Pleasing 1870 Judd-815 Half Dime, PR64

- 1418** 1870 Half Dime, Judd-815, Pollock-904, Low R.7, PR64 NGC. William Barber's Seated Liberty design. She faces left, with a shield in her right hand and free-standing Liberty pole behind. The reverse is the same design used to coin contemporary regular-issue half dimes. Struck in silver with a reeded edge. About a dozen are known. This pleasing champagne-toned proof has splashes of deep iridescence. From *The Frank M. Stirling Collection*. (#61059)

Rare 1870 Judd-825 Standard Silver Dime
PR66, Ex: Lemus Collection

- 1419** 1870 Standard Silver Ten Cents, Judd-825, Pollock-915, Low R.7, PR66 NGC. A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. On the reverse 10 / CENTS is within an open wreath of cotton and corn, tied with a bow at the bottom. STANDARD—in small letters—is found at the edge above the wreath, and the rim is unusually wide. Struck in silver with a reeded edge.

Nine distinct classes of 1870 dime patterns are known, including seven Standard Silver issues such as the current offering. The first eight of the nine dime groups comprise six variations: silver, copper, and aluminum, each with either a reeded or plain edge. The result is a total of 51 different dime patterns dated 1870—more than any other year by a wide margin.

Attractive cobalt and azure hues intermingle with peach toning throughout. The average strike of this Premium Gem proof is redeemed by substantial eye appeal and remarkably clean surfaces. Pollock (1994) notes that the current offering weighs 38.4 grains and has a diameter of 0.703 inches. The die alignment is 170 degrees.

Ex: Bareford Collection (*Stack's*, 10/1981); Lemus Collection, Queller Family Collection Part Two (*Heritage*, 1/2009), lot 1727. (#61069)

Important 1870 Judd-831 Silver Dime, PR64

- 1420** 1870 Ten Cents, Judd-831, Pollock-921, High R.6, PR64 NGC. A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse is that of the regular dime issue for the year. Struck in silver with a reeded edge. Here is another important pattern issue with only about a dozen known. A delightful near-Gem, this fully mirrored proof has attractive gold and cobalt-blue toning. From *The Frank M. Stirling Collection*. (#61075)

Beautiful Silver PR66 Cameo
1870 Quarter, Judd-882
Single Finest NGC-Certified

- 1421** 1870 Quarter Dollar, Judd-882, Pollock-980, High R.7, PR66 Cameo NGC. A regular issue Motto reverse quarter is paired with a William Barber rendition of the seated Liberty. She faces left and holds an olive branch and a Federal shield. A Liberty pole appears to impale her arm. Struck in silver with a reeded edge. Thickly frosted motifs rise above the untuned mirrored fields. Ruby-red toning appears now and then near the rims. A looped die scratch near star 7 is as made, and the reverse die is lightly rusted, which suggests a post-1870 production. Census: 1 in 66 Cameo, 0 finer (4/09). From *The Frank M. Stirling Collection*. (#61126)
-

**Splendid 1870 Half Dollar
Judd-934, PR66 Cameo**

- 1422** 1870 Half Dollar, Judd-934, Pollock-1040, Low R.7, PR66 Cameo NGC. William Barber's seated figure of Liberty faces left on the obverse. Thirteen stars surround Liberty with the date below. She supports a shield with her right hand, and holds an olive branch in her left. A Liberty pole is behind the shield, and a scroll crossing the shield is inscribed LIBERTY in raised letters. The reverse is the type used for regular issue Seated halves. Struck in silver with a plain edge. Autumn-gold, rose-red, and aqua-blue congregate throughout the margins of this impressive Premium Gem. The strike is exemplary, and the preservation is unimprovable.
From The Frank M. Stirling Collection. (#61180)

PR62 1870 Standard Silver Half, Judd-945

- 1423** 1870 Standard Silver Half Dollar, Judd-945, Pollock-1073, Low R.7, PR62 NGC. The obverse design is a bust of Liberty facing right, with the legend UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty is wearing a cap ornamented with two stars, and a ribbon crossing her shoulder is inscribed LIBERTY in incuse letters. The reverse has the denomination 50 CENTS and the date 1870 within a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a reeded edge. A fully struck specimen with tan-gold and aqua-blue peripheral toning. The obverse has a few wispy hairlines.
From The Frank M. Stirling Collection. (#61191)

Judd-951 1870 Standard Silver Half, PR62

- 1424** 1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR62 NGC. This Standard Silver entry depicts Liberty facing right and wearing a coronet. UNITED STATES OF AMERICA adorns the obverse border in large letters, while IN GOD WE TRUST resides on a scroll on the obverse exergue. The date is relegated to the reverse beneath the denomination, inside an agricultural wreath. STANDARD is displayed above. Struck in silver with a reeded edge. Rich golden-brown and cobalt-blue toning embraces faintly hairlined surfaces.
From The Frank M. Stirling Collection. (#61197)

**Choice Proof Judd-951
1870 Standard Silver Half**

- 1425** 1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR64 NGC. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in silver with a reeded edge. A well preserved and delicately toned near-Gem that has a typical strike and a hint of cameo contrast. Census: 4 in 64, 1 finer (4/09). (#61197)

**Attractive 1870 Judd-982
Standard Silver Half, PR63**

- 1426** 1870 Standard Silver Half Dollar, Judd-982, Pollock-1102, Low R.7, PR63 NGC. Liberty wears a diadem and faces right. Her hair is tied up in a bun. The reverse features a cotton and corn wreath with the date below and 50 CENTS nestled inside. STANDARD SILVER is proclaimed across the periphery. Struck in silver with a plain edge. A wonderful proof with brilliant centers on each side, framed by attractive peripheral toning. Sharply struck with only a few grade-limiting hairlines.
*Ex: Hans M.F. Schulman; M.H. Bolender, 10/1955. Schulman envelope included.
From The Frank M. Stirling Collection. (#61228)*

Choice Cameo Proof Judd-997
1870 Standard Silver Dollar

- 1427** 1870 Standard Silver Dollar, Judd-997, Pollock-1128, Low R.7, PR64 Cameo NGC. Liberty is seated left with 13 stars arranged around the periphery and the date 1870 below. Liberty's left hand holds an olive branch, and her right hand supports a shield over which is draped a scroll inscribed LIBERTY. A free-standing Liberty pole is behind. On the reverse, the denomination 1 DOLLAR is centered within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a plain edge. Well struck and flashy with untuned centers and moderate autumn-gold, violet, and electric-blue across the margins. From The Frank M. Stirling Collection. (#61244)

1871 Indian Princess Dollar Struck in Silver
Judd-1138A, PR62, Perhaps Two Known

- 1428** 1871 Dollar, Judd-1138A, Pollock-1276, R.8, PR62 NGC. The obverse features Longacre's Indian Princess design surrounded by 13 stars and 13 stars on the American flag. The date, 1871 is below. The reverse depicts the regular issue die used for the Seated dollar. Struck in silver with a reeded edge. A remarkably rare pattern with only probably no more than two pieces known, according to USPatterns.com. This piece's brightness in part derives from having been cleaned, and in part from the deep, flashy mirrors in the fields. The surfaces are mostly brilliant with an occasional reddish-brown smudging of color, mostly seen on the right side of the obverse. Ex: King Farouk; Palace Collections of Egypt (3/1954), part of lot 1876; Abe Kosoff; private sale to Frank M. Stirling, 9/1955; by descent to the present owner. Includes Kosoff envelope with Palace Collection printing and card of sale to F.M. Stirling with Kosoff's signed attestation. From The Frank M. Stirling Collection. (#61399)

Brilliant 1871 Judd-1147 Dollar, PR63 Red

- 1429 1871 Dollar, Judd-1147, Pollock-1289, High R.6, PR63 Red NGC. The Longacre obverse, with a seated Liberty facing left, wearing an Indian headdress and supporting a Liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind her is a flag ornamented with 22 stars. Thirteen stars surround her, and the date, 1871, is at the bottom. The reverse is the die used for regular issue Seated Liberty dollars. Struck in copper with a reeded edge. Just over a dozen examples of Judd-1147 are known. This reflective proof has deep orange-mint color with traces of bright blue toning on the reverse. It is boldly defined and attractive. Census: 1 in 63 Red, 2 finer (4/09).
Ex: B. Max Mehl, 6/1956. Envelope included.
From The Frank M. Stirling Collection. (#81409)

Exceedingly Rare 1872 Two Cent Piece
Struck in 100% Copper, Proof Details
First Auction Appearance in Fifty Years

- 1430 1872 Two Cents, Judd-1183, R.8—Improperly Cleaned—NCS. **Proof Details.** The regular dies, struck in copper with a plain edge. The NCS label is marked 103.9 grains and 100% copper. Sometimes described as trial pieces, it is more likely that they were made for deliberate sale to collectors. USPatterns.com has the following note: "This is unlisted in Pollock. If any do exist, they are probably masquerading as a regular issue proof." The 10th edition of Judd records the last auction appearance as March 1955, in a Bolender sale.
This is possibly one of the most important patterns in the present sale. The pattern had been delisted in Pollock due to an absence of examples that had been tested for their composition; the present piece now marks the first auction appearance of the Judd-1183 variety in more than 50 years. Although lightly cleaned, the present example is clearly a brilliant proof, with light orange surfaces and a splash of blue toning on the obverse.
From The Frank M. Stirling Collection. (#61454)

Select Proof Judd-1276
1873 Trade Dollar Pattern

- 1431** 1873 Trade Dollar, Judd-1276, Pollock-1418, R.4, PR63 PCGS. A distinctive Trade dollar pattern with a small head of Liberty facing left set amid a large, open field with 13 stars at the margin. The reverse has the required legends mostly set in the middle of that side, surrounded by an olive wreath, and UNITED STATES OF AMERICA at the upper periphery. Struck in silver with a reeded edge. This design was included in six-piece sets sold by the Mint for \$30. This well struck specimen has dusky chestnut-brown toning and is devoid of contact marks. The left obverse field has a possible fingerprint fragment. (#61561)

1873 Trade Dollar Pattern, Judd-1293, PR63

- 1432** 1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR63 NGC. The design is similar to the issued Trade dollar, but Liberty's left hand rests on a globe, her right hand holds a staff, and plow handles sprout from behind the globe. On the reverse, the eagle clutches in its beak the banner bearing E PLURIBUS UNUM, while also holding a Federal shield in place of the usual olive branch. Struck in silver with a reeded edge. This is an attractive piece for the grade. The mirrored fields flash strongly through the scattered gray-rose toning seen on each side.

From The Frank M. Stirling Collection. (#61578)

Bright 1873 Trade Dollar Pattern
Struck in Silver, Judd-1310, PR61

- 1433** 1873 Trade Dollar, Judd-1310, Pollock-1453, R.4, PR61 NGC. The obverse centers around a seated figure of Liberty facing left, with 13 stars around and the date below. Liberty wears an Indian headdress and holds a Liberty pole, with cap. Her left hand rests on a globe with LIBERTY inscribed, and there are two flags behind. The reverse features a small eagle clutching three arrows and an olive branch. Below the eagle are the specifications 420 GRAINS and 900 FINE. Above the eagle is a banner inscribed E PLURIBUS UNUM and below is another banner reading IN GOD WE TRUST. The peripheral inscriptions are UNITED STATES OF AMERICA and TRADE DOLLAR. Struck in silver with a reeded edge. The central portions of each side are uncommonly bright from cleaning, and a ring of russet patina surrounds the margins.

From The Frank M. Stirling Collection. (#61596)

Attractively Toned 1873 Silver Trade
Dollar Pattern, Judd-1310, PR64

- 1434** 1873 Trade Dollar, Judd-1310, Pollock-1453, R.4, PR64 PCGS. A second example of this popular Trade dollar pattern that shows Liberty seated on the obverse with an Indian headdress on top of her head, Liberty pole and cap in her right hand, left hand resting on a globe, and conjoined flags behind. The reverse has a small eagle in the upper half with most of the statutory legends above and below, two of which are on scrolls. Struck in silver with a reeded edge. The obverse is richly toned in shades of blue and rose, while the reverse is golden-rose with patches of blue at the margin. The fields are deeply reflective, and overall this is a most attractive pattern. (#61596)

Splendid 1873 Trade Dollar
Judd-1315, PR64

- 1435** 1873 Trade Dollar, Judd-1315, Pollock-1458, R.4, PR64 NGC. The central figure of the obverse is a seated Liberty facing left, with 13 stars around and the date below. Liberty rests her left hand on a globe inscribed LIBERTY and holds a Liberty pole with cap in her right. Liberty is surrounded by two bales of cotton, a wheat sheaf, and a tobacco plant. The reverse features a small, defiant eagle standing on a shield. The eagle clutches three arrows and an olive branch. Below the shield is a scroll with the motto IN GOD WE TRUST. In the field below the scroll are the specifications 420 GRAINS and 900 FINE. The motto E PLURIBUS UNUM is in the field above the eagle. The peripheral inscriptions are UNITED STATES OF AMERICA and TRADE DOLLAR. Struck in silver with a reeded edge. The surfaces are splendidly toned in deep shades of rose and blue, and the colors are enlivened by brightness from the deeply reflective proof fields.
From The Frank M. Stirling Collection. (#61601)

Sailor Head 1875 Twenty Cent
Judd-1392, PR65 ★ Cameo

- 1436** 1875 Sailor Head Twenty Cents, Judd-1392, Pollock-1535, Low R.6, PR65 ★ Cameo NGC. William Barber's "Sailor Head" of Liberty dominates the obverse. The reverse has a shield that emphasizes the denomination with a large 20. Arrows, leaves, and a glory of rays ornament the shield. Struck in silver with a plain edge. Magnificently toned (in cobalt-blue, ruby-red, and pumpkin-orange, with the deepest shades at the borders). The lovely patina undoubtedly elicited the Star designation from NGC, and the considerable contrast remaining more than merits the Cameo appellation. Fully struck and virtually pristine.
From The Frank M. Stirling Collection. (#61699)

Bright 1875 'Liberty at the Seashore'
Trade Dollar, Judd-1426, PR62

- 1437** 1875 Trade Dollar, Judd-1426, Pollock-1569, High R.7, PR62 NGC. A seated figure of Liberty faces left at the seashore, with 13 stars ringing the rim and the date 1875 below. Liberty holds an olive branch and rests her left hand on a globe reading LIBERTY, and two flags and a sheaf of wheat flank her. A steamship with sails appears in the water, with sails billowing in one direction and steam blowing in the opposite direction. A scroll above the date reads IN GOD WE TRUST. The reverse is that of the as-issued Trade dollar, Type One, produced from 1873 through 1876, with berry below the eagle's claw. Struck in silver with a reeded edge. At least five examples of this pattern are known. This piece has bright surfaces with hairlines. Light, scattered toning is seen around the margins on each side.
Ex: B. Max Mehl, 6/1956. Envelope included.
From The Frank M. Stirling Collection. (#61733)

1875 Trade Dollar Pattern Struck in Copper
Judd-1430, R.8, PR66 Red and Brown
Single Finest Certified

1438 1875 Trade Dollar, Judd-1430, Pollock-1573, R.8, PR66 Red and Brown NGC. Both obverse and reverse are the same as the regular-issue Trade dollar of 1875, but these are struck in copper with a reeded edge. The Judd 10th edition lists the pieces are die trials, but USPatterns.com notes "it is likely that this was deliberately struck for sale to collectors as part of complete off-metal sets. These were struck with the type I reverse with the berry under the eagle's left talon." Aluminum examples are also known of the issue (Judd-1431), both listed as R.8.

While the surfaces have mellowed considerably, there is considerable mint red that remains just beneath the brown seen over most of each side. The devices on the obverse are especially notable with a bright outline of mint red around the figure of Liberty. An exceptionally well-preserved, high grade Trade dollar pattern.

This example in PR66 Red and Brown condition is the only example of Judd-1430 in any grade certified at NGC. PCGS has certified one example each in PR65 Red and Brown and PR65 Red (4/09).

From The Frank M. Stirling Collection. (#71737)

1876 'Liberty at the Seashore' Dollar Struck in Silver, Judd-1467 PR66, Tied for Finest Known

1439 1876 Dollar, Judd-1467, Pollock-1618, High R.7, PR66 NGC. The obverse shows Liberty seated on the seashore, holding an olive branch, with conjoined flags behind her. A steamship is in the distance. Liberty's left hand rests on a globe inscribed LIBERTY, although the word is rather weak on all examples we have seen. Between the base and the date, IN GOD WE TRUST is presented in a cartouche. The reverse is rather plainly laid out, with ONE DOLLAR in the center, surrounded by an olive wreath. UNITED STATES OF AMERICA rings the upper margin and E PLURIBUS UNUM in small letters at the bottom reverse. Struck in silver with a reeded edge.

Three of the five pieces identified in the following roster were struck on Trade dollar planchets, suggesting that this pattern variety was intended as a Trade dollar pattern, even though the reverse inscription suggests otherwise. The Judd-1467, 1468, and 1469 patterns should be included among the many U.S. Trade dollar patterns produced in the 1870s. It is said (by Adams and Woodin) that just five were struck, and we list exactly five different examples below. NGC has certified five submissions, including this and another PR66, a PR65 Cameo, and a PR64. PCGS has certified two submissions, a PR63 and a PR64.

This Premium Gem is tied with the King Farouk specimen as the finest certified, and its aesthetic desirability suggests that it is the single finest known example. Both sides have fully mirrored fields and lustrous devices, created a desirable cameo contrast beneath the gorgeous gray-gold surfaces. The borders have delightful blue and iridescent peripheral toning. The overall appearance is entirely original and pristine, easily a coin for those who desire the best available quality.

We are able to account for the following examples:

1. PR66 NGC. Prior provenance unknown. **The present example.**

2. PR66 NGC. U.S. Mint; W.H. Woodin; Waldo Newcomer; F.C.C. Boyd; King Farouk (Sotheby's, 2/1954), lot 1962; Dr. J.H. Judd (Abe Kosoff, 1962 Illustrated History), lot 485; Bowers and Merena (11/1985), lot 1098; Novoselsky; Kagin's; Heritage (5/2001), lot 9478; Superior (10/2001), lot 2654; Heritage (1/2007), lot 1527. 419.7 grains per Pollock. Plated in Pollock.

3. PR64 Cameo PCGS. Bowers and Merena (11/1993), lot 1406; American Numismatic Rarities (9/2003), lot 80; American Numismatic Rarities (6/2004), lot 1679. 419.9 grains per Bowers and Merena.

4. PR63 PCGS. Julian Leidman; Rogers M. Fred, Jr. Collection (Bowers and Merena, 11/1995), lot 2305; Heritage (5/2005), lot 8338; American Numismatic Rarities (1/2006), lot 926. 419.7 grains per Bowers and Merena. Plated in the 10th edition of the Judd reference.

5. Proof. Lester Merkin (9/1968), lot 466; Lester Merkin (6/1971), lot 892. Plated in both catalogs and different from any of the others.

A. Proof. Abner Kreisberg (6/1965), lot 3718; Abner Kreisberg (11/1965). Unplated.
From The Frank M. Stirling Collection. (#61789)

**Fiery 1876 Judd-1476 Copper
Trade Dollar, PR65 ★ Red Cameo
Possibly Unique/Two Known**

1440 1876 Trade Dollar, Judd-1476, Pollock-1629, R.8/Unique(?), PR65 ★ Red Cameo NGC. The regular issue Type Two obverse and reverse design for the Trade dollar that first appeared in 1876. Struck in copper with a reeded edge. NGC incorrectly calls this Mint State, and as a result it does not appear in their *Census Report*. In fact, there is no example of Judd-1476 on either the NGC or PCGS reports.

According to USPatterns.com, there are two known examples of Judd-1476. They include this piece and the Farouk specimen that most recently appeared for sale in Paramount's 1972 ANA auction. That 1972 ANA auction (lot 1014) was the last time any example of Judd-1476 has appeared for public competition, and it is unlisted there but listed as a Gem proof, Ex: Farouk-Bolender. Lot 1955 in the Farouk sale was a two-piece lot including this pattern variety along with an example of Judd-1464, and only the latter example was plated in that catalog.

The fiery orange surfaces on each side exhibit deeply mirrored fields, highly lustrous devices, and only slight mellowing on the design high points. An extraordinary example with pristine surfaces with good contrast and extraordinary appeal, leading to the NGC Star and Cameo designations that are assigned to this Gem.

A further review of catalog descriptions may prove instructive. If this example matches the 1972 ANA specimen, then the variety is unique. Otherwise, there are just two pieces known. The present piece is undoubtedly the finest existing 1876 copper Trade dollar, an amazing, fiery red example. The collector of silver dollar or Trade dollar patterns should not miss such an opportunity, as there may never be another chance. The underbidder in the 1972 ANA auction has had to wait 37 years for another chance—if he or she is even still living. The present-day specialist should learn from numismatic history and prepare in advance for a long battle to win this piece at the upcoming Long Beach auction.

Extremely Rare 1877 Judd-1543
Copper Dollar, PR65 Red and Brown

1441 1877 Dollar, Judd-1543, Pollock-1716, High R.7, PR65 Red and Brown NGC. This unusual design shows the obverse of Liberty facing left, her hair bound by a coronet. On the extreme left side of the coronet there is a single bead that is isolated from the others. The motto is in small letters above the figure of Liberty and the date is below; 13 stars ring the left and right margins. The reverse has 1 DOLLAR in the center surrounded by a wreath of corn, wheat, and cotton with UNITED STATES OF AMERICA above and E PLURIBUS UNUM below. Struck in copper with a reeded edge.

This amazing Gem is almost entirely brilliant with orange mint luster on both sides with lovely accents of jade and violet. Both sides possess exceptional aesthetic desirability. A few tiny specks appear on Liberty's face and neck, but otherwise the surfaces are pristine.

We currently have records of just four known examples according to the following roster:

1. **PR65 Red and Brown NGC.** The present specimen.
2. **PR65 Red and Brown NGC.** Abner Kreisberg (11/1970), lot 1308; Harry W. Bass, Jr. (Bowers and Merena, 5/1999), lot 1274; Heritage (8/2001), lot 8388.
3. **Proof 64 Red and Brown PCGS.** G.D. Woodside; Clarence Bement (Henry Chapman, 5/1916); Waldo Newcomer; King Farouk (Sotheby's, 2/1954), lot 1969; Dr. J. Hewitt Judd; Abe Kosoff; Heritage (1/2006), lot 3710. The original Judd plate coin.
4. **PR60, Cleaned.** Goliad Corporation; Bowers and Ruddy (7/1981), lot 282.
From The Frank M. Stirling Collection. (#71887)

Probably Unique 1878 Judd-1553
Copper Dollar, PR64 Red and Brown

1442 1878 Morgan Dollar, Judd-1553, Pollock-1730, Unique(?), PR64 Red and Brown NGC. The obverse appears to be identical to the regular issue 1878 Morgan dollar. Compared to a proof 1878 7 TF Morgan, both obverse dies have exactly 148 dentils, and all other details appear to be the same. The reverse is similar to the regular issue reverse, with minor differences. The olive branch has nine leaves in a slightly different layout, with other differences in the arrows and slimmer wings. Note the first A in AMERICA, distant from the wing on this pattern, and touching the wing on the regular issue. Berries are in different clusters and leaves in the wreath are in different groups. However, this 1878 Morgan dollar pattern is a closer match to the regular design than any others of the year. Struck in copper with a reeded edge.

This pattern is almost certainly unique, as the only known record of an example dates to the King Farouk Sale in February 1954, where lot 1989 was described as "1878, a similar pattern in copper, A.W. 1561 A. Extremely Fine, *prettily toned and probably unique.*" Unfortunately, like so many of the King Farouk coins, that lot was unplated in the catalog. However, the grade of Extremely Fine and the description of "prettily toned" seem counterintuitive. Many of the Farouk patterns were conservatively graded Extremely Fine, while today they are known to be considerably nicer. Given the aesthetic desirability of this piece and the lack of any other auction records for the variety, we feel strongly that the present piece is the same as the Farouk coin, remaining unique. *Only this single example has been certified by NGC, and PCGS has never graded a Judd-1553.*

This amazing pattern is mostly brilliant, with rich orange luster and lovely iridescent toning. The surfaces are exceptional, and the strike is bold. There is little evidence of spotting or other blemishes. The appearance or reappearance of a pattern that is believed unique and has remained hidden for more than half a century is nearly unprecedented. This piece will appeal directly to pattern specialists and advanced Morgan dollar collectors. The connoisseur who desires the rarest numismatic specimens can do no better than the present piece, which resides on a short list of unique coins.

From The Frank M. Stirling Collection. (#71914)

**Extremely Rare, Finest Known PR62
Judd-1554A 1878 Silver Dollar**

- 1443** 1878 Silver Dollar, Judd-1554A, Pollock-1745, R.8, PR62 NGC. Similar to the "common" R.4 Judd-1554, but there are no stars on the reverse near 4 and 8 o'clock. The layout of the legends also differs slightly, with the B in PLURIBUS beneath the E in STATES. Struck in silver with a reeded edge. There is no listing for Pollock-1745 in his 1994 reference, but the author left a number for it before his copper Pollock-1746 struck from the same dies. USPatterns.com states two are known, the one photographed in the Judd 10th edition and another auctioned by Bowers and Merena in May 1994 as lot 1069. The present piece matches neither of those examples and is thus the third known. The other two grade PR40 or so, per USPatterns.com. This example has light gold toning and moderately abraded fields. A good strike with only minor softness at the centers.
From The Frank M. Stirling Collection. (#12234)

Pleasing 1878 Judd-1563 Goloid Dollar, PR62

- 1444** 1878 Goloid Metric Dollar, Judd-1563, Pollock-1754, Low R.6, PR62 PCGS. Liberty faces left and wears a cap with the legend LIBERTY in incuse letters. The reverse has the alloy composition and weight within a circle of 38 stars. Struck in goloid alloy with a reeded edge. Housed in a green label PCGS holder, this lightly toned example shows a hint of cameo contrast with excellent surfaces for the grade. Population: 6 in 62, 8 finer (4/09). (#61925)

**Sensational 1879 Washlady Dollar Pattern
Struck in Copper, Judd-1604, PR65 Red**

- 1445** 1879 Washlady Dollar, Judd-1604, Pollock-1799, High R.6, PR65 Red NGC. Liberty's lush hair is piled atop her head, with IN GOD WE TRUST above and 13 stars around. On the reverse a perched eagle holds an olive branch with seven leaves, and three arrows pass behind the wing. UNITED STATES OF AMERICA and ONE DOLLAR are at the rim. The Latin motto is in a wide inner arc above the eagle. Struck in copper with a reeded edge.
- NGC has certified five examples of Judd-1604, and this specimen is the only full Red example they have graded. PCGS has graded six pieces, including one PR65 Red. The PCGS PR65 Red example appeared in David Akers' session of Auction '89, and the color of that coin is mellow compared to the present specimen. The coin offered today has fewer carbon specks and lacks the fingerprint appearance of the other Gem. Considering all of these aspects, we feel that the present Gem proof Washlady dollar is the finest known with full mint color. It is also more desirable than the few numerically superior pieces with Red and Brown or Brown color.
- A faint patch of lilac is evident at the lower obverse, but the balance of the obverse and all of the reverse have blazing orange luster with frosty devices and fully mirrored fields. A single dark toning splash left of star 10 will serve those who seek numismatic pedigrees.
Ex: 1959 ANA Convention Auction. Envelope from the auction included.
From The Frank M. Stirling Collection. (#81982)

**Impressive 1882 Shield Earring Half Dollar
Struck in Copper, Judd-1701, PR62 Red**

- 1446 1882 Shield Earring Half Dollar, Judd-1701, Pollock-1903, R.7, PR62 Red NGC.** George Morgan's popular design features Liberty wearing a broad band holding her hair tightly to her head. The eponymous Shield Earring is seen dangling from Liberty's ear in the center obverse. The reverse shows a defiant eagle with raised wings. Struck in copper with a reeded edge. This is one of Morgan's most popular pattern designs and is one highly sought after by pattern collectors. The Shield Earring is one of the most popular designs in U.S. patterns, along with other notables such as the "Washlady" and "Amazonian" designs. The surfaces are bright red with occasional violet highlights, and light hairlines are present in the fields.
Ex: Hans M.F. Schulman; M.H. Bolender, purchased 10/1955. Envelopes included.
From The Frank M. Stirling Collection. (#82107)

**1883 Liberty Nickel Pattern, Judd-1710
Brilliant PR67 Cameo**

- 1447 1883 Liberty Head Five Cents, Judd-1710, Pollock-1914, R.5, PR67 Cameo NGC.** The obverse is similar to that used on regular issue 1883 Liberty nickels, but the legend UNITED STATES OF AMERICA has been substituted for 13 stars around the periphery. The reverse is inscribed with 50 N. 50C. centered within a wreath of corn and cotton. FIVE is above, CENTS is below. Struck in nickel with a plain edge. This is a stone-white Superb Gem that has a razor-sharp strike, immaculate preservation, and a few mint-made strike-throughs near the rims. (#62127)

R.8 1942 Experimental Alloy 1942 Cent
Judd-2079, Struck in Aluminum, PR66

1448 1942 Cent, Judd-2079, Pollock-2076, R.8, PR66 PCGS. Regular die trial issue but struck in aluminum with a plain edge. Struck on a planchet that is almost twice as thick as a regular cent, although this is not evident in the PCGS encasement.

The pattern cents from 1942 are divided into two groups, those of the regular issue design as this piece and those modeled after the Colombian two centavo. The regular design patterns are far rarer as a group but limited to only three compositions: aluminum, zinc-coated steel, and white metal. Those modeled after the two centavo are far more available as a group and seen in a wide variety of compositions, but some are equally as rare as the regular issue die trials.

The Judd book (10th edition) makes an interesting comment about these pieces: "Regular 1942 Lincoln cent dies are said to have been used to strike coins in pure zinc, copper and zinc, zinc-coated steel, aluminum, copperweld, antimony, white metal, and lead, among other materials." If this is accurate, then there are many other experimental alloy cents that remain to be discovered, as only three alloys are known today.

An interesting story is related in Andrew Pollock's pattern reference on page 390: "**2076. Aluminum. Plain Edge.** Rarity-8. Reportedly, an example was received in change by an ice dealer in the Annapolis, Maryland area, presumably in the 1940s." We cannot say for certain if this is that particular experimental striking, but we doubt it since the surfaces of this piece are so free from problems or contact marks. This is an extraordinary piece. Each side is bright, and there are no signs of oxidation. The fields have a pronounced mirrorlike appearance, and there are light flow lines evident on the reverse. The obverse is slightly convex, and the reverse slightly concave. This is essentially a perfect coin with no observable marks on either side.

A considerable body of information and speculation exists about this piece on a 12-page CU message board from January 2008 at http://forums.collectors.com/messageview.cfm?catid=26&threadid=628993&highlight_key=y&keyword1=aluminum. The coin was placed in our March auction that year, but then pulled in order to be resubmitted. The results from PCGS showed that it was not white metal as originally thought, but aluminum. The weight of the piece is 1.563 gm, about half the normal 3.11 gm. When the coin was resubmitted to PCGS and analyzed, its composition came back: aluminum 98.0%, silicon 0.7%, iron 0.6%, silver 0.5%, magnesium 0.4%. In July of last year Roger Burdette hypothesized:

"The assay: Al 98; Si 0.7; Fe 0.6; Ag 0.5 and Mg 0.4 is very significant. Although most of the piece is aluminum, the other elements are not impurities. Someone was making a deliberate attempt to test a harder, more durable alloy than plain aluminum. Aluminum-silver alloys can be extremely hard [although they are also extremely difficult to produce and usually require an atmosphere free of oxygen] and the quantity of silver necessary is small. The US Mint experimented with them as far back as the early 1860s, and James Ross Snowden conducted other experiments in about 1885. This assay suggests we will eventually identify many other experimental alloys, currently unknown, based on aluminum."

Burdette went on to state that even though the assay totals 100.2%, implying there is a 0.2% rounding error, "the important thing is that silver should not be present [unless the Mint were purposely trying to produce this difficult alloy], even if the cheapest aluminum scrap were used for experiments. (Fe [iron] and Si [silicon] are common impurities.)"

This is one of the most fascinating experimental pieces to enter the market in several years. The pattern coinage of 1942-1943 is definitely an underresearched area of 20th century U.S. numismatics. This problem will be resolved, but not for several years, when Burdette completes his research on a book he is writing on the subject.

Pollock-4060 General Motors Pattern Cent
MS62 Red and Brown

1449 (Circa 1967) General Motors Pattern Cent, Pollock-4060, MS62 Red and Brown NGC. General Motors manufactured a high production coinage press, but it proved too costly to maintain, and its development was eventually abandoned. The obverse is designed much like the Lincoln cent, with legends in similar positions. The legends are nonsense, to avoid legal entanglements. Struck in copper with a plain edge. Control code L-13, with the L entered inverted. Close to full red, although the lower reverse displays minute carbon.

'Nonsense' General Motors Pattern Cent
Pollock-4060, MS63 Red and Brown

1450 (Circa 1967) General Motors Pattern Cent, Pollock-4060, R.5, MS63 Red and Brown NGC. An experimental striking on the General Motors roller press with the head of Liberty facing left on the obverse, a wreath on the reverse, and nonsensical legends on each side. Control code M-1. Struck in copper with a plain edge. The lustrous orange-red surfaces have mellowed to steel-gray on the portrait, with minor carbon on the right obverse field.

**‘Nonsense Prototype Disk’ Pair, MS66
With Martha Washington Design**

1451 (1999) Sacagawea Prototype Composition Disks MS66 NGC The composition disks were resurrected Martha Washington dies used earlier in 1965 for similar composition tests. In 1999 as the Mint was preparing for the new Sacagawea dollars, they again issued prototypes.

An accompanying letter from the Department of the Treasury explains the new disks that carried no actual denomination:
“The Purpose of these prototype alloy samples is to field test two (2) alloy systems that the Mint has prepared for the new dollar coin. We need to get feedback from the industry relative to any tokens, foreign coins, or any other materials that may result in slugging problems. (In other words, these samples should not be accepted in any of your current electronic coinage discrimination channels.)”

The two pieces offered here are the “N” and “O” composition test disks sent out by the Mint. We believe that this is the first time both alloy systems have been offered together. These test disks are included in the 10th edition of the Judd reference as Judd-2184 to Judd-2187, although the numbering may require revision.

(1999) ‘N’ Composition Test Disk MS66 NGC. Plain Edge. This disk has a composition of 77% copper, 20% zinc, and 3% nickel. It has the letter N etched twice in the obverse field for identification purposes. The brilliant yellow surfaces have satiny luster.

(1999) ‘O’ Composition Test Disk MS66 NGC. Plain Edge. This disk has a composition of 73% copper, 24% zinc, 2% nickel, and 1% manganese. There are no letters etched in the fields. Fully brilliant lemon-yellow with prooflike surfaces.

The 10th edition of Judd records the following:

Judd-2184 Intermittently Reeded Edge. Copper-nickel clad copper.

Judd-2185 Plain Edge. Manganese-brass coated copper-clad metal.

Judd-2186 Intermittently Reeded Edge. Manganese-brass coated copper-clad metal.

Judd-2187 Reeded Edge. Manganese-brass coated copper-clad metal.

Neither of the two pieces in the present lot exactly matches any of the four descriptions in the Judd reference. A review of the Judd numbers for these various issues is probably in order. (Total: 2 coins)

GOLD DOLLARS

- 1452 1849 No L MS64 NGC.** A moderately prooflike near-Gem of this scarce introductory design subtype. Longacre's initial L was soon added to the hub, then the star layout was modified, then the reverse wreath was closed, all within the year 1849. Well struck and flashy with a few delicate grazes on the left obverse field. (#7501)

Incredible 1849 Small Head Gold Dollar, MS66

- 1453 1849 No L MS66 PCGS.** This is a remarkable and sharply struck example of the Small Head design of 1849 gold dollars, the first gold dollar variety struck in May of that year. The debut subtype, without Longacre's initial on the obverse, is elusive. Walter Breen recorded in his *Complete Encyclopedia* that only 1,000 of these pieces were struck on May 8. The obverse is also noteworthy for three prominently repunched stars, two of which are beneath the bust. This Premium Gem specimen is among the finest certified. It has rich honey-gold luster with gorgeous eye appeal. The upper portion of the reverse die is shattered, suggesting that this was one of the final examples of this variety produced. Population: 7 in 66, 2 finer (4/09).

Ex: ANA National Money Sale (Heritage, 3/1998), lot 6318; Long Beach Signature (Heritage, 2/2007), lot 4192. (#7501)

- 1454 1849 Open Wreath MS64 NGC.** Breen-6004. Close stars, thin date numerals. In his 1988 *Encyclopedia*, Breen assigns seven different entries to the 1849 gold dollar, due to several minor changes in subtype. This lustrous canary-gold near-Gem has a good strike, and the fields are only lightly abraded. (#7502)

Closed Wreath 1849 Gold Dollar, MS66 Tied for Finest Graded at PCGS

- 1455 1849 Closed Wreath MS66 PCGS. CAC.** A shining example with heavy mint frost and lovely canary-gold toning across both sides. The design details are produced with astonishing crispness and clarity. Diagonal die striations cover the flashy, semiprooflike reverse. A beautifully preserved Premium Gem example of this first-year gold dollar issue. Population: 4 in 66, 0 finer (4/09). (#7503)

- 1456 1849-D—Obverse Scratched, Improperly Cleaned—NCS. AU Details.** Variety 1-A. A modestly worn representative of this initial Dahlonega gold dollar issue. Minor scratches are visible in the left obverse field, and the yellow-gold surfaces are glossy from a past cleaning. (#7507)

Sharply Struck 1849-D Gold Dollar, MS61

- 1457 1849-D MS61 NGC.** Variety 1-A. The mintmark is slightly left of center below the ribbon knot. The bright yellow-gold surfaces of this D-mint gold dollar give off a slight greenish cast and exhibit sharply struck design elements. Both sides display a fair amount of luster, the most potent of which resides in the recessed areas. A couple of minute contacts exist on the reverse. An excellent type coin. (#7507)

- 1458 1851-C AU58 NGC.** Variety 3. Light yellow-gold color with considerable radiance. A well struck near-Mint representative of this popular Charlotte gold dollar issue. (#7514)

- 1459 1851-C AU58 NGC.** Variety 1. This Charlotte Mint gold dollar was struck during the halcyon days for the denomination, before a reduction in silver content returned the half dime through half dollar to circulation. A generally lustrous and alertly struck slider whose surfaces have only one mark of consequence, on the A in DOLLAR. (#7514)

Appealing 1851-C Gold Dollar, MS61

- 1460 1851-C MS61 NGC.** Variety 1. Lightly toned and attractive, this Uncirculated example is from the most easily available of the Charlotte Mint gold dollars, making it an appealing representative for a type collection. Boldly struck, nicely preserved, and free of distracting marks, with a slightly subdued appearance on both sides. (#7514)
- 1461 1851-O MS63 PCGS.** Strong yellow-gold luster in the centers with a shift to orange at the margins. A pleasing Select example of this ever-popular O-mint gold dollar issue. Population: 35 in 63, 59 finer (4/09). (#7516)
- 1462 1852 MS64 PCGS.** Sharply struck with satiny butter-yellow surfaces. This near-Gem would fit well in a date set or a similarly graded type set. Great eye appeal. (#7517)
- 1463 1853 MS64 NGC.** Peach-gold patina is imbued with hints of mint-green and light tan, and a solid strike imparts sharp definition to the design elements. A few minuscule marks deny Gem status. (#7521)

Luminous Mint State 1853-C Gold Dollar

- 1464 1853-C MS60 NGC.** Variety 1. The Charlotte Mint concentrated on half eagle coinage, and the gold dollars and quarter eagles usually had meager mintages. The 1853-C gold dollar mintage was typical in that only 11,515 pieces were coined. Few were set aside, and most survivors lack the luster extent of the present honey-gold and straw-gold example. Unmarked and minutely granular with a hint of strike incompleteness on the hair near the ear and shoulder. Census: 6 in 60, 38 finer (4/09). (#7522)

Lustrous Gem 1853-O Gold Dollar

- 1465 1853-O MS65 PCGS. CAC.** This New Orleans Gem has scintillating luster and rich lemon-gold toning. Sharply struck save for minor softness on the 3 in the date. The fields exhibit only a few inconsequential grazes. Exemplary quality for this mint and type. Housed in a first generation holder. Population: 4 in 65, 2 finer (4/09). (#7524)

Brilliant 1854 Type One Gold Dollar, MS66

- 1466 1854 Type One MS66 NGC.** Both the 1854 Type One and Type Two gold dollars were minted in generous quantities in Philadelphia, totaling more than 1.6 million pieces between the two types. This attractive piece shows evidence of die clashing on each side, more prominently on the reverse, and both dies show evidence of fatigue in the form of metal flow lines. Die cracks join a few of the star points with the obverse rim. The poststrike preservation, however, is as exemplary as the eye appeal is superlative. Census: 26 in 66, 7 finer (4/09). (#7525)

- 1467 1854-S AU58 NGC.** The 1854-S quarter eagle and half eagle are legendary rarities, and most collectors have never seen an example of either. Fortunately, collectors in search of first-year San Francisco coinage can afford the 1854-S gold dollar, although its mintage of 14,632 pieces made it scarce to begin with. This well struck orange and green-gold piece has ample luster and a few minor abrasions. (#7527)

Beautiful MS62 1854 Type Two Gold Dollar

- 1468 1854 Type Two MS62 ANACS.** A wonderful representative of the Longacre small Indian Head gold dollar, also known more generically at the Type Two gold dollar. This piece is highly lustrous with brilliant yellow mint frost and sharp design details. It would fit equally well in a date set or a Mint State type set. (#7531)

Desirable Select 1854 Type Two Gold Dollar

- 1469 1854 Type Two MS63 NGC.** While the 1854 Type Two gold dollar is readily available in grades through MS61, Select and finer pieces are noticeably more elusive. This winning MS63 survivor is well-defined with rich yellow-gold luster that shows a touch of satin. Significant clash marks are present on each side. (#7531)

Bold 1855 Gold Dollar, MS64

- 1470 1855 MS64 PCGS.** This boldly detailed near-Gem has rich orange-gold luster with frosty mint brilliance. The strike is typical of nearly all known examples with the 8 weaker than the other digits. Light clash marks on each side are typical of the Type Two design, especially those dated 1855. (#7532)

Attractive 1855-C Gold Dollar, XF40

- 1471 1855-C XF40 PCGS.** Variety 2. Struck from moderately clashed dies, with minute traces of die rust evident near the peripheries. A shallow planchet flaw resides just to the right (facing) of the large denominational 1 on the upper reverse. Noticeably worn on the obverse high points, but free of detracting marks on both sides. Population: 20 in 40, 69 finer (4/09). (#7533)

Exceptional 1855-C Gold Dollar, MS62

One of the Four Finest Certified

1472 1855-C MS62 NGC. Variety 2, newly discovered in 2008 per Douglas Winter, *Gold Coins of the Charlotte Mint*, third edition (2008). This variety was discovered by Heritage cataloger Brian Koller in 2003. It is attributed by the final date digit almost entirely below the right base of the A in DOLLAR, and all digits being well struck; the 8 in Variety 1 is weakly struck.

The Type Two gold dollar (Indian Princess Small Head, 1854-1856) was minted in Charlotte for one year only (9,803 pieces), and is eagerly sought by date and type collectors alike. Survivors are usually seen in Very Fine through About Uncirculated. Mint State coins are very rare. Indeed, NGC and PCGS have certified only 16 examples in Uncirculated, none finer than MS62 (4/09).

In addition to its Mint State rarity, the 1855-C is plagued by mint-made production problems. First, it is poorly struck, especially in Liberty's hair, the word LIBERTY, and on the lower wreath. Second, planchet quality is extremely poor, usually exhibiting roughness. Finally, clash marks are common, and the overall eye appeal is usually poor. These problems lead Winter to say: "The quality-conscious collector of Charlotte coinage will have to relax his standards when it comes to this issue."

The current MS62 possesses yellow-gold surfaces with pleasing luster. The strike is somewhat above average for the issue. While the hair at the temple is soft, the remaining elements of the obverse portrait are comparatively sharp. The reverse design features are crisp, the sole exception being the wreath bow and adjacent leaves. Light planchet roughness occurs in the lower left obverse quadrant but fortunately does not significantly interfere with the clarity of the letters in UNITED. A couple of planchet flakes on the cheek and neck and some swelling under the chin do not detract, nor do some light handling marks in the reverse field. In sum, this coin displays better-than-average eye appeal for the issue and designated grade, and is exceptional as such. Interested bidders on this rare coin thus need pay little heed to Winter's earlier-mentioned admonition. Census: 4 in 62, 0 finer (4/09). (#7533)

1473 1855-O AU53 ICG. Fantastic eye appeal for this popular O-mint Type Two gold dollar issue. Bright yellow-orange luster and crisply detailed devices show only minor evidence of wear.(#7535)

1474 1855-O AU55 NGC. Straw-gold and satiny with pale rose accents on the high points. Both sides show noticeable, even wear from light circulation. This issue is reasonably available at most grade levels, but becomes somewhat elusive in Mint State. The 1855-O is the only Type Two gold dollar struck at the New Orleans Mint.(#7535)

Scarce 1855-O Gold Dollar, AU58

1475 1855-O AU58 NGC. The yellow-gold surfaces of this near-Mint State New Orleans representative exhibit luster in the recessed areas. The design elements are generally well defined, except for the usual softness in the hair at the temple and the 8 in the date. A few minute circulation marks do not detract. The 1855-O is difficult to acquire in Mint State.(#7535)

Key-Date 1856-D Gold Dollar, AU58

1476 1856-D AU58 NGC. Variety 8-K, the only known. The 1856-D is one of the keys to the series, and always in demand. Douglas Winter (*Gold Coins of the Dahlonega Mint*) estimates 80 to 90 pieces are known. It is most often seen in VF and XF grades. Winter writes that it is extremely rare in the higher AU levels of preservation and is one of the rarest Dahlonega issues in Mint State.

This near-Mint specimen retains a good amount of luster on its yellow-gold surfaces. The overall design impression is relatively sharp, except for the usual softness in the hair, the U of UNITED, and the 5 in the date. Both sides are remarkably clean. Census: 17 in 58, 6 finer (4/09).(#7543)

Choice XF 1857-C Gold Dollar

1477 1857-C XF45 PCGS. Variety 1. Jeff Garrett and Ron Guth, authors of the *Encyclopedia of U.S. Gold Coins*, have pointed out the difficulties associated with this issue, the first Type Three gold dollar produced at the Charlotte Mint. Production quality was poor, and high grade pieces are rare. This Choice XF example is relatively attractive for the issue, and the surfaces are quite lustrous and pleasing, with only a few of the mint-made problems that these coins typically possess. Post-striking defects are likewise quite minor for the grade. Population: 32 in 45, 57 finer (4/09).(#7545)

Desirable 1859-C Gold Dollar MS62

1478 1859-C MS62 NGC. Variety 1. The final Charlotte gold dollar issue, limited to a mintage of only 5,235 pieces. A smooth and luminous tan-gold piece, struck on a minutely granular flan. The centers show only minor strike incompleteness, and luster overwhelms the legends and wreath. High quality for this North Carolina facility, which never received equipment or funding equivalent to the "mother" Philadelphia Mint. Tied for the finest certified by NGC (4/09).(#7552)

1479 1859-S AU58 NGC. Slight high-point wear does not diminish the sharp detail apparent on this near-Mint State specimen. Yellow-gold surfaces exhibit wisps of mint-green and lilac, and retain an ample amount of luster. A few minor circulation marks do not disturb. Census: 41 in 58, 14 finer (4/09).(#7554)

1480 1859-S AU58 NGC. Bright brassy-gold surfaces display traces of luster in the recesses of the well defined design features. A few light marks are scattered about. Census: 41 in 58, 14 finer (4/09).(#7554)

1481 1860 MS64 PCGS. Green-gold luster dominates this sharply impressed near-Gem. A loupe locates only unimportant faint field grazes. A low mintage date, particularly when compared with the 1861 and 1862. Population: 13 in 64, 10 finer (4/09).(#7555)

MS61 1860-D Gold Dollar, Conditional Rarity

- 1482 1860-D MS61 NGC.** Variety 12-P. Mint State coins of this issue are quite rare, although a surprising number of survivors, mostly circulated, exist for a date with so tiny a mintage. Only 1,566 business strikes were produced, most of dubious quality including poor strikes and planchets. This example offers a typical strike for the issue, comprising the always-weak U in UNITED and softness on the top of the 6 in the date and the O in DOLLAR, which is nearly obliterated. The reverse rim at 3 o'clock shows little denticulation remaining, also strike weakness, and the bow details are incompletely brought up. But the luster is good and there is strictly no trace of high point rub, as expected. Light field chatter marks and planchet roughness account for the grade, but there are no singular abrasions. Census: 5 in 61, 4 finer (4/09). (#7556)

- 1483 1868 MS62 Prooflike NGC.** Strongly struck with significant yellow-gold mirrors on each side. Lightly abraded overall with a single mark to the left of Liberty's nose contributing most to the grade. Census: 4 in 62 Prooflike, 3 finer (4/09). (#77567)

Cameolike 1868 Gold Dollar, MS67 ★ Prooflike

- 1484 1868 MS67 ★ Prooflike NGC.** NGC has graded only 11 1868 gold dollars as Prooflike, this Superb Gem being the finest and the only one given the Star designation (4/09). Excellent cameolike contrast exists over both sides, each of which exhibits an exquisite strike. Well cared-for brassy-gold surfaces reveal a faint graze on the jaw under high magnification. (#77567)

- 1485 1870-S AU53 NGC.** Ex: Richmond Collection. Orange-red toning visits this partially lustrous rare date gold dollar. A mere 3,000 pieces were struck, and probably fewer than 300 pieces have survived. Careful inspection locates several thin field marks.
Ex: *Richmond Sale, Part 1* (David Lawrence, 7/2004), lot 1061; *Denver Signature* (Heritage, 8/2006), lot 1533. (#7570)

Phenomenal 1872 Gold Dollar, MS68

- 1486 1872 MS68 NGC.** From an original production of only 3,500 business strikes, today the average certified survivor of the 1872 gold dollar issue only grades AU58 or thereabouts. Few high-grade examples exist, and among Mint State coins, most cluster in the range of MS62 through MS64. A tiny handful of wonderfully high-grade examples do exist, however, that were obviously held back from circulation at the time of their production and carefully preserved thereafter. Most of those coins show either full prooflike surfaces or semiprooflikeness.

As one might expect from the grade, this is a phenomenal coin. The surfaces are essentially perfect. The only mentionable pedigree identifier is a small, curved lint mark in the left obverse field out from Liberty's forehead. The fields are bright and semiprooflike, with an even layer of rich reddish color over both sides. An incredible opportunity for the gold specialist. Among non-Prooflike examples, this coin is the only MS68, and surpassed by only a single MS69 coin at NGC, although that service has also certified one piece in MS68 Prooflike. The finest survivors at PCGS are in MS67 (4/09). (#7572)

Lovely MS67 1874 Gold Dollar

- 1487 1874 MS67 NGC. CAC.** Satiny yellow-orange luster dominates the eye appeal of this remarkable Superb Gem. The strike is bold, and each side is carefully preserved. The 1874 is the last gold dollar issue with a six-figure mintage, making it one of the few dates available in MS67. Census: 41 in 67, 9 finer (4/09).(#7575)

Handsome MS67 ★ 1874 Gold Dollar

- 1488 1874 MS67 ★ NGC. Breen-6094.** This sharply struck Superb Gem is bathed in scintillating luster. The straw-gold surfaces are nearly as made. LIBERTY is virtually absent, as coined from a lapped die. The base of the 1 in the date is lightly repunched. Census: 1 in 67 ★, none finer with a Star designation (4/09).(#7575)

Amazing 1886 Gold Dollar, MS67

- 1489 1886 MS67 NGC. CAC.** An amazing Superb Gem with exquisite aesthetic appeal, this piece will easily please any connoisseur. Both sides are highly lustrous with gorgeous light orange toning over rich yellow-gold surfaces. It has few peers, and none that are graded finer. The 1886, with a mintage of 5,000 coins, is the least available of all dates in the 1880s. Census: 13 in 67, 0 finer (4/09).(#7587)

Beautiful MS66 1887 Gold Dollar

- 1490 1887 MS66 PCGS.** By 1887, the gold dollar was driven from American circulation by its silver and paper dollar equivalents. The business mintage of 7,500 pieces was probably intended only to prevent proofs from becoming the target of speculators. Well placed Philadelphia coin dealers set aside a number of examples, yet the date remains scarce, especially in upper grades. This is an intricately struck Premium Gem with exemplary preservation and dazzling luster. Population: 60 in 66, 22 finer (4/09).(#7588)

Deep Mirror Prooflike Superb Gem 1887 Gold Dollar

- 1491 1887 MS67 Deep Mirror Prooflike NGC.** This razor-sharp Superb Gem closely resembles a proof, since the fields are deeply reflective and the devices display frost. Presumably, the coin was among the first to be coined from the business strike mintage of 7,500 pieces. NGC has certified just seven pieces as Deep Mirror Prooflike, and within that select company, the present piece is the single finest certified (4/09).(#77588)

- 1492 1889 MS65 NGC.** An impressive Gem, satiny with rich butter-yellow color and winning eye appeal. A carefully preserved example from the final year of regular-issue gold dollar strikings. (#7590)

Stunning 1889 Gold Dollar, MS67

- 1493 1889 MS67 NGC.** An impeccable Superb Gem with exquisite surfaces and incredible luster, this piece retains all of its original mint frost. Although a few even finer pieces have been certified, this piece ranks among the couple of dozen finest examples that have ever been illuminated by the NGC grading lamps. That service has only certified 15 finer pieces (4/09).(#7590)

PROOF GOLD DOLLARS

Exquisite PR68 Ultra Cameo 1882 Gold Dollar

- 1494 1882 PR68 Ultra Cameo NGC.** This astonishingly beautiful specimen is the sole finest Ultra Cameo proof for the issue certified by NGC (4/09). Each side sports fantastic black-and-gold contrast with the devices sharply struck and amply frosted. Virtually flawless mirrors supply outstanding contrast and eye appeal. A great example of this later proof gold dollar issue. (#97632)

- 1495 1884—Cleaned—ANACS. PR60 Details.** Meticulously struck but the obverse displays patches of faint hairlines. An interesting lintmark connects the chin to the first S in STATES. Still somewhat flashy, and the reverse has pleasing cameo contrast. Much scarcer than its initial proof mintage of 1,006 pieces, due to the love token craze of the era. (#7634)

Amazing 1884 Gold Dollar, PR66 Cameo

- 1496 1884 PR66 Cameo PCGS.** The date is boldly recut, having first been entered at a sharp incline from left to right. The 18 are both visible well below the final position, the second 8 shows no sign of doubling, and the 4 is slightly doubled above.

An amazing Premium Gem Cameo proof, this 1884 gold dollar has few peers in its specialized arena. The proof mintage was actually quite high, with a total production of 1,006 coins, but PCGS has only graded seven submissions finer than PR65. A long, thin lint mark crosses the hair into the field behind the neck. This specimen is deeply mirrored with exceptional contrast. (#87634)

- 1497 1887—Damaged, Bent—ANACS. PR60 Details.** Fully struck with a complete LIBERTY and smooth, flashy fields. Bulged slightly near 6 and 12 o'clock, presumably caused by a past holder. Although 1,043 proofs were struck, most were likely made into love tokens. (#7637)

Delightful 1887 Gold Dollar, PR66

- 1498 1887 PR66 PCGS.** The Mint produced a little over 1,000 proof gold dollars in 1887. This delightful Premium Gem displays rich peach-gold coloration. A well executed strike imparts bold definition to the frosty design features, all of which stand out against the reflective fields. This impeccably preserved piece resides in a green label holder. Population: 9 in 66, 2 finer (4/09). (#7637)

Splendid 1888 Gold Dollar, PR66 Cameo

- 1499 1888 PR66 Cameo NGC.** The tiny mintages of proof gold dollars in the 1850s through 1870s saw large increases, into the low thousands, in the late 1880s as collectors realized that the series would likely come to an end, their need obviated by the Morgan silver dollar and minor silver coinage that actually circulated. Proof 1888 gold dollars were struck to the extent of 1,079 coins, and today examples can be found in grades as high as PR67.

The present splendid example displays deep, glassy fields with a noticeable orange-peel effect. Moderate mint frost is thicker on the reverse than on the obverse. A few tiny planchet flaws on each side, noted under a loupe, do little to dampen the appeal. Census: 23 in 66 Cameo, 6 finer (4/09). (#87638)

Stunning 1889 Gold Dollar, PR66

- 1500 1889 PR66 PCGS.** This stunning Premium Gem proof has deeply mirrored fields and lustrous devices, with excellent contrast, although the holder has no Cameo designation. The fields are wavy with an orange-peel texture normally associated with proof gold coins. The reverse has faint die cracks visible in the space between the wreath and border. Population: 9 in 66, 2 finer (4/09). (#7639)

Eye Appealing 1889 Gold Dollar, PR63 Cameo

- 1501 1889 PR63 Cameo NGC.** An eye-catching proof with strong contrast between the frosty devices and the deep mirrored fields. A horizontal pinscratch from the D of UNITED to Liberty's forehead is noted on the obverse. Die polishing has removed leftmost details of the crown. The dies are rotated by about 30 degrees counterclockwise. Only 1,779 gold dollars were minted in proof format in 1889, which was the final year of the series. Census: 4 in 63 Cameo, 21 finer (4/09). (#7639)

EARLY QUARTER EAGLES

AU Details BD-3 1802/1 Quarter Eagle

- 1502 1802/1—Repaired, Whizzed—NCS. AU Details.** Breen-6118, BD-3, R.5. The field to the left and right of the portrait has been smoothed, and both sides are whizzed. The centers are softly brought up, but remaining design details are sharp. The reverse is partly retoned in rose shades. A better variety for this Jefferson-era date, scarcer than the usually encountered BD-1. (#7650)

Attractive 1825 Quarter Eagle, MS61 Capped Bust Left, BD-2

- 1503 1825 MS61 PCGS. CAC.** Breen-6128, BD-2, High R.4. There are three known varieties of 1825 quarter eagles, unusually high for a date with a mintage of just 4,434 coins. The present coin is an example of the most available variety, the BD-2. The BD-2 obverse is characterized by the recut 5 in the date, and the reverse has the stem ending over the upright of the D. On this specimen both dies appear to be perfect, with no die cracks or clash marks. Approximately 80 to 100 examples still exist in all grades, with only about a dozen that grade MS60 or finer, including this piece.

Housed in a green-label PCGS holder, this brilliant and reflective piece has limited surface marks and presents excellent eye appeal. The details are well defined, and there is no evidence of weakness on either side. Proof or specimen examples were coined from this die pair. For example, the Mint Cabinet coin in the Smithsonian Institution, is one such. Its photo appears in the Garrett-Guth gold reference, although the authors there call it a "prooflike MS-66 that appears to have been produced under special circumstances." Those struck immediately after the proofs/specimen strikes were most likely to have reflective, mirrored obverse and reverse surfaces. For the date, Population: 10 in 61, 13 finer (4/09). (#7664)

Reflective and Rare BD-1
1833 Quarter Eagle, MS62

- 1504 1833 MS62 NGC.** Breen-6136, BD-1, R.5. All quarter eagles from 1829 through 1834, prior to the first Classic Head coins, are extremely rare in all grades. Some have called the 1833 the rarest of the rare, for it is more elusive than any other date in this short series, except for the 1834 Capped Head coinage, a major rarity. The BD-1 is the only known die pairing for the year, with a mintage recorded as 4,160 pieces.

The present MS62 specimen shows bold definition, except for the centers of each side. The fields are reflective, as usual, since the limited mintage means that every coin is an early strike. The surfaces have gorgeous greenish yellow-gold color. Census: 7 in 62, 11 finer (4/09).(#7673)

CLASSIC QUARTER EAGLES

High-End 1834 Quarter Eagle, MS64
Classic Head, No Motto

- 1505 1834 Classic MS64 NGC.** Breen-6138, Small Head, R.1. The year 1834 saw the first use of the Classic Head, No Motto design on U.S. gold coinage. A large mintage of 112,234 pieces was achieved, making the date one of the most available issues of the series and a popular type coin, as well. The date is known in four different die varieties. The Small Head variety is the one most frequently encountered, characterized by the flattened curls above the headband. The Classic Head design was always popular with collectors and appeared in many early auction catalogs, including the Sixth Semi-Annual Sale (Woodward, 3/1865), lot 2809. The lot was described as "1834 The new type, splendid impression, scarce." The lot sold for \$4.00 to William Strobridge.

The present coin is a most attractive specimen, with a particularly sharp strike and prooflike surfaces. Delicate shades of reddish toning adorn the central areas, deepening at the periphery. Census: 53 in 64, 16 finer (4/09).(#7692)

- 1506 1836 Script 8 AU58 NGC.** Head of 1835, Breen-6143, McCloskey-G, R.4. A scarcer variety that returns to service the Wide AM reverse from 1834 McCloskey-A and 1835 McCloskey-1. This is a bright straw-gold example with a pair of unobtrusive marks above the jaw and cheekbone.(#7694)

**Mint State 1836 Two and a Half
Script 8, Head of 1835**

- 1507 1836 Script 8 MS61 NGC.** Head of 1835, Breen-6143, McCloskey-D, R.2. The eagle's neck, wings, and claws are well struck, as are the obverse stars. The hair curls above the coronet are also bold. Only the very center of the coin, which includes the hair curl above the ear and the shield lines, exhibits moderate softness of strike. The pale gold surfaces are minimally abraded, and the margins and devices are lustrous. (#7694)

**1836 Classic Two and a Half
Block 8, Mint State**

- 1508 1836 Block 8 MS61 NGC.** Head of 1837, Breen-6144, McCloskey-C, R.2. A nicely struck yellow-gold Classic Head quarter eagle that displays ample luster. A wispy pinscratch appears on the upper obverse, but the surfaces are otherwise unmarked. Three dates of Classic Head half eagles (the 1834, 1836, and 1837) come with both Script and Block 8s, but only the 1836 two and a half attains separate *Guide Book* listings.
Ex: Sarasota Collection (Heritage, 7/2004), lot 8012. (#97694)

1836 Script 8 Quarter Eagle, MS63

- 1509 1836 Script 8 MS63 PCGS.** Head of 1835, Breen-6143, McCloskey-D, R.2. Boldly struck overall, if typically soft in the centers, this green-gold example displays appealing satiny luster and relatively clean surfaces for the grade. The Script 8 type of 1836 quarter eagle is said to be approximately four times more common than the Block 8 variety, according to Jeff Garrett and Ron Guth. (#7694)

Choice XF 1839-C Two and a Half

- 1510 1839-C XF45 NGC.** Recut 39, Breen-6150, McCloskey-C, Winter-2, R.3. This variety was at one time considered to be an 1839/8-C overdate, but now specialists (and the *Guide Book*) state that the 9 punch was merely defective. A lightly worn example that is light yellow-gold aside from glimpses of ruby-red near the borders. In a prior generation holder. (#7699)

- 1511 1839-O XF40 NGC.** Low Date, Close Fraction. McCloskey-B, R.4. An elusive quarter eagle variety from the Close Fraction reverse with both digit elements of the fraction touching the diagonal bar on the reverse. The reverse is also inverted and has a horizontal die crack from the right (facing) wing to the eagle's head. Yellow-gold surfaces display splashes of peach and a few small marks. (#7701)

LIBERTY QUARTER EAGLES

Lovely AU55 1840-C Quarter Eagle

- 1512 1840-C AU55 PCGS.** Variety 1, as always. This lovely Choice AU piece boasts brilliant green-gold color with radiant luster in the protected areas. The fields exhibit a few minor abrasions on each side, although they are inconsequential. Population: 9 in 55, 13 finer (4/09). (#7718)

Choice AU 1842-C Quarter Eagle

- 1513 1842-C AU55 NGC.** Variety 1, the only known. The 1842-C is one of the rarest quarter eagles from the Charlotte Mint. Moreover, it is often poorly struck. The current Choice AU example reveals the usual weakness in the star centers and eagle's neck and left (facing) leg feathers. The remaining features are generally well impressed, however, including the date digits and letters in LIBERTY, areas that are typically weak. Brassy-gold surfaces retain luster in the recesses and reveal the expected number of marks for a coin that has seen brief circulation. Census: 9 in 55, 11 finer (4/09). (#7724)

Near-Mint 1842-C Quarter Eagle

- 1514 1842-C AU58 NGC.** Variety 1. A pleasing honey-gold representative with a sharp central strike and only a few wispy marks on the cheek. Scarce, with a reported mintage of 6,729 from the Charlotte Mint, leaving few for collectors to locate today. In fact, the combined NGC and PCGS population reports show 10 pieces graded this high, with just six coins seen finer of this date and mint (4/09).

Ex: FUN Signature (Heritage, 1/2005), lot 30402.(#7724)

Low-Mintage 1842-D Quarter Eagle, AU58

- 1515 1842-D AU58 NGC.** Variety 3-F, the only known die pairing for this scarce issue, which also shows repunching on the digits of the date. Bright luster bathes the major devices as well as the stars and legends. This lightly circulated Dahlonega quarter eagle is sharply struck save for the shield lines, and the only mentionable contact is an unobtrusive horizontal pinscratch concealed within the hair. A moderate-sized planchet flaw beneath the eagle's beak is of Mint origin. Just 4,643 pieces were struck of this issue, and few today exist in grades approaching Mint State. Census: 8 in 58, 5 finer (4/09).(#7725)

Intriguing MS62 1842-O Quarter Eagle

- 1516 1842-O MS62 NGC.** As the present coin ably illustrates, the 1842-O is often softly struck. This piece has unbroken light yellow luster, but the detail is soft, perhaps on a VF level if taken out of context. In terms of technical grade, however, this coin ranks among the finest known. Undisturbed aside from a beveled obverse rim at 12 o'clock. Only 19,800 pieces were struck. Census: 3 in 62, 5 finer (4/09).(#7726)

Attractive 1843-C Large Date Plain 4 Quarter Eagle, AU55

- 1517 1843-C Large Date, Plain 4 AU55 NGC.** Variety 1. The 8 in the date is doubled to the south, the 3 touches the bust, and the mintmark is recut along its outside left arc. Luster resides in the recessed areas of the bright brassy-gold surfaces. Typically struck, in that the centers are weak, more so on the reverse of this particular coin. LIBERTY, often weak, is bold. Minimally marked for a coin that has experienced some circulation. Attractive overall. (#7728)

Scarce 1844-C Quarter Eagle, XF45

- 1518 1844-C XF45 PCGS.** Variety 1, the only die marriage known for the issue. This piece has better-than-expected eye appeal for a Choice XF survivor. This is at least partly because of the enticing lime-green and copper-orange toning that encompasses the lightly worn surfaces. Surface marks are few, and there are only one or two that are noticeable on either side, without a magnifier. "The 1844-C is among the scarcer Charlotte quarter eagles," according to Doug Winter. Population: 14 in 45, 40 finer (4/09).(#7735)

Sharp 1844-D Quarter Eagle, MS61

- 1519 1844-D MS61 NGC. CAC.** Variety 5-I with the mintmark placed low, much scarcer than the usual Variety 5-H. The 1844-D is often seen poorly struck. Aside from a touch of softness in the hair over Liberty's ear, this piece exhibits sharply struck design elements. Yellow-gold patina dominates both sides, and each displays occasional splashes of apricot. The most potent luster is seen in the recesses. A scattering of wispy marks helps account for the grade. Housed in a former generation holder.(#7736)

Condition Census 1844-D Quarter Eagle, MS63

- 1520 1844-D MS63 NGC.** Variety 5-H. The more frequently encountered variety, this variant shows the mintmark properly aligned and not slanted downward as seen on Reverse I. With a reported mintage of 17,332 pieces, the 1844-D is also one of the more frequently encountered quarter eagles from the Dahlonega Mint. However, while "common" in the context of D-mint quarter eagles, the 1844-D is still a scarce issue. Only 175-200 pieces are believed known in all grades, and probably no more than 10 coins are extant today in Mint State. This piece has bright, satiny mint luster and rich yellow-gold surfaces but is weakly defined in the centers, as often found. This particular coin is identifiable as the Ex: Montgomery coin by the presence of a tiny mark on Liberty's cheek and a dash of porosity below the eagle's right (facing) wing. Doug Winter ranks this coin in a tie for the number two position in his Condition Census. Census: 6 in 63, 0 finer (4/09).
Ex: Montgomery Collection (Bowers and Merena, 5/1998), lot 1019; New York Gold Mart.(#7736)

Pleasing 1847-D Quarter Eagle, XF40

1521 1847-D XF40 PCGS. Variety 9-M, the only known die marriage for the issue. This pleasing green-gold representative has considerable luster remaining for the Extremely Fine level. Both sides have a few minor surface marks that are consistent with the grade. An attractive example in typical quality for the date. (#7746)

1522 1847-O AU55 NGC. The date is lightly repunched on this deeply hubbed New Orleans quarter eagle. Luster glints from the design elements. The centers are softly brought up, but abrasions are limited to a couple of faint marks on the field above the eagle. (#7747)

Rare 1847-O Quarter Eagle, MS61

1523 1847-O MS61 NGC. The 1847-O is rare in Mint State and only occasionally offered for sale. Moreover, it is one of the most poorly struck issues from the New Orleans Mint. The bright yellow-gold surfaces of this MS61 specimen exhibit the usual softness in the centers but are well struck elsewhere. A few minor handling marks do not detract. The coin has a medal turn. Census: 17 in 61, 10 finer (4/09).(#7747)

Elusive MS62 1847-O Two and a Half

1524 1847-O MS62 NGC. Except for the curiously low-mintage 1847-O half eagle, gold coin production increased in 1847. Some numismatists believe gold coins were needed in quantity to pay Federal troops fighting in Mexico. The 1847-O quarter eagle is collectible in XF and AU, but Uncirculated examples are very scarce. This is an untoned and moderately prooflike piece with clean fields and occasional incompleteness of strike. Census: 5 in 62, 5 finer (4/09).(#7747)

Charming MS62 1848-D Two and a Half

1525 1848-D MS62 PCGS. Variety 10-M. Two varieties are known, and this 10-M variety is more plentiful. The other variety, 10-N, has the mintmark closer to the fraction. This lustrous Mint State example is a splendid piece with canary-gold color and clean surfaces. An unimportant lamination is seen near the middle arrowhead. Population: 8 in 62, 5 finer (4/09).(#7751)

Impressive 1849-C Quarter Eagle, MS60

1526 1849-C MS60 NGC. Variety 1. In strict Mint State grade as here, the 1849-C quarter eagle is extremely rare. Most examples found grade only VF or XF, and Winter points out that even AU pieces are "quite rare." The date generally comes sharply struck, but heavily abraded or with planchets of poor quality.

The present example is well struck, with some localized weakness on the hair below Liberty's coronet and the eagle's left (facing) leg. Some horizontal die scratches are present on all examples known of the issue, running through the vertical shield stripes. This piece also show numerous parallel planchet striations in the reverse fields, most obvious below the three arrowheads and in the area just above the left wing.

The surfaces show rich yellow-gold color and the fields show a faint glimmer, as often seen on C- and D-mint gold. Well struck for a Charlotte gold coin, with only slight central softness. Census: 5 in 60, 4 finer (4/09).(#7753)

Choice AU 1850-D Two and a Half

1527 1850-D AU55 NGC. Variety 13-M. Luster glimmers from the peripheries, hair, and coronet of this elusive Dahlonega quarter eagle. The surfaces are attractive despite a few faint hair-thin marks on the lower right obverse field. Most stars are sharp, although the right-side dentils are softly defined. A meager 12,148 pieces were struck.(#7757)

- 1528 1850-O—Altered Surfaces—ANACS. MS60 Details.** Careful smoothing of the fields has eliminated most of the initial cartwheel luster, although the absence of actual wear would undoubtedly fool many inexperienced collectors. The strike is a bit soft on the eagle's leg and on portions of the portrait. (#7758)

Near-Mint 1851-O Two and a Half

- 1529 1851-O AU58 PCGS. CAC. Breen-6214.** The date is repunched, evident southwest of the bases of the 51. The honey-gold surfaces are luminous and clean. A sharp strike save for the usual inexactness on the claws and the eagle's left (facing) leg. Population: 8 in 58, 13 finer (4/09). (#7762)

Satiny Gem 1853 Two and a Half

- 1530 1853 MS65 NGC.** The bounty of the 1849 California Gold Rush changed the market ratio between silver and gold. Silver coins became worth more than face, and were hoarded from circulation between 1851 and 1853. In response, quarter eagles were struck in record numbers to aid commerce. But few of those pieces survive in MS65 quality. The present example is one such Gem, and its remarkably smooth surfaces are green-gold and satiny. The strike is bold aside from the customary inexactness on the left (facing) leg. Census: 12 in 65, 0 finer (4/09). (#7767)

Elusive Near-Mint 1854-C Quarter Eagle

- 1531 1854-C AU58 NGC. Variety 1, the only one known.** The 1854-C quarter eagle is a difficult coin to acquire in About Uncirculated and is very rare in Mint State. This satiny AU58 coin displays appealing shades of lime-green and peach patina, along with considerable remaining luster on both sides. The design features reveal a typical strike, which is stronger on the obverse and characteristically soft on the eagle's lower parts. Minimally marked on both sides for the grade. Census: 20 in 58, 19 finer (4/09). (#7770)

- 1532 1856-S AU58 PCGS.** Lime and apricot shades enrich this minimally marked and partially lustrous slider. A trace of friction on Liberty's eyebrow and the eagle's neck feathers confirms momentary non-numismatic handling. Population: 12 in 58, 19 finer (4/09). (#7781)

AU55 Details Low Mintage 1859-D Two and a Half

- 1533 1859-D—Cleaned—ANACS. AU55 Details. Variety 21-M.** The yellow-gold color is attractive but cannot hide the faint hairlines present on both sides. Luster is considerable for the AU55 level. A suitable strike with the customary inexactness at the centers. A mere 2,244 pieces were coined, and most remaining examples lack the luster and sharpness of this coin. (#7789)

MS63 1861 Quarter Eagle Rare Type One Reverse

- 1534 1861 Old Reverse, Type One MS63 PCGS. CAC.** A sharply struck and satiny representative with clean fields and minor mint-made die rust on the portrait. The final appearance of the Type of 1858 Reverse, which was sparingly used on the 1859 through 1861 issues. The obsolete reverse subtype is identified by its arrowheads, which touch and are comparatively broad. Although the 1861 is a plentiful date, most examples are from the thin arrowheads, New Reverse hub. Population: 6 in 63, 4 finer (4/09). (#97794)

- 1535 1866-S AU55 NGC.** A low-mintage issue of 38,960 coins. The obverse has a jagged die crack from the border between stars 2 and 3 through the field to Liberty's chin. Considerable luster remains, with light yellow-gold around the devices accompanied by considerable olive patina in the fields. Census: 23 in 55, 26 finer (4/09). (#7804)

- 1536 1873 Open 3 MS64 PCGS.** Strong and satiny luster enlivens yellow-gold surfaces. A crisply struck representative of the later Open 3 logotype with only small and isolated marks. Population: 45 in 64, 11 finer (4/09). (#7817)

Low-Mintage 1875 Quarter Eagle, AU55

- 1537 1875 AU55 PCGS.** The 1875 Liberty Head quarter eagle has one of the lowest mintages of any U.S. gold coin (400 circulation strikes), and consequently ranks as one of the most desirable in the series. PCGS and NGC have graded fewer than 60 pieces in all grades, a mere six of which are in Mint State. This Choice AU example displays pleasing yellow-gold surfaces that retain luster in the recessed areas. Sharply struck and minimally abraded. Population: 10 in 55, 7 finer (4/09).(#7822)

Lustrous 1876 Quarter Eagle, MS61

- 1538 1876 MS61 NGC.** Though proof issues of 1876 saw a boost of interest from Centennial-year celebrations, the business strikes of that year saw no similar spike, and coinage of quarter eagles remained low. This strongly lustrous, well struck Mint State survivor shows light abrasions and scattered, wispy marks in the yellow-gold fields, though series enthusiasts know that the apparent flaw at Liberty's upper neck is actually a die diagnostic for the issue. Census: 7 in 61, 7 finer (4/09).(#7824)

- 1539 1877 AU55 PCGS.** Strongly struck with considerable luster remaining in the antique-gold fields. The reverse shows a rim nick near 12 o'clock and a scrape to the right of the eagle. Population: 15 in 55, 31 finer (4/09).(#7826)

Gorgeous Gem 1878 Two and a Half

- 1540 1878 MS65 NGC.** A gorgeous and lustrous Gem whose apricot-gold surfaces lack visible abrasions. The strike is bold, and the eye appeal is formidable. The year 1878 witnessed an increase in quarter eagle production, as the Treasury anticipated that citizens would wish to exchange currency at or near par to obtain gold coinage. Such demand never materialized except in the far West, since the public was by then accustomed to (and confident in) Federal paper money. Census: 28 in 65, 4 finer (4/09).(#7828)

Desirable Select 1880 Quarter Eagle

- 1541 1880 MS63 PCGS.** After 1879, San Francisco ceased production of the quarter eagle, and from 1880 on, all Liberty quarter eagles would be struck at Philadelphia; that year's mintage amounted to just 2,960 business strikes. This Select piece is well-defined and minimally abraded with considerable reflectivity in the honey-kissed yellow-gold fields. Population: 7 in 63, 12 finer (4/09).(#7832)

Rare 1881 Quarter Eagle, MS62

- 1542 1881 MS62 PCGS.** A rare and highly sought-after issue, the 1881 quarter eagle had a tiny mintage of just 640 business strikes. Fewer than 30 examples have been certified in Mint State, by NGC and PCGS combined, and none have been graded any finer than MS62 by PCGS. The deep copper-orange, lilac, and sea-green toning is this coin's most noteworthy physical attribute. It is also sharply struck and nicely preserved, with fewer marks than expected for the grade. Some cloudiness is noted in the upper left obverse field. Population: 4 in 62, 0 finer (4/09).(#7833)

- 1543 1891 MS64 PCGS.** Sharply impressed with considerable flashy luster in the yellow-gold fields, a common quality for this low-mintage issue. Well-preserved and lovely. Population: 25 in 64, 8 finer (4/09).(#7843)

1892 Quarter Eagle, MS67 ★ Prooflike
The Single Finest Certified

1544 1892 MS67 ★ Prooflike NGC. The 1892 quarter eagle is extremely popular because of its low mintage of 2,440 circulation strikes. Yet a fair number were apparently saved, as indicated by NGC/PCGS figures. Prooflike examples, however, are rare. This Superb Gem is the finest of the five Prooflike specimens certified by NGC, and is the *only* example given the coveted Star.

Both sides display a near gold-on-black appearance, and each exhibits exquisitely struck design features. The peach-gold surfaces have been well cared for, revealing just a few unimportant marks on Liberty's cheek. Great overall eye appeal.(#77844)

1545 1896 MS65 PCGS. Crisply detailed with great luster. Light yellow-gold color mingles with deeper wheat shadings. A great Gem from a low-mintage issue. Population: 62 in 65, 22 finer (4/09).(#7848)

Exquisite MS67 1898 Quarter Eagle

1546 1898 MS67 NGC. Exquisitely detailed with gorgeous, satiny sun-yellow luster. The preservation is simply marvelous. Only 24,000 business strikes were coined for this late 19th century issue, and this piece is tied with 30 other condition rarities at the top of the combined certified population (4/09).(#7850)

Stellar MS67 1900 Quarter Eagle

1547 1900 MS67 NGC. CAC. The 1900 quarter eagle issue has a mintage of 67,000 pieces, more than double the production of the previous year, and Premium Gem and even Superb Gem pieces are within reach for the 1900 in a way they are not for the 1899. This satiny and exquisitely detailed beauty has rich orange-gold surfaces that are carefully preserved. NGC has graded one coin finer (4/09). (#7852)

Dynamic MS67 1901 Quarter Eagle

1548 1901 MS67 NGC. This year's mintage was in the high five figures, greater than that of the year before, yet this issue is a more challenging condition rarity than its earlier counterpart at the MS67 level. This gorgeous Superb Gem offers richly lustrous orange and peach shadings with glimpses of yellow-gold at the dentils. Census: 19 in 67, 1 finer (4/09).(#7853)

1549 1903 MS66 PCGS. Sharply struck with bright, sparkling surfaces that display lovely orange-gold color with glimpses of mint-green. Beautifully preserved with winning eye appeal. PCGS has graded 47 finer pieces (4/09).(#7855)

Elegant Superb Gem 1904 Quarter Eagle

1550 1904 MS67 NGC. A great example of this 20th century Liberty quarter eagle issue, one that has enjoyed considerable popularity with type collectors. Sharply struck with warmly lustrous sun-yellow surfaces that turn peach close to the rims. NGC has certified only four numerically finer pieces (4/09).(#7856)

1551 1905 MS66 NGC. CAC. Original olive-tinged toning encompasses this lustrous and beautifully preserved Premium Gem. The strike is crisp save for blending on the dentils. An important example of this underappreciated Liberty gold type.(#7857)

Amazing 1907 Quarter Eagle, MS67

1552 1907 MS67 PCGS. This final Liberty quarter eagle's mintage of over a third of a million pieces was the largest since 1861, and Premium Gems and even Superb Gems are available to type collectors. This is a wonderful example of the latter, apricot-gold and orange with considerable patina over parts of the obverse fields. PCGS has graded only one finer survivor (4/09).(#7859)

PROOF LIBERTY QUARTER EAGLES

Rare Proof 1881 Quarter Eagle

1553 1881 PCGS Genuine. Given the PCGS number for a Cameo proof, although undesignated as Cameo on the insert. Radiant devices contrast with glassy fields. Boldly struck and attractive. The PCGS code equates to "Filed Rims," but the encapsulation makes the impairment difficult to see. A rare date. Only 51 proofs were struck, in addition to only 640 business strikes.
Ex: Nathan M. Kaufman Collection (Rarcoa, 8/1978), lot 706. (#87907)

Shimmering 1883 Quarter Eagle, PR62 Cameo

1554 1883 PR62 Cameo NGC. The 1 is equally spaced between the bust and border, the 8 nearly touch, and the 3 is slightly closer to the border. Die lines fill the first vertical shield space, and the bottoms of spaces two through four.

Most quarter eagles of the 1880s are low mintage issues, such as the 1883, with a business strike production of 1,920 coins and a proof mintage of just 82 more. This wonderful Cameo proof has light yellow surfaces with fully mirrored fields and lustrous devices. There are quite a few tiny abrasions in the obverse and reverse fields, limiting the grade. Census: 2 in 62 Cameo, 15 finer (4/09). (#87909)

Breathtaking 1883 Quarter Eagle
PR66 Ultra Cameo

1555 1883 PR66 Ultra Cameo NGC. There are two varieties of the 1883 proof quarter eagle, coming from a mintage of 82 coins. This Premium Gem is B-1, which, according to Walter Breen (1989), displays polish in the ear hole and an unpolished first stripe on the reverse shield.

This issue is subject to high date-collector pressure, owing to the extreme rarity of business strikes. NGC and PCGS have graded fewer than 50 1883 proof quarter eagles, some of which are likely resubmitted coins. Most of the certified specimens are Cameo or Ultra/Deep Cameo.

Gold-on-black contrast greets the viewer of this PR66 Ultra Cameo, as frosty motifs appear to float upon deep watery fields. An exacting strike leaves bold detail on the design elements, further enhancing the coin's eye appeal. Immaculately preserved throughout. Census: 2 in 66 Ultra Cameo, 2 finer (4/09).

From The Frank M. Stirling Collection. (#97909)

Alluring Gem Cameo 1895 Quarter Eagle

1556 1895 PR65 Cameo NGC. The *Guide Book* reports a mintage of 119 proofs for this quarter eagle issue, the smallest of the three denominations featuring the long-running Liberty Head design of Christian Gobrecht. Garrett and Guth noted in 2006 in their *Gold Encyclopedia* that while NGC and PCGS had combined to certify more than 100 examples of the issue, those "submission events" represented likely only 50 to 70 separate coins. Of course, as a Gem Cameo proof gold coin, any such piece will be under intense pressure from type collectors. The fields are deeply mirrored, with thick mint frost coating the device high points and providing splendid contrast. Subtle coloration—pale, slightly hazy lilac and rose around the devices—increases the allure. Census: 5 in 65 Cameo, 11 finer (4/09). (#87921)

Exquisite 1897 Quarter Eagle
PR67 Deep Cameo

1557 1897 PR67 Deep Cameo PCGS. CAC. The proof coins struck from 1896 to 1898 are renowned for their exceptional quality, and the gold proofs are particularly prized. Among those proofs, the quarter eagles are often the best-preserved, and this Deep Cameo Superb Gem proof, one of 136 specimens coined, reinforces the rule. Each side has absolute black-and-gold contrast between richly frosted, decisively struck devices and the glassy mirrors. Virtually impeccable with spectacular eye appeal. This is one of just two Deep Cameo coins at this level known to PCGS with only one finer (4/09).(#97923)

1558 1901—Cleaned—ICG. PR60 Details. Exquisitely detailed, as expected for this turn-of-the-century proof gold issue. The lemon-gold surfaces show slightly porous texture and imperfect mirrors, the result of a past cleaning.(#7927)

Blazing 1905 Liberty Quarter Eagle, PR67 ★

1559 1905 PR67 ★ NGC. From a tiny proof mintage of only 144 pieces, the 1905 Liberty Head quarter eagle is surprisingly available today, but many proof examples have been mishandled. The issue is decidedly rare at the Superb Gem level. Collectors prized the issue when it appeared; their popularity of the coins can be demonstrated by an early auction appearance in the celebrated John Story Jenks Collection (Henry Chapman, 12/1921), lot 5813. Chapman stated, "1905. Brilliant proof. Very rare, few being coined in proof."

The present coin is an absolutely magnificent specimen, with outstanding visual appeal to match the high technical grade. The surfaces are exceptionally bright and mirrorlike. In their *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth note most coins of the date lack cameo devices. However, the present example shows strong elements of contrast on the reverse. A tiny planchet flake in the right reverse field is detectable with a loupe. NGC has awarded this specimen the coveted Star designation. Census: 1 in 67 ★, 1 finer (4/09).(#7931)

INDIAN QUARTER EAGLES

Shining Gem 1908 Indian Quarter Eagle

1560 1908 MS65 PCGS. CAC. Well-defined for an Indian quarter eagle with pleasingly lustrous yellow-orange surfaces that are carefully preserved. Eye appeal is impressive. Though this first-year issue was saved more than its later peers, higher-grade examples are scarce. PCGS has graded 85 such pieces (4/09). (#7939)

1561 1909 MS63 NGC. Lustrous yellow-gold surfaces exhibit traces of olive-tan. This well struck piece reveals just a few minor handling marks. (#7940)

1562 1910 MS64 PCGS. Orange-red and green-gold alternate across this satiny and carefully preserved near-Gem. The obverse is especially unabraded. The surfaces are slightly mattelike, as made. Encased in a green label holder. (#7941)

1563 1911 MS64 NGC. CAC. Yellow-orange overall with areas of sage alloy visible in the fields around the portrait. Strong definition with lovely luster and excellent eye appeal to match. (#7942)

Sharp 1911-D Quarter Eagle, AU55

1564 1911-D AU55 PCGS. The key date to the Indian quarter eagle series. This Choice AU piece has a bold mintmark, making it especially desirable among specialists. The strike is sharp and the surfaces have khaki-gold luster. A wonderful representative for the Indian quarter eagle collector. (#7943)

Desirable Near-Mint 1911-D Quarter Eagle

1565 1911-D AU58 NGC. Light straw-gold surfaces offer impressive luster, and only a trace of friction separates this key-date coin from a higher designation. It is well struck, with all pendants on the necklace fully defined. This attractive AU58 survivor would fit well in an otherwise Mint State collection. (#7943)

Affordable 1911-D Quarter Eagle, AU58

1566 1911-D AU58 NGC. A frosty and sharply struck example with excellent honey-gold luster, this 1911-D exhibits a trace of rub on the high points, keeping it from the Mint State category. It is that trace of rub that keeps the price at lower, more-affordable levels that will appeal to a broader range of collectors. (#7943)

Appealing 1911-D Quarter Eagle, MS61

1567 1911-D MS61 NGC. This attractive Mint State representative of the key-date 1911-D Indian quarter eagle is fully lustrous with excellent design definition on rich yellow-gold surfaces. We are always pleased when we can offer multiple examples of the 1911-D, especially in a range of grades that will appeal to many different collectors. (#7943)

Bold 1911-D Two and a Half, MS61

1568 1911-D MS61 NGC. This boldly defined 1911-D has one of the sharpest mintmarks we have seen on the key-date Indian quarter eagle. The surfaces are fully lustrous, with brilliant light yellow mint frost. This issue is always on collectors' want lists, as the existing supply of attractive pieces falls far short of demand. (#7943)

Satiny MS61 1911-D Quarter Eagle

- 1569 1911-D MS61 PCGS.** This appealing piece has a mattelike appearance, along with satin luster and a mixture of khaki and champagne-red coloration. The design elements are boldly detailed. The only notable distraction is a pinscratch that extends from between ER in AMERICA to the edge of the eagle's wing. A strong candidate to fill that final hole in a Mint State collection of Indian quarter eagles. (#7943)
-

Popular MS62 1911-D Quarter Eagle

- 1570 1911-D MS62 NGC.** With a mintage dramatically lower than that of any of its business-strike fellows, the 1911-D has become a legend among Indian quarter eagles, and Mint State survivors are particularly prized. This example has an unusually sharp strike and a suggestion of frostiness on bright yellow-gold surfaces with a hint of apricot. An abrasion below the BER of LIBERTY accounts for the grade. (#7943)
- 1571 1911-D Weak D—Improperly Cleaned—NCS. AU Details.** The mintmark is present but barely perceptible to the unaided eye. A briefly circulated example, lightly abraded with dulled yellow-orange surfaces from a past cleaning. (#7954)
-

Noteworthy Gem 1912 Quarter Eagle

- 1572 1912 MS65 ICG.** While it is considered a common date in all grades through MS63, the 1912 is elusive in MS64, and an important condition rarity in Gem preservation. Both sides have excellent surfaces with sharp design elements, attractive pale blue toning over honey-gold color, and frosty luster that is only interrupted by a few insignificant marks. (#7944)
- 1573 1913 MS64 NGC.** An attractive piece that offers light yellow color overall with glimpses of deeper sun-gold. Pleasingly detailed with striking eye appeal. (#7945)
-

- 1574 1913 MS64 NGC.** Rich yellow-gold color with glimpses of straw. This attractive Choice example has an obverse that appears even finer, though a few minor abrasions are present in the reverse fields. NGC has graded 53 finer examples (4/09). (#7945)

- 1575 1913 MS64 PCGS.** This is a lovely, satiny example that may be conservatively graded by PCGS as a near-Gem. The design elements are boldly struck and the surfaces reveal deep, variegated lime-green and apricot-gold toning. Surface marks are minimal, and nearly nonexistent. (#7945)
-

Choice Semikey 1914 Quarter Eagle

- 1576 1914 MS64 NGC.** The 1914 has the second lowest mintage of any issue within the widely collected Indian quarter eagle series, and is in fact the rarest issue at the MS65 level, at least according to the 4/09 NGC Census Report. The scarcity of the 1914 may be related to the high mintage of its 1913 predecessor, which may not have been fully paid out by 1914. A well detailed caramel-gold Choice representative with satiny, undisturbed surfaces. (#7946)
- 1577 1914-D MS63 NGC.** The yellow-gold surfaces of this Select quarter eagle are laced with whispers of light tan. Both sides yield pleasing luster and well struck design features. Minute marks in the raised fields of the reverse limit the grade. (#7947)
-

Sharply Struck 1914-D Near-Gem Quarter Eagle

- 1578 1914-D MS64 PCGS.** This near-Gem 1914-D displays a sharp strike, including strong detail on the eagle's plumage, an area sometimes soft. Pleasing luster shows over both sides, each of which possesses attractive yellow-gold color. A few minor handling marks precludes Gem classification. (#7947)
-

Lustrous 1914-D Quarter Eagle, MS64

- 1579 1914-D MS64 PCGS.** The 1914-D is readily available through the Select level of preservation, and even near-Gems can be had with patience and searching. Bright luster shows on this MS64 coin as does light yellow-gold patina laced with wisps of orange. The design elements are sharply struck, and the few grade-defining marks are not detracting. (#7947)
- 1580 1915 MS64 PCGS.** Whispers of light tan visit the greenish-yellow surfaces of this near-Gem, and a well executed strike imparts strong delineation to the design features. A linear mark is concealed in the headdress near the ear. (#7948)
- 1581 1915 MS64 PCGS.** A handsome apricot-gold Choice gold type coin that has an exemplary strike and only one thin mark, relegated to the field between the ER in LIBERTY. Luster sweeps the impressively smooth surfaces. (#7948)

Frosty 1915 Quarter Eagle, MS65

- 1582 1915 MS65 NGC.** A frosty Gem with delightful pink-gold surfaces and fully brilliant luster. Traces of darker patina are visible, especially on the reverse of this sharply detailed Indian quarter eagle. While the date is relatively plentiful at this grade level, it is a major rarity any finer, with only seven higher grade coins certified at NGC and PCGS. (#7948)

Tantalizing Gem 1915 Quarter Eagle

- 1583 1915 MS65 NGC.** Though this Philadelphia issue, struck just before the denomination's decade-long hiatus, is available in grades through MS64, Gems are scarce and anything finer is a condition rarity. The present coin is vibrantly lustrous with wheat and pale yellow-gold elements mingling on each side. NGC has graded just four numerically finer pieces (4/09). (#7948)
- 1584 1925-D MS64 NGC.** Rich yellow-orange and sun-gold shadings enliven each side of this shining near-Gem. Strong definition overall with great eye appeal for this final D-mint quarter eagle issue. (#7949)

- 1585 1925-D MS64 NGC.** A boldly impressed Choice example of this popular quarter eagle issue, the last of its denomination struck at Denver. Wheat-gold surfaces are satiny with a blush of peach near the rims. (#7949)
- 1586 1925-D MS64 NGC.** A refreshingly unabraded mustard-gold near-Gem with exemplary eye appeal. The centers show moderate incompleteness of strike, and this may be all that limits the grade. (#7949)
- 1587 1925-D MS64 NGC.** The lovely, light champagne-gold coloration is highlighted by vibrant mint luster. Well struck with a few minor field grazes. Indian quarter eagles were produced only at the Denver Mint in 1925. (#7949)
- 1588 1925-D MS64 NGC.** Lovely peach toning invigorates this crisply struck and scintillating Choice Indian gold type coin. No marks are visible to the unaided eye, and the surfaces are also pleasing once viewed beneath a loupe. (#7949)
- 1589 1926 MS64 NGC.** A sumptuous orange-gold near-Gem that offers understated, frosty luster. Remarkably appealing with above-average design definition. (#7950)
- 1590 1927 MS64 NGC.** Well-defined with warm wheat-gold luster. This near-Gem is pleasingly preserved for the grade and offers great eye appeal for a 1920s quarter eagle. (#7951)
- 1591 1929 MS64 NGC.** Sharply struck and coruscating with caramel-gold luster. The obverse is particularly smooth. By 1929, the final year of the denomination, the quarter eagle was relegated to souvenir status, since gold coins no longer circulated and international payments were made using double eagles or (less frequently) eagles. (#7953)

THREE DOLLAR GOLD PIECES

Brilliant 1854 Three Dollar Gold, MS61

- 1592 1854 MS61 NGC.** The first year of issue and with the highest mintage of any three dollar gold piece, the 1854 is also a one-year subtype in the series with small letters in DOLLARS. The mintage totaled 138,618 coins, or 25% of the total mintage for the denomination through 1889. This sharp piece is brilliant and lustrous, with lovely yellow mint frost. A few minor marks on each side explain the grade. (#7969)

Pleasing 1854-D Three Dollar, AU58

1593 1854-D AU58 NGC. The 1854-D three dollar gold piece is extremely popular owing to the fact that it is the only date of the denomination which was struck at the Dahlonega Mint. Additionally, its tiny mintage of 1,120 pieces makes it rare, especially in the higher grades. Doug Winter (2003) writes: "The level of demand for this coin remains extremely strong."

The 1854-D is most frequently seen in the Very Fine and Extremely Fine levels of preservation. About Uncirculated coins are very scarce and Mint State pieces are extremely rare. NGC and PCGS have, to date, seen only 12 Uncirculated specimens, none higher than MS62.

Exacerbating the supply-demand relationship of this rare date is the subpar production quality. David Bowers (2005) contends that the 1854-D is the poorest struck and has the lowest eye appeal of all coins in the three dollar series. Moreover, nearly all specimens are dullish and lackluster, and it is common to see pieces with black grease stains, planchet roughness, or laminations.

The bright yellow-gold surfaces of this near-Mint State example retain a considerable amount of luster for the designated grade and the issue. The design elements exhibit an above-average strike, including strong detail on most of Liberty's portrait and virtually all of the wreath. The obverse peripheral lettering and the denomination, date, and mintmark are also sharp. The dentils show on the lower obverse and reverse but are absent from the remaining rims which are flat, a characteristic of the issue. The usually seen clash marks are visible on both sides, but there are no grease stains, surface roughness, or laminations. A few trivial circulation marks are undisturbing. All in all, this is an exceptional three dollar piece with much better-than-average eye appeal. (#7970)

1594 1854-O—Improperly Cleaned—NCS. XF Details. Bright apricot-gold surfaces reveal fine hairlines under magnification, along with a few light scratches on Liberty. The design elements are nicely defined. (#7971)

Collectible 1854-O Three, XF45

1595 1854-O XF45 NGC. The only readily collectible first-year branch mint three dollar gold issue, and highly popular as such. This piece shows pretty yellow-gold centers with copper-gold peripheries; some faded mint luster still clings. There are no major abrasions, although the central strike is typically weak. The beginning of a die crack extends from the right ribbon toward the rim at 4 o'clock. (#7971)

Pleasing AU 1854-O Three Dollar

1596 1854-O AU50 PCGS. With 24,000 pieces struck, the 1854-O is the more accessible of two Southern branch mint three dollar gold issues (the other being the famous 1854-D three dollar gold rarity). The present piece, though distinctly worn on the high points, has considerable radiance remaining in the orange-accented yellow-gold fields. Several light to moderate abrasions are noted around the portrait. (#7971)

Desirable Near-Mint 1854-O Three Dollar

1597 1854-O AU58 NGC. Though the nationwide lack of demand for the three dollar gold piece would not be resolved completely until 1890, the denomination's irrelevance was readily apparent in the regions served by New Orleans and Dahlonega, both of which stopped minting it after the initial issue of 1854. This attractive piece from the former Mint, light yellow-gold in the centers with deeper peach-orange elements near the rims, shows just a touch of rub on the high points. NGC has graded only 18 finer pieces (4/09). (#7971)

Flashy 1855 Three Dollar, MS64

1598 1855 MS64 NGC. The mintages of early Philadelphia three dollar gold issues were harbingers of the denomination's eventual fate. The first-year 1854 had a generous mintage of 138,618 pieces, but the main Mint coined just 50,555 pieces the next year, and the year after that, the Philadelphia production was halved again.

While the 1855 is infrequently prized as a condition rarity, especially in the context of a series with many low-mintage issues, Choice and finer coins are genuinely scarce. This shining yellow-gold example has flashy luster and well-defined obverse devices, though the bow on the reverse is soft. Modestly marked for the grade, with this issue's often-considerable die polish in the fields. Census: 23 in 64, 2 finer (4/09). (#7972)

Desirable 1857 Three, MS62

1599 1857 MS62 NGC. Considered a common date in the three dollar series, the 1857 had a mintage of a mere 20,891 coins, the eighth highest mintage of any issue in the 36 year history of the denomination. This sharp and attractive Mint State piece has frosty light yellow luster with scattered grade-consistent abrasions. Relatively few Mint State pieces still exist. Census: 35 in 62, 19 finer (4/09).(#7976)

1600 1857-S VF30 PCGS. A lemon-gold example of this San Francisco three dollar gold issue with moderate wear. The portrait is minimally marked, though a pair of significant abrasions appear to its right.(#7977)

Scarce 1857-S Three Dollar, AU53

1601 1857-S AU53 NGC. As usual with San Francisco threes, these pieces were not set aside by collectors on the West Coast. Rather, they entered the channels of commerce and by the time collectors began to search for mintmarked coins (some 40 years later), most were heavily circulated. This bright AU53 shows even peach-gold color, slight friction over the high points, and only minor abrasions.(#7977)

Rare 1857-S Three Dollar, MS60

1602 1857-S MS60 NGC. The 1857-S three dollar gold piece, with a mintage of 14,000 pieces, is very scarce in any grade and a formidable rarity in Mint State. As with many other San Francisco coins, S-mint threes were released into circulation and used extensively on the West Coast.

Most known specimens are in Very Fine, Extremely Fine, and lower About Uncirculated grades. Perusal of NGC and PCGS population data indicates the rarity of Uncirculated examples. The two services have graded a total of five pieces, mostly in the MS60 to MS62 range.

The bright yellow-gold surfaces of this MS60 offering display partially prooflike fields that offer modest variance with the devices. A well executed strike leaves strong definition on the design features, including the plume ends and the wreath elements, areas that are often weak. Some wispy marks show up under magnification, but this is a sharp specimen for the designated grade. Census: 1 in 60, 2 finer (4/09).(#7977)

Elusive 1858 Three, AU50

- 1603 1858 AU50 PCGS.** Mintages of the three dollar denomination dropped substantially during its first few years. By 1858, only 2,133 business strikes were coined. Unlike later dates, there were no small hoards of Uncirculated pieces. An original apricot-gold example without detrimental marks. Population: 12 in 50, 54 finer (4/09).(#7978)

Low-Mintage 1858 Three Dollar, AU55

- 1604 1858 AU55 NGC.** With its low mintage of 2,133 circulation strikes, the 1858 is one of the rarest and most popular dates in the three dollar series. High-level AU coins are the best most collectors can hope to obtain, as Mint State pieces are extremely elusive. Luster resides in the recesses of this brassy-gold Choice AU example. The design elements are well defined, and distributed light marks do not detract.(#7978)

Scarce 1859 Three Dollar, MS62

- 1605 1859 MS62 PCGS.** The 1859 is only a moderately scarce issue among three dollar gold pieces, from a mintage of 15,558 coins. While quite a few survive in Mint State grades, the typical piece that is encountered grades just AU. This frosty and boldly defined example has brilliant yellow-gold luster with faint traces of pinkish toning.(#7979)

Captivating MS61 1860 Three Dollar Gold

- 1606 1860 MS61 ANACS.** Crisply detailed on the portrait with bright lemon-gold luster. Though a few wispy abrasions are present in the fields, the overall eye appeal is stronger than the MS61 designation might suggest. By 1860, a lack of demand for the three dollar gold denomination was apparent, and just 7,036 business strikes were coined, with a substantial minority of those melted at the Mint. (#7980)

Appealing AU53 1866 Three Dollar

- 1607 1866 AU53 PCGS.** A lightly circulated representative of this lower-mintage post-Civil War three dollar gold issue, which has a mintage of only 4,000 business strikes. Despite modest rub on the high points and in the straw-gold fields, the coin's luster continues to shine. Population: 11 in 53, 71 finer (4/09).(#7987)

- 1608 1868 AU53 PCGS.** A meager mintage of 4,850 pieces ensures the scarcity of the 1868. This briefly circulated representative has a green-gold obverse and a sun-gold reverse. Neither side displays appreciable abrasions.(#7989)

Striking Select 1868 Three Dollar

- 1609 1868 MS63 PCGS.** Though it has a small original mintage, the 1868 three dollar has a high survival rate on a percentage basis. As a Select example, this piece is toward the top end of the certified spectrum, both numerically and aesthetically. The canary-gold surfaces offer splendid luster, and the few minor abrasions present are consistent with the grade. Population: 25 in 63, 20 finer (4/09). (#7989)

- 1610 1869 PCGS Genuine.** Bright yellow-gold color with pleasing detail. The lower obverse shows several scratches, while on the reverse, the area within the wreath to the right of the 3 shows evidence of tooling.(#7990)

- 1611 1869 AU55 PCGS.** A mere 2,500 pieces were struck, and there were no saved hoards of Uncirculated examples, unlike later dates such as the 1888. Splendidly smooth aside from a thin and nearly vertical mark on the cheek, and luster shimmers across the legends and devices. (#7990)

Highly Attractive 1870 Three Dollar, AU58

- 1612 1870 AU58 NGC.** Ex: South Texas Collection. The 1870 three dollar is available in the upper circulated grades and lower levels of Mint State. Highly attractive peach-gold patina adorns this near-Mint State example and a well directed strike imparts strong definition to the design elements. Luster resides in the recessed areas of the lightly abraded surfaces. (#7991)

- 1613 1874 AU55 NGC.** Just a touch of rub visits the high points of this three dollar gold piece, eminently suitable for a similarly graded type collection. Bright and attractive with light abrasions scattered throughout the wheat-gold surfaces. (#7998)

Lustrous 1874 Three, MS63

- 1614 1874 MS63 PCGS.** Housed in a green label PCGS holder, this Select example is highly lustrous with bold design features and exceptional eye appeal. One of the three most common dates in the series, it is an excellent candidate for the type collector, or for anyone who merely wants an example of this unusual denomination. (#7998)

Appealing Near-Gem 1874 Three Dollar

- 1615 1874 MS64 PCGS.** Blushes of peach and sun-gold endow this conditionally elusive near-Gem type coin. Solidly struck and lustrous with excellent eye appeal. Faint marks beneath the RS in DOLLARS are difficult to find. Encapsulated in a green label holder. PCGS has graded only 12 coins finer (4/09). (#7998)

- 1616 1878 AU50 NGC.** A lightly circulated example of this popular type issue, faintly abraded but pleasing. Wheat-gold surfaces retain most of their original luster. (#8000)

Frosty 1878 Three Dollar Gold, MS62

- 1617 1878 MS62 NGC.** The 1878 is the most frequently encountered date in the three dollar series, and it is also generally the best looking coin for type purposes. The typical example displays rich, frosted mint luster and light pinkish patina, as seen on this piece. Striking details tend to vary on 1878s, and this piece lacks complete highpoint definition; however, that weakness was undoubtedly considered when this piece was graded. (#8000)

Fantastic Gem 1878 Three Dollar Gold

- 1618 1878 MS65 PCGS.** An outstanding Gem representative of this immensely popular three dollar gold type issue. The strike is bold overall, with only slight softness visible at the bow on the reverse, and the richly colored honey-gold fields offer the potent, swirling luster that defines the best examples of the date. Though the 1878 three dollar gold piece was hoarded from the time of its release and thousands of Mint State survivors are extant, by the MS65 level, the population thins out considerably. As for even finer examples, PCGS has certified just 68 such pieces (4/09). (#8000)

**MS65 ★ Prooflike 1879 Three Dollar
A Breathtaking Example**

- 1619 1879 MS65 ★ Prooflike NGC.** Despite the low circulation-strike mintage of 3,000 three dollar gold pieces, Mint State coins of 1879 are especially numerous. This is evident from examination of NGC/PCGS data, revealing that the two services have certified over 500 Uncirculated specimens, primarily through the near-Gem level of preservation.

The MS65 coin offered in this lot is among the finest 1879 three dollar pieces. It is one of only 20 or so examples of this date given a Prooflike designation. It is the *only* Prooflike 1879 three dollar assigned the coveted Star. Its gold-on-black contrast jumps out at the observer, as do the exquisitely struck design features. Close inspection reveals just a few minor marks that likely preclude an even higher numerical grade. There are three non-Prooflike examples numerically finer at NGC (4/09), but it is doubtful any of them exceed the present specimen on aesthetic grounds. (#78001)

Attractive 1882 Three Dollar, MS60

- 1620 1882 MS60 NGC.** This Mint State 1882 will appeal to a broad range of collectors as an important low-mintage issue. The Philadelphia Mint only struck 1,500 of these coins but quite a few have survived, leaving the date ripe for cherrypicking. This piece is light yellow, with sharp design details and pleasing surfaces for the grade. (#8004)
-

Captivating 1882 Three Dollar Gold, MS64

- 1621 1882 MS64 PCGS.** A lovely near-Gem example of this prized post-1878 three dollar gold issue, one of just 1,500 business strikes produced. Warmly lustrous wheat-gold surfaces show elements of yellow and lilac. Excellent detail and eye appeal with few marks for the grade. Population: 22 in 64, 10 finer (4/09). (#8004)
-

Challenging MS63 1886 Three Dollar

- 1622 1886 MS63 PCGS.** The 1886 three dollar gold piece had an original mintage of 1,000 business strikes. Unimpaired survivors are typically found in XF through MS62. Anything finer is surprisingly rare, unlike the hoarded 1888. The current Select specimen displays rich apricot-gold color and possesses semiprooflike fields that highlight the satiny motifs. A desirable example, despite a solitary tiny spot on the left obverse field. Housed in a green label holder. Population: 5 in 63, 6 finer (4/09).(#8008)

PROOF THREE DOLLAR GOLD PIECES

Splendid 1882 Three, PR53

- 1623 1882 PR53 PCGS.** As was sometimes the case with proof issues of the era, some examples entered circulation or were mishandled, inadvertently or otherwise. Fortunately, the current example saw limited time in the hands of noncollectors and was rescued for the sake of posterity. From the minuscule mintage of 76 pieces, perhaps fewer than half survive in any grade. Numerous small contact marks are scattered over each side, but the areas protected by the devices still show deep reflectivity.(#8046)

Outstanding 1882 Three Dollar Gold
PR65 ★ Ultra Cameo, Finest Certified

- 1624 1882 PR65 ★ Ultra Cameo NGC.** The three dollar proofs of 1882 had a mintage of only 76 pieces. They were apparently saved in relatively large numbers, as NGC and PCGS have graded 73 specimens, some of which are surely resubmissions. The two services, however, have seen just two Ultra/Deep Cameos, with the current Gem the finer of the two. Moreover, this particular coin is the only 1882 three dollar assigned NGC's coveted Star designation.

Beautiful brass-gold color adorns both sides, each of which projects outstanding field-motif contrast. A powerful strike manifests itself in crisp delineation on the design features, and both faces are impeccably preserved. A tiny, inoffensive toning spot above the 1 in the date may well preclude an even higher numerical grade. The technical quality and aesthetic appeal of this specimen cannot be stressed enough.

From The Frank M. Stirling Collection. (#98046)

PROOF FOUR DOLLAR GOLD PIECE

Popular 1879 Flowing Hair Stella in Gold Judd-1635, PR61 Cameo

1625 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR61 Cameo PCGS. In his 1988 *Complete Encyclopedia*, Walter Breen sardonically attacked the ideas that brought about the stellas and other “metric” patterns of the late 1860s through the early 1880s. He described an “alleged need for international trade coins” and called three members of the House of Representatives—Richard P. Bland, John Adam Kasson, and William Darrah Kelley—an “unholy trinity” dedicated to foisting unwanted proposals for ill-conceived cross-border currencies on Congress and the Mint. As is often the case with Breen’s work, however, there is more to the story.

In the European Commission brochure “One Currency for One Europe: The Road to the Euro,” a sidebar highlights a number of thematic predecessors to today’s most famous economic union:

“Economic integration between independent states is not new. The Latin monetary union, comprising France, Belgium, Switzerland, Italy and Greece, existed from 1865 until 1927. The Scandinavian monetary union of Sweden, Denmark and Norway lasted from 1873 until 1924. The German Zollverein is perhaps one of the most successful examples, beginning with a customs union between German principalities in 1834 and producing a central bank, the Reichsbank, and a single currency, the Reichsmark, in 1875.”

By 1879, the Latin Monetary Union had added Spain as a member, the Sweden-Denmark alliance had added Sweden’s autonomous political union partner Norway, and the Zollverein had strongly influenced the beginning of the German Empire.

The United States was influenced by these monetary unions, the Latin in particular; after the Mint Act of 1873, the adjustment of the minor silver denominations to a metric standard meant that the weight of pure silver in a dollar’s worth of American minor silver (though notably not a silver dollar or Trade dollar) was equivalent to the silver weight of five Belgian francs or Italian lire. The alignment of the American metric standard with the Latin Monetary Union was aided by their already close proximity; as has been noted elsewhere in numismatic literature, the change in weight of the minor silver pieces of the United States in 1873 was so small that properly proportioned planchets of the previous standard were within tolerance for the new benchmarks.

The stella was better-received as a pattern than as an idea for an international currency, and the 1879-dated Flowing Hair stellas were immensely popular with government officials. As a result, the 1879 Flowing Hair stella is one of the most heavily minted American patterns, though unceasing demand for the issue has made the available supply seem tiny by comparison. This mildly contrasted honey-gold and green-gold piece shows a few scattered faint hairlines in the fields and a pinscratch that runs near-vertically through the left obverse field, but it offers strong overall eye appeal nonetheless. (#88057)

EARLY HALF EAGLES

Very Scarce 1796/5 Small Eagle Five BD-1, XF40 Details

- 1626 1796/5 Small Eagle—Rim Damage—NCS. XF40 Details.** Breen-6418, BD-1, High R.4. Jeff Garrett and Ron Guth believe the 1796/5 Capped Bust, Small Eagle half eagle is an underrated coin, with a tiny officially reported mintage of 6,196 pieces. John Dannreuther believes even this small total is too large, and some of the reported coins were probably dated 1795. Dannreuther estimates a surviving population of perhaps 80-100 examples in all grades. A search of auction records confirms Heritage has not handled an example of this scarce date in the last three years.

The BD-1 variety is the only one known for the year, and early catalogers usually overlooked the overdate feature. An example appeared in the McCoy Collection (Woodward, 5/1864), lot 1942. Woodward described the piece as "1796 Very fine, and excessively rare." The lot sold for a respectable \$21.00 to "Eley" (probably Heman Ely).

The present coin features attractive, orange-gold surfaces with smooth, even wear over the high points of the design. No large or individually distracting marks are present, just numerous tiny abrasions peppered over each side. This offering represents a rare opportunity to acquire an affordable example of this very scarce date. (#8067)

Significant MS62 1798 Half Eagle Heraldic Eagle, Large 8, 13 Reverse Stars, BD-4

- 1627 1798 Large Eagle, Large 8, 13 Star Reverse MS62 NGC.** Breen-6248, BD-4, High R.4. Bass-Dannreuther Die State d/e. Attribution can be made by the advanced die state alone, with the cuds at 12 and 1 o'clock on the reverse particularly prominent. Eight die marriages are known for the 1798 half eagle, but all are rare, and two varieties (BD-7 and the Small Eagle BD-1) are extremely rare. BD-4 may be the most available marriage, yet Dannreuther estimates that only 80 to 100 examples are known. Among those, few would grade as high as MS62. This is an attractive yellow-gold representative that lacks any memorable marks. The strike is good, with only slight softness of impression at the centers. A desirable example of this challenging date and type. (#8078)

**Pleasing 1798 Half Eagle, AU55
Large Eagle, Small 8, BD-6**

- 1628 1798 Large Eagle, Small 8 AU55 NGC.** Breen-6430, BD-6, R.6. Bass-Dannreuther Obverse State b, Reverse State b. A substantial mintage of 24,867 half eagles was achieved in 1798, with eight known die varieties for the date. The present coin is an example of the rare BD-6 variety. Strong die cracks are present at right obverse and reverse, but neither is terminal. A rare variety today, but one that does not receive the same level of appreciation as the 14 Star Reverse, Large 8 variants. Still, the discerning early gold specialist will want to pick up an example, especially one so fine as the present coin. Warm orange-gold surfaces remain surprisingly radiant despite light wear, and only a few fine abrasions crisscross the fields. Faint adjustment marks are noted at the central reverse. For the Large Eagle, Small 8 varieties, Census: 7 in 55, 25 finer (4/09). (#8079)

Delightful 1800 BD-5 Half Eagle, AU58

- 1629 1800 AU58 NGC.** Breen-6438, BD-5, High R.3. Attributed by the blunt 1 in the date, reverse star 13 touching the eagle's neck, both feet of last A in AMERICA touching the claw, and the last S of STATES over cloud space. This near-Mint representative has nearly full luster with brilliant green-gold color and strong design features. (#8082)

Uncirculated 1802/1 Five Dollar, BD-1

- 1630 1802/1 MS60 NGC.** Breen-6440, BD-1, High R.4. Luster fills the reverse and illuminates the obverse borders and portrait. The reverse is nearly unabraded, and the obverse exhibits only minor contact. A tiny ruby-red alloy spot is concealed on a star above the eagle. Early U.S. gold types are vastly scarcer than their post-1834 successors, and collector interest continues to grow, corresponding to the recent dispersal of die variety knowledge. Housed in a former generation holder. (#8083)

AU Sharpness 1803/2 Five, BD-4

- 1631 1803/2—Ex-Jewelry, Tooled, Whizzed—ANACS.** AU Details, Net VF20. Breen-6441, BD-4, R.4. The left and right obverse field has been repaired, and both sides are whizzed. Remnants of navy-blue solder are noted at 11 o'clock on the obverse and at 4 and 7 o'clock on the reverse. A collectible example of this better date early half eagle. (#8084)

Coveted 1803/2 Five Dollar, BD-4, MS62

- 1632** 1803/2 MS62 NGC. Breen-6441, BD-4, R.4. All 1803-dated half eagles are 1803/2 overdates, despite the usage of two distinct obverse dies. Both have a prominent 2 underdigit, but can be distinguished by the T in LIBERTY, which has a broken right foot on BD-1 through BD-3. The T is perfect on examples of BD-4, and equally diagnostic is the slender die crack along the bases of the date. This is a yellow-gold example with hints of lime-green. Well struck, although the reverse has a few faint adjustment marks, as made. No abrasions are consequential aside from two thin marks in the hair. An important contribution to a specialist holding. (#8084)
-

Thomas Jefferson, portrait by Rembrandt Peale

Desirable 1806 BD-6 Half Eagle, MS64

1633 1806 Round Top 6, 7x6 Stars MS64 PCGS. Breen-6448, BD-6, R.2. Dannreuther State d/e. The nation's first half eagles were coined in 1795, and for the first dozen years, mintages were modest, even though the half eagle was the primary gold denomination. From 1795 through 1806, a mere 300,000 half eagles were coined, and nearly 20% of that total was for the 1806 Round Top 6 coins. The Guide Book reports an actual mintage of 54,417 coins for this single variety, while John Dannreuther estimates the mintage at 35,000 to 50,000 coins.

The significant mintage of this single variety places it as the most common early half eagle, with many Mint State pieces still in existence. However, nearly all of those that survive are in lower Mint State grades. According to Jeff Garrett and Ron Guth, the average certified grade is 57, and the average auction grade is 52. The availability of this issue makes it an attractive and important type coin that is plentiful in any grade desired, up to MS63. Choice Mint State pieces, such as the example now offered, are rare, and Gems are extremely rare.

A few scattered but trivial surface marks on each side are all that stand between this coin and a Gem grade. Both sides have frosty luster and full mint brilliance with lovely greenish-gold surfaces. The strike is sharp with nearly all details fully defined. Population: 39 in 64, 1 finer (4/09).(#8089)

Uncirculated 1808 Early Five, Wide 5D, BD-4

- 1634** 1808 MS61 NGC. Wide 5D, Breen-6457, BD-4, High R.3. A lovely Uncirculated example of the scarce and popular Reich-designed Bust Left design. The centers have hints of olive-green, while the borders offer subtle peach-red shades. Boldly and evenly struck, and the surfaces are smooth with only faint and unimportant field marks. Luster is particularly extensive across the reverse. An excellent opportunity to secure a quality example of this challenging type. (#8102)

AU Large Date, Large 5
1810 Half Eagle, BD-4

- 1635** 1810 Large Date, Large 5 AU50 NGC. Breen-6459, BD-4, R.2. This gently circulated yet still desirable 1810 specimen offers partly lustrous greenish-gold surfaces with a glint of copper-gold through the headband. Some light obverse die clashing is noted along the border from 12 o'clock to 2:30, from the reverse dentilation. The eagle's neck is softly defined, but the wings and hair have pleasing definition.
Ex: Long Beach Signature (Heritage, 9/2006), lot 3475. (#8108)

Appealing 1810 Large Date, Large 5
Five Dollar, BD-4, MS63

- 1636** 1810 Large Date, Large 5 MS63 NGC. Breen-6459, BD-4, R.2. A simply splendid example of this early gold type coin, the most available of the Capped Bust Left series that ran from 1807 through 1812. Garrett and Guth point out that this date is one of the few of the type that can be found—for a price—in grades as high as MS66. This more-reasonable piece offers lustrous, relatively pristine greenish-gold surfaces. Only a few minuscule signs of contact preclude an even finer grade, but this piece nonetheless offers significant appeal at a reasonable cost of acquisition. Census: 31 in 63, 36 finer (4/09). (#8108)

**Near-Gem 1810 Half Eagle
Large Date, Large 5, BD-4**

- 1637 1810 Large Date, Large 5 MS64 PCGS.** Breen-6459, BD-4, R.2. Bass-Dannreuther Die State a/a, perfect dies. A lovely olive-gold near-Gem of this popular *Guide Book* variety. The strike is precise save for slight merging of the plumage near the left shield border, and the fields are smooth save for wispy luster grazes. Specialists argue that the Large 5 is a misnomer, since it is shorter than the Tall 5. In his notes, Harry W. Bass, Jr. referred to it as a Fat 5. Regardless of nomenclature, this variety is subject to strong demand from gold type collectors, who soon learn that the pre-1834 designs were heavily melted and are even more elusive than their mintages suggest. Population: 34 in 64, 2 finer (4/09). (#8108)

**Charming Choice AU
1811 Half Eagle, Small 5, BD-2**

- 1638 1811 Small 5 AU55 NGC.** Breen-6464, BD-2, R.3. This green-gold beauty has substantial luster and is remarkably devoid of visible abrasions. Although John Reich's Capped Bust Left type is elusive, collectors of a certain means can complete a date run of the design, 1808 to 1812. Such a task is impossible for its successor type, the Capped Head Left, due to the prohibitive rarity of the 1815 and 1822. (#8109)

CLASSIC HALF EAGLES

- 1639 1834 Plain 4 AU53 PCGS.** First Head, Breen-6501, McCloskey 3-A, R.3. Light wear is concentrated on the high points, leaving the yellow-gold fields radiant. Minimally abraded on the obverse. (#8171)

- 1640 1834 Plain 4 AU53 PCGS.** Small Head, Breen-6502, McCloskey 2-A, R.2. Considerable luster enlivens the dusky yellow-orange fields. Minimally marked with only modest wear across the high points. (#8171)

**Uncirculated 1834 Classic Half Eagle
Plain 4, Second Head**

- 1641 1834 Plain 4 MS61 NGC.** Second Head, Breen-6502, McCloskey 2-A, R.2. This unmarked Mint State Classic Head half eagle has dazzling luster throughout the margins, eagle, and curls. The strike is precise for the type, although slight weakness is noted at the curls left of the ear.

Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7273. (#8171)

Exquisite 1835 First Head Classic Five, MS63

1642 1835 MS63 NGC. First Head, Breen-6504, McCloskey 1-A, R.2. Well struck and pleasing with good luster and superior eye appeal. The reverse has three brief lintmarks, one of which (below the eagle's head) resembles the letter Q. Struck from clashed dies. Census: 14 in 63, 16 finer (4/09).(#8173)

1643 1836 AU55 NGC. Second Head, Large Date, Breen-6509, McCloskey 4-C, R.3. A problem-free green-gold Classic five that is well struck aside from the left-side stars. The cheek and curls show only slight wear.(#8174)

Pleasing MS63 1838 Classic Half Eagle

1644 1838 MS63 NGC. Breen-6515, Small Arrows, Large 5, McCloskey 2-B, R.2. Also diagnostic to this variety, the TES in STATES is widely spaced. Final year of this short-lived type and among the more difficult P-mint issues, trailing only the Crosslet 4 and 1837 in Mint State rarity. This piece is boldly detailed with frosty, original mint luster and a bright yellow-gold color. Abrasions are evenly distributed and mostly unobtrusive. The overall eye appeal is superior for the grade. Population: 15 in 63, 11 finer (4/09). Ex: *Baltimore Signature* (Heritage, 7/2003), lot 10273.(#8176)

Important 1838-C Half Eagle AU53

1645 1838-C AU53 NGC. Breen-6516, Variety 1-B, R.5. The 5 in the denomination is repunched. The scarcer of the two die marriages known for this elusive first-year Charlotte Mint issue. The reverse die has a heavy bisecting crack between 1:30 and 7:30. A yellow-gold piece with ample luster and only a few minor marks on the upper reverse field. Census: 6 in 53, 23 finer (4/09).(#8177)

LIBERTY HALF EAGLES

1646 1842 Small Letters AU50 NGC. A honey-gold representative that possesses ample luster and lacks singularly obtrusive marks. Liberty's extremities are incompletely brought up. The mintage of only 27,578 pieces is divided into Small Letters and Large Letters varieties, with the latter believed rarer. Census: 2 in 50, 13 finer (4/09).(#8207)

1647 1842-C Large Date—Improperly Cleaned—NCS. XF Details. Variety 1. Pleasing central detail despite the overall level of wear. Pale lemon-gold surfaces are lightly abraded with faint hairlines from a past cleaning.(#8209)

Borderline Uncirculated Large Letters 1843-O Five

1648 1843-O Large Letters AU58 NGC. Bright luster dominates the peripheries and devices of this boldly struck No Motto New Orleans five. Small marks are distributed, but none merit individual mention. Although less rare than its Small Letters counterpart, the 1843-O Large Letters is desirable this close to Mint State. Census: 39 in 58, 20 finer (4/09).(#8216)

1649 1844 MS61 PCGS. Sharply struck with warm sun-yellow luster. Though a number of light to moderate abrasions are present in the fields, the eye appeal remains strong. Population: 9 in 61, 21 finer (4/09).(#8219)

Choice AU 1844-D Five Dollar

1650 1844-D AU55 NGC. Variety 11-H. Luster brightens the margins and devices of this bright straw-gold Choice AU Charlotte Mint type coin. A few tiny marks near the chin and mouth are customary for the grade. Well struck for this branch mint, despite minor blending of detail on the eagle's neck plumage.(#8221)

Delightful Near-Mint 1844-D Five

- 1651 1844-D AU58 NGC.** Variety 11-H. The 1844-D five dollar is usually seen in Extra Fine or About Uncirculated grades, as Mint State specimens are quite rare. Bright yellow surfaces with a slight greenish tint grace both sides of this AU58 example, each of which possesses ample remaining luster. A sharp and even strike is noted on the design features. Small contact marks are visible, especially in the left obverse field. Census: 38 in 58, 20 finer (4/09). (#8221)

Scarce AU 1846-C Half Eagle

- 1652 1846-C AU50 NGC.** Variety 1. The 1846-C, with a mintage of 12,995 pieces, is scarce above the XF level. This AU Charlotte Mint example displays bright yellow-gold surfaces with traces of luster in the protected areas. The design elements are generally well defined, though some softness is noted in portions of the center on each side. A few of the expected faint abrasions are scattered about. Ex: Long Beach Signature (Heritage, 6/2006), lot 3297. (#8227)

- 1653 1847-D PCGS Genuine.** Variety 17-I. Well-defined for the Dahlonega issue with still-lustrous yellow-orange surfaces. Scattered light to moderate abrasions overall with certain areas of concentrated marks. (#8234)

- 1654 1848-C—Damaged—NCS. XF Details.** Variety 1. Pleasing central detail with luminous yellow-gold surfaces. Moderate abrasions overall and two circular depressions, one on each side near the rim, nearly aligned with one another; perhaps an attempt to hole the piece went awry. (#8237)

- 1655 1848-C—Improperly Cleaned—NCS. AU Details.** Variety 1. A uniformly microgranular representative of the Charlotte Mint. The luster is subdued, but little if any wear is present. The strike is above-average, save for softness on the E in LIBERTY and the fletchings. (#8237)

Attractive AU53 1848-C Half Eagle

- 1656 1848-C AU53 PCGS.** Variety 1, the only dies known despite a fairly high (by Charlotte Mint standards) mintage of 64,472 pieces. This is an attractive yellow-gold example that exhibits copious luster within the plumage and the reverse legends. No distracting marks are noted. Population: 8 in 53, 16 finer (4/09). (#8237)

Elusive 1848-C Five Dollar AU55

- 1657 1848-C AU55 NGC.** Variety 1, the only known dies. A yellow-gold Choice AU representative of the antebellum Charlotte Mint. Luster glows from the legends and eagle, and although small abrasions are scattered, none merits individual description. Census: 29 in 55, 24 finer (4/09). (#8237)

Choice AU 1848-C Half Eagle

- 1658 1848-C AU55 NGC.** Variety 1. Among Charlotte Mint gold coins, the production figure of 64,472 pieces for this issue was fairly significant, although only a few have survived in Mint State. This Choice AU example has deep orange and green-gold color on both sides, with fewer than the expected number of small marks. Plentiful luster beckons from the design recesses. Census: 29 in 55, 24 finer (4/09). (#8237)

- 1659 1849-C PCGS Genuine.** Variety 2, scarce with the 1 in the date closer to the bust than on Variety 1. This example, though cleaned with glossy and slightly hairlined yellow-gold surfaces, retains considerable detail. (#8241)

Appealing AU53 1849-D Five Dollar

- 1660 1849-D AU53 PCGS.** Variety 22-L. This lightly worn example displays substantial luster and even green-gold toning. The design motifs are boldly impressed, save for a few of the obverse stars and the eagle's arrow fletchings and right (facing) talons. Numerous tiny marks on each side contribute to the grade. Population: 12 in 53, 25 finer (4/09).(#8242)

Difficult MS61 1850-C Liberty Half Eagle

- 1661 1850-C Weak C MS61 NGC.** Variety 4 (formerly Variety 15-G, Die State II). A thick die scratch on the lower L of LIBERTY identifies this variety, as does the weak mintmark. While Doug Winter writes this is the most common variety of the year, it can still be difficult to locate in Mint State. Indeed, NGC has graded just four Uncirculated Weak C coins. This MS61 specimen displays fairly well defined devices. The yellow-gold surfaces exhibit the most luster in the recesses, and reveal distributed minute marks. Census: 3 in 61, 0 finer (4/09).(#98244)

- 1662 1852 MS61 NGC.** Decisively detailed with impressively lustrous yellow-gold surfaces. Though a number of light abrasions pepper the obverse, the overall eye appeal is strong.(#8250)

Borderline Uncirculated 1852-D Five

- 1663 1852-D AU58 PCGS.** Variety 28-U. This is a bright Dahlonega representative that has yellow canary-gold color and no obtrusive marks. A minor strike-through is behind the hair curls on Liberty's neck. The strike is inconsistent, although most of the eagle is sharp. Luster is plentiful, particularly on the reverse.
Ex: Long Beach Signature (Heritage, 6/2006), lot 3320. (#8252)

Sharp 1853-C Five Dollar, AU55

- 1664 1853-C AU55 PCGS.** Variety 1. The digit 1 is close to the bust, with a small curved notch in the lower bust line. Luster resides in the recessed areas of this Choice AU, and both sides yield yellow-gold surfaces that give off a slight greenish cast. Sharply struck with just a few minute marks. Population: 19 in 55, 18 finer (4/09).(#8254)

- 1665 1855-C—Repaired, Improperly Cleaned—NCS.** AU Details. Variety 1, as always. The fields have been carefully smoothed, most clearly beneath the left (facing) wing, and the piece has been whizzed to conceal the repairs. Still a well detailed example of this popular Charlotte issue.(#8262)

Challenging 1855-O Five Dollar, AU55

- 1666 1855-O AU55 PCGS.** The low-mintage 1855-O half eagle, produced to the extent of only 11,100 coins, is rare in any grade. Indeed, PCGS and NGC have certified slightly more than 100 examples in all levels of preservation, including a mere six in Mint State (all MS60 or MS61). The peach-gold surfaces of this Choice AU specimen retain luster in the protected areas of the sharply struck design features. A few minute circulation marks do not distract. Population: 6 in 55, 5 finer (4/09).(#8264)

Condition Rarity 1856 Select Half Eagle

1667 1856 MS63 PCGS. The 1856 is scarcer than its nearly 200,000 mintage might suggest. It is most frequently seen in XF or AU condition and is rare in Mint State. Rich peach-gold patina shows on both side of this Select example, each of which possesses ample luster and is minimally abraded. The design elements are crisply struck throughout. Population: 5 in 63, 3 finer (4/09). (#8266)

1668 1856-D—Obverse Damage, Improperly Cleaned—NCS. XF Details. Variety 33-BB. Light yellow-gold color overall and moderately abraded. Wispy hairlines are present in the fields, and the lower left obverse shows a scratch. A dig is also present above Liberty's coronet. Still, a remarkably appealing piece despite these flaws. (#8268)

Near-Mint 1857-D Half Eagle

1669 1857-D AU58 NGC. Variety 34-CC. A refreshingly unabraded Borderline Uncirculated Dahlonega half eagle that has peripheral luster and original yellow gold color. Slightly soft on the fletchings and forehead curls. A lower mintage issue, since California had its own mint and the Georgian gold fields were largely played out. Census: 24 in 58, 12 finer (4/09). (#8273)

Condition Census 1859-D Half Eagle
Medium D, MS63

1670 1859-D Medium D MS63 NGC. Variety 36-CC. The 1859-D Liberty Head half eagle boasts the second lowest mintage of the series, with only 10,366 pieces coined. An estimated 120-140 specimens exist today in all grades, with most examples seen in the XF range. The issue becomes rare at the AU level, and coins in Select Mint State are very rare. Collectors have prized the 1859-D half eagle since collecting mintmark varieties first became popular at the dawn of the 20th century. William Woodin consigned his specimen to the fabulous 1914 ANS Exhibition.

Doug Winter's Condition Census for 1859-D half eagles lists a PCGS-graded MS64 coin in the top spot, followed by three PCGS-certified MS63 examples tied for second-place honors. Recent population data from NGC shows one coin graded MS65 by that service, with a single example certified as MS64, and two specimens grading MS63, including the coin offered here (4/09). Some of these citations may represent crossovers and resubmissions. The available data suggests the present coin is tied with several other examples for the number four spot on the Condition Census list. This coin is sharply struck, with only the slight weakness on the centers always seen on this issue. The surfaces are a pleasing orange-gold color and display dazzling mint luster. Overall visual appeal is much greater than usually seen on this issue. (#8282)

**High-End 1860-D Half Eagle
Medium D, MS62**

1671 1860-D Medium D MS62 PCGS. Variety 38-FF. This variety has a medium mintmark on the reverse and is attributed by the upright of the D situated over the VE of FIVE. The 1860-D is most often seen in Extremely Fine grades, and is more available in the lower levels of About Uncirculated than its small mintage of 14,635 would suggest. It is rare in high-end AU, and extremely rare in Mint State (Douglas Winter, *Gold Coins of the Dahlonega Mint*, 2003).

A relatively sharp strike brings out strong definition on most of the design elements, including all of the star centers and the hair at Liberty's forehead, areas that are sometimes weak. The usual softness occurs on the curl beneath Liberty's ear and on the eagle's neck feathers, and a scattering of light marks occasionally interrupts the luster flow. Overall, this coin radiates pleasing eye appeal. Population: 7 in 62, 2 finer (4/09). (#8286)

Lustrous 1861 Half Eagle, MS63

1672 1861 MS63 PCGS. Any Mint State No Motto Liberty half eagle, regardless of its issue, is an important condition rarity, and even the otherwise plentiful 1861 is rarely found so finer. This boldly detailed example is fully lustrous with exceptional eye appeal. Population: 38 in 63, 50 finer (4/09). (#8288)

Rare Near-Mint 1863-S Five Dollar

1673 1863-S AU58 NGC. Only one die variety is known, with a large S mintmark on the reverse that Walter Breen attributed as the "Reverse of 1856." A single known variety is unsurprising, given a mintage of only 17,000 coins. The obverse has some curious raised die lines behind LIBERTY, near the eye, on the neck, and on the bust, visible on several examples that we checked in our Permanent Auction Archives. They are reminiscent of those seen on the 1884-CC eagle, and may represent damage to the die during its long journey from Philadelphia to San Francisco.

An attractive example, this half eagle has partly lustrous orange-gold surfaces that lack any obtrusive abrasions. Small marks are scattered, and the strike is precise. NGC has never graded a Mint State piece, and it is likely that the AU58 Census mostly comprises resubmissions. (#8295)

Popular 1870-CC Half Eagle, AU50

- 1674 1870-CC AU50 PCGS.** The 1870-CC, key to a set of "CC" half eagles, is popular and well known due to its status as the first issue of this denomination made at this mint. Only 100 or so examples are known in all grades, and most are heavily worn. About Uncirculated coins such as this AU50 offering are rare, and Mint State pieces are nearly unobtainable.

Deep orange-gold patina imbued with traces of lilac and sky-blue resides on the obverse, while the reverse displays bright yellow-gold color. Luster is visible in the recessed areas of both sides, and the design elements are well defined, save for the usual softness on the eagle's neck. Distributed minute marks do not detract from the overall appeal. Population: 5 in 50, 10 finer (4/09).(#8320)

Appealing 1870-S Half Eagle, AU53

- 1675 1870-S AU53 NGC.** Only 17,000 of these coins were struck in San Francisco during the year, and few survivors are seen today. In fact, the average grade of an example is VF38, far below the quality of this example. Modest portions of luster remain on the light yellow surfaces of this beauty. The fields are faintly reflective, imparting extra eye appeal to this pleasing piece. Census: 10 in 53, 14 finer (4/09).(#8321)
-

Bright 1871-CC Five Dollar, XF45

- 1676 1871-CC XF45 PCGS.** The 1871-CC is one of the scarcest dates in the Liberty Head five dollar series, though pieces through Very Fine can be located with little trouble. Extremely Fine and About Uncirculated examples will take more searching and patience, and Mint State coins are truly rare. The bright yellow-gold surfaces of this Choice XF specimen display traces of luster in the recesses, and the design elements exhibit nice detail. Minimally abraded for a coin that has seen some circulation.(#8323)
-

Exceptional 1872-CC Five Dollar, AU53

- 1677 1872-CC AU53 PCGS.** The 1872-CC is one of the rarest half eagles from the Carson City Mint. In this regard, Rusty Goe (2003) writes that survival percentage estimates are lower than any other date in the series, with less than 0.5% extant. Likewise, Goe states that: "At the turn of the 21st century, the 1872-CC is the only date in the Carson City half eagle series that has not had a specimen graded in Mint State condition by either PCGS or NGC."

Nearly a decade later neither service has yet to certify a Mint State specimen. This makes AU pieces such as the AU53 in this lot such a special offering. Attractive peach-gold coloration bathes both sides, each of which retains a good amount of luster in the recessed areas. As expected, the surfaces reveal a few small circulation marks, none of which are bothersome. The star radials are strong, as is the wing plumage, but the typically seen softness is apparent on portions of Liberty's hair and on the horizontal shield lines and adjacent neck feathers. Nevertheless, this specimen yields much better eye appeal than is characteristic of most surviving coins. (#8326)

- 1678 1873-S AU50 PCGS.** The 1873-S five dollar was issued to the extent of only 31,000 business strikes, and most were heavily circulated in the channels of commerce. There are few high-grade survivors. This AU50 coin displays apricot-gold color that transitions into red-gold in the recesses. The design elements are well defined, except that the E in LIBERTY is weak. A few light marks are undistracting. Population: 5 in 50, 10 finer (4/09). (#8332)

Appealing Near-Mint 1874 Five

- 1679 1874 AU58 NGC.** With just 3,488 business strikes produced, the Philadelphia Mint was third in half eagle production for 1874, behind both Carson City and San Francisco. This near-Mint piece is lustrous yellow-orange with glimmers of watery reflectivity in the reverse fields. NGC and PCGS have graded just six Mint State coins between them (4/09). (#8333)

Elusive 1877 Half Eagle, AU53

- 1680 1877 AU53 NGC.** Ex: Richmond Collection. A well struck piece that has almost as much semiprooflike flash in the fields as an Uncirculated specimen might possess. Minor marks and hairlines limit the grade, but high point wear is minimal. Softness on the eagle's neck feathers appears to be from striking weakness rather than wear. A pleasing piece for the grade. This low mintage issue of 1,152 coins is scarce at any level of preservation. Census: 3 in 53, 23 finer (4/09). (#8342)
- 1681 1877-CC—Improperly Cleaned—NCS. XF Details.** Luster is substantial, particularly on the reverse, although the strike is soft on Liberty's curls. Patient rotation finally reveals wispy parallel hairlines on each side. A challenging Carson City emission with a mintage of only 8,680 pieces. (#8343)
- 1682 1877-S AU55 NGC.** Aside from minor softness on the eagle's neck and the arrow feathers, this piece is well-defined, with a good amount of luster on its lemon-gold surfaces. Lightly worn with small, scattered abrasions. A conditionally rare state for this low-mintage San Francisco issue. Census: 21 in 55, 11 finer (4/09). (#8344)

Bold AU 1879-CC Five Dollar

- 1683 1879-CC AU50 PCGS.** Nearly full details are seen on both sides of this popular Carson City issue, thanks to a bold strike and less actual wear than the assigned grade would suggest. The color is a rich peach-gold and mint-green. There is plenty of luster, though moderate abrasions are visible on the obverse. Extremely rare in Mint State.(#8349)

Pleasing 1879-CC Liberty Five, AU55

- 1684 1879-CC AU55 PCGS.** This issue is the most available Carson City half eagle from the 1870s, but is usually found in the lower circulated grades (Jeff Garrett and Ron Guth, 2006). The apricot-gold surfaces of this Choice AU example display good amounts of residual luster, and the design features are nicely defined. A few minute marks are undistracting. Population: 13 in 55, 14 finer (4/09).(#8349)

**Desirable 1879-CC Five Dollar, MS61
Tied for Finest Certified**

- 1685 1879-CC MS61 NGC.** As with any Carson City five issued prior to 1890, the 1879-CC is legitimately rare in AU and better condition and is more often than not offered in the VF to XF grade range. Just 17,281 pieces were issued, a figure that would increase substantially in two of the next three years to take some of the burden off the overworked San Francisco Mint.

This lustrous example is one of just six '79-CC half eagles to receive a Mint State rating from NGC and PCGS. The design features are well struck except for minor softness on the arrow feathers. Peach-gold patina residing on both sides is tinted with wisps of reddish-tan. A triangular mark under the eagle's neck serves as a definite pedigree identifier, as does a linear mark beneath the S of TRUST. Truly a desirable offering for the Carson City or rare gold specialist. Census: 3 in 61, none finer at either service (4/09).(#8349)

-
- 1686 1882-CC AU55 PCGS.** Apricot-gold and mint-green toning vie for territory on this Choice AU half eagle. Traces of luster reside in the recesses of the well defined design features. Both sides are minimally marked.(#8359)

- 1687 1882-CC AU55 PCGS.** Crisply detailed with soft and pleasing luster in the orange-accented yellow-gold fields. Modestly worn with few overt abrasions. PCGS has graded 85 finer pieces (4/09).(#8359)

- 1688 1883 MS64 PCGS.** Sharply impressed with warm and swirling luster. Vibrant yellow-gold color with hints of honey and orange. A striking example of this midseries Liberty half eagle issue. Population: 12 in 64, 2 finer (4/09).(#8361)

**1886 Liberty Half Eagle, MS66
Finest Certified at PCGS**

- 1689 1886 MS66 PCGS. CAC.** There are many condition rarities in the Liberty gold series, including examples of all denominations. The 1886 half eagle is just such a coin, from a mintage of 388,360 coins, suggesting that it is a rather plentiful date. However, it is seldom encountered in higher grades. For example, the finest of four Smithsonian Institution pieces is only AU58, according to Garrett and Guth.

This green-label Premium Gem is the lone MS66-graded piece known to PCGS, making it a potential trump for Registry Set collectors (4/09). Its bold detail and ceaselessly lustrous peach-gold surfaces combine for amazing eye appeal. (#8369)

Rare 1889 Select Five Dollar

- 1690 1889 MS63 NGC.** The 1889, from a mintage of 7,520 circulation strikes, is rare in all grades. This Select example was crisply impressed by the dies, save for softness in the upper part of the bun and adjacent stars. Lustrous brass-gold surfaces reveal a few minute marks that prevent a higher grade. Census: 7 in 63, 2 finer (4/09). (#8374)

Well Struck 1890-CC Half Eagle, MS62

- 1691 1890-CC MS62 PCGS.** The 1890-CC was the first Carson City five dollar issue since 1884, and the partial-year production led to a relatively small emission of 53,800 pieces. This MS62 specimen displays partially prooflike fields that offset the well struck design elements. Minor obverse marks limit the grade. Population: 64 in 62, 57 finer (4/09). (#8376)

- 1692 1891-CC MS61 NGC.** Crisply struck with immense yellow-gold luster and no trace of wear. Though scattered light to moderate abrasions preclude a finer designation, the eye appeal remains strong. (#8378)

Important 1891-CC Half Eagle, MS64

- 1693 1891-CC MS64 NGC.** A favorite with collectors, the 1891-CC is quite common for a Carson City gold piece, and it is an ideal candidate for the type collector. Both sides are frosty and highly lustrous with lovely yellow-gold surfaces and exceptional mint brilliance. Census: 56 in 64, 7 finer (4/09). (#8378)

- 1694 1895 MS64 NGC.** Satiny yellow-orange surfaces offer inviting eye appeal. Boldly impressed on all devices, particularly on the center of Liberty. NGC has graded 69 numerically finer pieces (4/09). (#8390)

Amazing 1899-S Half Eagle, MS65

- 1695 1899-S MS65 NGC.** A stunning Gem with brilliant yellow and orange-gold luster over a full quota of mint frost. This amazing piece is an important rarity in high grades, with a combined NGC and PCGS population of 18 in MS65 and only seven finer. Census: 12 in 65, 5 finer (4/09). (#8399)

- 1696 1901/O-S MS64 PCGS.** FS-301, formerly FS-006. A lovely green-gold and peach near-Gem that possesses dazzling luster and has a particularly clean reverse. The upper right curve of the underdigit 0 is evident near the peak of the second 1 in the date. Population: 72 in 64, 14 finer (4/09). (#8403)

Popular 1901/0-S Overdate Five, MS65

1697 1901/0-S MS65 PCGS. FS-301, formerly FS-006. The underdigit 0 shows most prominently to the right of the top of the second 1 in the date. This variety ranks among a small number of 20th century overdates and is plentiful in relation to most of the others. The present Gem is boldly defined with excellent yellow-gold luster and brilliant mint frost. Population: 13 in 65, 2 finer (4/09). (#8403)

1698 1904-S MS62 PCGS. This yellow-gold better-date Liberty half eagle has ebullient luster and a few small marks between the first two stars. The 9 in the date is lightly repunched. Only 97,000 pieces were struck, since the double eagle was instead coined in prodigious quantity. Population: 28 in 62, 20 finer (4/09). (#8410)

1699 1905-S MS63 PCGS. Immensely lustrous with warm sun-yellow surfaces that show glints of orange. Pleasing for the Select grade with only a few wispy abrasions on and around the well-defined portrait. Population: 20 in 63, 27 finer (4/09). (#8412)

Exceptional 1908 Liberty Five, MS66

1700 1908 MS66 NGC. Fully struck in all areas with vibrant mint luster. This is an extraordinary type coin from the final year of the long-running Coronet series. The eye appeal far exceeds the stated grade, which is already considerable. A strong magnifier will reveal a few tiny marks, but none are apparent with the unaided eye. The luster is exceptional, soft and frosted with a slight bit of reddish patina around the rims. Census: 49 in 66, 7 finer (4/09). (#8418)

PROOF LIBERTY HALF EAGLES

Splendid, Rare PR65 Ultra Cameo 1882 Five Dollar Gold

1701 1882 PR65 Ultra Cameo NGC. The mintage for the 1882 proof half eagle is recorded as 48 pieces. That is merely a starting point, however: Garrett and Guth today estimate that fewer than 20 separate specimens exist. At least three are in the museum collections of the Smithsonian and the ANS.

According to our auction records and considering the present piece we can account for only 13 examples, whether non-Cameo, Cameo, or Deep/Ultra Cameo, that have sold in the last 15 years. With the splendid Ultra Cameo contrast as here, only this piece and one other, a PR63 Deep Cameo PCGS example that appeared in our recent FUN Signature auction (2/2009, lot 2824), have traded during that time, to our knowledge. This Gem Ultra Cameo example offers profound cameo contrast over medium orange-gold surfaces. There is one faint, reddish alloy spot below star 11 that will serve as a pedigree identifier. Census: 4 in 65 Ultra Cameo, 2 finer (4/09). From The Frank M. Stirling Collection. (#98477)

**Exquisite 1892 Liberty Head Half Eagle
PR64 Deep Cameo**

- 1702 1892 PR64 Deep Cameo PCGS.** Only 92 proof Liberty Head half eagles were minted in 1892. In their *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth estimate only 20-30 examples are extant today in all proof grades. Typically years pass between auction appearances. The coin offered here is the first Deep Cameo example of this rare date Heritage has handled. An early auction appearance occurred in the George Earle Collection (Henry Chapman, 6/1912), lot 2432. Chapman noted the issue was "very rare, as only a few made." Collector John M. Clapp is known to have purchased an example directly from the Mint in December 1892.

The present coin is a visual delight, displaying a well balanced cameo effect, with an equally strong element of contrast on both sides. A few light hairlines are visible in the reflective fields. Population: 3 in 64 Deep Cameo, 0 finer (4/09). (#98487)

INDIAN HALF EAGLES

- 1703 1908 MS63 PCGS.** A well struck example of this popular first-year Indian half eagle issue. Luminous yellow-orange surfaces show few significant abrasions, but scattered wispy marks account for the grade. (#8510)
- 1704 1909 MS63 NGC.** Crisply impressed and shimmering with refreshingly undisturbed fields and devices. The 1909 carries only a small premium over type prices, yet is at least a dozen times scarcer than the 1909-D in Mint State. (#8513)
-

Popular Gem 1909 Half Eagle

- 1705 1909 MS65 PCGS.** From a hefty reported mintage of 627,060 pieces, the 1909 Indian Head half eagle is easily located in all grades today. The issue enjoys great popularity as a type coin, due to its availability in Mint State. A PCGS-graded MS66 example sold for \$51,750 in 2006. The present coin is a delightful high-end specimen, with deep rose-gold color interspersed with lilac on each side. Fully struck, with deeply impressed design elements and unusually clean surfaces. The remarkable color and pristine fields make this coin a visual treat. Population: 83 in 65, 7 finer (4/09). (#8513)
-

Conditionally Rare 1909 Half Eagle, MS66

- 1706 1909 MS66 NGC.** The Indian half eagles are perhaps the most notable instance of serieswide condition rarity in American numismatics; virtually every issue is elusive in Select and scarce or better in Gem. At the Premium Gem level, an example from any date is a noteworthy prize. This 1909 half eagle is beautifully preserved with rich sunset-orange color and strong, slightly frosty luster. The strike is pleasing, with the sculptor's initials readily discernible, and the overall eye appeal is magnificent. One of just 13 coins at this level in the combined certified population, six graded by NGC and seven by PCGS, with none finer (4/09). (#8513)

Appealing Near-Gem 1909-D Indian Five

- 1707 1909-D MS64 NGC.** An appealing champagne-gold specimen with surprisingly frosty and intense mint luster, for the issue. Boldly struck with minor marks in the fields that keep it from grading higher. This second-year Indian half eagle issue from the Denver Mint is obtainable as a near-Gem but rare any finer. (#8514)

Desirable 1909-O Half Eagle, AU50 Details

- 1708 1909-O—Obverse Scratched—ICG. AU50 Details** This date is highly desired by collectors both because of its low mintage and its status as the only New Orleans representative of the type. The bright yellow-gold surfaces of this AU50 Details coin reveal a few minute marks, including a faint pinscratch in the lower left obverse field. Nicely detailed save for high-point wear. (#8515)

1909-O Indian Half Eagle, AU Details

- 1709 1909-O—Improperly Cleaned—NCS. AU Details.** According to Jeff Garrett and Ron Guth: "This is one of the most sought-after issues in the series because of the low mintage and general rarity in any Mint State grade. It has long been considered a key date and is always in feverish demand." This example retains excellent eye appeal and suffers minimal effects from improper cleaning. An attractive khaki-gold coin with numerous small abrasions in the reverse fields and a few wispy hairlines on each side. An affordable example of this important issue. (#8515)

Popular AU58 1909-O Half Eagle

- 1710 1909-O AU58 ANACS.** The final New Orleans half eagle is also the lowest-mintage issue of its design, and those two facts combine for insatiable demand from collectors. This example, yellow-gold with pleasing luster and just a touch of rub, could find a home in an otherwise Mint State collection. Several abrasions appear around the stars to the right of the Y in LIBERTY. (#8515)

Delightful MS64 1911 Indian Five

- 1711 1911 MS64 PCGS.** A great example of this popular Indian half eagle type issue, strongly lustrous with rich orange-gold color overall and a degree of sun-yellow at the left obverse. The well struck reverse shows a single abrasion to the left of WE. Only 78 numerically finer pieces appear in the combined certified population (4/09).(#8520)

Lovely MS64 1911 Half Eagle

- 1712 1911 MS64 NGC.** Despite a relatively high mintage, the 1911 half eagle, like the other issues of its ilk, is recognized as conditionally elusive relative to demand in Choice and better grades. The present coin is boldly impressed with luminous yellow-orange surfaces. Marks are few, with a small nick to the left of the eagle the only flaw deserving individual mention. NGC has graded 39 numerically finer pieces (4/09).(#8520)

Appealing Select 1911-S Five

- 1713 1911-S MS63 PCGS.** Softly lustrous yellow-orange surfaces with few abrasions on the obverse, though the scattered marks in the reverse fields contribute to the grade. Crisply detailed with excellent eye appeal for this S-mint issue, a condition rarity any finer despite a mintage of over 1.4 million pieces.(#8522)

- 1714 1912 MS63 NGC.** Well struck and appealing for the issue. Luminous yellow-orange surfaces show light abrasions overall and a patch of scrapes above the tips of the eagle's wings.(#8523)

Lustrous 1912 Half Eagle, MS64

- 1715 1912 MS64 PCGS.** A highly lustrous Choice Mint State piece, this 1912 half eagle has frosty yellow surfaces with traces of light pink on each side. The strike is bold, with all details virtually full. A few tiny abrasions are evident, preventing a higher grade. PCGS has only certified 45 finer examples of this issue (4/09).(#8523)

- 1716 1913 MS63 ICG.** Luminous with broad yellow-gold fields that show hints of orange. Overall detail is strong, including at the pendants of the necklace. Light, scattered abrasions contribute to the grade.(#8525)

Gorgeous 1915 Gem Five Dollar

1717 1915 MS65 NGC. The 1915, from a mintage of 588,000 pieces, is one of the more common Indian Head half eagles. Mint State examples are readily available through the near-Gem level of preservation. The certified population drops significantly in MS65, and neither NGC or PCGS has seen any specimens finer.

An exacting strike manifests itself in crisp definition on the design elements, and rich apricot-gold patination is imbued with splashes of lavender, mint-green, and violet, somewhat more so on the obverse. Frosty luster envelops both sides, each of which reveals just a few minor marks that barely prevent an even higher grade. Census: 37 in 65, 0 finer (4/09).(#8530)

1718 1915-S MS61 ICG. Like all San Francisco Indian fives, the 1915-S is conditionally rare, and Uncirculated examples are coveted. This is an unblemished honey-gold representative that has a good strike save for the customary incompleteness within the lower headdress.(#8531)

EARLY EAGLES

Attractive 1797 Large Eagle Ten, AU53 Rare BD-3 Variety

1719 1797 Large Eagle AU53 NGC. Breen-6835, Taraszka-11, BD-3, R.5. Mint records indicate 10,940 Capped Bust, Heraldic Eagle ten dollar gold pieces were struck in 1797, the first year of the design. Four die varieties are known for the year, with one variety representing the earlier Small Eagle design. The present coin is a representative of the rare BD-3 variety, characterized by the short, thin neck on the eagle. In *Early U.S. Gold Coin Varieties*, John Dannreuther estimates a surviving population of only 40-50 examples of this variety in all grades. As a date, 1797 eagles have been extremely popular with numismatists since the earliest times. An example appeared at auction as early as the A.C. Kline Sale (M. Thomas & Sons, 6/1855), lot 171. Unfortunately, the cataloger did not indicate the die variety of the specimen, as such distinctions were unknown at that early date.

The present coin shows some softness on the central details, but the peripheral design elements are sharply defined. The surfaces are a pleasing orange-gold color, with no notable distractions. Overall eye appeal is impressive.(#8559)

Desirable 1797 Heraldic Eagle
Ten Dollar, BD-2, AU53

- 1720** 1797 Large Eagle AU53 PCGS. Breen-6834, Taraszka-8, BD-2, High R.4. A strong loupe locates a hair-thin die crack from the serif of the 7 to the bust, and a radial die crack is at 1 o'clock on the reverse. Curiously, this radial crack is unmentioned in the Bass-Dannreuther reference, although it is evident on the photograph of the Bass-ANA Museum specimen. Four different styles of eagles were used on the 1797 ten dollar: the small eagle, BD-1, the toucan-beaked large eagle, BD-3, the narrow-necked large eagle, BD-2, and the narrow-beak, triangle-necked BD-4.

This is a partly lustrous example with pleasing surfaces. A few faint adjustment marks are concealed within Liberty's hair. The strike is sharp throughout, with only a hint of wear noted on the cheek, shoulder, and forehead. (#8559)

Handsome 1797 Large Eagle Ten, BD-2, AU55

- 1721** 1797 Large Eagle AU55 NGC. Breen-6834, Taraszka-12, BD-2, High R.4. The only obverse used with the Large Eagle reverse, having 10 stars left and six right. On the reverse, a star touches cloud 4, whereas in BD-3 and BD-4 the star is distant from cloud 4.

The present Choice AU offering displays bright brassy-gold surfaces that yield a slight greenish cast. Luster resides in the recessed areas, and well centered design elements are sharply defined throughout, except for softness on the eagle's breast feathers. A few light marks are scattered over both sides, including a faint pinscratch running from star 15 into Liberty's hair. Nevertheless, this is a handsome specimen of this early ten dollar. (#8559)

**Elusive 1799 Small Stars Obverse Ten
Irregular Date, BD-7**

- 1722 1799 Small Stars Obverse PCGS Genuine.** Irregular Date, Breen-6840, Taraszka-19, BD-7, R.3. Incorrectly designated by PCGS as a Large Stars Obverse, although the subtypes are admittedly difficult to distinguish. The PCGS code corresponds to "Damage." The right obverse field has the pinscratched letters R and M, and the reverse is moderately abraded near the shield corners and on the horizontal stripes. Partly lustrous, but likely cleaned at one time. (#98562)

Impressive 1799 Eagle, BD-7, AU58

- 1723 1799 Small Stars Obverse AU58 NGC.** Breen-6840, Taraszka-19, BD-7, R.3. A large mintage of 37,449 Capped Bust, Heraldic Eagle ten dollar gold coins was achieved in 1799. Ten die varieties are known for the date, with the present coin representing the BD-7 variety, distinguished by the tilting numerals 17 in the date and the position of star 13 away from the ribbon on the reverse. John Dannreuther estimates a surviving population of 250-350 examples of this variety in all grades.

The present coin is an exceptional early Bust ten, and one of the most attractive AUs we have seen in some time. This specimen has a feature that is extremely desirable on an AU58 coin—it has significantly more eye appeal than most low-end but technically Uncirculated coins. The striking details are firmly impressed throughout (save for a couple of stars on the obverse), and the color is an even, light yellow-gold with no trace of the coppery-reddish patina so common on these coins. Although there are myriad tiny contact marks and abrasions on each side, they seem not to affect the bright, remaining luster. (#98562)

Choice VF 1800 Ten Dollar, BD-1

- 1724 1800 VF35 PCGS.** Breen-6842, Taraszka-23, BD-1, High R.3. BD-1 is the only known variety for 1800 eagles, a better date within this coveted gold type. This is a richly detailed example with noticeable remaining luster. A small mark is noted on the bust near star 13, a few short scratches are clustered below the arrows on the reverse, and the obverse rim has a couple of minor dings near 3 o'clock. Ex: FUN Signature (Heritage, 1/2004), lot 7760; Steve Glenn Collection (Heritage, 4/2006), lot 3901. (#8563)
-

Choice XF 1800 Eagle, BD-1

- 1725 1800 XF45 PCGS.** Breen-6842, Taraszka-23, BD-1, High R.3. The only die pairing known for this issue, which the *Guide Book* records as having been struck to the extent of 5,999 pieces. This single reverse, featuring the eagle's beak touching or nearly touching star 12 at two points, was also used with obverses dated 1799 and 1801. Bass-Dannreuther estimate that the actual mintage of this variety could have ranged as high as 12,500 coins (likely including production in 1799 and 1801), making it an ideal acquisition for a type set. This specimen has reddish patina interspersed over each side, creating significant contrast against the natural greenish-gold color of the gold alloy. There are no mentionable contact marks on either side, just light wear consistent with the grade. (#8563)
-

Appealing 1800 Eagle, BD-1, AU58

1726 1800 AU58 NGC. Breen-6842, Taraszka-23, BD-1, High R.3. Only 5,999 Capped Bust, Heraldic Eagle ten dollar gold pieces were coined in 1800, and only one variety is known for the date. The issue is more available than one would expect from the small mintage, with a surviving population of 200-300 examples in all grades. The date has been prized by collectors from the early days of the hobby, and an example appeared in the Fifth Semi-Annual Sale (Woodward, 10/1864), lot 1620. The lot followed an exquisite Uncirculated 1799 eagle and Woodward described the coin as, "1800 Nearly as fine as the last; fine impression and beautiful surface; very scarce." The lot sold for the healthy sum of \$23.00 to J.O. Emery.

Woodward's lot description might well be used for the present coin. This coin is indeed a "fine impression," with the sharp strike imparting crisp definition to the breast feathers above the shield. Likewise, this example has a "beautiful surface" with bright, semiprooflike fields and luster remaining around the devices. Only a scattering of small abrasions on each side and some slight wear on the highest points of the design limit the grade. Census: 21 in 58, 46 finer (4/09).(#8563)

AU53 Details 1801 Ten Dollar, BD-2

1727 1801—Scratched—ANACS. AU53 Details. Breen-6843, Taraszka-25, BD-2, R.2. The obverse has a few thin marks, the most noticeable on Liberty's neck. The reverse is problem-free save for a minute dig near 7 o'clock. This butter-gold type coin is designated AU53, but luster dominates all but the open fields, and high point wear is negligible.(#8564)

AU58 1803 Eagle, BD-5, Star on Cloud

- 1728 1803 Extra Star AU58 NGC.** Breen-6845, Taraszka-30, BD-5, High R.4. Although the BD-5 die marriage was known for decades, nobody seemed to notice the extra star embedded in the reverse's rightmost cloud until Harry W. Bass, Jr.'s 1966 discovery.

In 2006, John Dannreuther estimated that approximately 100 1803 BD-5 tens have survived. The other Large Reverse Stars variety, BD-6, is even rarer, with as few as 10 extant pieces. Six different die marriages were used to strike 1803-dated eagles. The first four in the emission sequence are of the Small Reverse Stars type, and the authors opine that they are twice as plentiful—as a group—as their cousins with larger reverse stars.

This is a sharply defined example that shows even yellow-gold color. The surfaces are minimally abraded, and in fact show no singularly mentionable marks on either side. Significant quantities of mint luster can be seen around the devices. (#88565)

LIBERTY EAGLES

- 1729 1840 XF45 PCGS.** Rich orange-gold color with glimmers of luster remaining close to the rims. Lightly worn with scattered abrasions that have surprisingly little effect on the eye appeal. Population: 27 in 45, 31 finer (4/09). (#8581)
- 1730 1841 AU55 NGC.** This sharply struck sun-gold example possesses noticeable glimpses of prooflike luster. Tiny marks frequent the fields and portrait, as often seen on lightly circulated No Motto tens. A better date with a small production of 63,131 pieces. Census: 28 in 55, 28 finer (4/09).
Ex: Long Beach Signature (Heritage, 9/2006), lot 3736. (#8582)

- 1731 1842 Small Date AU55 NGC.** The small size of the date makes the space below the bust seem cavernous. This briefly circulated straw-gold piece shows numerous fine abrasions over each side. Census: 31 in 55, 23 finer (4/09). (#8585)

Scarce Choice AU 1844-O Ten

- 1732 1844-O AU55 NGC.** The 1844-O ten dollar is relatively scarce in all grades. The Choice AU specimen displays bright yellow-gold surfaces that are imbued with traces of reddish-orange, particularly on the reverse. Except for light highpoint wear, the design elements exhibit good definition. The normal assortment of minor marks are noted over each side. (#8591)

Reflective 1844-O Ten, AU58

- 1733 1844-O AU58 NGC.** Most of the design details on this light greenish-gold example are sharp, with slight weakness at the central obverse resulting from strike and wear. The fields are noticeably reflective. The mintmark shows slight doubling at the left inside curve. A rather high production piece for an early New Orleans gold coin, but only 16 Mint State examples have been graded by NGC and PCGS. Census: 49 in 58, 13 finer (4/09). (#8591)

Appealing AU 1846 Eagle

- 1734 1846 AU50 NGC.** This pre-California Gold Rush issue has a mintage of just over 20,000 pieces, and most survivors show considerable wear; as Garrett and Guth note, "The typical 1846 example is only EF or worse. About Uncirculated pieces are definitely rare" This yellow-orange piece, though moderately marked with a scrape in the right obverse field, exhibits only slight rub on the high points. Census: 15 in 50, 27 finer (4/09). (#8594)

Scarce 1846 Liberty Ten, AU53

- 1735 1846 AU53 NGC. CAC.** The typical 1846 ten is in VF or XF condition. AU coins are rare, and Mint State pieces are virtually unobtainable. This AU53 example displays the typically seen bright yellow-gold color that is imbued with hints of light tan. A well struck coin, revealing a scattering of minute marks. Census: 8 in 53, 19 finer (4/09).(#8594)

Elusive Near-Mint 1852-O Eagle

- 1736 1852-O AU58 NGC.** This issue had a scant mintage of just 18,000 pieces, which was many times lower than the previous year's New Orleans Mint production of 263,000 coins. This conditionally rare, appealing near-Mint example has even khaki-gold toning over both sides. There are no severe marks, but a few wispy hairlines are noted in the fields. Census: 7 in 58, 2 finer (4/09).(#8609)

Mint State 1856 Liberty Eagle

- 1737 1856 MS60 NGC.** A better No Motto issue with a mintage of just 60,490 pieces. Most certified examples are in AU grades, and Uncirculated representatives are rare. The present Mint State coin is well struck aside from the high-relief stars. Field abrasions are surprisingly close to absent, and only a few tiny ticks on Liberty's neck and mouth merit passing comment. The luster is vivacious. Census: 13 in 60, 14 finer (4/09).(#8619)

- 1738 1856-S AU50 PCGS.** Well struck overall with dusky orange-gold color and strong eye appeal for the grade. Minor dots of alloy and scattered abrasions are present on each side. Population: 23 in 50, 66 finer (4/09).(#8621)

- 1739 1857 AU50 PCGS.** Strong central detail with considerable flashy luster remaining in the fields. This lightly circulated coin is generally pale yellow-orange with an allow dot between star 5 and the rim. Population: 21 in 50, 14 finer (4/09).(#8622)

- 1740 1859 AU53 PCGS.** An original lemon-gold representative that has substantial luster and a few marks typical of the denomination in AU. An unheralded but very scarce antebellum Philadelphia issue. Only 16,093 pieces were struck, and PCGS has certified just one as Mint State. Population: 8 in 53, 15 finer (4/09).(#8628)

- 1741 1860-S Fine 12 NGC.** Though well-worn, this coin has a pleasing appearance with relatively few abrasions on the surfaces, dusky yellow-gold with deepening to violet around the peripheral devices. A desirable survivor from a San Francisco issue of just 5,000 pieces. Census: 1 in 12, 16 finer (4/09).(#8632)

Appealing AU 1866-S No Motto Eagle

- 1742 1866-S No Motto AU50 PCGS.** The various No Motto 1866-S issues are celebrated as the last of their kind, and the eagle, mintage 8,500 pieces, is no exception. The still-lustrous fields of this piece are lightly abraded with a mix of butter-yellow and canary-gold shadings. Great quality relative to the population; PCGS has graded only two AU50 pieces and just three finer (4/09).(#8644)

Rare AU55 1866 Ten Dollar

- 1743 1866 AU55 NGC.** The 1866, from a mintage of 3,750 circulation strikes, is rare in About Uncirculated grades and virtually unobtainable in Mint State. The yellow-gold surfaces of this Choice AU example displays mildly prooflike fields and sharply defined design motifs. Distributed light marks do not disturb. Census: 17 in 55, 5 finer (4/09).(#8649)

Low Mintage 1871-S Eagle, AU53

- 1744 1871-S AU53 NGC.** The AU53 grade designation seems to have been reasonably applied to this example. It is not quite as lustrous as the average AU55 specimen, but it shows slightly better detail than the typical AU50 coin. Boldly struck with only small marks on each side. Garrett and Guth observe that this issue is scarcer than expected, based upon the mintage figure of 16,500 pieces. Census: 14 in 53, 19 finer (4/09).(#8662)

Rare 1872-CC Ten Dollar, AU55

- 1745 1872-CC AU55 NGC.** Some controversy exists over the mintage of the 1872-CC ten dollar. Walter Breen (1988) and the 2009 *Guide Book* report 4,600 pieces; Rusty Goe (2003) gives a figure of 5,500; and Douglas Winter (2001) says 5,908. Regardless of which figure one chooses to believe, the 1872-CC is considered one of the rarest Carson City eagles, both in terms of absolute and condition rarity.

NGC and PCGS have certified only 99 examples of this issue in all levels of preservation, with the modal grade in the XF40-XF45 range. Thirty pieces fall into the AU spectrum, and none are rated Mint State.

The peach-gold surfaces of this Choice AU specimen are accented in reddish-gold and sky-blue, and display traces of luster in the protected areas. A better-than-average strike leaves relatively strong detail on the design elements. All stars, for example, show sharp radials; they are flat on many specimens. Only the hair over Liberty's ear and the right (facing) claw reveal the usual softness. Evenly distributed light marks are in line with a large gold coin that saw brief circulation. Census: 7 in 55, 0 finer (4/09). (#8664)

Lovely 1872-S Eagle, AU55

- 1746 1872-S AU55 NGC.** Between a low mintage of 17,300 pieces and a high attrition rate, the 1872-S eagle is part of a long string of conditionally rare San Francisco tens. This piece shows only light rub on faintly abraded but still-lustrous yellow-orange surfaces. NGC has graded 13 finer examples (4/09). (#8665)

- 1747 1873-S VF35 NGC.** An appealing Choice VF example of this elusive San Francisco ten dollar issue, one of only 12,000 pieces struck. Luminous yellow-orange surfaces show only a few readily perceptible abrasions. (#8668)
-

Attractive 1874-CC Ten Dollar, AU53

- 1748 1874-CC AU53 NGC.** The 1874-CC is relatively easy to locate in grades through Extremely Fine. Its availability declines in About Uncirculated, and a mere two Mint State pieces have been certified to date (4/09). The brass-gold surfaces of this AU53 coin retain considerable luster. Generally well defined, though the obverse center is typically soft. The small marks scattered about are not as frequent or severe than usually found. (#8670)
-

Exceptional 1875-CC Eagle, AU53, Rare So Fine

1749 1875-CC AU53 PCGS. Variety 1-A, attributed by a lump on the right arm of the Y in LIBERTY. While most Carson City collectors are aware of the absolute rarity of the 1875-CC, few ever get the chance to appreciate the condition scarcity of this key issue. Extremely Fine specimens are about the best quality that are usually seen. About Uncirculated coins are quite scarce, and only three Mint State examples are certified.

Rich orange-gold patina is imbued with occasional splashes of lavender, and remnants of yellow-green mint luster can still be seen in the recessed areas. While the 1875-CC is the most poorly struck eagle from the Carson City Mint, this particular specimen is fairly well defined, including the star centers and most of the eagle's plumage. Minor softness is apparent on the typically weak curls around the hair and ear of Liberty and on the eagle's left (facing) leg. A few minute contact marks are undistracting. An exceptional example of this elusive issue. Population: 10 in 53, 6 finer (4/09). (#8673)

Well Struck 1876-CC Ten Dollar, AU53

1750 1876-CC AU53 NGC. The 1876-CC ten dollar has a slightly higher survival rate than its low mintage of 4,696 pieces might indicate, perhaps resulting from many being saved as a result of the 1876 Centennial year. Yet it is difficult to obtain in About Uncirculated grades, and no Mint State survivors are known.

The issue is also difficult to locate with a good strike. Branch mint gold expert Douglas Winter wrote in 2001, "the reverse is always soft on the neck feathers." The present piece, however, is well defined in this area. Although the overall strike lacks absolute definition, the remaining design elements exhibit above-average detail, and the yellow-gold surfaces display myriad pockets of luster. A few hair-thin marks on the obverse merit passing mention, while the reverse is surprisingly minimally unabraded, given the hardships of Old West commerce. Census: 10 in 53, 11 finer (4/09). (#8675)

**Low-Mintage 1877 Ten Dollar, AU58
Seldom Seen Finer**

- 1751 1877 AU58 NGC.** A minuscule 797 eagles were minted in 1877. NGC and PCGS have certified only 60 examples in all grades, attesting to the issue's rarity. A mere three pieces rate Mint State, none higher than MS61. The yellow-gold surfaces of this near-Mint State specimen retain luster in the recessed areas and exhibit well defined devices. Scattered surface and rim marks are minor. Census: 10 in 58, 1 finer (4/09).(#8677)

Important Choice XF 1877-CC Eagle

- 1752 1877-CC XF45 PCGS.** The 1877-CC eagle, a low-mintage issue of just 3,332 pieces, is arguably underrated by today's collectors; this is likely a byproduct of how infrequently it is offered, since a glance at the Permanent Auction Archives shows just over a dozen prior appearances, far fewer than for many other Carson City issues. This well-defined example is modestly abraded, with considerable reflective luster remaining in the sun-yellow fields. Great eye appeal for the grade. Population: 8 in 45, 12 finer (4/09).(#8678)

Scarce, Low-Mintage 1878-CC Ten, XF40

- 1753 1878-CC XF40 NGC.** With the second-lowest mintage figure in the series of only 3,244 pieces, it is not surprising that the 1878-CC is one of the rarest Carson City eagles. It, like many of its predecessors, is also known for poor striking details. At the XF40 level, this coin is just outside the Condition Census for the issue, with most examples typically grading VF. The surfaces are bright with a reddish tinge. The most noticeable surface flaws are a shallow planchet flake out of the obverse next to star 2, and a small cluster of pinprick marks by star 4.(#8681)

Challenging MS63 1879 Eagle

- 1754 1879 MS63 PCGS.** Although the 1879 is more available in Mint State than prior dates, it is seen less often than the high-mintage 1880-1882 issues. Select examples with smooth surfaces and full luster are seldom encountered. This boldly struck representative has apricot-gold color and a splendidly smooth reverse. Population: 33 in 63, 8 finer (4/09).(#8683)

- 1755 1880-O AU53 NGC.** The New Orleans Mint reopened in 1879 to coin silver dollars, but eagles were also produced at the facility annually through 1883. The 1880 ten dollar emission was just 9,200 pieces. This is a bright example with excellent peripheral luster and a small number of marks on Liberty's neck.(#8689)

Sharp 1882-CC Eagle, AU53

- 1756 1882-CC AU53 PCGS.** The mintage of Carson City eagles in 1882 (6,764 pieces) dropped considerably from the previous two years. This issue is mostly available in Extremely Fine. About Uncirculated pieces can be located with patience, and Mint State coins are extremely rare, with just three certified examples. While softness is visible in the hair at Liberty's ear, the remaining design features exhibit a much better-than-average strike. Peach-gold surfaces retain luster in the protected areas. A couple of milling marks are noted under Liberty's chin.(#8696)

- 1757 1883-CC AU50 PCGS.** Golden-orange and greenish areas compete for turf on this lustrous AU eagle. Garrett and Guth say that even AU coins of this issue are rare, despite a mintage that is nearly twice that of the previous year. This is a well-struck piece, and the presence of a single small dark toning spot above the 1 in the date does not detract from the broad appeal.(#8700)

- 1758 1890-CC AU58 NGC.** Well struck and highly lustrous, with lovely orange-gold toning and flashy semiprooflike reflectivity in the fields. Trivial marks are seen on each side, and high point wear is only found directly above the ear on the obverse. A popular issue with an original mintage of just 17,500 coins.(#8718)

Bold, Unworn 1890-CC Eagle

- 1759 1890-CC MS60 NGC.** A boldly impressed and unworn representative of this Carson City eagle issue, one of two lower-mintage dates in that Western mint's abbreviated run of ten dollar coins struck in the 1890s. Each side has warm yellow-gold luster with peach influences. The obverse shows scattered fine abrasions, while the reverse shows a dig above the claw gripping the arrows. (#8718)

Sharply Impressed 1890-CC Eagle, MS61

- 1760 1890-CC MS61 PCGS.** Yellow-gold surfaces are laced with traces of orange-tan and mint-green and exhibit well above-average striking definition, including the star centers, the hair curls at Liberty's face, and the eagle's neck feathers—all areas that are typically weak. Distributed contact marks, a usual characteristic of 1890-CC survivors, limit the grade. (#8718)
-
- 1761 1891-CC MS62 NGC.** The yellow-gold lustrous surfaces of this CC-mint representative exhibit sharply struck design elements. An overall attractive piece despite some minute surface and rim marks that limit the grade. (#8720)
-
- 1762 1892-CC AU58 PCGS.** An attractive near-Mint State example of this popular Carson City gold eagle. Well struck with only faint wear noted on the high points, and few marks. Apricot-gold luster remnants and pale gray-green toning are seen on each side. Population: 20 in 58, 22 finer (4/09). (#8722)

Important Near-Gem 1892-CC Ten Dollar

- 1763 1892-CC MS64 NGC.** Unlike its '91-CC predecessor, the 1892-CC is rare in Mint State. It becomes very rare at the MS63 level, with only two pieces certified at PCGS and none at NGC. Both services combined have graded only four examples as MS64, and none have been certified finer.
- This impressive piece has lustrous sun-gold surfaces and impressive aesthetic appeal. The surfaces display only minimal grazes. The upper portion of the reverse is lightly die doubled, especially at the tops of the letters in the motto. Census: 3 in 64, 0 finer (4/07). (#8722)
-
- 1764 1893-CC XF40 PCGS.** Dusky orange-gold color with glimmers of luster visible in the fields. Well struck in the centers with modest, scattered abrasions that contribute to the grade. (#8726)

Difficult 1893-CC Eagle AU53

- 1765 1893-CC AU53 PCGS.** In its final year of coining, Carson City struck only 14,000 eagles, only a fraction of the quantity produced in the two immediately preceding years. Examples are scarce in all grades, and only a handful of pieces have been certified as Mint State. This representative has seen light circulation, but the butter-gold surfaces display ample luster, and the only remotely relevant mark is a minor obverse rim nick at 3:30. In a green label holder. Population: 11 in 53, 47 finer (4/09).(#8726)

- 1766 1899-O MS62 PCGS.** Excellent detail in the centers with lustrous sun-yellow fields. Wispy abrasions are present on each side, and an abrasion is noted at Liberty's lower jaw. Population: 20 in 62, 13 finer (4/09).(#8743)

Conditionally Rare 1899-O Eagle, MS63

- 1767 1899-O MS63 PCGS. CAC.** A surprisingly scarce issue that is a condition rarity in higher Mint State grades. For example NGC and PCGS have combined to grade just 17 as MS63 and only six finer pieces. This specimen has satiny honey-gold luster with bold design definition and a few scattered marks that prevent a higher grade. Population: 10 in 63, 3 finer (4/09).(#8743)

- 1768 1901-O MS62 PCGS.** Crisply detailed with tasteful apricot accents at the otherwise sun-yellow fields. Minimally abraded for the grade and housed in a green label holder. PCGS has graded 60 finer pieces (4/09).(#8748)

Superlative 1901-S Eagle, MS66

- 1769 1901-S MS66 PCGS. CAC.** An absolutely stunning Premium Gem, this Liberty eagle is just shy of the finest that PCGS has ever graded. They have only certified two pieces in higher grades. The frosty and fully brilliant yellow surfaces have a hint of olive-gold toning close to the borders, and a small splash of deep orange at the final 1.(#8749)

Scarce Choice 1903 Ten Dollar

- 1770 1903 MS64 PCGS.** A precise strike, sweeping luster, and original canary-gold toning confirm the quality of this lower mintage Liberty ten. The reverse is splendidly smooth, and the obverse has only scattered faint grazes. Much scarcer in this grade than its S-mint counterpart. Population: 45 in 64, 1 finer (4/09).(#8752)

Elusive Premium Gem 1905 Eagle

- 1771 1905 MS66 NGC.** Powerfully struck with attractive orange-gold coloration throughout. Luster sweeps across the uncommonly unabraded fields and devices. A relatively low mintage of 200,900 pieces contributes to the high grade rarity of this date. Census: 13 in 66, 7 finer (4/09).(#8757)

PROOF LIBERTY EAGLES

Rare 1882 Eagle, PR64 Cameo

1772 1882 PR64 Cameo NGC. Proof 1882 ten dollar gold coins, which saw a mintage of 40 pieces, are very rare. Most gold specialists put the number of extant examples at 12 to 15. NGC and PCGS have certified a total of 15 specimens, a number of which are probably resubmitted coins. Most of them display a Cameo finish.

The yellow-gold surfaces of this near-Gem Cameo display reflective fields that highlight the frosted devices. An exacting strike delivers virtually complete definition to the design elements, and a few wispy handling marks barely preclude Gem classification. A few interesting lint marks are visible on the obverse. Census: 4 in 64 Cameo, 3 finer (4/09).

From The Frank M. Stirling Collection. (#88822)

Desirable PR62 Deep Cameo 1892 Eagle

1773 1892 PR62 Deep Cameo PCGS. This proof issue's mintage of 72 pieces is high relative to its peers, though there are a number of circulated proofs in the population. The present specimen shows no rub on the high points or the mirrors, and though a number of hairlines are visible in the fields, the outstanding black-and-gold contrast offers redeeming eye appeal. The frost on the portrait is particularly rewarding. Overall, a desirable survivor of an issue only rarely found with Deep Cameo surfaces; this is the only PR62 Deep Cameo coin known to PCGS, and that service lists only one finer (4/09). (#98832)

Difficult Proof 1904 Ten Dollar

1774 1904 PR60 NGC. CAC. Of the 1904, Walter Breen wrote, "Proofs have a high date slanting down to the right. Possibly 35 to 40 pieces survive." A needle-sharp strike and peripheral field reflectivity help confirm the specimen status of the present example. Scattered tiny marks confirm non-numismatic storage at one time. An opportunity to acquire an affordable yet unimpaired representative of this challenging proof type. (#8844)

Extraordinary 1905 Eagle, PR65 Cameo

1775 1905 PR65 Cameo NGC. Only 86 proof Liberty Head eagles were minted in 1905. The issue is one of the least available proofs of the 20th century, with perhaps half of the original mintage surviving today. The present coin is a spectacular example whose visual appeal appears to deserve an even higher grade. The surfaces are a rich yellow-gold, and a discernible element of contrast is present between the devices and the reflective fields. Intense contrast is rare on proofs of the early 20th century, and pieces worthy of the coveted Cameo designation are quite rare. Census: 2 in 65 Cameo, 3 finer (4/09).(#88845)

Spectacular 1907 Indian Head Eagle
Wire Rim, MS65

1776 1907 Wire Rim MS65 NGC. The 1907 Wire Rim coins (here described by NGC as “Wire Edge”) are the ten dollar counterpart to the MCMVII Ultra High Relief double eagle coins, in that they are the most faithful representation of Saint-Gaudens’ (and Roosevelt’s) artistic vision for the denomination. Like the Ultra High Relief, they were completely unsuitable for high-speed coinage production, but were produced to suit President Roosevelt’s whims over his “pet crime.”

Garrett and Guth say concerning the issue, “The extreme outer rim on this coin rises to a sharp edge. Unfortunately, these coins cannot be stacked more than two or three high before they fall over, making them unsuitable for commercial purposes. In defense of Mint officials, the Wire Rim was only struck to show the design and test its usefulness. They have a curious finish that resembles the satin finish on certain Proofs, and which is quite unlike that seen on the coins produced for circulation in later years.”

The later circulation version of the issue, cobbled up by Mint Engraver Charles Barber, features a rounded rim that allowed stacking of the coins, but while the feather ends are strengthened, the central details of Liberty’s hair and the eagle are softer.

Although the Ultra High Relief was produced only to the extent of a handful of pieces, the production of the Wire Rim 1907 eagle is recorded at 500 coins—most of which were saved—and today specimens are always available for a price. The present example shows the characteristic bright yellow satiny finish, with full articulation in the central design and considerable evidence of a knifelike wire rim on both sides. A couple of contact marks on the obverse near the rim at 9 o’clock, and one in the reverse right field, appear to limit a finer grade, but this remarkably attractive coin offers plenty of eye appeal. Census: 33 in 65, 31 finer (4/09). (#8850)

1777 1907 No Periods MS62 ICG. Lustrous surfaces yield attractive peach-gold color. This sharply struck piece is limited in grade only by a few marks on the Indian's cheek and in the reverse fields. (#8852)

1778 1908 Motto MS63 PCGS. Variegated orange and mint-green patina runs over the lustrous surfaces of this Select ten dollar, and a well directed strike leaves strong detail on the design motifs. Scattered light marks preclude the next highest grade. (#8859)

Desirable Premium Gem 1908 Motto Indian Ten

1779 1908 Motto MS66 NGC. This impeccably preserved Premium Gem is fully brilliant, with wonderful yellow-gold luster and pristine surfaces. All of the individual design elements are boldly detailed on each side of this remarkable specimen. These coins are rare enough at this grade level that an appearance of just one piece in an auction would be a major even for the specialist, but the present Long Beach sale has two different NGC-certified pieces, affording the collector an extremely rare opportunity to acquire one or the other. Census: 37 in 66, 7 finer (4/09). (#8859)

Magnificent MS66 1908 Motto Eagle

1780 1908 Motto MS66 NGC. The 1908 With Motto Indian eagle is a rather common issue within the series, with a mintage of 341,300. Compared to many other 20th century issues, that mintage seems low, but in the Indian eagle series it ranks as 10th highest. However, the date is still a condition rarity, as the population data shows.

This magnificent Premium Gem is highly lustrous, with brilliant yellow-gold surfaces and frothy mint brilliance. Both sides have a few tiny marks that are inconsequential. Rarely does such an opportunity as this come along. Census: 37 in 66, 7 finer (4/09). (#8859)

Choice Motto 1908-D Indian Ten

1781 1908-D Motto MS64 PCGS. The 1908 introduction of IN GOD WE TRUST to the Indian eagle design did have one aesthetic advantage. It balanced the placement of E PLURIBUS UNUM, which had made the upper right reverse field appear comparatively crowded. This is a pleasing olive-gold near-Gem that appears undergraded upon first inspection, since the fields and portrait are close to immaculate. A faint and slender thin mark concealed within the eagle's wing limits the grade, but not the eye appeal. Population: 26 in 64, 19 finer (4/09). (#8860)

- 1782 1910 MS63 NGC. Boldly impressed with luminous yellow-orange surfaces. The obverse is slightly dusky but clean for the grade, while the brighter reverse shows light abrasions in the fields. (#8865)
- 1783 1910 MS64 NGC. Pronounced mattelike texture with a subtle overlay of satiny mint luster is apparent over both sides of this peach-gold near-Gem. Sharply struck and well preserved. (#8865)

Lovely Premium Gem 1910 Indian Eagle

- 1784 1910 MS66 NGC. The 1910 is not a highly respected date in terms of rarity, and the Garrett/Guth *Gold Encyclopedia* states: "The 1910 issue is one of the more available dates in all grades, including gem Mint State and higher." We find this assessment to be perhaps a bit of an overstatement, considering that just 55 examples are graded at MS66 by the two major services. The current example is definitely worthy of its Premium Gem designation, showing intensely lustrous yellow-gold surfaces that reveal slight accents of rose near the peripheries and across the centers. Well struck and impressively preserved, with just a handful of trivial, undistracting marks. Census: 34 in 66, 17 finer (4/09). (#8865)

Astounding Superb Gem 1910 Eagle

- 1785 1910 MS67 PCGS. CAC. Garrett and Guth praise the 1910 eagle's high survival rate and quality in their *Encyclopedia of U.S. Gold Coins*: "The 1910 issue is one of the more available dates in all grades, including gem Mint State and higher. As with other Philadelphia Mint coins, the luster and strike are all that a collector could hope to find."

According to the PCGS *Population Report*, this Superb Gem is all a collector could hope to find; that service has graded just three MS67 pieces and none finer (4/09). This orange-kissed yellow-gold beauty, well-defined with a touch of frostiness to the portrait, is exquisitely preserved with memorable eye appeal. A sublime opportunity for the discerning series enthusiast. (#8865)

Splendid 1910 Indian Head Eagle, MS67

- 1786 1910 MS67 NGC.** The 1910 Indian Head eagle enjoys great popularity with type collectors, due to its ready availability in all grades up to the Gem level. The business strike mintage of 318,500 pieces was substantial, but pales in comparison with the 2.3 million pieces coined by the Denver Mint in the same year. Paradoxically, the Denver issue is only marginally more available than its Philadelphia counterpart. Philadelphia eagles of 1910 seem to have been selectively saved by some circumstance not understood by numismatists today. However, coins at the Superb Gem level are decidedly rare.

The present coin is an amazing Superb Gem, with fine-grained, mattelike surfaces covered with rich satiny luster. The strike is full, with crisp detail on all design elements, and no marks of any kind visible without a loupe. Lovely medium orange-gold color enhances the outstanding visual appeal. Census: 14 in 67, 3 finer (4/09).(#8865)

- 1787 1910-D MS64 NGC.** Yellow-gold surfaces display subtle greenish undertones. A well struck specimen that reveals just a few marks precluding Gem status.(#8866)

Excellent Gem 1910-D Indian Eagle

- 1788 1910-D MS65 NGC. CAC.** Boldly struck with luminous, highly lustrous surfaces that display lovely, light honey-gold coloration. Exquisitely preserved for nearly 100 years and nearly blemish-free on both sides, except for a few faint ticks that are only discernible with magnification. One of the most common Indian eagle issues (and the most common from the Denver Mint), making this piece an excellent potential acquisition for a type specialist. (#8866)

- 1789 1910-S MS61 NGC.** Generally pleasing detail with luminous yellow-orange surfaces. Light abrasions are present on and near the portrait, and areas of deeper color are present at certain of the high points.(#8867)

Stunning 1911 Indian Eagle, MS66

- 1790 1911 MS66 NGC.** Among all of the Indian eagles struck from 1907 to 1933, the 1911 ranks as one of the most common dates in all grades, including Gem. Even in Premium Gem quality, examples such as the present piece can be found with only a little searching. Choosing carefully for quality is always a good idea, and the present piece easily meets the quality criteria for the connoisseur. (#8868)

Incredible MS67 1911 Eagle

- 1791 1911 MS67 NGC.** The 1911 is an issue of high quality that offers the type collector a slightly unconventional but satisfactory option for the Saint-Gaudens eagle. Garrett and Guth write in their *Encyclopedia of U.S. Gold Coins*: "Aside from the 1926 and 1932 issues, this is one of the most obtainable issues." In a relative sense, this extends even to the MS67 level, though at that point even the 1911 is a definite condition rarity. The present piece has smooth and vibrant lemon-gold surfaces. The strike is particularly pleasing, adding another dimension to the eye appeal. Census: 7 in 67, 3 finer (4/09).(#8868)

Desirable 1912-S Gem Ten Dollar

- 1792 1912-S MS65 NGC.** The 1912-S is one of the most challenging Indian tens to locate in high grades. This leads David Akers (2008) to say: "Factoring overall appearance and eye appeal into the equation, the 1912-S emerges as one of the rarest issues in the series." The reasons for Akers' assertion follow: first, the typical 1912-S is one of the most poorly struck coins in the series; second, the luster is usually below average; and third, the typically encountered specimen has numerous distracting abrasions.
- This Gem offering displays pleasing frosty luster residing on its honey-gold surfaces. The obverse design elements are sharply struck, including decent definition in the hair curls, an area that is generally weak. The reverse features are also well impressed, save for the usual weakness on the eagle's shoulders. The obverse surfaces are nicely preserved and yield a pleasing smooth appearance, while the reverse reveals a handful of light to moderate marks. The overall eye appeal of this '12-S may not rate a perfect "10," yet it stands well above the typically encountered specimen. Census: 6 in 65, 2 finer (4/09).(#8872)

Uncirculated 1913-S Indian Eagle

- 1793 1913-S MS60 PCGS.** A peach-gold example with unencumbered luster and minimally abraded surfaces. The devices have occasional ice-blue highlights. The 1913-S is a low mintage issue, and few among the 66,000 pieces struck survive in Uncirculated grades. Encased in a green label holder. (#8874)

High-End Gem 1914-D Indian Eagle

- 1794 1914-D MS65 NGC.** This issue is described as an easily available date, with plenty of survivors available to collectors, in the *Encyclopedia of U.S. Gold Coins*. The specialist may want to take a second look at this Gem example, however. It seems unusually well struck, for the issue, and the surfaces are even cleaner than required, for the MS65 grade assessment. Census: 38 in 65, 18 finer (4/09). (#8876)

Pleasing 1914-D Gem Ten Dollar

- 1795 1914-D MS65 PCGS.** This sharply struck and highly lustrous example has unusually smooth surfaces. Pleasing yellow-gold coloration displays hints of mint-green. The 1914-D is one of the most frequently encountered mintmarked issues in the Indian eagle series, but is challenging at the Gem level and quite rare any finer. Population: 18 in 65, 7 finer (4/09). (#8876)

- 1796 1915-S MS60 PCGS.** Boldly impressed with gorgeous luster. On the obverse, a few linear abrasions in the left obverse field preclude a finer designation, but the reverse is comparatively clean. A desirable Mint State representative of this well-known low-mintage San Francisco Saint-Gaudens eagle issue. (#8879)

Splendid MS62 1915-S Indian Ten

- 1797 1915-S MS62 PCGS.** A splendid orange-tinged representative that has a surprisingly unabraded appearance. Intense cartwheel luster sweeps the surfaces, and the eye appeal is outstanding for the MS62 level. A mere 59,000 pieces were struck, most going directly into circulation. Certified in a green label holder. Population: 46 in 62, 58 finer (4/09). (#8879)

Lovely Premium Gem 1926 Indian Eagle

- 1798 1926 MS66 NGC.** Like many other examples of this Philadelphia Mint issue, this piece displays sumptuous luster over both sides, resulting in a high degree of visual allure. The yellow-gold toning mingles with appealing accents of pale rose, which further enhance the splendid eye appeal. Well struck throughout, with minimal surface marks. Census: 50 in 66, 0 finer (4/09). (#8882)

- 1799 1932 MS64 PCGS.** The pale, honey-gold coloration is illuminated by unusually vibrant mint luster. Boldly struck overall, with just a touch of softness above Liberty's ear and on the eagle's shoulder. A handful of shallow marks are noted on each side of the coin. A popular, readily available issue for type collectors. (#8884)

Charming 1932 Indian Eagle MS66

- 1800 1932 MS66 NGC.** A splendid apricot-gold Premium Gem of this desired gold type. Precisely struck and thoroughly lustrous. Both sides are exquisitely preserved despite a few delicate grazes on the reverse field, mostly near UNITED. The 1932 Indian ten is the only readily collectible gold issue of any denomination from its decade, but it becomes scarce at the MS66 level. (#8884)

Compelling MS66 1932 Indian Eagle

- 1801 1932 MS66 PCGS. CAC.** After a six-year period with no ten dollar production at Philadelphia, more than 4.4 million pieces were coined in 1932. Many remained in Treasury vaults, since double eagles were more convenient for international trade. A number must have been released, however, since the 1932 is substantially more available than the 1931 twenty, which also had a relatively high mintage. The present piece is a charming honey-gold Premium Gem whose vibrant luster and smooth surfaces confirm its lofty grade. Population: 82 in 66, 1 finer (4/09). (#8884)

LIBERTY DOUBLE EAGLES

Luminous AU53 1850 Double Eagle

- 1802 1850 AU53 PCGS.** The 1850 double eagle marks the beginning of the denomination as struck by the U.S. Mint for circulation, granting it substantial cachet for a number of collectors. This example circulated only briefly, and though scattered light to moderate marks pepper each side, the yellow-gold fields remain strongly lustrous. (#8902)

Debut 1850-O Liberty Twenty, XF45

- 1803 1850-O XF45 NGC.** The first year of New Orleans Mint production for the denomination, and one of the more obtainable O-Mint twenties in lesser grades. This is an above-average representative that displays a bright yellow-gold appearance along with uniform sufficiency from 15 points of circulation. (#8903)

Appealing AU50 1850-O Twenty

- 1804 1850-O AU50 PCGS.** A luminous and appealing representative of this popular issue, the first double eagle struck at New Orleans. Slightly dusky yellow-orange surfaces retain considerable flashy luster, though they also show light wear across the high points and a number of fine abrasions. Population: 18 in 50, 38 finer (4/09). (#8903)

Condition Scarcity 1850-O Double Eagle Sharpness of AU53

- 1805 1850-O—Cleaned—ANACS. AU53 Details.** The 1850-O is extremely rare in Mint State and scarce in XF and AU. The yellow-gold surfaces of this AU53 coin display a subtle greenish cast and retain traces of luster in the recessed areas, despite having been cleaned. This is a nicely detailed piece save for portions of Liberty's hair. Moderate abrasions are noted, especially on the obverse. (#8903)
- 1806 1851 XF40 NGC.** Despite the apparent rub across the high points, the faintly green-gold fields remain luminous. Lightly abraded with hints of alloy noted at the upper and right margins. (#8904)
- 1807 1851 AU50 NGC.** Light yellow-gold color with isolated areas of rub noted on the high points. Scattered marks are present on each side, and a few rim bumps are visible near stars 5 and 6, which are softly struck. (#8904)
- 1808 1851-O Fine 12 PCGS.** Any New Orleans double eagle is coveted by Southern gold collectors, and the present example is affordable to those who can only dream about ever owning an 1854-O or 1856-O. The upper obverse border is worn, but the reverse is surprisingly sharp save for the wingtips. Encased in a first generation holder. (#8905)

Popular 1851-O Twenty, XF40

- 1809 1851-O XF40 NGC.** Considerable high point wear is evident, consistent with the grade of this pleasing double eagle. Both sides have smooth yellow surfaces with traces of green patina. With a mintage of 315,000 coins, the 1851-O twenty had the highest production of any double eagle from that Mint, a result of California gold mining operations. At the time, New Orleans was the closest branch of the Mint. (#8905)
- 1810 1852 XF45 PCGS.** Dusky yellow-orange surfaces remain luminous despite light, even wear. Modestly abraded with considerable eye appeal for this early double eagle issue. (#8906)
- 1811 1852 AU55 NGC.** Well struck for this issue of 2 million pieces with impressive luster despite the light wear on the high points. The yellow-gold fields are minimally abraded save for a cluster of marks at the left obverse. (#8906)

Well Defined 1852-O Double Eagle, XF40

- 1812 1852-O XF40 ICG.** The yellow-gold surfaces of this O-mint representative retain traces of luster in the protected areas. The design features display rather sharp definition for the designated grade. Minute marks are distributed over each side. This issue is quite rare in Mint State. (#8907)

Splendid 1852-O Twenty, AU50

- 1813 1852-O AU50 NGC.** A lovely example for the grade, with considerable deep yellow luster on each side. In fact the protected areas show evidence that the coin was a wonderful prooflike piece at the time it was struck. But few paid attention to such special quality when they were struck, and few have been preserved today. (#8907)

Terrific Near-Mint 1852-O Twenty

- 1814 1852-O AU58 PCGS.** New Orleans gold type collectors are drawn to the 1852-O, which is among the more available O-mint issues of the denomination; production of the denomination in New Orleans was slowed greatly by the opening of the San Francisco Mint in 1854. This partly lustrous and slightly subdued green-gold example shows only a whisper of friction on the wingtips and cheek. Minimally marked and most appealing. Population: 30 in 58, 12 finer (4/09). (#8907)
- 1815 1853 XF45 NGC.** The orange-gold fields are luminous despite the light wear that crosses the high points. Light abrasions overall, including several ticks on the cheek. (#8908)
- 1816 1853 AU53 NGC.** Considerable luster remains to enliven the yellow-orange surfaces. Lightly worn with several moderate abrasions scattered in the left obverse field. (#8908)
- 1817 1853 AU55 NGC.** Lightly rubbed on the obverse with less evidence of wear on the reverse. Both sides retain considerable luminosity in the moderately abraded yellow-orange fields. (#8908)
- 1818 1853 AU58 NGC.** Swirling yellow-orange luster is virtually undisturbed. Well struck for the issue with only modest abrasions and a touch of rub on the high points that determines the grade. (#8908)

Attractive Choice XF 1853-O Double Eagle

- 1819 1853-O XF45 PCGS.** In his *Gold Coins of the New Orleans Mint*, Doug Winter notes that he is aware of only one die variety for this date. He describes that variety as follows: "All 1853-O double eagles have a Closed 5 in the date. The date is high with the 1 nearly touching the truncation. The mintmark is tall and thin. It is positioned over the left side of the N in TWENTY and comes close to the feathers but does not touch them." This is an attractive khaki-gold specimen with well struck design elements and a few scattered abrasions. Even high point wear confirms the Choice XF grade assessment by PCGS. (#8910)

- 1820 1854-S XF40 PCGS.** Traces of luster show in the recesses of this S-mint representative. Well balanced and showing a typical amount of wear and small marks for the grade.(#8913)
- 1821 1855 XF40 NGC.** The brassy-gold surfaces of this double eagle show traces of luster in the protected areas. Scattered minute marks are unworthy of individual mention.(#8914)
- 1822 1855-S XF45 PCGS.** A mustard-gold Choice XF Type Twenty. Generally olive-gold, with rose-tinted luster in protected regions. A bagmark affects the E in TWENTY, but pleasing overall.(#8916)
- 1823 1856 AU50 PCGS.** Pumpkin-gold visits the centers, while the margins are pale straw-gold. Luster is prevalent throughout the reverse, and the obverse also shows many pockets of iridescence. A better date, although reasonably priced in AU relative to its value as bullion.(#8917)
- 1824 1856-S XF45 PCGS.** This early San Francisco Mint double eagle has pale orange toning, and the only noticeable mark is a narrow abrasion near Liberty's forehead. The surfaces appear original and exude ample luster.(#8919)
- 1825 1856-S XF45 PCGS.** A pleasing Choice XF S-mint representative. Peach-gold surfaces display whispers of apricot, along with luster in the recesses. Distributed light marks are visible over each side.(#8919)
- 1826 1856-S AU50 PCGS.** Luster gently glimmers from protected areas, and the surfaces lack the notable abrasions that are often encountered on large gold coins. The mintmark was weakly punched into the working die, and it is faint although complete. Faint die clash lines (as made) are noted near Liberty's ear and behind her neck.(#8919)
- 1827 1856-S AU53 ICG.** Soft luster remains in the pale yellow-gold fields of this earlier S-mint twenty. The strike is pleasing, and the portrait shows only minor wear. Wispy marks and several more significant abrasions are present in the fields.(#8919)

**Choice AU 1856-S Double Eagle
Split Serif, Ex: S.S. Central America**

- 1828 1856-S Split Serif AU55 PCGS.** Ex: S.S. Central America. Variety 17J. SSCA 5373. The 1857-S constituted a majority of the double eagles recovered from the S.S. Central America. A shipwreck, but a number of 1856-S twenties were also present, mostly in AU grades. The present lightly abraded piece has nearly full luster, although the wing tips show slight friction. Generally sun-gold, with blushes of golden-brown in selected areas. Encased in a gold label holder.(#70019)

- 1829 1857 XF45 NGC.** Luster clings to the recesses of this Choice XF specimen. Yellow-gold surfaces exhibit nicely defined motifs along with a scattering of light to moderate marks.(#8920)
- 1830 1857 AU50 ANACS.** Luster dominates the stars, legends, and motifs of this yellow-gold Type One twenty. The left stars are softly brought up, but the remaining design is bold. An unimportant rim nick is on the reverse at 1 o'clock.(#8920)

Near-Mint 1857 Type One Twenty

- 1831 1857 AU58 NGC.** The 1857-S double eagle is relatively common in Uncirculated grades, due to the bounty from the S.S. Central America. But the 1857 Philadelphia issue was struck thousands of miles away and went unrepresented in that shipwreck's holdings. While the present piece is lightly circulated, considerable pumpkin-orange luster clings to the design. The devices are evenly struck, and there are no marks worthy of individual comment.(#8920)

Underrated 1857-O Twenty, AU55

- 1832 1857-O AU55 PCGS. CAC.** New Orleans in the years before the Civil War was one of America's most populous and fastest-growing cities. By 1840 the city at the mouth of the Mississippi, with 102,000 inhabitants, was the United States' fourth largest city; the largest city in the South; and the largest away from the Eastern Seaboard. The establishment of the branch mint at New Orleans in 1838 was a testament to the city's importance as a commercial center. However, the thriving economy of antebellum New Orleans, and the relatively limited mintages of both gold and silver coins (in contrast to the other two branch mints established in 1838, Charlotte and Dahlonega, which produced only gold coins) meant that most coins minted there were apt to be from small to moderate productions, with most survivors well circulated.

In the case of the 1857-O double eagle, it basks in the reflected glow of a great rarity, the 1856-O double eagle that is one of the important keys to the Liberty Head series. The mintage of the 1856-O is only 2,250 coins. While the production the following year rose to 30,000 coins, most survivors are well circulated, averaging only Very Fine to XF. (The average grade for NGC/PCGS-certified examples is Choice XF or a bit better.) The surfaces of this high-grade example have a pronounced green-gold color, and the striking details are strongly brought up throughout. A few abrasions are scattered over each side, and traces of mint luster cling to the devices. Population: 12 in 55, 6 finer (4/09). (#8921)

- 1833 1857-S XF45 NGC.** This Choice XF example seems conservatively graded and high-end for the grade. Subtly variegated khaki and red-orange coloration inhabits the evenly worn surfaces. Light high point rub and scattered small abrasions are seen on both sides. (#8922)

- 1834 1857-S XF45 PCGS.** Though the S.S. *Central America* Mint State coins now attract more attention, circulated examples of the 1857-S twenty are still in demand. This yellow-orange example is lightly abraded with a degree of alloy visible on the obverse. (#8922)

- 1835 1857-S XF45 PCGS.** An example of the "Bold S" Variety 20B, as designated by Robert Evans in his July 2000 *Numismatist* article. This reverse die was used to coin many 1857-S double eagles recovered from the S.S. *Central America*, although the origins of the present coin are unknown. A problem-free Choice XF example with smooth surfaces and noticeable luster. (#8922)

Pleasing MS64 1857-S Spiked Shield Twenty Ex: S.S. *Central America*

- 1836 1857-S Spiked Shield MS64 NGC.** Ex: S.S. *Central America*. SSCA 3395. A gorgeous near-Gem that combines immense luster with a strong strike. Sun-yellow and pale straw-gold surfaces show few overt abrasions, and the eye appeal is strong. Overall, a great example of this historic shipwreck issue. Comes with box and certificate of authenticity. (#70000)

Choice 1857-S Spiked Shield Double Eagle From the S.S. *Central America*

- 1837 1857-S Spiked Shield MS64 PCGS.** Ex: S.S. *Central America*. Variety 20A. SSCA 0312. Dazzling luster, an exacting strike, and exemplary surfaces combine to proclaim the quality of this impeccable near-Gem. Principally pumpkin-gold, although the obverse margin has glimpses of deep orange or russet. Nearly perfect save for a hair-thin mark on the nose and a faint graze on the cheek. Encapsulated in a gold label holder. (#70000)

Gem S.S. Central America 1857-S Twenty

1838 1857-S MS65 NGC. Ex: S.S. Central America. This is an especially bright and highly lustrous example of this issue that is well-known for its brightness and intense mint luster. A few tiny obverse marks preclude an even higher grade. Sharply defined throughout. Census: 72 in 65, 26 finer (4/09).(#8922)

1839 1858 XF45 PCGS. Whispers of apricot visit the yellow-gold surfaces of this nicely defined twenty dollar. The expected number of contact marks occurs over each side.(#8923)

1840 1858-S—Rim Filed, Scratched—ANACS. AU Details, Net XF40. This yellow-gold example displays ample luster within protected areas. The left obverse has a few thin pinscratches, and both sides are moderately abraded from light circulation. Faint rim filing is noted near 5 o'clock on the reverse.(#8925)

1841 1858-S AU53 PCGS. Deep orange-gold color with lively luster remaining in the fields. Well-defined central devices show only light wear and minor, scattered abrasions.(#8925)

1842 1859—Tooled, Cleaned—ANACS. AU Details, Net VF30. The obverse is whizzed, and both sides are hairlined from cleaning. Struck from moderately rotated dies. Only 43,597 pieces were struck, and few of those were set aside.
Ex: *Long Beach Signature* (Heritage, 2/2003), lot 8462. (#8926)

Scarce 1859-O Twenty, AU Details

1843 1859-O—Altered Surfaces—ANACS. AU Details, Net XF40. Among O-mint twenties, the 1859-O ranks fourth, after the legendary 1854-O and 1856-O and more closely behind the 1855-O. Only 9,100 pieces were originally struck and the survival ratio is impressively low, with perhaps fewer than 100 pieces known in all grades. Glossy orange-gold and steel-blue surfaces have had nearly all of the semireflective luster buffed away, and a smattering of light pock marks remains on the obverse.(#8927)

1844 1860 AU55 NGC. Luster emanates from the recesses of this yellow-gold Choice AU. Distributed minute marks are visible over both sides, each of which exhibits nicely defined design motifs. A spot is seen on the upper right part of the shield.(#8929)

1845 1860-S VF30 NGC. This softly struck Type One double eagle shows light to moderate wear, though the remaining luster in the light yellow-gold fields is impressive. A vertical abrasion cuts through the glory on the reverse.(#8931)

Choice AU 1860-S Twenty Dollar

1846 1860-S AU55 NGC. The 1860-S double eagle is rare in Mint State, a fact little changed by the recent recovery of the S.S. Republic treasure. While the present piece shows light wear on the hair and wingtips, substantial luster remains, particularly on the reverse. Occasional moderate marks are commensurate with its brief spate in circulation.(#8931)

Appealing Near-Mint 1860-S Double Eagle

1847 1860-S AU58 PCGS. CAC. A pale yellow-gold piece that shows a number of alloy dots, mostly at the obverse and reverse margins but also to the left of the shield on the reverse. Liberty's hair shows striking softness, but the overall effect is frosty and pleasing. Neither side shows more than a hint of rub. Overall, a solid near-Mint example of this pre-Civil War issue. Population: 35 in 58, 26 finer (4/09).(#8931)

1848 1861 XF45 PCGS. Mildly prooflike orange-gold luster visits many portions of this moderately circulated Civil War twenty. The fields and devices are principally butter-gold.(#8932)

Near-Mint 1861 Twenty Dollar

1849 1861 AU58 NGC. Though this Type One issue has a mintage of nearly 3 million pieces it also experienced heavy attrition, and only a small fraction of those coins survive today in higher grades. This attractive near-Mint State piece, well struck with strongly lustrous gold-orange fields, shows modest friction on the highest parts of the design and light, scattered marks across each side.(#8932)

1850 1861-S XF40 PCGS. Luster glimmers from design recesses of this originally toned canary-gold Type One twenty. Small marks are scattered, but none individually distract. Housed in a green label holder.(#8935)

High-Grade 1861-S Paquet Reverse Twenty Rarest S-Mint Double Eagle, AU53

1851 1861-S Paquet AU53 PCGS. In late 1860, Anthony Paquet produced a new style reverse die for the double eagle. Paquet's design was characterized by taller, thinner letters in the peripheral inscriptions and a narrow reverse rim. Dies were shipped to the branch mints at New Orleans and San Francisco (four pairs), and production commenced at Philadelphia on January 5, 1861. Unfortunately, the narrow rim caused problems in the striking process, and Mint Director James Ross Snowden ordered a halt to production with the new dies. Messages were immediately sent to New Orleans and San Francisco to cancel production at those facilities. The message to New Orleans arrived by telegraph in a timely manner, and no coins were minted there. The situation in San Francisco was more complicated, as the telegraph lines were only completed as far as St. Joseph, Missouri. From that point, the message was carried by overland express. Snowden's instructions did not reach San Francisco until February 2, 1861. Production was halted immediately, but 19,250 double eagles had already been coined, using two of the new reverse dies, in the time required for Snowden's directive to reach authorities in San Francisco.

The coins struck in this time period were paid out to customers and circulated readily in the local economy, or were shipped overseas. Today, approximately 200 examples of this romantic issue survive, making it the rarest double eagle of the San Francisco Mint.

Little notice was taken of the Paquet reverse in contemporary numismatic circles. While two specimens of the Philadelphia Paquet Reverse double eagle appeared in various auction catalogs over the years, no example of a San Francisco double eagle with this reverse was mentioned in any auction catalog of the 19th century. The only mention of this issue in the numismatic press was in the July 1895 issue of the *American Journal of Numismatics*. An example came to light in Nathan M. Kaufman's collection, which was formed in the later part of the 19th century, but there is no indication that he noticed the difference between his coin and the regular-issue 1861-S double eagles. All knowledge of the San Francisco Paquet Reverse double eagles eventually faded from the numismatic community.

Numismatists were startled when an 1861-S double eagle with a strange reverse was discovered under an old barn in Hull, Texas in 1937. Initially believed to be unique, the coin was widely publicized and discussed. With heightened awareness of the issue, numismatists began to discover more examples. Today approximately 200 pieces are known, all in circulated grades.

With respect to grade, the present coin is in the top 20% of surviving examples. A few specimens have been certified at the AU58 level, but no Mint State coins are known. The coin exhibits gentle, even wear on the high points, with a minimum of abrasions and no serious problems. Attractive yellow-gold color suffuses the surfaces, with hints of rose in the fields. We expect spirited competition for this scarce and elegant prize. Population: 10 in 53, 5 finer (4/09).(#8936)

- 1852 1862—Cleaned—ANACS. AU Details, Net XF40.** Despite a mintage of less than 100,000 pieces, the 1862 double eagle's scarcity is underappreciated by series collectors. For example, NGC has certified only 51 pieces in all grades, several of which are surely resubmissions. A wispy pinscratch is observed above TWE in TWENTY, and the surfaces are lightly cleaned, but hints of luster outline the letters and devices.
Ex: Long Beach Signature (Heritage, 5/2003), lot 6822. (#8937)

Choice AU 1862-S Double Eagle

- 1853 1862-S AU55 NGC.** Considerable luster remains on both sides of this pleasing green-gold example. The surfaces have modest abrasions, only a few that are of any consequence. At one time considered a major rarity in AU or better grades, the 1862-S is now easily available due to discoveries of the *S.S. Brother Jonathan* and *S.S. Republic* treasures. (#8938)

- 1854 1863—Cleaned—ANACS. AU Details, Net XF40.** A polished piece that has a couple of unobtrusive contact marks on each side. Mint luster remains in protected areas. An underappreciated low mintage issue, the 1863 is scarce in all grades.
Ex: Long Beach Signature (Heritage, 2/2003), lot 8469. (#8939)

- 1855 1863-S—Cleaned—ANACS. AU Details, Net XF45.** Glossy from an ill-advised wipe, but luster emerges from protected areas. Bagmarks are noted near the T in TWENTY and the obverse rim at 8 o'clock. Struck during the Civil War, although California was isolated from the traumas of the conflict. (#8940)

- 1856 1864-S XF40 ANACS.** A mildly bright yellow-gold example of this popular issue, struck during the Civil War but thousands of miles from the battlefields of Virginia. A moderate obverse rim ding at 2:30 merits only passing mention. (#8942)

- 1857 1865 AU50 NGC.** From canary to lemon-gold, this lightly worn piece runs the range of yellow. Minimally marked with considerable variety for this Civil War-era issue. (#8943)

Shining Near-Mint 1865 Double Eagle

- 1858 1865 AU58 NGC.** The mint luster is nearly complete and the strike is crisp throughout. The surfaces reveal some small abrasions, but do not significantly detract from the coin's overall eye appeal. Prior to the discovery of the *S.S. Republic*, this issue was generally only seen in VF and XF condition. That discovery put more than 300 AU to Gem pieces on the market. (#8943)

Condition Census 1866-S No Motto
Liberty Double Eagle, Lustrous AU58

1859 1866-S No Motto AU58 PCGS. The year 1866 saw the addition of the motto IN GOD WE TRUST to the double eagle denomination, a result of the upsurge in religious belief during the Civil War. Although the two cent piece had featured the motto since its debut in 1864, it would be two more years before the double eagle design would be revised to include it. It must be remembered that all die production for the branch mints, until the latter part of the 20th century, was done at the Mother Mint in Philadelphia. So it was no problem to incorporate the reference to God on P-mint dies; San Francisco, on the other hand, had to either wait for new dies, or reuse an old reverse die. According to Breen's *Complete Encyclopedia*, six 1866-dated obverses were shipped from Philadelphia in November 1865, but the new reverses bearing IN GOD WE TRUST were not shipped until March 1866. Meanwhile, in February 1866, a mintage of double eagles was accomplished with the obverse dies paired with reused leftover dies from 1865.

The mintage of No Motto 1866-S double eagles has been estimated at 120,000 coins. Jeff Garrett and Ron Guth commented in 2006 concerning the issue:

"The Without Motto [compared to the 1866-S With Motto] is by far the rarest. It is actually one of the rarest double eagles of this type. Nearly all of the coins seen of the date are very well worn or heavily bagmarked. There are probably no more than 200 examples known in all grades. Extremely Fine pieces are rare, and in About Uncirculated the issue is considered a major rarity. Even by today's more liberal standards, there are no known Mint State examples. Both the Bass and Smithsonian specimens grade just Extremely Fine."

Since then, there have been a few pieces certified in the lower Mint State grades, although AU58 examples such as the present coin are tied for the lower end of the Condition Census. Specifically, NGC has certified three examples, one each in MS60, MS61, and MS62. PCGS has graded one single coin MS60. As always, those data are subject to duplications and crossovers.

Heritage since 2006 has handled three examples, all certified AU58 PCGS, in its Signature Auctions:

- Central States, 4/2006, lot 4217, which realized \$172,500;
- 2007 FUN, 1/2007, lot 3717, which brought \$195,500; and
- 2008 FUN, 1/2008, lot 3317, which garnered \$149,500.

The present piece, as far as we can determine from photographs in our Permanent Auction Archives, duplicates none of the above pieces and thus becomes the fourth of the five examples certified in AU58 at PCGS (and again, that service has only certified a single coin finer, in MS60). As expected for a lightly circulated gold coin from the Old West, the surfaces show some abrasions. The most mentionable are a pair in front of Liberty's nose, in the obverse field between star 2 and Liberty's mouth, between stars 12 and 13, and a mark below the eagle's right (facing) wing. Those marks will serve as pedigree identifiers. In keeping with the AU58 grade, there is almost complete mint luster found throughout both sides, and the light, attractive reddish patina further enhances the appeal. (#8945)

Notable Near-Mint 1866 Motto Twenty

- 1860 1866 AU58 PCGS. CAC.** The beginning of the With Motto or Type Two design, represented here by a fantastically lustrous near-Mint survivor. The sun-yellow fields are vibrant, and the central devices are well struck for the issue, if a trifle softly defined on the hair below the coronet. Modest friction on the high points accounts for the grade, but the eye appeal is fantastic. Population: 50 in 58, 18 finer (4/09).(#8949)
- 1861 1867 XF45 PCGS.** Golden-green patina dominates both sides, accented with wisps of orange and lavender. High-point wear does not significantly subtract from the detail of the devices. Lightly marked throughout.(#8951)
- 1862 1867-S VF35 NGC.** Attractive yellow-gold patination is laced with traces of light tan. Well defined, save for high-point wear. Scattered small marks are in line with a large gold coin that has seen some circulation.(#8952)
- 1863 1867-S XF45 ANACS.** This sun-gold double eagle has its share of scintillating luster, although the surfaces display myriad small abrasions. The reverse rim appears to have a trace of filing at 1 o'clock.(#8952)
- 1864 1867-S AU53 PCGS.** Although the mintage of the 1867-S fails to stand out, the issue is surprisingly rare in Mint State, and even AU pieces are scarce. This yellow-gold double eagle has substantial luster and no more than usual number of small abrasions.(#8952)

Desirable AU55 1867-S Double Eagle

- 1865 1867-S AU55 NGC.** A rich yellow-orange example of this conditionally elusive issue. Only moderately abraded aside from a scuff beneath the right (facing) wing. The 1867-S was struck too late to participate in the various shipwreck hoards, yet was delivered prior to the large-scale export of gold coins to Europe, where they survived as bullion reserves.(#8952)

- 1866 1868 XF45 NGC.** The tan-gold fields remain subtly luminous on this Choice XF coin. Despite the light, even wear across each side, overt abrasions are few. A great example of an issue with a five-figure mintage.(#8953)
- 1867 1868 XF45 PCGS.** Golden-orange and aquamarine ensure the originality of this better date double eagle. No abrasions are consequential save for one bagmark just above the eagle's right (facing) wing.(#8953)
- 1868 1868-S XF45 NGC.** Pale straw-gold surfaces retain considerable luster despite the wear evident on the softly struck central devices. The obverse shows light abrasions but the reverse is comparatively clean.(#8954)
- 1869 1868-S AU53 PCGS.** The straw-gold fields and devices are unblemished, and the rims have only a solitary minor ding, on the obverse at 1 o'clock. A loupe reveals a mildly mattelike finish, as made.(#8954)
- 1870 1869 AU50 PCGS.** Sun-gold throughout aside from a few russet freckles near STATES. The remaining luster is substantial. Only a brief dig on the field near the nosetip merits mention.(#8955)
- 1871 1869-S XF45 PCGS.** Glimmers of luster percolate beneath rich original green-gold toning. Small field marks are scattered but are individually inconsequential.(#8956)
- 1872 1870—Cleaned—ANACS. AU Details, Net XF40.** This is a generally lustrous better date double eagle, a bit bright from cleaning and with a few typical marks but nonetheless attractive. Only 155,185 pieces were struck at Philadelphia in 1870, too late for shipwreck hoards and too early to appear regularly within European bank hoards.(#8957)
- 1873 1870-S AU55 PCGS.** Luster covers the reverse and brightens portions of the obverse. Customary for lightly circulated large diameter gold coins, small to moderate marks are seen throughout.(#8959)

Coveted AU 1871-CC Double Eagle

1874 1871-CC AU50 NGC. 1871 was the second year of double eagle production at Carson City, and though 17,387 coins were minted, it is a challenging issue. As Garrett and Guth (2006) note, "By a large margin, the 1871-CC double eagle is the second-rarest Carson City issue. The mintage is small, and most of the production was destined for circulation in Nevada and the surrounding areas. Circulation is the key word, as most of the coins found of this issue are well worn and heavily bagmarked."

Pockets of luster dominate this moderately abraded straw-gold example. Despite a brief trip through the pockets and cash drawers of Old West commerce, wear is slight, and there are no singularly significant marks. This is an important Carson City double eagle, perfect for the advanced gold collection. (#8961)

Exceptional 1871-CC Twenty, AU55

1875 1871-CC AU55 NGC. Following a limited production of 3,789 double eagles in its debut year of 1870, the Carson City Mint increased the mintage the following year to 17,387 pieces. As with most of the Carson City and San Francisco double eagles coined in the 1870s and 1880s, the entire mintage entered circulation. The few high grade (AU and Mint State) pieces known today have survived purely by chance. The lower-quality survivors are usually heavily abraded or damaged, placing even more emphasis on AU pieces.

The current NGC Census Report indicates that quite a few pieces have been certified in higher grades, 27 at last count. That figure undoubtedly includes quite a few resubmissions. For comparison, PCGS has never graded an example finer than AU55. Of the 27 finer NGC "coins" (but actually certification events), 21 grade AU58, and only six are MS60 or finer. We suggest an actual census that includes three or four Mint State pieces, perhaps 11 AU58 coins, and probably no more than 15 AU55 pieces.

With its pleasing light yellow color and wispy orange patina, this specimen is typical of most, showing moderate abrasions on each side but lacking any damage. Hints of prooflike surface remain visible in the protected areas around the devices. The strike is sharp, with slight weakness only near the borders. It is exceptional, ranking among the top three dozen known examples. Census: 24 in 55, 27 finer (4/09). (#8961)

Rare 1871-CC Double Eagle, AU58

1876 1871-CC AU58 NGC. The low-mintage 1871-CC is the second-rarest Carson City double eagle, both in overall rarity and high grade rarity, trailing only the 1870-CC (Douglas Winter, 2001, p. 150). The 2009 *Guide Book* reports that 17,387 pieces were struck, although Rusty Goe in *The Mint on Carson Street* says mint records report 14,687 coins. When available, the 1871-CC usually grades Very Fine to Extremely Fine. It is scarce in the low and mid levels of About Uncirculated and rare in AU58. The certified Mint State population currently numbers a mere six specimens (4/09).

A primary factor underlying the 1871-CC's rarity is the nature of double eagle circulation at the time. While other, later Carson City double eagle issues were used in international trade and stored in vaults for years or even decades at a time, the earliest CC-mint twenties, including the 1870 and 1871 issues, circulated extensively in the channels of commerce in and around Nevada. This makes substantially worn and heavily abraded coins the rule rather than the exception, and the collector who expects to find an attractive 1871-CC double eagle quickly and easily will be disappointed.

This near-Mint State representative offers excellent eye appeal for the issue, with lemon-gold surfaces that show considerable luster and only a trace of friction. The design features exhibit relatively strong definition, except that a couple of star centers and portions of Liberty's hair are soft. Some reverse die breaks are visible on the scroll, one of which obliterates the E preceding PLURIBUS. Although a number of light to moderate surface and rim marks occur on each side, the overall eye appeal remains impressive. A coin worthy of consideration for the finest Carson City cabinet. (#8961)

- 1877 1872 AU53 NGC.** The straw-gold luster is flashy with significant reflectivity. Modestly worn on the high points with an assortment of marks in the fields and on the well struck devices. (#8963)

Pleasing 1872-CC Double Eagle, XF40

- 1878 1872-CC XF40 NGC.** The remaining luster is ample and has a subdued honey-gold color. A faint pinscratch is behind the hair bun, and the upper reverse has a couple of small contact marks. The cheek is slightly glossy. Just 26,900 pieces were struck, none of which contemporary numismatists set aside. (#8964)
- 1879 1872-S AU58 NGC.** Great eye appeal for a near-Mint Type Two double eagle. A trifle softly struck on the portrait, but the luster is impressive and significant abrasions are few. (#8965)
- 1880 1873 Open 3 AU58 NGC.** Softly lustrous yellow-gold surfaces show whispers of frostiness and a touch of rub. A minimally marked example bearing the later Open 3 date logotype. (#8967)

Near-Mint Sharpness 1873-CC Twenty

- 1881 1873-CC—Cleaned—ANACS. AU58 Details.** The reverse of this better-date Carson City double eagle has nearly complete luster, but the obverse is subdued by a moderate cleaning, and the upper left obverse field is somewhat abraded, as is the portrait of Liberty. Close 3, as always on this issue. (#8968)
- 1882 1874 AU58 NGC.** A well-defined near-Mint example with ample remaining luster. Lightly marked overall with two more significant abrasions on the obverse, one to the left of the coronet and the other to the left of Liberty's lips. (#8970)
- 1883 1874 AU58 NGC.** Though the hair over Liberty's ear is weakly struck, it shows only slight evidence of friction. Splashes of orange color enhance the faint green elements found elsewhere on each side. (#8970)
- 1884 1874-CC XF40 NGC.** The yellow-gold surfaces of this Carson City representative give off a slight greenish cast. Well defined except for portions of Liberty's hair. A few light to moderate marks are not bothersome. (#8971)
- 1885 1874-CC XF40 PCGS.** Unlike so many 19th century branch mint gold coins, the present unblemished Carson City twenty has never encountered baking soda, and retains its original pale orange-gold color. Aqua-tinged luster clings to design recesses. (#8971)
- 1886 1874-CC XF45 NGC.** The yellow-gold surfaces of this Choice XF specimen display traces of reddish-gold luster in the recessed areas. The strike is well defined, save for on portions of Liberty's hair. Small marks are distributed over each side, and some grease spots are found on the right reverse. (#8971)

- 1887 1874-CC XF45 PCGS.** Because of the considerable mintage, the 1874-CC is the first CC-mint double eagle available in any number. This piece displays hazy brownish-gold, lightly abraded surfaces and traces of luster in the protected areas. Localized softness is visible on the design elements, a characteristic of the issue. The reverse die is rotated about 25 degrees counterclockwise from the obverse. (#8971)

Condition Scarcity 1874-CC Twenty, AU53

- 1888 1874-CC AU53 NGC.** The 1874-CC double eagle is readily available through the lower levels of AU due to hoards that have surfaced in Europe and South America. Higher-level AU coins are more difficult to acquire, and Mint State pieces are rare. Traces of luster reside in the recesses of this honey-gold AU53 example. Well defined save for the usual softness on Liberty's hair curls. The light marks scattered about are not disturbing. (#8971)

Attractive Choice AU 1874-CC Double Eagle

- 1889 1874-CC AU55 NGC.** The Carson City Mint produced 115,085 double eagles dated 1874, a relatively high number by the standards of the time. While not particularly rare in the absolute sense, in AU or better this is a difficult issue. The present example is particularly pleasing and has retained much original mint luster, indicating that its time in circulation was brief. Modestly worn with a few small marks and hairlines. (#8971)
- 1890 1875-CC XF40 NGC.** Only 111,151 pieces were produced, yet this issue is the most readily available double eagle from the Carson City Mint of the decade, and the most highly recommended for type purposes. This example shows somewhat unevenly defined elements, as usual, with normal wear and abrasions for the grade. (#8974)
- 1891 1875-CC XF40 ANACS.** Carson City double eagles are always popular with collectors. It is easy to imagine Lorne Greene spending one to buy livestock in the Old West for his ranch at the Ponderosa. Such a rancher would likely have handled more S-mint twenties, but those lack the same panache. The present straw-gold piece has noticeable luster, particularly on the obverse. The cheek has small marks. (#8974)
- 1892 1875-CC XF40 PCGS.** Ex: Rainy Day Collection. Originally toned in peach and olive-gold shades. The hair and wingtips show expected moderate wear, but much luster remains, and there are no obtrusive marks. (#8974)
- 1893 1875-CC AU50 PCGS.** The yellow-gold surfaces of this CC-mint example retain luster in the recesses. The design elements are unevenly brought up, a frequent characteristic of this issue. Moderate abrasions are noted on the obverse. (#8974)

Near-Mint 1875-CC Twenty

1894 1875-CC AU58 NGC. Much of the mint luster remains on this moderately abraded Type Two Carson City type coin. The 1875-CC is a frequently encountered Carson City twenty, and it is also an important type coin due to its position in the Type Two series. At the AU58 level this piece represents good value; in the better grades of Mint State it is a much pricier item. (#8974)

1895 1875-S AU58 NGC. Considerably luster resides on the brass-gold surfaces of this near-Mint State, well defined twenty. Light to moderate marks are in concert with a large coin that has experienced brief circulation. (#8975)

1896 1876-CC XF45 PCGS. A charming Carson City type coin from the nation's Centennial year. Luster is plentiful, particularly on the reverse, and although minor marks are scattered, the eye appeal is attractive. Encapsulated in a green label holder. (#8977)

1897 1876-CC AU50 PCGS. Substantial bright luster outlines the stars and fills the hair. The reverse is lustrous save for the open fields. A few abrasions above the cheekbone and arrowheads are of little import. (#8977)

1898 1876-CC AU53 NGC. Honey-gold patina bathes both sides of this AU53 twenty dollar, each of which displays traces of luster. The devices are well defined for the most part, save for portions of Liberty's hair and the centrils of the right-border stars. Light scattered marks reflect a short stint in circulation. (#8977)

1899 1876-CC AU53 PCGS. A bright yellow example with considerable luster and well defined design features. The distributed minute marks are in line with a large gold coin that has seen brief circulation. (#8977)

1900 1876-S AU58 NGC. Medium yellow-gold color overall with hints of electric lemon lacing the obverse. A touch of rub is visible on the high points, but this Type Two S-mint double eagle is well-preserved otherwise. (#8978)

1901 1876-S AU58 NGC. This yellow-orange near-Mint example is a trifle softly struck on the hair below the coronet but generally well-defined elsewhere. The luster is pleasing, and only a touch of rub is present. (#8978)

Scarce 1876-S Twenty Dollar MS62

1902 1876-S MS62 PCGS. This lemon-gold representative is flashy and sharply impressed. The reverse on its own merits a finer grade, as it has only minimal marks. The obverse has no more abrasions than is customary for the MS62 level. The final year for the conditionally scarce Type Two design. (#8978)

1903 1877-CC XF40 PCGS. Peach-gold surfaces are imbued with traces of reddish-gold and possess a good amount of luster for the designated grade. The scattered marks present are fewer and less severe than typically encountered. (#8983)

Lovely Choice XF 1877-CC Double Eagle

1904 1877-CC XF45 PCGS. CAC. Despite light wear across each side, the surfaces remain vibrantly lustrous with significant reflectivity. Yellow-gold color dominates, but a measure of orange is present as well. Modestly abraded overall, though a mark is noted at the lower part of the bust. Strong eye appeal for this first Type Three Carson City double eagle. (#8983)

Significant 1877-CC AU53 Twenty Dollar

1905 1877-CC AU53 PCGS. The bright honey-gold surfaces of this CC-mint representative display faint reddish-tan accents and are sharply defined on the design elements. Inoffensive, light circulation marks are visible over each side. In 1877, the double eagle design was modified by changing the value from TWENTY D. to TWENTY DOLLARS. This is important to Carson City collectors, as it represents the only significant design change for the gold coinage from this mint. (#8983)

Sharply Defined 1877-CC Double Eagle, AU55

1906 1877-CC AU55 PCGS. This is the first issue of the Type three design struck at the Carson City Mint. A well executed strike imparts sharp delineation to the design elements, and a good amount of luster resides in the recessed areas. Yellow-gold surfaces reveal a few minute marks. (#8983)

1907 1877-S AU58 NGC. A well-defined example of the first Type Three S-mint double eagle issue, lustrous with dusky yellow-orange color. Lightly marked overall with a near-vertical abrasion in the hair below the coronet. (#8984)

- 1908 1878 MS61 NGC.** Impressively detailed overall, if a trifle softly struck at the uppermost stars on the obverse. Rich yellow-gold color with glimpses of canary and orange along with a number of moderate abrasions. (#8985)

Remarkable MS62 1878 Twenty Dollar

- 1909 1878 MS62 NGC.** Boldly impressed with gorgeous yellow-gold luster. A remarkably appealing example for a coin not awarded the Select designation, though the wispy abrasions found on and near the portrait make the MS62 grade accurate. NGC has certified 32 numerically finer representatives (4/09). (#8985)

Gleaming MS61 Prooflike 1878 Double Eagle

- 1910 1878 MS61 Prooflike NGC.** This date falls early in the run of Type Three double eagles, and though circulated pieces are readily available, supply dries up quickly as the grade advances through Mint State. Prooflike examples such as the present coin are particularly prized; there are just four MS61 Prooflike representatives graded by NGC and none finer (4/09). The distinctly reflective yellow-gold mirrors show scattered moderate abrasions that account for the grade. (#78985)

Popular 1878-CC Twenty Dollar, VF35

- 1911 1878-CC VF35 NGC.** Pale yellow-gold surfaces are enhanced by faint rose and violet toning in the protected areas on each side of this attractive Carson City twenty. The 1878-CC twenty is relatively plentiful, although it is far from a common date. This piece is typical of survivors, with most known examples in the VF to XF grade range. (#8986)

Low Mintage 1878-CC Double Eagle, XF40

- 1912 1878-CC XF40 PCGS.** The 1878-CC, from a mintage of 13,180 pieces, is one of the rarest Carson City Mint issues. Whispers of mint-green and tan lace the honey-gold surfaces of this XF example. Traces of luster rest in the protected areas of the relatively well defined design motifs. A scattering of light marks does not detract. (#8986)

Elusive 1878-CC Twenty, AU50

- 1913 1878-CC AU50 PCGS.** Variety 1-A. Among the rarest Carson City double eagles with only 13,180 coins produced, and today most certified examples average only Choice XF or so. This AU specimen displays attractive orange-gold patina, with just a few minor abrasions and tremendous eye appeal. A sharply struck, semiprooflike piece that will see spirited bidding. A raised, interesting, straight die line appears on Liberty's neck, as Doug Winter describes in his *Gold Coins of the Carson City Mint* (2001). There are also two die lumps near the second T in TWENTY and a die scratch below the D in DOLLARS. (#8986)

Scarce 1878-CC Double Eagle, AU53

- 1914 1878-CC AU53 PCGS.** Variety 1-A, attributed by the vertical die scratch on Liberty's neck and two minute die lumps right of the second T in TWENTY. Only slight friction is seen on this scarce CC twenty. Yellow-gold surfaces are semiprooflike. The striking definition is strong throughout and there are only slight abrasions present, all of which are consistent with a coin of this grade. (#8986)

- 1915 1879-CC—Improperly Cleaned—NCS. VF Details.** A moderately worn example of this lower-mintage Type Three Carson City double eagle, light yellow-gold overall with a splash of deeper peach at the upper right reverse. Each side shows hairlines from a past cleaning. (#8989)

Sharp 1879-CC Twenty Dollar, XF40

1916 1879-CC XF40 PCGS. Decreased gold deposits and a national effort to increase production of gold half eagles and eagles led to the minuscule mintage of only 10,708 pieces for this issue. The present piece, while lightly worn, reveals just a few surface and rim marks, and the fields retain considerable luster, even at the XF40 level. The coloration is a lovely orange-gold. This is a sharp coin for the designated grade. (#8989)

Attractive 1879-CC Double Eagle, XF45

1917 1879-CC XF45 NGC. Always a popular issue because of its impressively low mintage of only 10,708 coins, the 1879-CC is not quite as difficult as one might imagine from the low production. Probably 300-350 pieces are known in all grades, most of which are VF-XF. This reddish-tinted Choice XF coin has faint remnants of reflectivity in the fields and is well struck. Both sides are minimally abraded. (#8989)

Appealing Choice XF 1879-CC Double Eagle

1918 1879-CC XF45 PCGS. Though recent decades have brought a number of examples of the 1879-CC double eagle to light, such appearances have fed demand for this low-mintage date rather than sated it. The present Choice XF coin is well struck overall and retains considerable luminosity. The lower right reverse shows two alloy spots that stand out against the light yellow-orange color present elsewhere. (#8989)

Minimally Abraded 1879-CC Double Eagle, AU50

1919 1879-CC AU50 NGC. Variegated mint-green and apricot-gold patina resides on both sides of this CC-mint representative. Traces of luster are found within the recessed areas of the well defined design features. The minute marks scattered about are fewer and less severe than ordinarily seen on most survivors. This issue is not as scarce as its low mintage of 10,708 pieces might suggest, due to hoards that have turned up in recent decades. Mint State coins, however, are elusive. (#8989)

Dynamic AU55 1879-CC Twenty

1920 1879-CC AU55 NGC. Despite a touch of rub across the high points, this pale straw-gold example retains considerable reflective luster, particularly on the reverse. The strike is strong, and marks are scattered and mostly wispy, though a horizontal abrasion is noted below the 18 in the date. Thanks to its mintage of just 10,708 pieces, the 1879-CC twenty has gained considerable fame among collectors of Old West coinage, and Choice AU and better survivors are particularly prized. NGC shows 58 higher-graded pieces, but this number doubtless includes resubmissions (4/09). (#8989)

Pleasing 1879-O Liberty Head Double Eagle, AU58
Low-Mintage Issue, Only O-Mint Type Three

1921 1879-O AU58 PCGS. The New Orleans Mint opened for business in 1838 and produced a continuous stream of gold and silver coins until 1861. The series included double eagles beginning in 1850. At the dawn of the Civil War, the facility fell into the hands of state officials and then the Confederate government. A limited number of coins were minted by both groups through about April 1861, before coinage was halted entirely.

After being restored to the U.S. government at the end of the war, the New Orleans Mint remained dormant until 1879, when coinage production resumed, undoubtedly due to the need for silver dollar coinage under the Bland-Allison Act. In 1879, a limited number of double eagles were minted, just 2,325 according to mint records. They were the last coins of that denomination ever struck in New Orleans, and represent the only non-Type One issue of that mint. Those that were struck apparently entered circulation, as the date is a rarity in all grades and an extreme rarity in high grades, as the PCGS population shows. There are probably no more than 150 examples surviving in all grades, including a single harshly cleaned AU coin in the Smithsonian Institute. An early auction appearance of this date was in the Belden Roach Collection (B. Max Mehl, 2/1944), lot 196. Mehl's interesting description read, "1879 Last year of issue. Small O. Uncirculated with bright mint luster. Only the slightest evidence on obverse of having been handled with other coins. Catalogs at \$115.00 but difficult to obtain even at that price."

This wonderful piece has brilliant lemon-yellow color and rose patina, with only a faint trace of highpoint wear over fully lustrous and frosty surfaces. A few minor abrasions are visible on each side, but they are entirely insignificant. Population: 2 in 58, 1 finer (4/09).(#8990)

- 1922 1880-S MS61 PCGS.** Well-defined with shining yellow-gold surfaces. Though numerous tiny marks are scattered on each side, there are no singularly mentionable abrasions. (#8993)
- 1923 1882-CC—Cleaned—ANACS. AU Details, Net XF40.** A lightly polished example that has a couple of trivial contact marks on the rims. Only 39,140 pieces were struck, and Carson City double eagles are widely collected.
Ex: *Long Beach Signature* (Heritage, 2/2003), lot 8500. (#8997)

Wonderful 1882-CC Twenty, AU58

- 1924 1882-CC AU58 NGC.** An exceptional example of this scarce Carson City date, with brilliant and highly lustrous yellow surfaces and excellent eye appeal. This date is generally available without difficulty in grades through AU58, but it is scarce in Mint State. The present piece is at the top of the list for those that are easily obtained. (#8997)
- 1925 1882-S MS60 NGC.** Well-defined with impressive yellow-orange luster. Though a number of abrasions are present on the portrait, including one on Liberty's hair bun, this piece retains considerable eye appeal. (#8998)
- 1926 1883-CC XF45 PCGS.** Bright yellow-gold surfaces display apricot accents and well struck design features. The minute distributed marks are in concert with a lightly circulated large gold coin. (#8999)
- 1927 1883-CC AU53 PCGS.** This scarce Carson City issue has a mintage of fewer than 60,000 pieces. Survivors with ample luster and original green-gold surfaces, such as the present example, are always in demand. (#8999)
- 1928 1883-S MS60 NGC.** A well-defined S-mint twenty with fresh sun-yellow luster and no trace of wear. Numerous scattered marks and wispy abrasions contribute to the grade. (#9000)
- 1929 1884-CC AU53 PCGS.** Pumpkin-orange surfaces reveal traces of luster in the protected areas. Just a few minute marks are noted on this well struck example. (#9001)
- 1930 1884-S MS60 NGC.** Strongly struck with dusky yellow-orange surfaces that show no trace of wear. Despite the presence of light to moderate abrasions, the MS60 designation seems uncharitable. (#9002)
- 1931 1885-CC VF30 PCGS.** Scarce and desirable with a mintage of only 9,450 pieces. Light, even wear with copper-gold patina around the devices. There are no distracting abrasions, and value received is substantial relative to finer grades.
Ex: *Long Beach Signature* (Heritage, 2/2003), lot 8504. (#9004)

Pleasing 1885-CC Twenty Dollar, XF40

- 1932 1885-CC XF40 PCGS.** The 1885-CC is one of the rarest Carson City double eagles struck in the 1880s, both in terms of overall and high grade rarity. A good amount of luster is retained on the yellow-gold surfaces of this XF specimen. This is a sharply defined piece despite high-point wear. Distributed light marks occur over each side. (#9004)

Lustrous Choice XF 1885-CC Twenty

- 1933 1885-CC XF45 PCGS.** The 1885-CC double eagle, the last Carson City twenty struck before that mint's nearly four-year shutdown in the late 1880s, is a scarce issue with an original mintage of only 9,450 pieces. The present wheat-gold example has ample remaining luster, particularly on the reverse, though the lightly worn surfaces also show several significant abrasions. (#9004)

Elusive AU Details 1885-CC Twenty

- 1934 1885-CC—Rim Damage—NCS. AU Details.** Although the 1884-CC mintage exceeded 80,000 pieces, only 9,450 pieces were struck at Carson City in 1885. The low mintage was partly due to the cessation of the coining presses on March 18, 1885. While the facility remained open as an assay office, coinage did not resume until July 1, 1889. Any 1885-CC is desirable, and the present lightly circulated piece is important despite a few small marks on the obverse rim between 10 and 3 o'clock. (#9004)

Bright 1885-CC Double Eagle, AU55

1935 1885-CC AU55 PCGS. The 1885-CC is one of the rarest Carson City double eagles struck in the 1880s. This Choice AU example displays luster in the recesses of the well impressed design elements. Bright peach-gold surfaces are laced with hints of light tan and reveal a scattering of minor contact marks. (#9004)

1936 1885-S AU58 NGC. Only a touch of rub separates this warmly lustrous yellow-orange piece from a Mint State designation. Well struck for the issue with scattered, wispy abrasions. (#9005)

1937 1885-S MS60 NGC. Strongly struck with bright lemon-gold luster that enlivens moderately abraded surfaces. Considerable eye appeal despite its scattered faults. (#9005)

1938 1885-S MS61 NGC. Considerable flashy luster is evident in the light yellow-orange fields. Scattered abrasions throughout, but the bold strike on the central devices is redeeming. (#9005)

1939 1885-S MS62 PCGS. Strongly struck with dusky peach-g old surfaces that show occasional butter-yellow and orange elements. Small and scattered marks on the obverse contribute to the grade. (#9005)

1940 1887-S MS60 NGC. Excellent definition with bright luster enhancing the peach-tinged yellow-gold surfaces. Though light to moderate abrasions pepper each side, the eye appeal of this S-mint example is pleasing. (#9007)

1941 1889 MS61 NGC. Peach-gold surfaces are imbued with wisps of light tan and exhibit sharply impressed design elements. Minute surface and rim marks on the obverse limit the grade. A couple of reverse grease spots are also visible. The low-mintage 1889 twenty dollar (44,070 business strikes) is a scarce issue. (#9010)

1942 1889-CC—Scratched—ANACS. AU Details, Net XF40. A better date within the Carson City double eagle series, the 1889-CC has a low mintage of 30,945 pieces. This example has four brief hair-thin knife marks on the lower right obverse field, and three additional similar marks on the right reverse field, presumably made to see if the coin was plated. It wasn't. (#9011)

1943 1889-CC XF45 NGC. Luster is prominent in the recesses of this Choice XF twenty dollar, and relatively strong detail is apparent on the devices. Brass-gold surfaces reveal distributed minuscule marks. A low-mintage Carson City issue of 30,945 pieces. (#9011)

1944 1889-CC AU50 NGC. Traces of luster show in the protected areas of this bright brassy-gold Carson City representative. This is a well struck piece that reveals some light surface and rim marks. (#9011)

1945 1890 MS61 NGC. A luminous yellow-gold piece that has considerable alloy present, most noticeably as a spot to the right of the date. The strike is strong and the luster pleasing, though each side shows light and moderate marks. (#9013)

1946 1890-CC VF30 PCGS. Both sides of this VF30 twenty dollar yield traces of luster in the recessed areas. Peach-gold patina is imbued with hints of light green, and the design elements are nicely defined. Light abrasions are noted over each side. Housed in a green label holder. (#9014)

1947 1890-CC VF30 PCGS. This orange-gold CC-mint double eagle retains traces of luster within the hair, rays, and plumage. The cheek and other high points display wear. Marks are minor for the grade save for abrasions near the arrowheads. In a green label holder. (#9014)

1948 1890-CC XF40 NGC. An attractive example despite light cleaning, or possibly seawater immersion, which gives the coin a slightly bright appearance. Well detailed and free of severe abrasions, with numerous small marks, faint hairlines, and a couple of wispy pinscratches observed. (#9014)

1949 1890-CC—Cleaned—ANACS. AU Details, Net XF40. This Carson City twenty has little actual wear but is thickly hairlined, probably from an attempt to remove speckles of maroon patina. Like most 1890-CC twenties, the reverse is minutely die doubled, most visible on the UR in PLURIBUS and the E in WE. (#9014)

1950 1890-CC XF45 PCGS. Modest wear is concentrated largely at the high points, leaving the wheat-gold fields surprisingly lustrous. An attractive example of this popular Carson City double eagle issue. (#9014)

1951 1890-CC AU53 NGC. Lightly worn with considerable luster remaining in the yellow-orange fields. A touch of flashiness counterbalances the moderate abrasions visible in Liberty's hair. (#9014)

1952 1890-S AU58 NGC. Strongly struck with only a hint of friction that scarcely affects the bright yellow-gold luster. Minimally abraded with excellent eye appeal. (#9015)

Formidable Near-Gem 1890-S Twenty

1953 1890-S MS64 PCGS. Peach and straw-gold alternate across this lustrous and well impressed near-Gem. Splendidly unabraded save for minor contact near obverse star 5. The 1890-S is plentiful in typical Mint State, but is rarely encountered this nice. Certified in a green label holder. Population: 17 in 64, 1 finer (4/09). (#9015)

Low Mintage 1891-CC Double Eagle, VF35

1954 1891-CC VF35 PCGS. The 5,000-piece mintage of the 1891-CC double eagle is among the lowest for any Carson City issue. We present here a Choice VF example that retains traces of luster in the protected areas. Yellow-gold surfaces are imbued with whispers of apricot and mint-green, slightly deeper in hue on the reverse. Sharply struck throughout. A strikethrough is noted in the left obverse field. (#9017)

Elusive AU53 1892 Twenty

1955 1892 AU53 PCGS. In 1892, the Philadelphia Mint struck nearly 800,000 eagles and more than 750,000 half eagles. The facility's production of double eagles was far less generous. Only 4,430 business strikes were coined, in addition to 93 proofs. Collectors of the day ignored the issue, aside from a few wealthy and ambitious numismatists such as J.M. Clapp. Survivors are scarce and widely sought. This is a pleasing sun-gold example with ample luster and no obtrusive marks. The cheek shows slight rub corresponding to the grade. (#9019)

Exceptional 1892-CC Double Eagle, AU58

1956 1892-CC AU58 NGC. The brassy-gold surfaces of this near-Mint State twenty dollar display semireflective fields that yield a mild variance with the motifs. A well executed strike leaves sharp definition on the design features, none of which reveal even a hint of softness. This issue is "nearly always seen with deep, dense abrasions" (Douglas Winter, 2001). This particular coin, however, shows distributed light marks that do not detract from the coin's overall appeal. (#9020)

Borderline Uncirculated 1892-CC Twenty

1957 1892-CC AU58 PCGS. A lovely orange-gold near-Mint example of this better Carson City issue. Sharply struck and lustrous with minimal friction on the cheek and hair. Marks are minor, particularly on the obverse. The 1892-CC has a low mintage of 27,265 pieces, and pleasing near-Mint examples provide excellent value. Housed in a green label holder. (#9020)

1958 1892-S MS62 NGC. Boldly impressed with bright and shining luster. The color of this faintly abraded coin ranges from light canary-yellow to deeper gold and peach. (#9021)

Impressive MS64 1892-S Double Eagle

1959 1892-S MS64 NGC. Butter-yellow and peach shadings dominate, though a few copper-brown alloy dots are present on the reverse. Sharply struck and satiny. Both sides are carefully preserved overall, with just a handful of minor abrasions precluding an even finer designation. NGC has graded a mere four pieces in higher grades (4/09). (#9021)

1960 1893-CC—Ex-Jewelry, Damaged—ANACS. AU Details, Net VF20. For the final year of coinage at Carson City, only 18,402 double eagles were issued. This is an overly bright example that has a faint scrape near obverse star 3 and a large number of small raised elements, formed when the piece was heated. (#9023)

1961 1893-CC XF40 PCGS. In its final year of operation, the Carson City Mint produced just 18,402 double eagles. Traces of reddish and electric-blue patina accent the antique-gold surfaces that are minimally abraded. Generally well defined on the design features. (#9023)

Lovely 1893-CC Double Eagle, MS62

- 1962 1893-CC MS62 NGC.** This was the final double eagle issue from the Carson City Mint, and just 18,402 pieces were produced. According to the *Encyclopedia of U.S. Gold Coins*, several findings have increased the availability of this date, making it easier to obtain in high grades than in previous years. This example is well struck and lustrous, with a lovely satiny sheen across both sides. Scattered small marks limit the grade. (#9023)

Always-Popular 1893-CC AU58 Prooflike Double Eagle

- 1963 1893-CC AU58 Prooflike NGC.** This low-mintage final-year Carson City twenty is among the most readily available double eagles from this mint. Coins with Prooflike fields, however, are elusive. This AU58 Prooflike specimen has flashy fields with just a whisper of wear on Liberty's hair, eyebrow, and cheek. Only a few marks are noticeable, and they are in peripheral areas. Census: 4 in 58 Prooflike, 3 finer (4/09). (#79023)
- 1964 1894 MS62 NGC.** Sharply impressed with a touch of frostiness on the high points. Each side is generally light yellow-orange with a diagonal area of alloy above the DOL in DOLLARS on the reverse. (#9025)
- 1965 1894-S MS63 PCGS.** Sharply struck with few abrasions for the Select designation. This S-mint Liberty twenty has warm and inviting luster with a touch of satin texture to the surfaces. (#9026)
- 1966 1895 MS62 NGC.** Sharply defined on the hair below Liberty's ear. This late 19th century double eagle has great yellow-gold and orange-gold color with only isolated abrasions on the strongly lustrous surfaces. (#9027)

- 1967 1895 MS64 NGC.** Satiny and well frosted, with only a few minor facial marks and delicate green-gold peripheral accents. The near-Gem level is the highest state of preservation that most collectors can obtain; NGC has graded only nine coins finer (4/09). (#9027)

- 1968 1895-S MS63 NGC.** Pleasing luster exudes from the yellow-gold surfaces of this Select S-mint representative, and a well executed strike delivers sharp delineation to the design features. Minimally abraded for the grade designation. (#9028)

- 1969 1896-S MS62 NGC.** Well-defined with powerfully lustrous yellow-gold surfaces. It has few marks overall, but abrasions above and to the right of Liberty's ear account for the grade. (#9030)

- 1970 1896-S MS62 NGC.** Occasional orange elements enhance the eye appeal of this otherwise yellow-gold example. Delightfully lustrous with light, scattered abrasions that combine to preclude Select status. (#9030)

Captivating MS64 1896-S Twenty

- 1971 1896-S MS64 PCGS. CAC.** Deep orange-gold color overall with small cores of lighter yellow visible at the centers. The luster is strong, as is the strike. While this later S-mint Liberty twenty dollar issue is accessible at the MS64 level, anything finer is a condition rarity; PCGS has graded only two such coins (4/09). (#9030)

Shining MS64 1898-S Double Eagle

- 1972 1898-S MS64 PCGS.** This late 19th century Liberty double eagle issue of over 2.5 million pieces is available in grades through Select, though anything finer is conditionally scarce. This immensely lustrous near-Gem is boldly defined with peach accents gracing otherwise pale yellow-gold surfaces. (#9034)

- 1973 1899-S MS63 PCGS.** Well-defined in the centers with slight softness at the stars. Strong yellow-gold luster shows glimpses of peach around the lightly abraded portrait. (#9036)

1974 1901 MS63 ANACS. The 1901 double eagle is a fairly low-mintage issue, although the Philadelphia Mint struck more than 1.7 million ten dollar pieces that year. The present twenty has dazzling luster and an exquisite strike. Both sides show only light marks, and a violet alloy spot near the right (facing) claw is of mint origin. (#9039)

1975 1902 MS61 NGC. The luster and strike are equally strong on this faintly yellow-orange representative. Attractive with few abrasions of note, though a thin flaw passes below the chin. (#9041)

Vibrant MS63 1902-S Twenty Dollar

1976 1902-S MS63 PCGS. Dynamic luster swirls about this sharply impressed Select double eagle. The fields display only trivial contact, and the portrait has just a few small marks. The 1902-S was well represented in foreign bank holdings, but most such pieces were abraded from years of indifferent storage, and cannot compare in eye appeal with the present coin. (#9042)

Handsome Gem 1903 Double Eagle

1977 1903 MS65 PCGS. The 1903 double eagle had a much lower mintage than its 1904 successor. This sun-gold Gem example has vibrant cartwheel sheen and undisturbed fields. The cheek displays unobtrusive grazes, and the reverse has a trio of subtle orange freckles. Only two pieces have been certified higher by PCGS (4/09). (#9043)

1978 1903-S MS64 PCGS. This beautiful near-Gem has vibrant cartwheel sheen, and the smooth apricot and lime-green surfaces lack the usual inundation of small abrasions. Worth evaluation from the specialist. PCGS has graded only eight pieces finer (4/09). (#9044)

1979 1903-S MS64 PCGS. Vibrant apricot luster is imbued with hints of mint-green, and an exacting strike emboldens the design elements. The 1903-S is a condition scarcity in near-Gem and is difficult to locate finer. (#9044)

Unchallenged Gem 1904 Twenty Dollar

1980 1904 MS65 NGC. CAC. Many 1904 double eagles have returned to America from a lengthy repose in European bank vaults, but most of those pieces display bagmarks from decades of careless storage. The present canary-gold Gem provides an exception, since the fields and devices are uncommonly free from abrasions. Encased in an older generation holder. (#9045)

Pleasing 1904 Double Eagle, MS65

1981 1904 MS65 NGC. CAC. The 1904 is the most common date of the series, evidenced by the tens of thousands certified in the various Mint State grades. That said, this is a most pleasing Gem that exhibits sharply struck design elements and radiant luster. Peach-gold surfaces are minimally abraded. (#9045)

Lovely Gem 1904 Twenty Dollar

1982 1904 MS65 NGC. Highly lustrous with beautiful rose-gold toning evenly distributed across both sides. Other than a few faint grazes in the fields, the surfaces are nearly flawless. The 1904 Liberty double eagle is the most common issue in the entire series, and is the ideal choice for type purposes. (#9045)

Prooflike Select 1905-S Twenty

1983 1905-S MS63 PCGS. Obviously prooflike, although undesignated as such on the old-style green insert. This flashy example is lightly abraded, and is well struck aside from a couple of upper obverse star centers. An occasional mint-made alloy spot is noted on the peripheries. (#9048)

1984 1906 MS61 NGC. A pleasing Mint State example of this challenging issue, one of two low-mintage Philadelphia dates that appeared in the wake of the double eagle bumper crop of 1904. Each side is pleasingly detailed with few overt abrasions, and the lustrous butter-yellow surfaces show glimpses of orange. (#9049)

Scarce 1906 Double Eagle MS62

1985 1906 MS62 NGC. This better-date double eagle is originally toned in rich peach shades. The cartwheel shimmer is unbroken, and marks are generally confined to a few ticks near the profile. Fewer than 70,000 pieces were struck of this issue, since many of the 11.4 million pieces coined in 1904 between Philadelphia and San Francisco presumably remained in Federal vaults. (#9049)

Beautiful Near-Gem 1906-S Twenty

1986 1906-S MS64 PCGS. Beautiful peach-red toning augments the charm of this lustrous and only lightly abraded near-Gem. The strike is precise save for slight blending on a portion of the shield stripes. Certified in a green label holder. PCGS has graded only three pieces finer (4/09). (#9051)

1987 1907 MS63 NGC. Honey-gold lustrous surfaces exhibit sharply struck design features. A handful of minuscule marks precludes a higher grade. (#9052)

Vibrant 1907-S Liberty Twenty, MS64

1988 1907-S MS64 PCGS. Although the Philadelphia Mint struck various incarnations of Saint-Gaudens double eagles in 1907, San Francisco clung to the Longacre design throughout its final year. A lustrous apricot-gold representative that has a well preserved reverse. Only two pieces have been certified finer by PCGS (4/09). (#9054)

PROOF LIBERTY DOUBLE EAGLES

Fantastic 1856-O Double Eagle Certified Specimen-63 by NGC
Rarest O-Mint Double Eagle, Finest Known

1989 1856-O SP63 NGC. Variety One. The status of the 1856-O double eagle as the rarest New Orleans twenty, from a paltry mintage of 2,250 pieces, was established as long ago as the Atwater Sale (B. Max Mehl, 6/1946). In lot 1338 of that celebrated catalog Mehl proclaimed, "1856 Strictly very fine; free from any nicks or dents. The rarest Double-Eagle of the New Orleans Mint. Smallest coinage, that of only 2250. Not in some of the largest collections of U.S. Gold. Not even in the recent Sale of 'World's Greatest Collection of U.S. Gold Coins.' "

Many specialists believe that this is the single most important New Orleans double eagle in existence, and one of the most important O-mint coins of any denomination. The coin offered here is the finest example known by a wide margin. Its special characteristics have earned this coin the Specimen designation, certified as such by NGC. Doug Winter once believed this coin was a proof, but he later revised his opinion to coincide with the NGC designation. As an issue, the 1856-O needs little introduction. It remains one of the few transcendent rarities among 19th century U.S. gold, recognized as such even by non-gold collectors.

The 1856-O is one of the classic rarities in U.S. gold coinage. It is both the rarest gold coin struck by the New Orleans Mint, and the rarest regular issue Liberty Head double eagle. The estimated number of survivors ranges from a conservative 10-12 (Breen) to as high as 20-30 (Winter). The issue is very rare in AU grades, and the present coin is the only Uncirculated example known. The example in the Bell Collection (Stack's, 12/1944), lot 899 was cataloged as Uncirculated, but that coin is believed to be the Eliasberg specimen, which graded AU50 in the sale of that storied collection.

The present coin has an appearance unlike any other 1856-O double eagle. While weakness is generally found on O-mint double eagles from this era, including the 1856-O, this coin shows an amazing full strike in all areas and fully reflective fields, somewhat different from the finish seen on other New Orleans twenties from this period. Each star has satiny luster and shows shadowing, as though impressed with an extra blow from the die. Liberty's hair details and the stars above the eagle are equally well brought up. There is a bit of incomplete die polish along the top and bottom sides of the right wing. This is a common occurrence on branch mint proof dollars in the Morgan series, and while it is not entirely similar to a Philadelphia proof from this era, it is obviously a very special coin. Clearly, a great deal of care went into its production. The satiny luster over the devices plus the deeply mirrored fields produces a noticeable cameo contrast on each side. Even casual inspection reveals that this coin was produced differently from regular business strikes.

This coin has been submitted to both major grading services. When the coin was featured in the Premier Auction Sale (Superior, 1/1995), the catalogers offered the following account:

"Superior submitted the coin to PCGS for grading. In a conversation with PCGS' principal shareholder, Mr. David Hall, Larry Goldberg was told by Mr. Hall that in his opinion the coin is definitely something special, completely unlike regular issue New Orleans double eagles of the period. Only because he (Hall) wanted to insure a conservative estimate was it graded Mint State 63 by PCGS. (The service eschews the terms 'Proof' or 'Specimen' designations on most branch mint issues except for the few documented Proofs of which the mint has a record)."

As a result of this policy, even though direct examination of the coin proves it was produced under controlled circumstances and it cannot be other than a special striking, PCGS would only certify it as an “MS63.” NGC, on the other hand, recognized the special nature of this piece and was willing to certify it as such. It is worth noting there are unquestionable proof New Orleans gold coins from this era: the unique 1844-O half eagle and eagle that both trace their pedigree to the fabled Parmelee sale of 1890, and to George Seavey’s collection before that.

The reason for the small mintage of New Orleans double eagles from 1854-1856 probably lies in the establishment of the San Francisco Mint, which began operations in 1854. Before that date, large amounts of bullion from the California gold fields were shipped to New Orleans for coinage. When the new facility came online, the flow of gold deposits to the New Orleans Mint was drastically reduced.

Another factor in reducing the availability of this issue was the timing of its release into numismatic circles. Early double eagles were not valued as numismatic items at their time of issue. Coin collecting as a hobby did not become popular in the United States until after 1857, when the old large copper cents and half cents were discontinued. A wave of nostalgia for the “old coppers” transformed itself into a viable market for all older denominations. Unfortunately, double eagles were viewed as neither historic nor interesting pieces, since they had only been circulating since 1850. The 1856-O was released only one year before the ground swell of enthusiasm for coin collecting took hold in the United States. The large intrinsic value of the coins also mitigated against casual collecting.

A further complication for branch mint coins was the widespread unfamiliarity about mintmarks. Collectors regarded mintmarks as unimportant details and were content to save only one example of each date for their collections, paying no attention to which mint the specimen represented. Most advanced collectors simply ordered a proof from the Philadelphia Mint every year to represent the date. As late as 1893, Augustus Heaton (author of the seminal *Mint Marks* pamphlet in that year) would write he was unaware of any collector in this country who systematically collected large denomination gold coins by date and mintmark.

In the early 20th century, only a few collectors such as John H. Clapp, Virgil Brand, and Waldo Newcomer collected double eagles systematically. In 1909 Edgar Adams published a list of U.S. gold coins and their values, but he did not even itemize the early double eagles, as there was no demand for them. Auction appearances of Liberty Head double eagles were decidedly rare, although the new Saint-Gaudens High Reliefs stirred some interest when they appeared. Collecting interest in the older twenties languished until the late 1930s, when collectors such as Louis E. Eliasberg, Sr. became interested in the coins as a way to invest legally in gold, after the federal government made it illegal for citizens to own stocks of that metal. By the time numismatists became interested in the early double eagles, the supply of nice coins had been exhausted for decades. The survival of a Mint State branch mint double eagle from the 1850s can only be regarded as a miracle by modern collectors.

Recalling the initial appearance of this particular specimen in the numismatic marketplace, Marc Emory recalled: “New England Rare Coin Galleries was contacted by a family, then living in Vermont. They inquired if we would be interested in purchasing a proof 1856-O double eagle. New England staff explained that no proofs were known of this issue. The party on the other end of the line patiently explained that, well, they had one, nonetheless. The New England staffer asked, rhetorically, or so he thought, if the prospective seller was a descendent of Bienvenu, the superintendent of the New Orleans Mint in the year 1856. All sarcasm was quickly forgotten when the seller on the phone responded, ‘Yes.’ ”

In order to identify this important rarity, we point out the following surface irregularities which essentially “fingerprint” the coin. There are two small planchet flakes seen in the exergual area, one below the 8 in the date, the other at the top of the 5. Several others appear around stars 4, 5, 8, 10, and 13, and in the hair just above the bun. We stress that these are not post-striking imperfections, but small planchet flaws frequently found on proof gold coins from this period. On the reverse, a fine die crack runs from the rim through the D in the denomination and ends at the curve of the scroll.

The answer to the questions about the exact circumstances surrounding the striking of this coin may still be found in the New Orleans Mint records from 1856. Unfortunately, mint records from that era are very sketchy, difficult to locate, and, in many cases, simply no longer exist. This piece is undoubtedly the highlight of the current sale. This is only the fourth appearance of this coin at public auction since its striking in 1856. When sold as part of The Eagle Collection in January 2002, this piece realized \$310,500, which seems like a relative bargain today. In its next appearance, in the Long Beach Signature (Heritage, 6/2004), lot 6372, the coin bought a healthy \$542,800. The current record for an 1856-O double eagle belongs to the AU58 NGC-graded example sold in the Baltimore Collection (Heritage, 10/2008), lot 3018, which realized \$576,150. Jeff Garrett and Ron Guth have included the 1856-O double eagle in their list of 100 Greatest U.S. Coins.

Ex: Purchased from the New Orleans Mint at the time of issue by Mint Superintendent Charles Bienvenu; passed to Bienvenu’s heirs; purchased by Marc Emory of New England Rare Coin Galleries directly from Bienvenu’s family in 1979; sold by James Halperin later that year to Larry Demerer for approximately \$215,000; sold to Superior for a reported \$312,500 in late 1980/early 1981; The Premier Auction Sale (Superior, 1/1995), lot 1645, where it realized \$203,500 as an MS63 PCGS; subsequently certified MS63 Specimen by NGC; The Eagle Collection (Heritage, 1/2002), lot 4147, where it realized \$310,500; Long Beach Signature (Heritage, 6/2004), lot 6372, where it realized \$542,800. (#9061)

Intriguing PR55 1901 Double Eagle

1990 1901 PR55 PCGS. One of 96 proofs made for this turn-of-the-century double eagle issue. Yellow-gold fields retain strong mirrors despite a degree of impairment. Judging from the contact marks and light rub visible on each side, this proof likely was spent and circulated briefly before being saved as special.(#9117)

HIGH RELIEF DOUBLE EAGLES

Uncirculated Details 1907 High Relief Twenty

1991 1907 High Relief—Cleaned, Mount Removed—ANACS. Unc Details, Net XF45. Light wear is evident on the lower reverse and on the chest and knee of the striding Liberty, but there are no remotely mentionable handling marks. Improper cleaning has had a minimal impact on the overall appearance of the piece, and minor rim damage is noted, where a jewelry mount has been removed. Although every worthy coin auction contains a few High Reliefs, such pieces have tremendous numismatic importance and are coveted by a formidable cross-section of collectors.(#9135)

High Relief MCMVII Twenty Wire Rim, AU Details

1992 1907 High Relief, Wire Rim—Improperly Cleaned—NCS. AU Details. Friction is minimal on Liberty's knee and on the crest of the eagle's wing. The satiny luster is consistent although slightly diminished by a careful wipe, which has left the surfaces mildly bright and glossy. As always, a formidable example of the famous and low-mintage High Relief type.(#9135)

Lustrous 1907 High Relief Twenty, AU55

1993 1907 High Relief, Wire Rim AU55 PCGS. This is a minimally circulated representative of an ever-popular issue in the U.S. double eagle series. Both sides display the sharp definition that collectors associate with Saint-Gaudens' High Relief design, this despite a little light friction over the high points. Rich olive and orange-gold colors are blended over features that are free of mentionable distractions save for a few moderate abrasions in the right obverse field.(#9135)

Popular 1907 High Relief, Wire Rim Double Eagle, MS61

1994 1907 High Relief, Wire Rim MS61 NGC. The luminous peach-gold surfaces of this High Relief specimen exhibit boldly struck motifs, making them appear to reach out to the observer. The wire rim is apparent along the right, left, and lower obverse and throughout most of the reverse. A few small surface and rim marks are visible on each side.(#9135)

Sharp, High-End MS62 MCMVII
High Relief Twenty, Wire Rim

1995 1907 High Relief, Wire Rim MS62 PCGS. This specimen of the eternally popular High Relief double eagle design, here in the more-available Wire Rim version, presents a significant opportunity for some fortunate bidder. There are no visible contact marks on either side. The coin appears fully struck throughout, with good articulation on Liberty's face, the torch, the panes of the Capitol building, the rock, her sandals, and the eagle on the reverse. Greenish-gold coloration predominates, although there is a hint of reddish-gold patina. The swirling die polish marks noted are characteristic of the issue. Although this piece numerically is only a tad higher than the median grade for all certified survivors at both NGC and PCGS, in terms of aesthetic appeal we believe it to be considerably finer. A high-end coin. (#9135)

Gem MCMVII High Relief Twenty, Wire Rim

1996 1907 High Relief, Wire Rim MS65 NGC. This is an issue that members of the collecting public never tire of, nor should they. While the High Relief coins are not rare in the strictest sense, they are simply *beautiful*, and for many—perhaps most—collectors, that is enough. That beauty is expressed in a timeless, classic elegance that no other U.S. coin conveys in quite the same way. As a testament to the undying artistry of Augustus Saint-Gaudens, the U.S. Mint in 2009 resurrected his design to offer a reduced-size, extra-thick version of the original 1907 Ultra High Relief coins, patterns which were issued in minuscule quantities (perhaps 16 to 22 coins). To quote from the Mint website, www.usmint.gov:

“This [2009-dated] one-ounce, 24-karat gold coin is a triumph in coin design representing the culmination—more than a century in the making—of a partnership between a renowned artist, Augustus Saint-Gaudens, and a visionary leader, President Theodore Roosevelt. The coin is a digitally reproduced version of Saint-Gaudens’ original ultra high relief 1907 Double Eagle gold piece, which was never released into circulation.

“On the coin’s obverse, Saint-Gaudens shows Liberty, personified by a statuesque woman striding powerfully forward. A young eagle flying during a sunrise is depicted on the reverse. The original 1907 Double Eagle is considered by many the most beautiful coin ever made in the United States. But despite Saint-Gaudens’ artistic masterpiece, the minting process at the time did not allow for the mass production of ultra high relief coins, and Saint-Gaudens’ artistic vision was never fully realized.”

Despite the “digital mapping” and other technologies now available at the Mint, the present cataloger and many others cannot help but feel disappointment over the smaller size of the new coins, although they have many other charms. It appears equally true today, as in 1907, that production of a large-size Ultra High Relief in any kind of production quantities would and will remain an unfulfilled dream. Many collectors will certainly opt for both coins, but the 1907 High Reliefs for many numismatists remain the gold standard for collectible examples of “the Saint’s” artistry.

The present Gem specimen has silky, satiny surfaces that are absent the usual heavy reddish patina. The coin is primarily light green-gold throughout. There are faint, swirling die polish lines in the fields, a feature often seen on the issue. Strong magnification is needed to discern any contact marks or tiny planchet flakes, none of which are worthy of singular mention. *From The Frank M. Stirling Collection. (#9135)*

Splendid 1907 Saint-Gaudens Double Eagle High Relief, Flat Rim MS65

1997 1907 High Relief, Flat Rim MS65 PCGS. Long celebrated as the most beautiful regular-issue coins in American numismatics, the famous MCMVII High Relief Saint-Gaudens double eagles are known in both Wire Rim and Flat Rim varieties. Q. David Bowers believes the two varieties resulted from differences in milling and planchet diameter, and do not really constitute different die varieties. Whatever their origin, the dramatic physical differences were noted by numismatists at the time of issue, and the two types have historically been listed separately. It is believed that approximately one-third of the original mintage of 12,367 pieces was of the Flat Rim variety, but the Wire Rims have a higher survival rate. In the *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth estimate the Flat Rim double eagles are nearly five times as scarce as the Wire Rim variety today.

In the sale of the Keel, Griswold, and Johnson Collections (Henry Chapman, 2/1908), both varieties of the High Relief twenty were offered, illustrating how soon the difference was recognized. Lot 619 of the sale reads in part, "1907 1st issue, with the high or 'Wire Edge.' Uncirculated. Mint lustre. In great demand, selling now at \$35 to \$45." Lot 620 reads, "1907 \$20 second issue, the same as last with the edge smooth made by using a flattening collar. Uncirculated. Mint lustre. In great demand, selling now at \$35 to \$40." Notice Chapman believed a different collar was used to efface the wire rim feature. It is also interesting to observe that the Wire Rim variety was selling for a slightly higher price than the Flat Rim in 1908.

The present coin is a magnificent specimen, fully struck, with bright, satiny luster. The surfaces are essentially pristine. Population: 92 in 65, 45 finer (4/09).(#9136)

SAINT-GAUDENS DOUBLE EAGLES

- 1998 1907 Arabic Numerals MS61 PCGS.** Highly lustrous with canary-gold color and a smattering of small abrasions. A good strike, although the raised knee, Liberty's chest, and the eagle's breast lack full definition. (#9141)

Bold 1907 Saint-Gaudens Twenty, MS65

- 1999 1907 Arabic Numerals MS65 PCGS.** This Gem Saint-Gaudens double eagle is housed in an older green label PCGS holder. It is fully lustrous with frosty surfaces and rich yellow-gold mint brilliance. The strike is fully executed and the surfaces are virtually free of abrasions. An outstanding example. (#9141)

- 2000 1908 No Motto MS63 PCGS.** Coruscating luster exudes from the yellow-gold surfaces of this Select specimen. Sharply struck, especially on the panes of the Capitol building and on Liberty's branch hand and toes. A few reverse marks from near-Gem. Housed in a green label holder. (#9142)

- 2001 1908 No Motto MS63 PCGS.** Long Rays obverse. A pleasing piece that has a minimally abraded obverse and only a single relevant mark on the reverse, concealed on the eagle's back wing. Encased in a green label holder. (#9142)

- 2002 1908 No Motto MS63 PCGS.** Long Rays obverse. This lustrous yellow-gold type coin is only moderately abraded and has a good strike. Certified in a green label holder. (#9142)

- 2003 1908 No Motto MS63 PCGS.** Well struck overall with only slight softness visible at the upper part of Liberty's gown. A lustrous Select example of this popular type issue with strong eye appeal for the grade. (#9142)

- 2004 1908 No Motto MS63 PCGS.** Long Rays obverse. This precisely struck twenty dollar piece has sweeping luster and minimally abraded fields. Liberty's waist has minor contact. Encapsulated in a green label holder. (#9142)

- 2005 1908 No Motto MS65 PCGS.** Long Rays obverse. A lovely apricot-gold Gem with vibrant cartwheel sheen and a minimum number of marks. Minor contact on the sun is all that prevents an even finer grade. (#9142)

Gem 1908-D No Motto Saint-Gaudens Twenty

- 2006 1908-D No Motto MS65 PCGS.** Pleasing shades of pale orange and coral toning mingle with hints of steel-blue on the lustrous surfaces of this Denver Mint Gem, from just the second year of the vaunted Saint-Gaudens double eagle series. A handful of small abrasions on the obverse prevent the piece from receiving an even higher grade assessment, but the reverse is blemish-free. (#9143)

Popular Gem Type Coin 1908 With Motto Twenty

- 2007 1908 Motto MS65 PCGS.** President Theodore Roosevelt was a man who usually got what he wanted. Witness the production of the MCMVII Ultra High Relief twenties, a good run of several thousand "circulation strike" High Reliefs, 500 prototype examples of the 1907 Wire Rim, Periods tens, and finally hundreds of thousands of lower-relief production versions of both of Saint-Gaudens' new designs as modified by the obstreperous Charles Barber. However, Roosevelt lost the battle to keep the motto IN GOD WE TRUST off the new coinage. Roosevelt considered references to God on coinage sacrilegious, but Congress enacted such a requirement anyway, over his strenuous and well-reasoned objections. This is a fully struck green-gold Gem example of this popular type coin, with full articulation of all design details and the minimal contact marks expected for the grade. Population: 39 in 65, 10 finer (4/09). (#9147)

**Exemplary MS66 ★ Motto
1908 Double Eagle**

2008 1908 Motto MS66 ★ NGC. Although the 1908 No Motto is common, even in exemplary Mint State grades, it is a different matter for its Motto counterpart. The Motto mintage of 156,258 pieces is only a sliver of the 4.27 million production of the 1908 No Motto, and there are no “Wells Fargo” hoards stocked with Superb Gems. Given the large diameter and soft surfaces of the double eagle, it is unsurprising that most Uncirculated examples are at least moderately bagmarked and grade between MS61 and MS64. However, the present Premium Gem provides an exception, since the shimmering butter-gold fields and devices are nearly bereft of contact. Census: 3 in 66 ★, none finer at either major service (4/09).(#9147)

Elusive 1908-S Twenty, AU50

2009 1908-S AU50 NGC. This issue boasts a tantalizingly low original mintage of 22,000 coins. The present example is lightly rubbed over the high points, yet possessed of generally bold definition for a circulated second-year Saint. Reddish-orange overtones decorate otherwise olive-gold features. Some blushes of original luster appear in protected areas, as well as a smattering of light-to-moderate abrasions from a short stint in the avenues of commerce. (#9149)

Low Mintage AU58 1908-S Double Eagle

2010 1908-S AU58 NGC. Among the mintages of Arabic Numerals Saint-Gaudens double eagles, one issue stands out as especially low: the 1908-S. Only 22,000 pieces were struck, a remarkably low number given that all other San Francisco double eagle mintages for that decade approached or exceeded 1,000,000 pieces. The unusually small 1908-S production may have been at least partly due to the addition of IN GOD WE TRUST that year. Perhaps dies from the new reverse hub arrived late. Whatever the reason for its scarcity, a momentarily circulated example of the 1908-S is desirable. The present coin shows only minor marks and retains most of its initial mint bloom. (#9149)

Exceptional 1908-S Double Eagle, MS66

2011 1908-S MS66 NGC. The 22,000-piece mintage of the 1908-S is one of the lowest in the Saint-Gaudens double eagle series, trailing only the Ultra High Relief and High Relief. As with many San Francisco dates, a large number of coins entered the channels of commerce. Of the 850 or so pieces certified by NGC and PCGS, the vast majority are in circulated grades.

While the 1908-S is challenging in terms of the absolute numbers available, a fair number are seen in Mint State, especially the lower levels thereof. Approximately 165 pieces have been certified in the MS60 to MS62 grade range, and even Select and near-Gem specimens total about 75 coins. Gem-quality examples (MS65 to MS67), however, account for slightly more than 40 coins among the certified population. Of course, a number of these figures represent resubmitted coins.

High-end Mint State examples of this issue are popular among gold collectors because of their strong visual appeal, as the 1908-S is known to generally have thick mint frost and rich coloration. The current Premium Gem offering fits this profile perfectly. Its frosted surfaces yield pleasing luster and honey-gold patina tinted with subtle mint-green and apricot. In addition, a well executed strike leaves virtually complete delineation on the design elements. Crispness shows on the panes of the Capitol building, for example, as well as on Liberty's facial features, fingers, toes, and gown lines, and on the eagle's plumage. A couple of faint marks on Liberty's breast and one in the upper part of the eagle's left wing are mentioned solely for identification purposes, as they do not detract in the least from the impeccably preserved surfaces. It may be some time before one again encounters a 1908-S twenty with the technical quality and aesthetic appeal of this specimen. Census: 6 in 66, 0 finer (4/09). (#9149)

2012 1909/8 AU58 NGC. An original example of this popular Saint-Gaudens double eagle overdate. It shows minor blemishes on both sides but exhibits strong eye appeal for the grade.(#9151)

Highly Attractive 1909/8 Double Eagle, MS62

2013 1909/8 MS62 NGC. CAC. FS-301. A well executed strike leaves its imprint on the yellow-gold surfaces of this popular overdate. The panes of the Capitol building are sharp, as are the fingers on Liberty's branch hand and on the eagle's plumage. Lustrous surfaces reveal a scattering of minute marks, yet the overall eye appeal is high, a fact aptly recognized by CAC.(#9151)

Appealing MS64 1909/8 Twenty Dollar

2014 1909/8 MS64 PCGS. FS-301. In its own way, the 1909/8 double eagle is a throwback to the overdates found in America's early gold coinage; since there were very few die pairs used to strike the double eagles of 1909, the one overdated obverse accounts for a large number of 1909-dated Philadelphia survivors, as many as half according to some estimates. This is a highly attractive near-Gem example with strong and swirling luster that enlivens deep yellow-gold fields. Below the eagle's neck is a faint copper spot that adds interest to the area. Minimally marked for the grade with great eye appeal. PCGS has certified 17 finer pieces (4/09).(#9151)

Near-Gem 1909/8 Double Eagle

2015 1909/8 MS64 PCGS. FS-301. The most dramatic overdate of the double eagle denomination, caused by hubbing an obverse die with hubs of two different dates. A lustrous yellow-gold Choice example that has a crisp strike and scattered trivial marks. Encased in a green label holder.(#9151)

2016 1909-S MS63 PCGS. Olive-gold luster bathes this Select Saint-Gaudens twenty. A bagmark is concealed within the obverse rays, but the coin is generally smooth. Certified in a green label holder.(#9153)

2017 1909-S MS64 NGC. A well-defined S-mint Saint-Gaudens twenty with bright and shining luster. The fields are primarily pale yellow-gold with occasional lemon shadings as well.(#9153)

Surprising Gem 1909-S Twenty

2018 1909-S MS65 PCGS. The 1909-S is available for a price in grades through MS65, but it is a condition rarity any finer, with only six such pieces known to PCGS (4/09). This Gem, housed in a green label holder, sports immensely lustrous yellow-gold surfaces with dots of alloy on the well-defined devices, the most noticeable one appearing on the arm holding the torch.(#9153)

2019 1910 MS62 NGC. Unbroken cartwheel sheen traverses this boldly struck and moderately abraded Saint-Gaudens gold coin. Generally green-gold, although hints of orange are also seen.(#9154)

2020 1910 MS62 NGC. Softly lustrous with pleasing sun-yellow color. Light, scattered abrasions frame a handful of more significant marks. Appealing despite these faults.(#9154)

2021 1910 MS63 NGC. Vibrant luster and pleasing surfaces proclaim the quality of this yellow-gold Select double eagle. True gold coin of the realm has been increasingly hoarded in recent years, which is understandable when one realizes how much purchasing power the dollar has lost over the years.(#9154)

Fantastic Gem 1910 Twenty

2022 1910 MS65 PCGS. Fewer than half a million examples were struck for this Philadelphia issue, and Gem survivors are scarce, with anything finer being a condition rarity. This orange-gold beauty is minimally marked with soft but attractive luster that enlivens warm orange-gold surfaces. PCGS has graded only four finer pieces (4/09).(#9154)

2023 1910-D MS63 NGC. A brightly lustrous example, generally light yellow-gold with occasional hints of orange close to the rims. Attractive and without overt abrasions.(#9155)

2024 1910-D MS65 PCGS. Orange and green-gold endow this highly lustrous and well preserved Gem. Impressively unabraded, and the eye appeal is superior. Difficult and costly to acquire any finer.(#9155)

2025 1910-D MS65 NGC. Dazzling luster exudes from the brassy-gold surfaces of this lovely Gem. The strike is well executed, evidenced by strong detail on Liberty's facial features and fingers and on the eagle's plumage. A few grade-consistent marks do not detract from the overall appeal.(#9155)

2026 1910-S MS64 PCGS. Gold-orange and sun-yellow elements dominate this well struck near-Gem. The minimally abraded obverse is subtly lustrous, while the reverse is more flashy. (#9156)

2027 1911 MS62 NGC. The medium yellow-orange color of the obverse lightens slightly on the reverse. Strong luster and strike with only wispy abrasions precluding a finer designation. (#9157)

Desirable MS64 1911 Twenty

2028 1911 MS64 NGC. Dusky sun-yellow surfaces have strong, satiny luster. Overall detail is strong, including rounding on Liberty's often-flat knee. No singularly mentionable marks appear on either side, though scattered, wispy flaws combine to account for the grade. NGC has certified 60 finer pieces (4/09). (#9157)

2029 1911-D MS62 PCGS. A charming representative whose lustrous lime-green and pumpkin-orange surfaces are only minimally abraded for the designated grade. (#9158)

2030 1911-D MS63 NGC. Soft and pleasing luster defines the eye appeal of this D-mint double eagle. The strike is strong and reinforces this minimally marked piece's essential eye appeal. (#9158)

Lustrous 1911-D Twenty, MS65

2031 1911-D MS65 NGC. Quite common among earlier issues of the Saint-Gaudens series, from a mintage of nearly 1 million coins. This highly lustrous Gem has pebbled surfaces that are typical of Mint State examples from this time period. The strike is strong and the surfaces are fully. (#9158)

Exceptional Gem 1911-D/D Double Eagle

2032 1911-D/D MS65 PCGS. FS-501, formerly FS-1911.5. The mintmark is clearly repunched east, as seen on numerous Mint State examples of the 1911-D. What is unusual about the present coin is its minimally abraded surfaces, and an exceptional strike that displays full detail on the Capitol building, torch, fingers, and face. Population: 32 in 65, 6 finer (4/09). (#145010)

Pleasing 1911-D/D Twenty, MS65

2033 1911-D/D MS65 PCGS. FS-501, formerly FS-1911.5. Each side of this lustrous Gem offers a blend of lemon-yellow and straw-gold. Well-defined with the repunched mintmark plain under magnification. Many high grade 1911-D double eagles are the repunched mintmark variety, but it is nonetheless highly popular. For the variety, Population: 32 in 65, 6 finer (4/09). (#145010)

Gorgeous Gem 1911-D/D Twenty, FS-501

2034 1911-D/D MS65 PCGS. FS-501, formerly FS-1911.5. The mintmark is boldly repunched east. Well defined with elegant, satiny luster that enlivens peach-gold and mint-green surfaces. Impressively preserved and visually alluring. A gorgeous Gem representative of this popular variety. Population: 32 in 65, 6 finer (4/09). (#145010)

**1911-D MS65 Double Eagle
With Repunched Mintmark**

2035 1911-D/D MS65 PCGS. FS-501, formerly FS-1911.5. The mintmark is obviously repunched, with the second impression directly left of the initial punch. Booming luster sweeps the beautifully smooth surfaces. Intricately struck on the face, fingers, and Capitol panes. A small strike-through (as issued) appears beneath the S in TRUST. (#145010)

2036 1911-S MS62 NGC. Warmly lustrous with the light wheat-gold color of the obverse ceding to deeper yellow-orange on the reverse. Minimally abraded for the grade with dynamic eye appeal. (#9159)

2037 1911-S MS63 PCGS. A needle-sharp olive-green and peach-gold piece that has refreshingly unabraded surfaces. A faint grease streak (as made) crosses the eagle's neck.
Ex: Long Beach Signature (Heritage, 2/2003), lot 8610. (#9159)

2038 1912 MS63 PCGS. Lustrous peach-gold surfaces display traces of mint-green. A well struck piece with a few grade-limiting marks. (#9160)

2039 1912 MS63 PCGS. Rich yellow-gold color with glimpses of orange. Aside from scattered marks and a few small scrapes, a pleasing example of this pre-World War I issue. (#9160)

2040 1913 MS61 NGC. The peach-gold color that dominates the centers fades slightly to yellow near the rims. Well struck with pleasing luster and fewer abrasions than the grade might suggest. (#9161)

2041 1913 MS62 NGC. Rich orange-gold color on the obverse with a degree of yellow mixed in on the reverse. Strong and attractive luster for this Philadelphia issue, though the rim areas show light bumps and abrasions. (#9161)

2042 1913-S AU50 ANACS. A ring of luster connects the 48 obverse stars. The reverse has considerable luster, but the eagle has obvious wear. Only 34,000 pieces were struck for this often-hoarded issue.
Ex: Columbus Central States (Heritage, 4/2002), lot 2366. (#9163)

2043 1913-S MS61 PCGS. Vibrant luster bathes this moderately abraded better date double eagle. A mere 34,000 pieces were coined, and the details are sharp save for softness on the Capitol building. (#9163)

2044 1914 MS62 PCGS. Well-defined for the issue with immense luster that enlivens pale straw-gold fields. Lightly abraded overall, including a nick at Liberty's lower leg, but a pleasing coin nonetheless. (#9164)

2045 1914 MS62 NGC. Well-defined with dusky yellow-gold luster that is strong but satiny. Though a number of tiny abrasions are noted in the fields, the eye appeal is comparable to that of many Select pieces. (#9164)

Dazzling 1914 Near-Gem Double Eagle

2046 1914 MS64 PCGS. Dazzling luster invigorates both sides of this near-Gem twenty dollar, each of which displays peach-gold coloration with subtle green undertones. A sharp strike leaves nice detail on the design features, including the Capitol building and eagle's feathers. A few minor marks deny Gem status. Extremely elusive any finer. (#9164)

2047 1914-S MS65 PCGS. Sharply struck with highly lustrous honey-gold surfaces. Minimally marked for the grade designation. (#9166)

2048 1915 MS62 PCGS. This bright low mintage Saint-Gaudens twenty has coruscating luster and only one reportable abrasion, found on the obverse rim at 5 o'clock. (#9167)

2049 1915 MS62 PCGS. This shimmering green-gold double eagle is smooth overall, and would likely command a higher grade were it not for a tick on the base of the olive branch. A lower mintage date. (#9167)

Elusive, Desirable Gem 1915 Twenty Nearly Unimprovable

2050 1915 MS65 NGC. Although the 1915 Philadelphia double eagle is a middling series scarcity in the lower Mint State grades, with an original production recorded at 152,000 business strikes, it becomes a notable rarity at the Gem level. The swirling mint frost on this lovely coin is much more pronounced than expected for a P-mint Saint-Gaudens double eagle. The medium orange-gold coloration and a good strike, with a balanced appearance on both sides and minimal contact marks, make this an appealing and desirable example. There are a few dozen total certified in MS65 at NGC and PCGS combined, from which must be subtracted a generous factor for duplications and crossovers. The bottom line here is a coin that is essentially unimprovable. Census: 39 in 65, 1 finer (4/09).(#9167)

2051 1915-S MS65 NGC. This marigold-yellow Gem provides potent luster and is well struck, save for selected softness on the panes of the Capitol. The reverse is beautifully preserved, and the obverse has only moderate marks.(#9168)

Charming MS66 1915-S Twenty

2052 1915-S MS66 PCGS. A wonderful survivor from the one year that the double eagles produced at San Francisco were not the highest-denomination pieces struck there (the fifty dollar Panama-Pacific commemoratives claimed that title in 1915). It is richly detailed with impressive yellow-orange color and strong, inviting luster. In sum, a gorgeous Premium Gem that is tied for finest certified by PCGS (4/09).(#9168)

2053 1916-S MS65 PCGS. A well executed strike leaves sharp detail on the design motifs of this pleasing yellow-gold Gem. A few grade-consistent marks do not detract.(#9169)

Appealing Near-Gem 1920 Double Eagle

2054 1920 MS64 PCGS. While the 1920 double eagle is available in grades through MS64, Gems are all but nonexistent, with only eight coins above the Choice level in the combined certified population (4/09). This yellow-orange example is pleasingly lustrous, though a significant abrasion is noted in the right obverse field.(#9170)

Semikey 1920-S Twenty, Mint State Details

2055 1920-S—Cleaned—ANACS. Unc Details, Net AU55. Even though the 1920-S has a substantial mintage of more than a half million pieces, it is one of the most highly respected issues in the entire Saint-Gaudens series. Elusive in all grades, it is the seventh rarest issue in the series and is nearly as challenging to locate as the 1921. This piece is especially well struck. The surfaces are bright from cleaning and there are several small, milky spots of color in the right obverse field. A couple of prominent marks are found on each side.(#9171)

2056 1922 MS63 NGC. Light straw-gold and deeper orange shadings find a balance over much of this lustrous Select coin. Pleasingly detailed with few abrasions for the grade.(#9173)

Lovely MS65 1922 Double Eagle

2057 1922 MS65 PCGS. This highly lustrous yellow-gold Gem has a solid strike. Well-preserved with just a couple of small copper spots noted on the reverse. While the 1922 double eagle is readily available in grades through Gem, MS66 and better coins are condition rarities; PCGS has certified just seven coins finer (4/09). (#9173)

2058 1922-S—Cleaned—ANACS. Unc Details, Net AU55. The obverse has a few wispy hairlines, but the potent cartwheel luster and unabraded surfaces give this coin eye appeal beyond its assigned net grade. Die clash marks are observed below the eagle and are somewhat unusual for the series. A high mintage but heavily melted better date.

Ex: Long Beach Signature (Heritage, 2/2003), lot 8636. (#9174)

Bright MS63 1922-S Double Eagle

2059 1922-S MS63 PCGS. Despite a mintage of over 2.6 million pieces, the 1922-S is an elusive issue, particularly in Select and better grades. This lustrous and appealing example combines butter-yellow and paler straw-gold shadings. A degree of alloy is noted at the high points of the lightly abraded reverse. (#9174)

2060 1923-D MS64 NGC. Strongly impressed on the central devices with rich yellow-gold color and lovely luster. Minimally marked for the Choice designation with considerable eye appeal. (#9176)

2061 1924 MS65 PCGS. A satiny Gem gold type coin whose green-gold surfaces are original and beautifully preserved. Boldly struck throughout, and a wonderful high grade example of the famous Saint-Gaudens design. (#9177)

Uncirculated 1924-D Twenty Dollar

2062 1924-D MS60 ANACS. The mintage of the 1924-D exceeded 3 million pieces, but most of those coins never left Treasury vaults, and were melted during the Roosevelt administration. Approximately 1,000 pieces escaped Federal holdings, but that quantity is fewer than the number of collectors assembling sets of the popular series. This is a bright and flashy example with good luster and the expected number of moderate obverse bagmarks. (#9178)

2063 1924-S—Rim Damage—NCS. AU Details. Well struck for this famous melt-rarity issue with just a touch of rub on the lustrous yellow-orange surfaces. Several rim bruises and possible crimping account for the details grade. (#9179)

2064 1925 MS63 NGC. This Philadelphia issue was not saved to the same extent as its 1924 or 1927 counterparts, but it remains available through most grades. This Select piece has attractive yellow-gold luster and strong eye appeal for the grade. The strike is above-average. (#9180)

Pleasing 1925-S Twenty, AU50

2065 1925-S AU50 NGC. An attractive example, this 1925-S double eagle has considerable luster for the grade. The surfaces are lightly abraded, and modest high point wear is visible on each side. A rather unusual grade for the issue, as most 1925-S twenties are found in higher grades. This piece is ideal for the Saint-Gaudens lover with a limited budget. (#9182)

2066 1926 MS63 NGC. A pleasingly detailed Select coin with only trifling softness visible on Liberty's torch hand. Its pale yellow-orange surfaces are remarkably smooth for the Select designation with lovely luster. (#9183)

**MS66 ★ 1926 Double Eagle
Tripled Die Obverse, FS-101**

- 2067 1926 MS66 ★ NGC. FS-101.** Although undesignated as such on the NGC insert, this is the Tripled Die Obverse variety, with tripling evident near the date on the rays, stars, and designer's monogram. This orange-gold Premium Gem has dazzling luster and an intricate strike. Census: 5 in 66 ★, 1 finer with a Star designation (4/09).(#9183)

Uncirculated 1926-D Double Eagle

- 2068 1926-D MS61 NGC.** Mintages of double eagles at Denver peaked in 1924 and 1925, when about 3 million pieces were coined for each of the two dates. Production was much lower in 1926, since only 481,000 twenties were struck. Most of the mintage for all three issues remained in Federal vaults, although bags of 1923-D double eagles were paid out. Prior to 1933, anyone who wanted a 1926-D could have obtained one for close to face value from the Treasury. But few numismatists could afford to collect the series, and it was only after the gold recall that interest in the denomination increased. By then, the 1926-D had proved to be among several late-date issues primarily melted by the Treasury.

Over the years, a couple of hundred pieces emerged from foreign bank holdings. Most were like the present piece, lustrous and well struck but somewhat abraded from bag-stored peers. But no marks merit mention, save for a tick on the chin and a few faded scuffs near the branch stem.(#9184)

Radiant MS62 1926-S Twenty

2069 1926-S MS62 NGC. The 1926-S double eagle is arguably an underrated melt rarity, overshadowed as it is by the 1927-D twenty, but the knowledgeable collector knows how challenging the issue can be, possibly from personal experience. On this unworn example, flashy straw-gold fields define much of the eye appeal, though abrasions at Liberty's legs preclude Select status. (#9185)

2070 1927 MS65 PCGS. This Saint-Gaudens twenty dollar type coin is lustrous and well struck with rich apricot toning. A few delicate field grazes hardly affect the eye appeal. (#9186)

MS66 ★ 1927 Saint-Gaudens Twenty

2071 1927 MS66 ★ NGC. A handsome representative that boasts dynamic cartwheel sheen and impressively unperturbed yellow-gold surfaces. The strike is exceptional save for slight blending on the fingers of the torch hand. The absence of any alloy spots undoubtedly helped secure the Star designation from NGC. Census: 45 in 66 ★, 2 finer with a Star designation (4/09). (#9186)

Seldom-Seen 1927-S Twenty, AU50

2072 1927-S AU50 ANACS. The 1927-S was once considered one of the keys in the Saint-Gaudens series. Since that time a number of pieces have appeared in European gold shipments, and today, while not as rare as it once was, it is still one of the 10 scarcest issues in the series. This piece is sharply struck and overall bright, with good remaining luster. Lightly abraded on each side with just a trace of friction over the high points. (#9188)

2073 1928 MS62 PCGS. A highly lustrous sun-gold representative of this popular high mintage issue. Small marks are here and there, yet the eye appeal is superior for the MS62 level. Certified in a first generation holder. (#9189)

TERRITORIAL GOLD

2074 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—Plugged—NCS. AU Details. K-24, R.3. A telltale circle at 12 o'clock (relative to the Bechtler side) is repeated on the reverse at 3 o'clock (due to rotated dies). The fields are smoothed near the plug, and also above and below 27 G. Still a sharp example of this popular Southern private gold coiner. Listed on page 359 of the 2009 *Guide Book*. (#10040)

2075 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—Damaged—NCS. Unc. Details. K-24, R.3. A small dig is present above the H in BECHTLER, and the piece may have been folded in half at one time, since straightened with parallel laminations through the prominent 1 and a wavy surface near 27 G. Listed on page 359 of the 2009 *Guide Book*. (#10040)

AU 1861 Clark, Gruber Two and a Half Kagin-5a Die Marriage

2076 1861 Clark, Gruber & Co. Quarter Eagle AU50 PCGS. K-5a, R.4. Satin luster visits this luminous apricot-gold Territorial piece. The strike is precise, and the devices show only minimal indications of wear. Smooth overall, despite a minor reed mark above the beak. Encased in a green label holder, and listed on page 376 of the 2009 *Guide Book*. Population: 10 in 50, 37 finer (4/09). (#10139)

AU53 1861 Clark, Gruber Five Dollar, K-6

2077 1861 Clark, Gruber & Co. Five Dollar AU53 PCGS. K-6, R.4. Impressive due to its original, smooth butter-gold surfaces. The strike is typically soft on the eagle's neck and Liberty's lovelock, and a slender mint-made lamination crosses the beak. Listed on page 375 of the 2009 *Guide Book*. Population: 7 in 53, 15 finer (4/09). (#10140)

**1861 Clark, Gruber Half Eagle Copper Die Trial
Struck Without a Collar
K-10b, MS65 Brown**

- 2078 1861 Clark, Gruber Five Dollar Copper Die Trial MS65 Brown NGC.** K-10b, High R.7. This curious die trial was struck in copper, but without a collar. As a result the rims are noticeably spread, and on this piece unevenly so. The upper left portion of both the obverse and reverse are tight, to the point that there are no denticles. On the opposing "corner," the bottom right of each side, the rim is exceptionally wide. The surfaces are mostly brown, as stated in the grade, but there is a noticeable amount of original red around each of the peripheral devices. The design motifs are strongly struck throughout, and there are no obvious or mentionable marks on either side. (#10151)

**887 Thous. Reeded Edge
1851 Humbert Fifty 'Slug'
K-6, VF Details**

- 2079 1851 Humbert Fifty Dollar, 887 Thous.—Polished—NCS.** VF Details. K-6, R.4. An early reeded edge variety. The obverse is bright from polishing, while the reverse has a more natural appearance. Each side has numerous small marks, inevitable for a circulated "slug" from the halcyon days of the Gold Rush. The date and fineness are faint, but the country name and denomination are bold, which allows quick attribution. Listed on page 362 of the 2009 *Guide Book*. (#10214)

**Elusive Reeded Edge
1851 Humbert Fifty Dollar
887 Thous., K-7, VF25**

- 2080 1851 Humbert Fifty Dollar, 887 Thous. VF25 PCGS.** K-7, R.4. At the time this hefty coin was struck, the United States Assay Office of Gold was operating under the auspices of Moffat & Co. Augustus Humbert served as the assayer of the U.S. government at the facility, and each of the fifty dollar gold pieces produced by the Assay Office in 1851 carried his name, either on the edge or around the obverse periphery. An elusive representative of the reeded edge 1851 Humbert slug, this pleasingly original coin displays reddish-copper highlights around the obverse devices. The balance of the surfaces are green-gold, and both sides are typically abraded for a circulated frontier-era gold coin of this size. We note several moderate rim dings on each side. Plenty of appreciable definition remains, however, along with traces of luster. Housed in a green label holder. Listed on page 362 of the 2009 *Guide Book*. Ex: FUN Signature (*Heritage*, 1/2006), lot 3680. (#10214)

Scarce 1852/1 Humbert Ten Dollar
K-8, AU Details

- 2081 1852/1 Humbert Ten Dollar—Whizzed—NCS. AU Details. K-8, R.4. The fletchings and shield show slight wear, but the legends and devices display considerable sharpness and luster. Late dies with a teardrop-shaped die break beneath the FO in CALIFORNIA. Slightly bright and granular from subtle whizzing, and the right obverse field is moderately abraded. Listed on page 363 of the 2009 *Guide Book*. (#10190)

Collectible 1852 Assay Office Fifty
900 Thous., K-14, VF30

- 2082 1852 Assay Office Fifty Dollar, 900 Thous. VF30 PCGS. K-14, High R.5. Although dated 1852, the K-14 .900 THOUS. pieces were an emergency issue, actually produced to the extent of 13,800 coins in January 1853. Whether a sudden need impelled the production, or whether the production of new dies was simply viewed as a wasteful expense, is unrecorded today. Most survivors of the issue are well circulated, however. This VF30 piece shows moderate, even wear throughout both sides. There are a couple of rim bumps—not at all unusual for these large, heavy coins—and a couple of shallow vertical scratches appear in the left portion of the machine-turned reverse. There is light porosity on the reverse rim at 9 o'clock, likely a function of incomplete alloy mixing and also not uncommon. None of these minor problems interfere with the appeal, the collectibility, or the historic interest of this fascinating Territorial gold piece. Listed on page 364 of the 2009 *Guide Book*. (#10019)

**Impressive MS62 900 Thous.
1853 Assay Office Twenty, K-18**

- 2083** 1853 Assay Office Twenty Dollar, 900 Thous. MS62 PCGS. K-18, R.2. The 8 underdigit is readily visible on the first 0 in 900, if a loupe is used. A satiny and well struck example of this later Assay Office issue. Clean aside from a thin mark near the E in OFFICE. A small strike-through at 12 o'clock is of mint origin. Listed on page 364 of the 2009 *Guide Book*. Population: 32 in 62, 52 finer (4/09). (#10013)

**Delightful Choice XF K-2
1854 Kellogg & Co. Twenty**

- 2084** 1854 Kellogg & Co. Twenty Dollar XF45 PCGS. Long Arrows. K-2, R.4. A green-gold and orange-red representative from this highly regarded private gold coiner. Luster shimmers across the margins and devices, and although a few minor marks are here and there, none distracts the eye. Listed on page 372 of the 2009 *Guide Book*. (#10222)

Lovely 1854 Kellogg Twenty, K-2, AU55

- 2085** 1854 Kellogg & Co. Twenty Dollar AU55 NGC. K-2, R.4. This lovely Kellogg & Co. twenty has long arrows on the reverse. Both sides have rich orange-gold patina with slight traces of high point wear. Only a few minor abrasions are evident on each side. Listed on page 372 of the 2009 *Guide Book*. (#10222)

Pleasing 1855 Kellogg Twenty, K-3b, XF40

- 2086** 1855 Kellogg & Co. Twenty Dollar XF40 PCGS. K-3b, R.5. This light-yellow example has hints of deep orange toning on each side. The surfaces are pleasing with only typical grade-consistent marks in the fields. Traces of luster are still visible in the protected areas. Listed on page 372 of the 2009 *Guide Book*. Population: 13 in 40, 41 finer (4/09). (#10225)

**Formidable K-3a MS62
1855 Kellogg & Co. Twenty**

2087 1855 Kellogg & Co. Twenty Dollar MS62 NGC. Short Arrows, K-3a, R.6. In 1855, the federal Mint in San Francisco was just beginning operations, and had a shortage of parting acids needed to coin 900 fine gold. The facility soon had a backlog of bullion to be coined, and merchants turned to two local private coiners, Kellogg & Co. and Wass Molitor. Much of the output of those firms was eventually melted and recoinced as federal double eagles.

While the surfaces are mildly abraded, this is an extremely attractive and nicely detailed Kellogg "double eagle." Although not identical, the design is similar to the federal issues of this period, although with different inscriptions and slightly different device treatments. This splendid example has brilliant yellow-gold luster with a trace of green coloration. The dies were well-used, as evidenced by minor rim breaks, especially on the obverse. The final 5 in the date is only partially complete, probably from a lapped or polished die. Listed on page 372 of the 2009 *Guide Book*. Census: 2 in 62, 0 finer (4/09).

Ex: Long Beach Signature (Heritage, 9/2004), lot 7349. (#10225)

Elusive 1849 K-6a Moffat Ten, AU55

2088 1849 Moffat & Co. Ten Dollar, "Ten Dol." AU55 NGC. K-6a, High R.5. This important example is only the fifth piece among all 1849 Moffat tens that have appeared in our auctions in AU55 or finer condition. In July 2005 we offered an AU55 PCGS; in August 2001 we offered an AU58 NGC specimen; in February 2008 we sold an AU58 PCGS piece; and in May 2001 we offered an MS62 PCGS example. The 1849 Moffat ten dollar pieces are elusive, although there are enough in existence to permit collectors an opportunity to acquire one. Including the several varieties, there are approximately 80 survivors in all grades. This wonderful piece has brilliant and frosty green-gold luster, with minor, grade-consistent marks and slight wear on the high points. The centers are a little weak, as these pieces are always found. Listed on page 361 of the 2009 *Guide Book*. (#10246)

1849 Norris, Gregg, & Norris Five Dollar, MS62
Reeded Edge, Period, K-4, R.4

- 2089 1849 Norris, Gregg, & Norris Five Dollar R.E. MS62 PCGS. Period, K-4, R.4. This is a typically well struck example of the Norris, Gregg & Norris five dollar issue of 1849. Still lustrous and nicely preserved, the piece displays rich greenish-gold coloration and just a handful of small marks on each side. This coinage was hailed in the *Alta California* newspaper issue of May 31, 1849, making it the first private coinage to be publicly acknowledged in the Gold Rush territory. According to *California Coiners and Assayers*, by Dan Owens: "The appearance of Norris, Gregg, & Norris \$5 pieces signaled a cascade of gold issues from different bankers, assayers, and other firms which would continue until 1855." Listed on page 360 of the 2009 *Guide Book*. (#10282)

Historic K-9 1855 Wass Molitor Fifty, Fine 15

- 2090 1855 Wass Molitor Fifty Dollar Fine 15 PCGS. K-9, R.5. The so-called Large Head variant. Because of the large size of the coin the head still does not seem large, but when compared to the Small Head twenties of the same year this designation makes more sense. The Large Head twenty and fifty dollar coins of 1855 had the central obverse device of Liberty modeled after the federal double eagles of that time.

Both Wass and Molitor were Hungarian immigrants and both had experience with mining and metallurgy in their native country. The quality of their gold coins was unquestioned and ranked alongside those of Moffat, Kellogg, and Humbert. As a result, they were heavily circulated and they were saved, as the other reputable companies' products were. This is an important distinction when studying this fascinating series. The rarest coins today were usually from companies that had low assay values and subsequent low acceptability in Gold Rush California. This coin is not unusual for a Wass, Molitor. While it is heavily abraded and shows signs of extensive wear, this is how many of these pieces are found because they were widely circulated as trusted stores of value.

The surfaces show heavy marks on each side, most likely from contact with other heavy coins. The fields have a pronounced reddish tinge with lighter, yellow-gold accents over the high points of the devices. Listed on page 371 of the 2009 *Guide Book*. (#10363)

Famous XF 1855 Wass, Molitor Fifty, K-9

- 2091** 1855 Wass Molitor Fifty Dollar XF40 PCGS. K-9, R.5. Although the long-awaited San Francisco Mint was finally in operation during 1855, a shortage of parting acids prevented satisfactory coinage of double eagles. Two private firms, Kellogg & Co. and Wass Molitor, stepped up to the plate until Mint production was sufficient. This impressive example is evenly struck save for star 1. Some luster remains, and the yellow-gold surfaces are typically abraded, with minor laminations near a few of the reverse peripheral letters. Listed on page 371 of the 2009 *Guide Book*. Population: 12 in 40, 21 finer (4/09).(#10363)

S.S.C.A. RELIC GOLD MEDAL

- 2092** 1857/0 SSCA Relic Gold Medal "1857/0 Baldwin & Co. Ten" Deep Cameo Proof PCGS. A gleaming example of this modern replica that looks back to California Gold Rush days, both in design and in content. Comes with stand, certificate of authenticity, outer box, and slipcase.(#10361)

CALIFORNIA FRACTIONAL GOLD

- 2093** Undated Liberty Round 25 Cents, BG-203, R.6, MS63 PCGS. A lustrous yellow-gold Select example of this very rare undated variety, well struck with few marks for the grade. Strong eye appeal. Population: 8 in 63, 2 finer (4/09).(#10388)

1853 Period One Round Quarter BG-208, AU55

- 2094** 1853 Liberty Round 25 Cents, BG-208, R.7, AU55 PCGS. An extremely rare Period One variety noteworthy for its large date entered with an upward slant. Although briefly circulated, this round quarter retains a semiprooflike finish in the fields and lacks any consequential marks. Encapsulated in an old green label holder. Population: 2 in 55, 3 finer (4/09).(#10393)
- 2095** Undated Liberty Round 25 Cents, BG-222, R.2, MS65 PCGS. Crisply struck with gleaming yellow-gold surfaces that offer significant cartwheels. This undated issue is one of the most popular with nonspecialists. Population: 14 in 65, 2 finer (4/09).(#10407)
- 2096** 1855 Liberty Round 25 Cents, BG-226A, R.5, MS64 PCGS. Very similar to BG-227, but the upper pearls are the coronet are distinct. BG-226A was struck first, since there is no sign of a die crack through the bow seen on BG-227. A satiny apricot-gold near-Gem with exquisite technical preservation. The portrait has two small shallow strike-throughs. Population: 2 in 64, 0 finer (4/09).(#10417)
- 2097** 1856 Liberty Octagonal 50 Cents, BG-307, High R.5, MS64 PCGS. Rich orange and olive shades grace this satiny and unabraded near-Gem. Die lapping has removed details of the portrait, as made. Population: 3 in 64, 2 finer (4/09).
Ex: Dallas Signature (Heritage, 12/2005), lot 2089, which realized \$2,185. (#10427)

Well-Preserved 1853 Liberty Round Half Dollar, BG-428, MS65

- 2098** 1853 Liberty Round 50 Cents, BG-428, R.3, MS65 PCGS. Small Liberty head, bust tip points to star, L in CALIFORNIA centered between the wreath ends. An available Period One variety, but rarely encountered in such lofty condition. The prooflike yellow-green surfaces have numerous mint-made striations, but are well preserved. Population: 1 in 65, 0 finer (4/09).(#10464)

**Desirable 1853 Arms of California
Fifty Cent, BG-435, MS63**

- 2099 1853 Arms of California 50 Cents, BG-435, Low R.5, MS63 NGC.** Although this variety is relatively common among fractional gold pieces, the design is extremely popular with collectors, including novices and advanced specialists. The obverse features Eureka looking over the fields of gold, and the reverse has an eagle resembling that on the massive fifty dollar octagonal slugs. Light yellow gold with hints of green and violet toning. (#10471)

**Bright Undated Liberty Octagonal Dollar
BG-501, MS62**

- 2100 Undated Liberty Octagonal 1 Dollar, BG-501, Low R.5, MS62 NGC.** The bright brassy-gold surfaces of this gold dollar yield a slight greenish cast and exhibit uniformly struck design elements. Both sides are well cared for and reveal no significant contact marks. Noteworthy for its reverse design, which imitates the then-contemporary logo of the U.S. Assay Office of Gold. Census: 1 in 62, 1 finer (4/09). (#10478)

**Undated Liberty Octagonal Dollar
BG-501, Low R.5, MS64**

- 2101 Undated Liberty Octagonal 1 Dollar, BG-501, Low R.5, MS64 PCGS.** A crisply struck and well preserved example with intense mint luster and bright greenish-yellow toning. The obverse stars are somewhat flat, but the other design elements are remarkably well defined. This is the only undated octagonal dollar variety, and this example is the single finest-graded specimen at PCGS (a single MS64 coin has also been certified by NGC). Population: 1 in 64, 0 finer (4/09). (#10478)

- 2102 1854 Liberty Octagonal 1 Dollar, BG-510, Low R.5, MS61 NGC.** An unworn example of this elusive octagonal dollar issue. Each side has bright lemon-gold and orange surfaces that show only a few stray abrasions. Census: 3 in 61, 4 finer (4/09). (#10487)

- 2103 1855/4 Liberty Octagonal 1 Dollar, BG-511, High R.4, MS62 NGC.** A moderately prooflike Period One gold dollar with lovely canary-gold borders. The centers are butter-gold. This boldly struck example has a few hairlines, but its eye appeal is considerable. (#10488)

- 2104 1859 Liberty Octagonal 25 Cents, BG-705, High R.6, MS63 PCGS.** A rare backdated Period Two variety that always comes with a softly impressed central reverse. Lustrous and unmarked with excellent eye appeal for this die marriage. Struck from boldly clashed dies. Population: 2 in 63, 1 finer (4/09). (#10532)

- 2105 1869 Liberty Octagonal 25 Cents, BG-712, High R.4, MS66 NGC.** Well struck with immensely lustrous surfaces that are light yellow-gold. Striking eye appeal for this very scarce octagonal issue. Census: 2 in 66, 1 finer (4/09). (#10539)

- 2106 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS66 PCGS.** Well-defined with bright and shining luster. Each side of this gorgeous octagonal Premium Gem offers a touch of satin. Population: 18 in 66, 4 finer (4/09). (#10544)

- 2107 1866 Liberty Octagonal 25 Cents, BG-740, Low R.6, MS63 PCGS.** A flashy and well struck butter-gold representative with excellent eye appeal for its Select assessment. Population: 6 in 63, 2 finer (4/09). (#10567)

**Extremely Rare MS66 Prooflike
BG-744 1868 Octagonal Quarter**

- 2108 1868 Liberty Octagonal 25 Cents, BG-744, R.7, MS66 Prooflike NGC.** This is the finest NGC-certified BG-744 octagonal quarter. In fact, it is the *only* example of the variety that has been graded by NGC (4/09). PCGS has certified four examples, two as MS60, one as MS62, and one as MS65. The present coin is likely the finest known of this extremely rare Breen-Gillio variety. Fully struck and nearly immaculate with mirrored fields and a nicely frosted portrait. (#710571)

- 2109 1870 Liberty Octagonal 25 Cents, BG-753, High R.6, MS62 PCGS.** A rare and interesting variety noted for a *horizontal G* (for Gray) initial below the bust. A well struck but lightly hairlined piece with a thin horizontal strike-through (as made) behind the bust and an unrecorded diagonal die crack through the 7 in the date. Population: 4 in 62, 1 finer (4/09).
Ex: Long Beach Signature (Heritage, 6/2004), lot 10263. (#10580)

Finest 1870 BG-758 Quarter, MS64

- 2110 1870 Liberty Octagonal 25 Cents, BG-758, R.8, MS64 PCGS.** The only example of this very rare variety to ever cross the auction block at Heritage, now in its second appearance. Only five pieces are reflected in the PCGS *Population Report*. Of the five PCGS examples, three are circulated, and the current piece is the finest graded (4/09). This is a splendid, deeply prooflike example that has frosted devices which provide strong cameo contrast. A bit weakly struck. The reverse shows a distinguishing arc that appears to be some sort of striking imperfection which will easily identify this piece in the future. (#10585)

- 2111 1875 Indian Octagonal 25 Cents, BG-783, R.5, MS65 PCGS.** Several of the feathers in the Indian's headdress are doubled, a diagnostic feature of this scarce variety. A prooflike Gem with smooth sun-gold surfaces. "Ghosts" from the headdress feathers (pressed through the thin planchet during the strike) are noted on the reverse. Population: 2 in 65, 0 finer (4/09). (#10610)

- 2112 1874 Indian Octagonal 25 Cents, BG-795, R.3, MS66 Prooflike NGC.** The bust truncation points to the first star on this variety, and star 7 is small and weak. The yellow-gold surfaces show no mentionable impairments save for a small strike-through from star 6 to the forehead of the Indian. The surfaces are prooflike, as usually seen, and the strike is crisp aside from slight blending on the cheek. One of the two finest graded at NGC (4/09). (#710622)

Very Rare 1876 Indian Octagonal Quarter, BG-799E, MS64

- 2113 1876 Indian Octagonal 25 Cents, BG-799E, High R.7, MS64 PCGS.** In September 1981 Jay Roe discovered this variety, which is attributed to jeweler Christopher (Christoph) Ferdinand Mohrig. The second edition of Breen-Gillio (2003) lists five survivors, one of which is unconfirmed. The present piece is honey-gold, and the fields are deeply reflective with lustrous devices and good cameo contrast. A few trivial hairlines are insignificant.
Ex: *Long Beach Signature* (Heritage, 2/2006), lot 4071, which realized \$4,036.50. (#10631)

- 2114 1876 Indian Octagonal 25 Cents, BG-799F, Low R.6, MS64 PCGS.** Profound depth of mirrored reflectivity in the fields, and the lemon-yellow surfaces are immaculate aside from a solitary hair-thin mark above the wreath bow. Population: 13 in 64, 4 finer (4/09).
Ex: *Frank Manthey Collection of Gold Coins* (Heritage, 12/2005), lot 2098. (#10632)

Finest Certified 1881 BG-799N Octagonal Quarter, MS66

- 2115 1881 Indian Octagonal 25 Cents, BG-799N, Low R.7, MS66 PCGS.** Full cameo contrast is evident on this prooflike Premium Gem, the only example of BG-799N graded MS66 and the finest by two full grade points. This piece has exceptional aesthetic appeal and is sure to enhance the finest California fractional gold collection. (#10640)

- 2116 1882 Indian Octagonal 25 Cents, BG-799CC, R.6 MS63 PCGS.** Peach and olive-gold toning blankets this crisply struck and undisturbed representative. Much nicer than its designated grade implies. Certified in an old green label holder. Population: 8 in 63, 4 finer (4/09). (#10655)

- 2117 1865 Liberty Round 25 Cents, BG-802, Low R.5, MS65 PCGS.** Orange and sun-gold toning embraces this essentially pristine Gem. On this crude Breen-Gillio variety, DOLLAR is so heavily lapped that it instead resembles IOLA, the Wisconsin home of *Numismatic News*. Population: 2 in 65, 0 finer (4/09). (#10663)

Fabulous 1868 Liberty California Quarter BG-806, MS67

- 2118 1868 Liberty Round 25 Cents, BG-806, R.3, MS67 PCGS.** Although the variety ranks among the most plentiful California fractional 25 cent gold pieces, it is hardly common in Superb Gem quality. In fact, this is the only such example of BG-806 to receive the MS67 grade from PCGS. The surfaces are highly lustrous with frosty yellow brilliance, bold design details, and a complete absence of blemishes. (#10667)

- 2119 1871 Liberty Round 25 Cents, BG-810, Low R.7, MS63 PCGS.** A well-defined example of this very rare variety. The devices are well-defined and the yellow-gold fields are pleasingly lustrous. Housed in a green label holder. Population: 2 in 63, 10 finer (4/09). (#10671)

Bright MS67 1871 Liberty Round Quarter, BG-810

- 2120 1871 Liberty Round 25 Cents, BG-810, Low R.7, MS67 PCGS.** There is no date or initial below the crude bust, and there are two pairs of berries on each side of the wreath, with the biggest berry outside the wreath, to the left of the D in DOLLAR. A Frontier & Co. product. The surfaces are bright and essentially perfect, as indicated by the grade. The fields are deeply prooflike with contrasting mint frost on the devices, and the coin overall is bright yellow-gold. (#10671)

Gem BG-818 Round 1872 Washington Quarter

- 2121 1872 Washington Round 25 Cents, BG-818, Low R.4, MS65 PCGS.** This Washington Head coinage is significant for its appeal outside the usual circle of small denomination gold followers. This design shows a well executed head of George Washington, surrounded by a circle of 15 stars, some of which show recutting. This yellow-gold piece displays only some trivial areas of light field chatter. Population: 23 in 65, 2 finer (4/09). (#10679)
- 2122 1870 Liberty Round 25 Cents, BG-833, Low R.6, MS63 PCGS.** Die State III with heavy bisecting obverse crack. A luminous lemon-gold example of this challenging round quarter variety. A small rim defect at 3 o'clock on the reverse will be ignored by most viewers. Certified in a green label holder. Population: 3 in 63, 0 finer (4/09). (#10694)
- 2123 1875 Indian Round 25 Cents, BG-848, Low R.7, MS64 PCGS.** Ex: Jay Roe. This sharply impressed and unblemished sun-gold near-Gem provides reflective fields and pleasing eye appeal. Slightly wavy, as made. The plate coin for the variety in the second edition of Breen-Gillio. Population: 3 in 64, 0 finer (4/09).
Ex: Jay Roe Collection (Bowers and Merena, 9/2003), lot 331; Long Beach Signature (Heritage, 5/2007), lot 2974, which realized \$2,070. (#10709)
- 2124 1876 Liberty Round 25 Cents, BG-856, High R.7, MS62 PCGS.** A lustrous yellow-orange example of this extremely rare variety. Though the obverse shows light to moderate marks, the reverse is comparatively clean. Population: 2 in 62, 3 finer (4/09). (#10717)
- 2125 1872/1 Indian Round 25 Cents, BG-868, High R.4, MS65 Deep Prooflike NGC.** A profoundly reflective yellow-gold example of this very scarce issue, the mirrors of the fields contrasting with the texture of the broad portrait. A remarkable Gem. (#710729)

Glittering 1873 BG-874 Indian Round Quarter, MS65

- 2126 1873 Indian Round 25 Cents, BG-874, Low R.6, MS65 PCGS.** A glittering prooflike green-gold Gem, this impressive piece has exceptional cameo contrast. It is tied for the finest that PCGS has certified of the BG-874 die combination, a highly desirable piece for the Set Registry specialist. Population: 3 in 65, 0 finer (4/09). (#10735)
- 2127 1868 Indian Round 25 Cents, BG-890, High R.5, MS65 PCGS.** A prooflike Gem that has a crisp strike and no visible abrasions. The reverse field has a couple of faint retained laminations, as made. Scarcer than the usual Period Two 1868 round quarter variety, BG-806. Population: 8 in 65, 0 finer (4/09). (#10751)
- 2128 1871 Liberty Octagonal 50 Cents, BG-926, High R.6, MS64 PCGS.** The single highest graded PCGS example, with its two closest competitors at that service tied at MS62. A lemon-gold near-Gem with flashy fields and attractive surfaces. (#10784)
- 2129 1876/6876 Indian Octagonal 50 Cents, BG-935, R.5, MS65 PCGS.** This prominently mirrored Gem has an intricate strike and unperturbed fields. A desirable example of this curious overdate. The engraver forgot the cardinal rule of working die engraving, which is to enter all design elements backwards into the die. Population: 2 in 65, 0 finer (4/09). (#10793)
- 2130 1868 Indian Octagonal 50 Cents, BG-961, R.7, MS63 PCGS.** Strongly struck with moderately mirrored yellow-gold surfaces. Overall quality is excellent despite a few wispy abrasions. A great example of its extremely rare variety. Housed in a green label holder. Population: 3 in 63, 2 finer (4/09). (#10819)
- 2131 1852 Indian Octagonal 50 Cents, BG-962, Low R.7, MS65 PCGS.** Encapsulated in a green label holder. This lemon-gold Gem has prooflike fields and is well struck aside from moderate inexactness on the central reverse. PCGS has certified only eight pieces in all grades, with none finer (4/09). (#10820)
- 2132 1871 Liberty Round 50 Cents, BG-1011, R.2, MS65 PCGS.** A lustrous and beautiful green-gold Gem of this popular variety. Better struck than usual, with softness limited to the upper curve of the 2 in the fraction. Population: 25 in 65, 15 finer (4/09). (#10840)
- 2133 1871 Liberty Round 50 Cents, BG-1011, R.2, MS66 Prooflike NGC.** Prominently reflective fields and a mark-free appearance ensure the quality of this beautiful Period Two Premium Gem. Sharply struck aside from the base of the wreath. (#710840)
- 2134 1876 Indian Round 50 Cents, BG-1065, R.5, MS65 Prooflike NGC.** Highly reflective canary-gold fields provide modest contrast with the Indian. Flawless save for moderate incompleteness of strike on the central reverse. Census: 1 in 65 prooflike, 4 finer (1/09). (#710894)

**R.7 1852 Indian Round Half Dollar
BG-1075, MS65, BG Plate Coin**

- 2135 1852 Indian Round 50 Cents, BG-1075, R.7, MS65 PCGS.** Although undesignated as such on the PCGS insert, the present piece appears to be the Jay Roe example, which was sold at auction in September 2003 by Bowers and Merena as lot 540. This is also the plate coin for the variety in the second edition of Breen-Gillio. The luminous devices contrast with the reflective honey-gold fields. The central reverse field displays moderate planchet abrasions that were uneffaced by the strike. One of two Gems graded at PCGS, with none finer at either service (4/09).(#10904)

- 2136 1875 Indian Octagonal 1 Dollar, BG-1126, R.5, AU58 PCGS.** A pleasingly lustrous example with just a touch of rub on the high points. Slightly dusky yellow-orange fields retain strong mirrors. Great eye appeal for the ever-popular one dollar octagonal type. Population: 6 in 58, 20 finer (4/09).(#10937)

- 2137 1876/5 Indian Octagonal 1 Dollar, BG-1129, R.4 MS63 PCGS.** Sharply struck at the centers, with a distinct overdate feature and dies that are rotated a full 90 degrees. The semiprooflike fields are glassy and highly reflective, and the coin is free from visible marks or blemishes. Population: 16 in 63, 11 finer (4/09).
Ex: New York Signature (Heritage, 7/2004), lot 8795, which realized \$2,070. (#10940)

- 2138 1871 Liberty Round 1 Dollar, BG-1204, High R.5, AU58 PCGS.** Broad yellow-orange surfaces exhibit watery reflective. The well-engraved portrait exhibits only a hint of friction. Overall, a pleasing representative of this rare variant. Population: 6 in 58, 16 finer (4/09).(#10949)

**Pleasing 1872 Indian Round Dollar
BG-1208, MS62**

- 2139 1872 Indian Round 1 Dollar, BG-1208, Low R.6, MS62 PCGS.** Yellow-gold surfaces display splashes of red on the reverse. Suitably struck except for the usual softness in the centers. Pleasing field-device contrast shows on both sides. Housed in a green label holder.
Breen and Gillio (2003) indicate: "The only piece in the series to proclaim itself a token, from fear of prosecution following the Hershfield and Mitchell arrests." The authors are alluding to the August 1871 arrest of the two jewelers for allegedly violating the Private Coinages Act of June 8, 1864. (#10953)

End of Session Three

HERITAGE MYWANTLIST™ SERVICE

A Proof 1937
Buffalo Nickel
is the next item
on your wantlist.

You have been watching prices rise for years. You have registered your desire on Heritage's exclusive MyWantlist™ service, and have been receiving automatic notification for examples in auction and inventory for twelve months. You don't want to overpay for the quality you desire, but then again, you are willing to pay what it takes for the right coin. One that meets your exacting standards. Your next step?

Visit Heritage's Permanent Auction Archives at HA.com. With your free membership, you have access to records on more than 26,000 Buffalo Nickels, including some 450 proofs dated 1937, most of them in Gem grades. Coins ranging in value up to the \$20,700 paid for a PCGS PR68 in December 2008 at Houston. Complete catalog descriptions, enlargeable full-color images, and prices realized data for every lot. All free.

We also make this you this promise. If you visit HA.com for the first time, join for free, and click on the enlarged image of Lot 1018 from Auction #1118, you will wonder about two things: Why, oh why, didn't you visit this treasure trove years before, and, can the price really be free?

Come join the world's largest numismatic community today. It's free, one more fact that our 425,000+ registered bidder-members can affirm.

- 7013** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge AU53 NGC. NGC Census: (0/0). PCGS Population (8/154). (#746)

HALF CENTS

- 7014** 1800—Improperly Cleaned—NCS. XF Details. C-1. With Original Flip. NGC Census: (0/0). PCGS Population (15/89). Mintage: 202,908. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$510. (#1051)
From The Collection of a Dallas Gentleman.
- 7015** 1804 Plain 4, No Stems—Reverse Struck Thru—AU58 NGC. NGC Census: (47/50). PCGS Population (52/109). Mintage: 1,055,312. Numismedia Wsl. Price for NGC/PCGS coin in AU58: \$655. (#1063)
- 7016** 1804 Plain 4, No Stems AU58 PCGS. CAC. PCGS Population (52/109). NGC Census: (47/50). Mintage: 1,055,312. Numismedia Wsl. Price for NGC/PCGS coin in AU58: \$655. (#1063)
- 7017** 1806 Small 6, No Stems XF40 ANACS. NGC Census: (12/344). PCGS Population (51/229). Mintage: 356,000. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$300. (#1093)
- 7018** 1806 Small 6, No Stems XF45 NGC. With Original Flip. NGC Census: (11/333). PCGS Population (28/201). Mintage: 356,000. Numismedia Wsl. Price for NGC/PCGS coin in XF45: \$379. (#1093)
From The Collection of a Dallas Gentleman.
- 7019** 1806 Large 6, Stems XF40 NGC. C-4. NGC Census: (0/0). PCGS Population (0/73). Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$300. (#1099)
- 7020** 1807—Improperly Cleaned, Scratched—NCS. VF Details. C-1. With Original Flip. NGC Census: (8/139). PCGS Population (3/146). Mintage: 476,000. Numismedia Wsl. Price for NGC/PCGS coin in VF20: \$165. (#1104)
From The Collection of a Dallas Gentleman.
- 7021** 1807 XF40 PCGS. PCGS Population (13/97). NGC Census: (10/92). Mintage: 476,000. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$475. (#1104)

- 7022** 1809/6 9 Over inverted 9 XF45 PCGS. PCGS Population (22/66). NGC Census: (13/103). Mintage: 1,154,572. Numismedia Wsl. Price for NGC/PCGS coin in XF45: \$288. (#1126)
- 7023** No lot.
- 7024** 1810—Improperly Cleaned—NCS. XF Details. C-1. With Original Flip. NGC Census: (6/37). PCGS Population (3/47). Mintage: 215,000. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$500. (#1132)
From The Collection of a Dallas Gentleman.
- 7025** No lot.
- 7026** 1828 12 Stars—Improperly Cleaned—NCS. VF Details. C-2. With Original Flip. NGC Census: (2/147). PCGS Population (1/145). Mintage: 606,000. Numismedia Wsl. Price for NGC/PCGS coin in VF20: \$84. (#1150)
From The Collection of a Dallas Gentleman.
- 7027** 1829—Improperly Cleaned—NCS. AU Details. C-1. With Original Flip. NGC Census: (4/186). PCGS Population (19/143). Mintage: 487,000. Numismedia Wsl. Price for NGC/PCGS coin in AU50: \$150. (#1153)
From The Collection of a Dallas Gentleman.
- 7028** 1829 AU58 NGC. C-1. NGC Census: (39/125). PCGS Population (23/87). Mintage: 487,000. Numismedia Wsl. Price for NGC/PCGS coin in AU58: \$190. (#1153)
- 7029** 1832 AU58 NGC. With Original Flip. NGC Census: (44/113). PCGS Population (30/94). Mintage: 154,000. Numismedia Wsl. Price for NGC/PCGS coin in AU58: \$175. (#1159)
From The Collection of a Dallas Gentleman.
- 7030** 1833—Improperly Cleaned—NCS. AU Details. C-1. With Original Flip. NGC Census: (6/330). PCGS Population (29/312). Mintage: 120,000. Numismedia Wsl. Price for NGC/PCGS coin in AU50: \$130. (#1162)
From The Collection of a Dallas Gentleman.
- 7031** 1834 MS62 Brown NGC. C-1. NGC Census: (49/158). PCGS Population (29/125). Mintage: 141,000. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$290. (#1165)

7032 1834 MS63 Brown NGC. C-1. With Original Flip. NGC Census: (54/104). PCGS Population (67/58). Mintage: 141,000. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$350. (#1165)
From The Collection of a Dallas Gentleman.

7033 No lot.

7034 1849 Large Date Brown—Corroded—ICG. MS60 Details. NGC Census: (4/131). PCGS Population (7/85). Mintage: 39,864. Numismedia Wsl. Price for NGC/PCGS coin in MS60: \$340. (#1218)

7035 1849 Large Date MS62 Brown NGC. C-1. With Original Flip. NGC Census: (36/76). PCGS Population (26/54). Mintage: 39,864. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$460. (#1218)
From The Collection of a Dallas Gentleman.

7036 1851 MS62 Brown NGC. C-1. NGC Census: (99/166). PCGS Population (53/89). Mintage: 147,672. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$250. (#1224)

7037 1851 MS62 Brown ICG. NGC Census: (99/166). PCGS Population (53/90). Mintage: 147,672. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$250. (#1224)

7038 1851 MS62 Red and Brown NGC. C-1. With Original Flip. NGC Census: (14/43). PCGS Population (22/60). Mintage: 147,672. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$325. (#1225)
From The Collection of a Dallas Gentleman.

7039 1853 MS63 Brown NGC. C-1. NGC Census: (139/305). PCGS Population (120/153). Mintage: 129,694. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$300. (#1227)

7040 1854 MS62 Brown NGC. C-1. With Original Flip. NGC Census: (0/0). PCGS Population (47/172). Mintage: 55,358. Numismedia Wsl. Price for NGC/PCGS coin in MS62: \$225. (#1230)
From The Collection of a Dallas Gentleman.

7041 1854 MS63 Brown NGC. C-1. NGC Census: (0/0). PCGS Population (98/74). Mintage: 55,358. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$280. (#1230)

7042 1856 MS63 Brown ICG. NGC Census: (0/0). PCGS Population (50/17). Mintage: 40,430. Numismedia Wsl. Price for NGC/PCGS coin in MS63: \$320. (#1236)

7043 1856 MS64 Brown NGC. C-1. With Original Flip. NGC Census: (0/0). PCGS Population (15/2). Mintage: 40,430. Numismedia Wsl. Price for NGC/PCGS coin in MS64: \$440. (#1236)
From The Collection of a Dallas Gentleman.

7044 No lot.

LARGE CENTS

7045 1794 Head of 1795 VG8 ICG. NGC Census: (2/123). PCGS Population (15/398). Mintage: 918,521. Numismedia Wsl. Price for NGC/PCGS coin in VG8 : \$450. (#1365)

7046 1794 Head of 1795—Cleaned—ICG. VF30 Details. S-29. NGC Census: (12/87). PCGS Population (43/196). Mintage: 918,521. Numismedia Wsl. Price for NGC/PCGS coin in VF30: \$2,285. (#1365)

7047 1795 Plain Edge—Cleaned—ICG. Fine 15 Details. S-76B. NGC Census: (5/19). PCGS Population (16/199). Mintage: 501,500. Numismedia Wsl. Price for NGC/PCGS coin in Fine 15: \$903. (#1380)

7048 1796 Liberty Cap—Cleaned—ICG. Fine 15 Details. S-83. NGC Census: (5/49). PCGS Population (9/70). Mintage: 109,825. Numismedia Wsl. Price for NGC/PCGS coin in Fine 15: \$1,094. (#1392)

7049 1797 Reverse of 1796, Grippped Edge Good 6 PCGS. PCGS Population (2/26). NGC Census: (0/4). Mintage: 897,510. Numismedia Wsl. Price for NGC/PCGS coin in Good 6 : \$227. (#1416)

7050 1798 First Hair Style—Cleaned, Corroded—ICG. XF40 Details. S-164. NGC Census: (4/11). PCGS Population (18/34). Mintage: 1,841,745. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$1,750. (#1431)

7051 1798 First Hair Style—Corroded—NCS. XF Details. With Original Flip. NGC Census: (4/11). PCGS Population (18/34). Mintage: 1,841,745. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$1,750. (#1431)
From The Collection of a Dallas Gentleman.

7052 1802—Environmental Damage—NCS. XF Details. NGC Census: (10/55). PCGS Population (42/82). Mintage: 3,435,100. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$1,100. (#1470)

7053 1803 Small Date, Small Fraction—Cleaned—ICG. XF40 Details. S.258. NGC Census: (0/4). PCGS Population (0/9). Mintage: 3,131,691. (#1483)

7054 1806—Environmental Damage—NCS. XF Details. With Original Flip. NGC Census: (3/28). PCGS Population (6/23). Mintage: 348,000. Numismedia Wsl. Price for NGC/PCGS coin in XF40: \$1,350. (#1513)
From The Collection of a Dallas Gentleman.

7055 1807/6 Large 7—Corroded, Improperly Cleaned—NCS. Fine Details. NGC Census: (3/33). PCGS Population (3/57). Mintage: 829,221. Numismedia Wsl. Price for NGC/PCGS coin in Fine 12: \$200. (#1528)

Heritage Auction Galleries Staff

Steve Ivy - Co-Chairman and CEO

Steve Ivy began collecting and studying rare coins in his youth, and as a teenager in 1963 began advertising coins for sale in national publications. Seven years later, at the age of twenty, he opened Steve Ivy Rare Coins in downtown Dallas, and in 1976, Steve Ivy Numismatic Auctions was incorporated. Steve managed the business as well as serving as chief numismatist, buying and selling hundreds of millions of dollars of coins during the 1970s and early 1980s. In early 1983, James Halperin became a full partner, and the name of the corporation was changed to Heritage Rare Coin Galleries. Steve's primary responsibilities now include management of the marketing and selling efforts of the company, the formation of corporate policy for long-term growth, and corporate relations with financial institutions. He remains intimately involved in numismatics, attending all major national shows. Steve engages in daily discourse with industry leaders on all aspects of the rare coin/currency business, and his views on grading, market trends and hobby developments are respected throughout the industry. He serves on the Board of Directors of the Professional Numismatists Guild (and was immediate past president), is the current Chairman of The Industry Council for Tangible Assets, and is a member of most leading numismatic organizations. Steve's keen appreciation of history is reflected in his active participation in other organizations, including past or present board positions on the Texas Historical Foundation and the Dallas Historical Society (where he also served as Exhibits Chairman). Steve is an avid collector of Texas books, manuscripts, and national currency, and he owns one of the largest and finest collections in private hands. He is also a past Board Chair of Dallas Challenge, and is currently the Finance Chair of the Phoenix House of Texas.

James Halperin - Co-Chairman

Jim Halperin and the traders under his supervision have transacted billions of dollars in rare coin business, and have outsold all other numismatic firms every year for over two decades. Born in Boston in 1952, Jim attended Middlesex School in Concord from 1966 to 1970. At the age of 15, he formed a part-time rare coin business after discovering that he had a knack (along with a nearly photographic memory) for coins. Jim scored a perfect 800 on his math SATs and received early acceptance to Harvard College, but after attending three semesters, he took a permanent leave of absence to pursue his full-time numismatic career. In 1975, Jim personally supervised the protocols for the first mainframe computer system in the numismatic business, which would catapult New England Rare Coin Galleries to the top of the industry in less than four years. In 1983, Jim's business merged with that of his friend and former archrival Steve Ivy. Their partnership has become the world's largest and most successful numismatic company, as well as the third-largest auctioneer in America. Jim remains one of the best "eyes" in the coin business today (he won the professional division of the PCGS World Series of Grading the last time he competed). In the mid-1980s, he authored "How to Grade U.S. Coins" (now posted on the web at www.CoinGrading.com), a highly-acclaimed text upon which the NGC and PCGS grading standards would ultimately be based. Jim is also a well-known futurist, an active collector of EC comics and early 20th-century American art (visit www.jhalpe.com), venture capital investor, philanthropist (he endows a multimillion-dollar health education foundation), and part-time novelist. His first fictional novel, "The Truth Machine," was published in 1996 and became an international science fiction bestseller, and was optioned for movie development by Warner Brothers and Lion's Gate. Jim's second novel, "The First Immortal," was published in early 1998 and immediately optioned as a Hallmark Hall of Fame television miniseries.

Greg Rohan - President

At the age of eight, Greg Rohan started collecting coins as well as buying them for resale to his schoolmates. By 1971, at the age of 10, he was already buying and selling coins from a dealer's table at trade shows in his hometown of Seattle. His business grew rapidly, and by 1985 he had offices in both Seattle and Minneapolis. He joined Heritage in 1987 as Executive Vice-President and Manager of the firm's rare coin business. Today, as an owner and as President of Heritage, his responsibilities include overseeing the firm's private client group and working with top collectors in every field in which Heritage is active. Greg has been involved with many of the rarest items and most important collections handled by the firm, including the purchase and/or sale of the Ed Trompeter Collection (the world's largest numismatic purchase according to the Guinness Book of World Records), the legendary 1894 San Francisco Dime, the 1838 New Orleans Half Dollar, and the 1804 Silver Dollar. During his career, Greg has handled more than \$1 billion of rare coins, collectibles and art, and provided expert consultation concerning the authenticity and grade condition of coins for the Professional Coin Grading Service (PCGS). He has provided expert testimony for the United States Attorneys in San Francisco, Dallas, and Philadelphia, and for the Federal Trade Commission (FTC). He has worked with collectors, consignors, and their advisors regarding significant collections of books, manuscripts, comics, currency, jewelry, vintage movie posters, sports and entertainment memorabilia, decorative arts, and fine art. Additionally, Greg is a Sage Society member of the American Numismatic Society, and a member/life member of the PNG, ANA, and most other leading numismatic organizations. Greg is also Chapter Chairman for North Texas of the Young Presidents' Organization (YPO), and is an active supporter of the arts. Greg co-authored "The Collectors Estate Handbook," winner of the NLG's Robert Friedberg Award for numismatic book of the year. Mr. Rohan currently serves on the seven-person Advisory Board to the Federal Reserve Bank of Dallas, in his second appointed term.

Paul Minshull - Chief Operating Officer

As Chief Operating Officer, Paul Minshull's managerial responsibilities include integrating sales, personnel, inventory, security and MIS for Heritage. His major accomplishments include overseeing the hardware migration from mainframe to PC, the software migration of all inventory and sales systems, and implementation of a major Internet presence. Heritage's successful employee-suggestion program has generated 200 or more ideas each month since 1995, and has helped increase employee productivity, expand business, and improve employee retention. Paul oversees the company's highly-regarded IT department, and has been the driving force behind Heritage's Web development, now a significant portion of Heritage's future plans. As the only numismatic auction house that combines traditional floor bidding with active Internet bidding, the totally interactive system has catapulted Heritage to the top rare coin Web site (according to Forbes Magazine's "Best of the Web"). Paul came to Heritage in 1984. Since 1987, he has been a general partner in Heritage Capital Properties, Sales Manager, Vice President of Operations, and Chief Operating Officer for all Heritage companies and affiliates since 1996.

**Todd Imhof - Vice President**

Todd Imhof did not start collecting coins in his teens, unlike most professional numismatists. Shortly after graduating college, Todd declined an offer from a prestigious Wall Street bank to join a former high school classmate in his small rare coin firm in the Seattle area. In the mid-1980s, the rare coin industry was rapidly changing, with the advent of third-party grading and growing computer technologies; as a newcomer, Todd more easily embraced these new dynamics. In 1991, he co-founded Pinnacle Rarities, a firm specialized in servicing the savviest and most prominent collectors in numismatics. At 25, he was accepted into the PNG, and currently serves on its Consumer Protection Committee and its Legislation/Taxation Issues Committee. In 1992, he was invited to join the Board of Directors for the Industry Council for Tangible Assets, later serving as its Chairman (2002-2005).

**Leo Frese - Vice President**

Leo has been involved in numismatics for nearly 40 years, a professional numismatist since 1971, and has been with Heritage for more than 20 years. He literally worked his way up the Heritage "ladder," working with Bob Merrill for nearly 15 years, then becoming Director of Consignments. Leo has been actively involved in assisting clients sell nearly \$500,000,000 in numismatic material. Leo was recently accepted as a member of PNG, is a life member of the ANA, and holds membership in FUN, CSNS, and other numismatic organizations.

**Jim Stoutjesdyk - Vice President**

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. He was named ANA's Outstanding Young Numismatist of the Year in 1987. A University of Michigan graduate, he was first employed by Superior Galleries, eventually becoming their Director of Collector Sales. Since joining Heritage in 1993, Jim has served in many capacities. Jim's duties now include buying and selling, pricing all new purchases, assisting with auction estimates and reserves, and overseeing the daily operations of the rare coin department.

**Norma L. Gonzalez - VP of Auction Operations**

Norma Gonzalez joined the U.S. Navy in August of 1993 and received her Bachelor's Degree in Resource Management. She joined Heritage in 1998 and was promoted to Vice President in 2003. She currently manages the operations departments, including Coins, Currency, World & Ancient Coins, Sportscards & Memorabilia, Comics, Movie Posters, Pop Culture and Political Memorabilia.

**Debbie Rexing - VP - Marketing**

Debbie Rexing joined the Heritage team in 2001 and her marketing credentials include degrees in Business Administration and Human Resources from The Ohio State University. Debbie has worked across many categories within the company leading to her comprehensive and integrative approach to the job. She guides all aspects of Heritage's print marketing strategies – advertisements, brochures, direct mail campaigns, coordination of print buying, catalog design and production, The Heritage Magazine, and media and press relations.

**Ron Brackemyre - Vice President**

Ron Brackemyre began his career at Heritage Auction Galleries in 1998 as the Manager of the Shipping Department, and was promoted to Consignment Operations Manager for Numismatics in 2004. He is responsible for the security of all of Heritage's coin and currency consignments, both at the Dallas world headquarters and at shows. His department also coordinates the photography, scanning, and cataloging of coins for upcoming auctions; coordination of auction planning; security and transportation logistics, and lot-view and auction prep.

**Marti Korver - Manager - Credit/Collections**

Marti Korver was recruited out of the banking profession by Jim Ruddy, and she worked with Paul Rynearson, Karl Stephens, and Judy Cahn on ancient and world coins at Bowers & Ruddy Galleries, in Hollywood, CA. She migrated into the coin auction business, and represented bidders as agent at B&R auctions for 10 years. She also worked as a research assistant for Q. David Bowers for several years.

Coin Department Specialists

David Mayfield - Vice President, Numismatics

David Mayfield has been collecting and trading rare coins and currency for over 35 years. A chance encounter with his father's coin collection at the age of nine led to his lifetime interest. David has been buying and selling at coin shows since the age of 10. He became a full time coin and currency dealer in the mid-1980s. David's main collecting interest is in all things Texas, specializing in currency and documents from the Republic of Texas.

Jim Jelinski - Consignment Director

Jim Jelinski has been involved in numismatics for more than five decades as a collector, dealer and educator. He started as Buyer for Paramount International Coin Corporation in 1972, opened Essex Numismatic Properties in 1975 in New Hampshire and has held numerous executive positions at M.B. Simmons & Associates of Narberth, Pennsylvania. He works at Heritage as a Senior Numismatist and Consignment Coordinator.

Bob Marino - Consignment Director & Senior Numismatist

Bob Marino joined Heritage in 1999, managing and developing Internet coin sales, and building Heritage's client base through eBay and other Internet auction Web sites. He has successfully concluded more than 40,000 transactions on eBay. He is now a Consignment Director, assisting consignors in placing their coins and collectibles in the best of the many Heritage venues. .

Sam Foose - Consignment Director and Auctioneer

Sam Foose joined Heritage Numismatic Auctions, Inc., in 1993 as an Auction Coordinator. He rose to Assistant Auction Director in 1998, and began calling auctions. After a stint serving as a Senior Manager and Consignment Director in other collectible fields, he returned to Heritage in 2002 as a Consignment Director to help Heritage's expansion into other collectibles fields. Besides calling auctions as one of Heritage's primary auctioneers, he travels the nation assisting clients who wish to liquidate their collections of coins, paper money, decorative arts, and sports collectibles.

Katherine Kurachek - Consignment Director

Katherine Kurachek graduated from the University of Mississippi in 1993 as an art major. She came to Heritage in January 2003, working alongside Leo Frese for several years, learning the numismatic wholesale trade. Katherine frequently travels to coin shows to represent Heritage and service her dealer accounts along with her wide ranging duties as Consignment Director.

Shaunda Fry - Consignment Director

Shaunda Fry ran her own textile company for 22 years before meeting Leo Frese while co-coordinating a local school auction. She followed his suggestion to add auctioneering to her list of talents. After training, she worked part-time at Heritage's auctions and began to call, and auction excitement inspired a career change. She is now a Consignment Director, and travels to shows on the "Wholesale Dealers Team." Outside of work you might see Shaunda bungee jumping, singing karaoke, baking, reading, or jumping out of airplanes; if you see her inside the plane, chances are that she will be calling an auction or gathering consignments.

Mike Sadler - Consignment Director

Mike Sadler joined the Heritage team in September 2003. He attended the United States Air Force Academy, flew jets for the military and is a longtime pilot with American Airlines. Before coming to Heritage, his unlimited access to air travel enabled Mike to attend coin shows around the nation, and to build a world class collection that was auctioned by Heritage in 2004. He is known for his tremendous knowledge of rare coins, making him a trusted colleague to many of today's most active collectors.

Jason Friedman - Consignment Director

Jason's interest in rare coins, which began at 12 and expanded into his own numismatic business, allowed him to pay for most of his college tuition at the University of North Texas, from which he graduated in 2005. He joined Heritage soon after. He is a member of the American Numismatic Association (ANA) and Florida United Numismatists (FUN).

**Dennis Nowicki - Consignment Director**

Dennis Nowicki began his numismatic career as the Auction Manager for Bowers and Ruddy Galleries/American Auction Association in the mid-1970s. In the 1990s, he joined Heritage as webmaster/designer, garnering the NLG's Outstanding Web Site award. Dennis later designed and supported Web sites for several numismatic firms and worked cataloging lots, as well. He recently returned to Heritage as a Consignment Director and cataloger for the US and World coin departments.

**Bert DeLaGarza - Consignment Director**

Bert DeLaGarza joined Heritage in 2008, capitalizing on a longtime passion for, and expertise in rare coins from a very young age. Prior to Heritage, Bert spent over 25 years in Landscape Construction and Estate Management having achieved the Texas Master Nurseryman certification. A member of the ANA, Bert is known for his strong knowledge of U.S. coins and an eye for rare U.S. stamps.

**Mark Van Winkle - Chief Cataloger**

Mark has worked for Heritage, and Steve Ivy, since 1979. He has been Chief Cataloger since 1990, and has handled some of the premier numismatic rarities sold at public auction. Mark was editor of Legacy magazine, won the 1989 NLG award for Best U.S. Commercial Magazine, and has won numerous awards for his writing, including the 1990 NLG award for Best Article for his *Interview With John Ford*, the 1996 NLG Best Numismatic Article for *Changing Concepts of Liberty*. He has published extensively and written articles for *Coin World*, *Numismatic News* and has contributed to editions of the *Red Book*, *United States Patterns and Related Issues*, and *The Guide Book of Double Eagle Gold Coins*.

**Mark Borckardt - Senior Cataloger**

Mark started attending coin shows and conventions as a dealer in 1970, and has been a full-time professional numismatist since 1980. He received the Early American Coppers Literary Award, and the Numismatic Literary Guild's Book of the Year Award, for the *Encyclopedia of Early United States Cents, 1793-1814*, published in 2000. He serves as a contributor to *A Guide Book of United States Coins*, and has contributed to many references, including the Harry W. Bass, Jr. Sylloge, and the *Encyclopedia of Silver Dollars and Trade Dollars of the United States*. Most recently, he was Senior Numismatist with Bowers and Merena Galleries. Mark is a life member of the A. N. A., and an active member of numerous organizations.

**Brian Koller - Cataloger & Catalog Production Manager**

Brian Koller has been a Heritage cataloger since 2001, before that working as a telecom software engineer for 16 years. He is a graduate of Iowa State University with a Bachelor's degree in Computer Engineering, and is an avid collector of U.S. gold coins. His attention to detail ensures that every catalog, printed and on-line, is as error free as technology and human activity allows. In addition to his coin cataloging duties, he also helps with consignor promises and client service issues.

**John Salyer - Cataloger**

John Salyer has been a numismatist and coin cataloger with Heritage since 2002. He graduated from the University of Texas with a bachelor's degree in English. Prior to his numismatic employment, he worked primarily within the federal government and for several major airlines.

**Dr. Jon Amato - Cataloger**

Jon Amato has been with Heritage since 2004. He earned his Ph. D. from the University of Toronto, and was previously a Program Manager in the NY State Dept. of Economic Development, and an Adjunct Professor at the State University of New York at Albany. He is currently writing a monograph on the draped bust, small eagle half dollars of 1796-1797. He has published numerous articles in prestigious numismatic publications and belongs to many numismatic organizations, including the ANA, ANS, John Reich Collectors Society, and the Liberty Seated Collectors Club, and has made several presentations at ANA Numismatic Theaters.

**John Dale Beety - Cataloger**

John Dale Beety accepted a position with Heritage as a cataloger immediately after graduation from Rose-Hulman Institute of Technology, after serving an internship at Heritage during the summer of 2004. He grew up in Logansport, Indiana, a small town associated with several numismatic luminaries. Highlights as a Young Numismatist include attending Pittman III, four ANA Summer Seminars, and placing third in the 2001 World Series of Numismatics with Eric Li Cheung.

Production and Design by: Carl Watson, Mary Hermann, Mark Masat, Debbie Rexing

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auction Galleries, a d/b/a of Heritage Auctions, Inc., or its affiliates Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. On bids placed through Auctioneer, a Buyer's Premium of fifteen percent (15%) will be added to the successful hammer price bid on lots in Coin and Currency auctions, or nineteen and one-half percent (19.5%) on lots in all other auctions. There is a minimum Buyer's Premium of \$9.00 per lot; after June 1, 2009, the minimum Buyer's Premium shall be \$14.00 per lot. In Gallery Auctions (sealed bid auctions of mostly bulk numismatic material), the Buyer's Premium is 19.5%.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, and Vintage Movie Poster); Heritage Monthly Internet Auctions (Sports, and Stamps). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; Heritage Live and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) well in advance of the Auction or supply valid credit card information. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders; Bidders who are not members of HA.com or affiliates should pre-register at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit may be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof to us so a credit check may be performed prior to Auctioneer's acceptance of a bid.

Bidding Options:

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Internet bids may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-4438425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

Current Bid.....	Bid Increment	Current Bid.....	Bid Increment
<\$10	\$1	\$20,000 - \$29,999	\$2,000
\$10 - \$29	\$2	\$30,000 - \$49,999	\$2,500
\$30 - \$49	\$3	\$50,000 - \$99,999	\$5,000
\$50 - \$99	\$5	\$100,000 - \$199,999	\$10,000
\$100 - \$199	\$10	\$200,000 - \$299,999	\$20,000
\$200 - \$299	\$20	\$300,000 - \$499,999	\$25,000
\$300 - \$499	\$25	\$500,000 - \$999,999	\$50,000
\$500 - \$999	\$50	\$1,000,000 - \$1,999,999	\$100,000
\$1,000 - \$1,999	\$100	\$2,000,000 - \$2,999,999	\$200,000
\$2,000 - \$2,999	\$200	\$3,000,000 - \$4,999,999	\$250,000
\$3,000 - \$4,999	\$250	\$5,000,000 - \$9,999,999	\$500,000
\$5,000 - \$9,999	\$500	>\$10,000,000	\$1,000,000
\$10,000 - \$19,999	\$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE

WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the buyer. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer or its affiliates may consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors, and may extend financing or other credits at varying rates to certain Bidders in the auction.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, all subject to reporting requirements). All are subject to clearing and funds being received in Auctioneer's account before delivery of the purchases. Auctioneer reserves the right to determine if a check constitutes "good funds" when drawn on a U.S. bank for ten days, and thirty days when drawn on an international bank. Credit Card (Visa or Master Card only) and PayPal payments may be accepted up to \$10,000 from non-dealers at the sole discretion of the Auctioneer, subject to the following limitations: a) sales are only to the cardholder, b) purchases are shipped to the cardholder's registered and verified address, c) Auctioneer may pre-approve the cardholder's credit line, d) a credit card transaction may not be used in conjunction with any other financing or extended terms offered by the Auctioneer, and must transact immediately upon invoice presentation, e) rights of return are governed by these Terms and Conditions, which supersede those conditions promulgated by the card issuer, f) floor Bidders must present their card.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys. .

Terms and Conditions of Auction

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. Any risk of loss during shipment will be borne by the buyer following Auctioneer's delivery to the designated common carrier or third-party shipper, regardless of domestic or foreign shipment.
35. Due to the nature of some items sold, it shall be the responsibility for the successful bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
36. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtleshell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Bill Taylor at 800-872-6467 ext. 1280.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the alternative dispute resolution provided herein. Arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Arbitration Clause: All controversies or claims under this Agreement or arising from or pertaining to: this Agreement or related documents, or to the Properties consigned hereunder, or the enforcement or interpretation hereof of this or any related agreements, or damage to Properties, payment, or any other matter, or because of an alleged breach, default or misrepresentation under the provisions hereof or otherwise, that cannot be settled amicably within one (1) month from the date of notification of either party to the other of such dispute or question, which notice shall specify the details of such dispute or question, shall be settled by final and binding arbitration by one arbitrator appointed by the American Arbitration Association ("AAA"). The arbitration shall be conducted in Dallas, Dallas County, Texas in accordance with the then existing Commercial Arbitration Rules of the AAA. The arbitration shall be brought within two (2) years of the alleged breach, default or misrepresentation or the claim is waived. The prevailing party (a party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorney's fees and costs. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof; provided, however, that the law applicable to any controversy shall be the law of the State of Texas, regardless of its or any other jurisdictions choice of law principles and under the provisions of the Federal Arbitration Act.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed Auctioneers are Kathleen Guzman, No.0762165, and Samuel W. Foose, No.0952360, who will conduct the Auction on behalf of Heritage Auctions, Inc. ("Auctioneer"). All lots are subject to: the consignor's right to bid thereon in accord with these Terms and Conditions of Auction, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or reserve. Auctioneer has made advances to various consignors in this sale.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege. You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

WIRING INSTRUCTIONS:

Bank Information: JP Morgan Chase Bank, N.A., 270 Park Avenue, New York, NY 10017

Your five most effective bidding techniques:

1 Interactive Internet™ Proxy Bidding

(leave your maximum Bid at HA.com before the auction starts)

Heritage's exclusive Interactive Internet™ system is fun and easy! Before you start, you must register online at HA.com and obtain your Username and Password.

1. Login to the HA.com website, using your Username and Password.
2. Chose the specialty you're interested in at the top of the homepage (i.e. coins, currency, comics, movie posters, fine art, etc.).
3. Search or browse for the lots that interest you. Every auction has search features and a 'drop-down' menu list.
4. Select a lot by clicking on the link or the photo icon. Read the description, and view the full-color photography. Note that clicking on the image will enlarge the photo with amazing detail.
5. View the current opening bid. Below the lot description, note the historic pricing information to help you establish price levels. Clicking on a link will take you directly to our Permanent Auction Archives for more information and images.
6. If the current price is within your range, Bid! At the top of the lot page is a box containing the Current Bid and an entry box for your "Secret Maximum Bid" – the maximum amount you are willing to pay for the item before the Buyer's Premium is added. Click the button marked "Place Bid" (if you are not logged in, a login box will open first so you can enter your username (or e-mail address) and password).
7. After you are satisfied that all the information is correct, confirm your "Secret Maximum Bid" by clicking on the "Confirm Absentee Bid" button. You will receive immediate notification letting you know if you are now the top bidder, or if another bidder had previously bid higher than your amount. If you bid your maximum amount and someone has already bid higher, you will immediately know so you can concentrate on other lots.
8. Before the auction, if another bidder surpasses your "Secret Maximum Bid", you will be notified automatically by e-mail containing a link to review the lot and possibly bid higher.
9. Interactive Internet™ bidding closes at 10 P.M. Central Time the night before the session is offered in a floor event. Interactive Internet™ bidding closes two hours before live sessions where there is no floor bidding.
10. The Interactive Internet™ system generally opens the lot at the next increment above the second highest bid. As the high bidder, your "Secret Maximum Bid" will compete for you during the floor auction. Of course, it is possible in a Signature® or Grand Format live auction that you may be outbid on the floor or by a Heritage Live bidder after Internet bidding closes. Bid early, as the earliest bird wins in the event of a tie bid. For more information about bidding and bid increments, please see the section labeled "Bidding Increments" elsewhere in this catalog.
11. After the auction, you will be notified of your success. It's that easy!

Current Bid: \$0 (Buyer's Premium 30%)

Congratulations, you're the current high bidder!

Your secret maximum bid of \$33.33 on Lot #1010 in Auction #1110 has been outbid.

Your secret maximum bid of \$33.33 on Lot #1010 in Auction #1110 has been outbid.

Item Information

2 HERITAGE Live!™ Bidding (participate in the Live auction via the Internet)

1. Look on each auction's homepage to verify whether that auction is "HA.com/Live Enabled." All Signature® and Grand Format auctions use the HERITAGE Live!™ system, and many feature live audio and/or video. Determine your lots of interest and maximum bids.
2. Note on the auction's homepage the session dates and times (and especially time zones!) so you can plan your participation. You actually have two methods of using HERITAGE Live!™: a) you can leave a proxy bid through this system, much like the Interactive Internet™ (we recommend you do this before the session starts), or b) you can sit in front of your computer much as the audience is sitting in the auction room during the actual auction.
3. Login at HA.com/Live.
4. Until you become experienced (and this happens quickly!) you will want to login well before your lot comes up so you can watch the activity on other lots. It is as intuitive as participating in a live auction.
5. When your lot hits the auction block, you can continue to bid live against the floor and other live bidders by simply clicking the "Bid" button; the amount you are bidding is clearly displayed on the console.

3 Mail Bidding (deposit your maximum Bid with the U.S.P.S. well before the auction starts)

Mail bidding at auction is fun and easy, but by eliminating the interactivity of our online systems, some of your bids may be outbid before you lick the stamp, and you will have no idea of your overall chances until the auction is over!

1. Look through the printed catalog, and determine your lots of interest.
2. Research their market value by checking price lists and other price guidelines.
3. Fill out your bid sheet, entering your maximum bid on each lot. Bid using whole dollar amounts only. Verify your bids, because you are responsible for any errors you make! Please consult the Bidding Increments chart in the Terms & Conditions.
4. Please fill out your bid sheet completely! We also need: a) Your name and complete address for mailing invoices and lots; b) Your telephone number if any problems or changes arise; c) Your references; if you have not established credit with Heritage, you must send a 25% deposit, or list dealers with whom you have credit established; d) Total your bid sheet; add up all bids and list that total in the box; e) Sign your bid sheet, thereby agreeing to abide by the Terms & Conditions of Auction printed in the catalog.
5. Mail early, because preference is given to the first bid received in case of a tie.
6. When bidding by mail, you frequently purchase items at less than your maximum bid. Bidding generally opens at the next published increment above the second highest mail or Internet bid previously received; if additional floor, phone, or HERITAGE Live!™ bids are made, we act as your agent, bidding in increments over any additional bid until you win the lot or are outbid. For example, if you submitted a bid of \$750, and the second highest bid was \$375, bidding would start at \$400; if no other bids were placed, you would purchase the lot for \$400.
7. You can also Fax your Bid Sheet if time is short. Use our exclusive Fax Hotline: 214-443-8425.

Telephone Bidding (when you are traveling, or do not have access to HERITAGE Live!™)

- 4 1. To participate in an auction by telephone, you must make preliminary arrangements with Client Services (Toll Free 866-835-3243) at least three days before the auction.
2. We strongly recommend that you place preliminary bids by mail or Internet if you intend to participate by telephone. On many occasions, this dual approach has reduced disappointments due to telephone (cell) problems, unexpected travel, late night sessions, and time zone differences. Keep a list of your preliminary bids, and we will help you avoid bidding against yourself.

Attend in Person (whenever possible)

- 5 Auctions are fun, and we encourage you to attend as many as possible – although our HERITAGE Live!™ system brings all of the action right to your computer screen. Auction dates and session times are printed on the title page of each catalog, and appear on the homepage of each auction at HA.com. Join us if you can!

Take **4**
Months to Pay...

Heritage will
Finance Your
Purchase

We're collectors too, and we understand that on occasion there is more to buy than there is cash. Consider Heritage's Extended Payment Plan [EPP] for your purchases totaling \$2,500 or more.

Extended Payment Plan [EPP] Conditions

- Minimum invoice total is \$2,500.
- Minimum Down Payment is 25% of the total invoice.
- A signed and returned EPP Agreement is required.
- The EPP is subject to a 3% *fully refundable* Set-up Fee (based on the total invoice amount) payable as part of the first monthly payment.
- The 3% Set-up Fee is refundable provided all monthly payments are made by eCheck, bank draft, personal check drawn on good funds, or cash; and if all such payments are made according to the EPP schedule.
- Monthly payments can be automatically processed with an eCheck, Visa, or MasterCard.
- You may take up to four equal monthly payments to pay the balance.
- Interest is calculated at only 1% per month on the unpaid balance.
- Your EPP must be kept current or additional interest may apply.
- There is no penalty for paying off early.
- Shipment will be made when final payment is received.
- All traditional auction and sales policies still apply.

There is no return privilege once you have confirmed your sale, and penalties can be incurred on cancelled invoices. To avoid additional fees, you must make your down payment within 14 days of the auction. All material purchased under the EPP will be physically secured by Heritage until paid in full.

To exercise the EPP option, please notify **Eric Thomas** at **214.409.1241** or email at **EricT@HA.com** upon receipt of your invoice.

We appreciate your business and wish you good luck with your bidding.

HERITAGE

HERITAGE AUCTION GALLERIES
